The Granby company, which operates in British Columbia, owns copper ore reserves estimated at over 22,000,000 tons, also smelter plants having a capacity of 3,000,000 pounds of copper per month, and making it the largest producer of copper in Canada.

Acadia Sugar Bonds

Within the next few days a syndicate, composed of Messrs. Graham, Sanson and Co. and A. E. Osler and Co., Toronto, will offer Acadia Sugar Refining Co., Ltd., 7 per cent. 1st mortgage serial gold bonds to the public at 100 and interest, with a bonus of 10 per cent. common stock. The bonds are a first mortgage on the Halifax plant and the cooperage plant at Moncton, N.B., valued at $4,206,000, more than twice the amount of bonds outstanding. (Replacement value over $4,800,000.) Interest and principal are payable in New York, and the investor is offered a choice of a 5-year or 10-year maturity—namely, bonds maturing from 1925 or 1930.

This is part of an issue authorized some time ago, the other part being offered in New York by Imbrie and Co.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended April 23rd:—

Mining Corporation of Canada, 345,909; O'Brien Mines, 66,075; La Rose Mines, 84,660. Total, 496,644. The total since January 1st is 4,992,082 pounds, or 2,496.04 tons.

There is Money in Sugar

The continued world-wide shortage of sugar is full of meaning for holders of sugar securities.

With demand far exceeding the supply, the prevailing high prices for sugar will continue.

Here is your opportunity to profit in sugar by investing your surplus funds in a safe 7% security, with excellent prospects of realizing a handsome profit on the common stock bonus.

Acadia Sugar Refining Company

Limited

7% 1st Mortgage Serial Gold Bonds

Interest payable January 1st, July 1st.
Principal and interest in New York funds.
Coupon Bonds of $500 and $1,000.
Maturities July 1st. 1921 to 1940.

Security	These Bonds are a first mortgage on the Halifax Plant and the cooperage plant at Moncton, valued at $4,206,000 more than twice the amount of bonds outstanding. Replacement value over $4,800,000.
Earnings	The average earnings based on an average output of sugar of 300,000 lbs. per day in 1918 and 1919 were $287,500—over twice the interest requirements The present capacity is 700,000 lbs. a day, shortly to be increased to 1,000,000 lbs. a day. Earnings thus increased in proportion.
Sinking Fund	After the payment of interest and maturities of this issue, dividends on the preference shares, also working capital, etc., to an amount not exceeding $250,000, and an amount equal to a 5% dividend on the outstanding ordinary shares, the Company agrees to set aside 25% of the balance of the annual net earnings to purchase or retire the bonds.
Management	The management of the Company will be under the supervision of Mr. B A. Oxnard and associates.
Price	100 and interest with a 10% bonus of Common Stock.

HEAVY REACTIONS ON LOCAL EXCHANGES

Most Stock Experience Declines — New York Situation Responsible—Bank Stocks Display Strength

FOLLOWING the bad break on the New York exchange on April 21st, the market became somewhat steadier, and most of the issues made substantial recoveries from their losses. During the week, however, the market was very unsettled and further declines were made, due to many disturbing influences, such as tighter money, the failure of the United States Steel directors to increase the common dividend, and the more discouraging industrial situation arising from the railroad strike. There also seemed to be some apprehension regarding labor disturbances rumored for the week end. Towards the close on April 28th, however, some of the declines were retrieved, the rally following a drop in call loans from 10 to 8 per cent. and a substantial recovery in foreign exchange.

Losses in Canadian Stocks

Brompton was the most active stock on the Montreal exchange for the week ended April 28th, furnishing sales of 14,380, as compared with 13,334 for the previous week, and for the greater part was stronger, being bid as high as 93⅛. A falling away was experienced towards the close, however, and the last sale was made at 91½. Trading in other stocks was much lighter than in the preceding week, and most issues suffered declines. In Spanish River preferred 4,330 shares changed hands, and in common, 4,080 shares. Both stocks closed weaker, with losses of 2¾ and 3 points, respectively, after having made substantial gains. National Breweries, which was strong at 50¾, weakened to 49¾ at the close, with sales for the week of 4,280. Dominion Steel and Steel of Canada were fairly active with a turnover of 3,680 and 2,020 shares, respectively. Both issues were weaker at the close. Bank stocks were particularly strong, in comparison with the rest of the market, the most prominent issues being those of banks which recently announced new stock offerings. Royal sold up 4¾ points to 227, with a further advance to 228 in the closing bid, Montreal advancing 10 points to 220 and 219 bid, and Merchants adding a point at 191.

Toronto Exchange Fairly Active

Stocks on the Toronto exchange for the week ended April 28th displayed more activity than in the preceding weeks, and for the greater part showed strength. On April 27th, however, most stocks suffered declines, presumably in sympathy with New York, and at the close the market was very weak. Brazilian led in trading again, with sales of 2,398, but was much weaker than previously, the highest point being 44 bid, as compared with a low of 45⅝ for the previous week. The closing quotation was 42⅛ bid. Atlantic Sugar followed with a turnover of 2,100 shares, its strongest point being 89 bid and its weakest 84½ at the close. Canada Steamships was not as active as in the preceding week, total sales amounting to 1,387, as against 2,330, and was also much weaker, the highest bid being 78½, as compared with 79 previously. Dominion Steel made a gain of 2½ points at 69½, but fell away considerably, closing at 67½. Steel of Canada was strong at 79 bid, having gained 2 points, but lost at the close. The activity in the shares of these two steel companies is largely accounted for by the fact that they, as well as the Canada Steamships Lines, are understood to be included in the British Empire merger, now under consideration. Canada Cement and Canada Bread were fairly active with sales of 810 and 815, respectively, both stocks showing considerable strength, but weakening at the close. In mining issues La Rose and Dome were weak, but in both cases more shares changed hands than in the previous week. Unlike the rest of the market, bank and trust and loan stocks closed strong. Dominion Bank gained ½ point for the week at 199½, while Bank of Montreal gained 7 points. Canada Permanent closed a point stronger at 176 bid.

FINANCIAL

Advertiser with 20 years' experience in investment and financial operations, with a practical knowledge of the country and cities of Western Canada, also organization, field work and values, desires connection with financial institution for investment of funds in Manitoba, Saskatchewan and Alberta. OAKVILLE, MAN., BOARD OF TRADE

A board of trade has been formed in Oakville, Man., and the following officers have been elected: President, A. A. Alford; vice-president, H. C. Christie; secretary-treasurer, B. J. Lindall. Executive—W. V. Anderson, Archie Bell, W. A. Niblock, C. L. McGregor.

Investments and the Market

International Paper Company Had Trying Year—Winnipeg Street Railway Faced With Wage Demands, Necessitating Higher Fares — Canadian Consolidated Rubber Had Record Year—Consolidated Felt Also Made Good Showing—Canadian Pacific Net Earnings for March

Toronto Ferry Co.—The city council has authorized an increase in ferry fares by adopting an amendment to the Board of Control's recommendation that the fare be fifteen cents return. Ferry fares for adults who are non-residents of the island will be four for 25 cents instead of one return trip ticket for 10 cents. This is an increase of a cent and a quarter for a single ticket. Two return tickets will be 25 cents instead of 30, but for one return trip the fare will be fifteen cents. The new rates do not affect children.

Steel Co. of Canada.—At the annual meeting of the company in Hamilton on April 26, the following officers were re-elected: Chairman of the board, C. S. Wilcox; president, Robert Hobson; vice-president, F. H. Whitton and Ross H. McMaster; secretary-treasurer, H. H. Champ; assistant treasurer, H. S. Alexander; assistant secretary, Corbett F. Whitton; directors, Cyrus A. Birge, A. G. Brown, Lloyd Harris, Hon. John Milne, Sir Edmund Osler and Sir Thomas White. In his annual report, President Hobson announced that in connection with the coke ovens a plant would be installed for the extraction of benzol.

New Brunswick Power Co.—The corporation committee of the New Brunswick legislature, has fixed the base rate valuation at $3,100,000, which is the figure the company has been holding out for. The return is 8 per cent. for all purposes, except that 1 per cent. additional is allowed for depreciation fund, contingent upon it being shown to the Public Utilities Commission that it is necessary for carrying on the company's proposed extensions.

About two months ago the Supreme Court of Appeal, in a judgment handed down at Fredericton, reduced the property valuation of the company from $2,800,000 to $2,577,665.

Winnipeg Electric Railway.—Expert evidence before the Public Utilities Commission in Winnipeg, on April 22, placed the valuation of the company, on the "reproduction cost" basis at $28,662,187.

An increase in street car fares of one and one-half cents per passenger, in addition to the increase necessary if the company is to receive a fair return on its investment, will result if the new wage demands of the street railway motormen and conductors is acceded to. This information was conveyed to the commission at the hearing on April 24, by E. Anderson, K.C., counsel for the railway company. Mr. Anderson pointed out the one and one-half cents increase was estimated on 67,000,000 passengers, whereas only 58,000,000 were carried last year. He added the company would fight the wage demands before the board of arbitration.

Canadian Consolidated Felt Co., Ltd.—The company, which is a subsidiary of the Canadian Consolidated Rubber Co., reported at the annual meeting in Montreal on April 27, net profits for the year ended December 31, 1919, of $71,977, compared with $69,804 in 1918 and $43,339 in 1917. With the balance carried forward from the previous year there remained a surplus standing at the credit of the profit and loss account at the end of 1919 of $321,916. The net sales of the twelve months were the largest in the history of the company, aggregating $1,234,029, against $1,155,192 in 1918 and $763,481 in 1917. The balance sheet division of the statement shows an increase in net working capital from $162,424 at the end of 1918 to $206,541 as at December 31 last.

Canadian Pacific Railway.—The net earnings of the company for March, 1920, show an increase of $418,720, as compared with the same month last year. This is the first time since last October that the monthly net has shown an increase when compared with the previous year. The better showing effected in the period was due almost altogether to additional traffic receipts, which at $15,715,936 were higher by $3,341,754 than in March of last year and constitute a record for any corresponding period in the road's history. Working expenses were up $2,923,033 in the month, the total of $13,758,171 constituting approximately 87 per cent. of the gross earnings, leaving the advantage in net. The following is the summarized earnings statement:—

	1920.	1919.	Increase.
Gross	$15,715,936	$12,374,182	$3,341,754
Expenses	13,758,171	10,835,137	2,923,033
Net	$ 1,957,764	$ 1,539,044	$ 418,720

Bell Telephone Co.—The city of Toronto has prepared an appeal against the increased rates granted to the company. In a memorandum the city points out that the increase in rates amounted to about $900,000 a year, and contends that the company's financial position controverts the contention that the increase was needed to meet an emergency. In the memorandum it is pointed out that the company has for 30 years paid its bond interest in full and an 8 per cent. dividend on stock, that it shows a contingency reserve fund of $3,132,436 (December, 1918), for purposes which the officials of the company did not state at the hearing, and that it showed at the same time an undivided surplus of $2,286,550. The city maintains that $2,648,766 set aside in 1918 out of a revenue of $12,227,545, is not necessary and that it is arbitrary and altogether too high a figure.

"The main ground on which the judgment of the board is based is that the company will require in 1919 about $1,500,000 above 1918 requirements to meet wage increases, and that this is the basis of the alleged emergency," says the memorandum. "Incidentally, the board have entirely overlooked the fact that about 25 per cent., or $366,000, of this annual wage increase was absorbed in 1918, and yet the company had a substantial surplus. All wage increases were in force by November 1, 1918. Therefore, it is fair to take November and December as test months on which to premise a year's operations."

Winnipeg Paint and Glass Co., Ltd.—Profits of the company for the year 1919, after making due allowance for depreciation, bad debts, etc., amounted to $158,410, being both satisfactory and encouraging. The balance at the credit of the profit and loss account amounted to $8,143, as compared with $134,928 at the end of the previous year. This large reduction is accounted for by the deduction of $200,000 for special appropriation to reserve for possible depreciation of stocks and bonds; miscellaneous real estate, etc., and further bad and doubtful accounts. In his report to shareholders, John Carr, president, said:—

"Owing to the high prices of all building supplies and shortage of labor, added to the unsettled conditions following the signing of the armistice, the early months of the year were disappointing from a sales standpoint, but as the months passed and after the serious labor strike was settled business showed a decided increase each month. During the later months our sales were equal to those of any previous period and the year ended with a total increase of more than 30 per cent. over 1918. During the past five years your directors have had many difficult problems confront them, and as quickly as possible adjustments were made to meet the conditions. Throughout the year uncollectable accounts

INVESTMENTS AND THE MARKET

(Continued from preceding page)

to the amount of $148,193.94 were written off and an appropriation of $200,000 was made from profit and loss account to provide for further contingencies."

International Paper Co.—In his report to shareholders for the year ended December 31, 1919, President P. T. Dodge said:—

"The net revenue of the company for the year from operations was $7,044,455 and from other sources $126,138, making a total revenue of $7,170,593. After proper allowance for depreciation of mill plants and other property, reserves for taxes, interest and sinking funds, there remained a net revenue of $4,121,493. From this there was paid $1,-

500,000 as the 6 per cent. dividend on the preferred stock, leaving a balance for the period of $2,621,493, which is carried to surplus.

"Throughout the year the business was conducted under the most unusual and trying conditions, and more especially in the production of newsprint paper, constituting about two-thirds of the tonnage of the company. There was produced during the year 305,708 tons of newsprint paper and 166,299 tons of other papers in great variety. With the completion of the new mill at Three Rivers, Que., the total production will be over 1,900 tons a day, nearly three times that of the nearest competitor.

"There has been a steadily increasing cost of production, due to the increasing cost of labor, material, transportation and of all other factors involved in manufacturing. In the newsprint mills the cost of labor per ton has advanced from about $8 per ton in 1913 to above $20 at the present time, a percentage increase far beyond the percentage of increase in the cost of living to the workmen. Notwithstanding this fact, it has been found necessary to make new arrangements with the various unions representing a further increase of 20 per cent. over the present wage, to take effect on May 1, 1920.

"The company operates in five states and in the Canadian provinces 15 paper mills, in addition to 7 pulp mills and 10 sawmills dealing with large timber principally for exportation."

Canadian Consolidated Rubber Co., Ltd.—At the annual meeting of the shareholders on April 27, in Montreal, a record year for the company was reported. The sales of the company's varied products grew by almost $3,500,000 in the twelve-monthly period ended December 31 last, the total of $22,162,977 being the heaviest in the history of the consolidation. After all deductions, including cost of goods, selling and other expenses, and providing for depreciation to the extent of $562,300, together with bond and other interest and dividends on the preferred stock, there remained, applicable to the common stock, a balance of $1,541,512, equal to almost 55 per cent. on the junior securities outstanding, against slightly below 50 per cent. in 1918 and approximately 35 per cent. in the preceding year.

The balance sheet shows that the total assets at the end of the year were $28,172,520, compared with $25,305,343 in the previous year. Inventories are higher at $10,285,434, against $9,228,696, while a new item, Victory loan bonds, $557,100, is included among the current assets. Property and plants have increased from $8,330,837 in 1918 to $10,047,735. Chief changes among the liabilities are a growth in reserves from $1,554,326 to $2,272,866, an increase in payables and a decrease in accruals. Total current assets at the end of the year were $12,870,226, an increase over the previous year of $11,297,469, while total current liabilities were $3,351,847, up over $2,744,721 in 1918. This reveals an extremely strong working position, surplus current assets (net working capital) amounting to $9,518,379, as against $8,552,748 in 1918, a gain of $965,631 in the year.

Reporting to shareholders for the board, Chas B. Seger, the president, points out that the sales for 1919 do not include any substantial amount of business incident to the war, and, therefore, the directors believe that the results are fairly indicative of the increase in volume of business that may reasonably be expected under peace conditions, due to the development of the country. Cost of manufacturing rose during the year, due to the increase in prices of substantially every kind of raw material used, and to the increase in prices of substantially every kind of raw material used, and to the increase in factory wages, all of which resulted in a decrease in the percentage of profits to sales. In 1919, $1,716,897 was expended for plant expansions and improvements, which amount was about equal to total net profits. The Kitchener tire plant was enlarged, the output being practically doubled. Plans for 1920 provide for further expansion and improvement of the tire plant, as well as a substantial increase in the productive capacity of the footwear plants.

RECENT FIRES

Clifford, Ont.—April 27—Barn on farm of E. Mahood, 14th concession of Howick township, was destroyed, together with grain, implements and some live stock. Cause, lantern explosion. Insurance carried, $2,000.

Liverpool, N.S.—April 25—Residence of Judge F. G. Forbes, with contents, was destroyed. Estimated loss, $25,000. Insurance on building, $7,000; on furnishings, $1,000, and on the library, $1,000.

Lethbridge, Alta.—April 20—Warehouse of the Standard Furniture Co. was destroyed. Loss is estimated at about $3,500.

London, Ont.—April 22—Wood shops of the A. B. Greer and Sons carriage factory were damaged. Loss fully covered by insurance. The London Collegiate Institute was destroyed. Estimated loss on building and equipment, $440,000. Total insurance, $60,000.

Moncton, N.B.—April 21—Store and stock of David Steeves, St. George Street, was damaged. Insurance on stock, $4,000.

Montreal, Que.—April 20—Six automobile moving vans, two piano trucks and two pianos were destroyed when fire broke out in the Baillargeon Express Co. garage, 329 Ontario Street East. Loss is estimated at about $25,000.

April 27—Factory of the St. Henri Shoe Co., Ltd., at the corner of Greene Avenue and Workman Street, was destroyed and adjoining stores were damaged. Estimated loss on factory and stock, $200,000.

Napanee, Ont.—April 26—Barns of Casey Dennison, Centre Street, were damaged. Estimated loss, between $200 and $300.

Newtonville, Ont.—April 23—Two large barns on the farm of James Lang, near the village, were destroyed. Loss is estimated at $7,000, with only a small insurance.

Peterboro, Ont.—April 26—Barn on farm of Hugh Fife, Otonabee township was destroyed. Estimated loss, $10,000. Cause, spontaneous combustion.

St. Catharines, Ont.—April 26—The Ensign Refining Co., Carlton Street, was destroyed. Estimated loss, $75,000, partially covered by insurance.

St. John, N.B.—April 27—Building extending from Prince William to Water Street, and occupied by Dearborn and Co., Ltd., wholesale grocers, was damaged. Estimated Loss, $100,000, largely covered by insurance.

Toronto, Ont.—April 25—The western wing of the Union Station was damaged to the extent of $15,000. Estimated loss on the building, $5,000; the Canada Railway News Service stock, $7,000, and the dining car supplies of the G.T.R., $3,000.

Windsor, Ont. — April 28—The International Hotel, owned jointly by R. H. Dowler and the Dominion Bank, was damaged. Loss is estimated at $30,000. The adjoining shoe store of Geo. Wilkinson was damaged to the extent of $12,000, and the contents of the United Cigar Stores, Jackson Cleaner and Dyer Co., the "Everything in Rubber" Co., the barber shop of C. A. Mounce and two shoe-shining stands were destroyed.

Winnipeg, Man.—April 25—Offices of the J. H. Ashdown warehouse were damaged. Cause, believed to have started from a match or cigarette. Loss is estimated at $200.

ADDITIONAL INFORMATION CONCERNING FIRES

Algonquin, Ont.—March 24—Barns owned by Blake Edwards were destroyed. Cause, explosion of lantern. Estimated loss on buildings, $5,000; stock, $100. Insurance carried in the Fire Insurance Co. of Canada totals $7,200.

Kitchener, Ont.—March 31—The storage sheds of the Baetz Bros. Furniture Co., Ltd., were destroyed. Cause, match igniting grass surrounding shed, carelessly dropped by passerby. Estimated loss on stock, $8,185; on buildings, $750. Total insurance, $173,500.

Canadian Concerns In Great Steel Merger

British Empire Steel Corporation will Approach United States Steel Corporation in Size — Authorized Capital is $500,000,000, of which $207,000,000 will be Issued at Once--Directors of Dominion Steel, Nova Scotia Steel, Canada Steamships and Other Companies Approve Plan

IRON and steel, coal, shipping and shipbuilding and manufacturing companies are involved in the plan for the organization of the British Empire Steel Corporation, which has been under way for some time. As previously stated in these columns, this merger has been under consideration for some time, but definite information has just been made public this week. The purpose of the organization is to utilize Canada's iron resources by the application of British capital, manufacturing facililties, and long experience in world markets. It has been hastened by the near-exhaustion of iron deposits in the United Kingdom.

The capital of the corporation is to be as follows:—

	Authorized.	To be Issued.
7% cum. pref.	$ 50,000,000	$ 37,000,000
8% cum. pref. part.	100,000,000	25,000,000
7% non-cum. pref.	150,000,000	68,000,000
Common	200,000,000	77,000,000
Total	$500,000,000	$207,000,000

Companies to be Acquired

Negotiations are still under way with a large number of companies, and the directors of the following, it is understood, have already approved of the plan:—Dominion Steel Corporation and its subsidiaries; Nova Scotia Steel and Coal Co., Ltd., and its subsidiaries; Canada Steamship Lines, Ltd., and its subsidiaries; Canada Foundries and Forgings, Ltd., and its subsidiaries; Maritime Nail Co., and its subsidiaries; Collingwood Shipbuilding Co., Ltd.; Port Arthur Shipbuilding Co., Ltd.; Halifax Shipyards, Ltd.; Davie Shipbuilding and Repairing Co., Ltd.

The terms for the acquisition of these companies, which will, of course, be submitted to the shareholders, are as follows:—

Dominion Steel Corporation.—$95 par value in 7 per cent. non-cumulative preferred stock of the new corporation, plus $40 in common stock, to each holder of $100 of the security known market wise as "iron common."

Canada Steamship Lines, Ltd.—$100 par value in 7 per cent. non-cumulative preferred stock, plus $45 in common; and,

Nova Scotia Steel and Coal Co., Ltd.—$90 par value in 7 per cent. non-cumulative stock, plus $40 in common.

Plans of the Corporation

The negotiations in Canada have been carried on by Col. W. Grant Morden, who is a Canadian, and a director of several companies, including the Collingwood Shipbuilding Co., the Murray-Kay Co., and the Richelieu and Ontario Navigation Co. In an interview on May 2nd, Col. Morden stated that the 7 per cent. cumulative preferred which figures in the division of the share capital of the corporation would be issued in exchange for the securities of a preference category now outstanding in the obligations of the various companies to be embraced in the consolidations. The 7 per cent. non-cumulative stock, in addition to the common, is to be exchangeable for the existing common shares of the enterprises affected, while the $25,000,000 of 8 per cent. cumulative and participating securities are to be issued to provide the corporation with the additional funds needed to carry out its ambitious program of expansion and improvement. The London Advisory Board of the corporation would, he said, include Sir William Beardmore, Bart., chairman of William Beardmore and Co., Glasgow; Henry Steel, chairman of the United Steel Companies of Great Britain, and the Bengal Iron and Steel Co. of India; Right Hon. Viscount Furness, chairman of the Furness group of English steel industrials; Benjamin Talbot, J.P., managing director of the Furness Companies; Major-Gen. Sir Newton Moore, G.C.M.G., M.C., formerly Prime Minister of Western Australia, director of the General Electric Co. of England, and closely associated with the Australian steel industry, and Sir Trevor Dawson, Bart., deputy chairman and managing director of Vickers, Ltd.

Col. Morden stated that in view of the anticipated earnings of the constituent companies in the current year, together with the savings to be effected through unification of control brought about by the affiliation of interests, through which operating expenses will be reduced by several millions annually, the directors of the British Empire Steel Corporation feel that they will be quite justified in placing the common stock of the enterprise on a 5 per cent. dividend basis before the end of 1920.

Present Executives to be Retained

The board of directors will include many of the directors of the companies being acquired. It is anticipated that Roy M. Wolvin, president of the Dominion Steel Corporation, will be the first chief executive of the British Empire Steel Corporation, and that D. H. McDougall, president of the Nova Scotia Steel and Coal Co., will also occupy an important position. In an interview on May 1st, Mr. Wolvin said:—"I am tremendously pleased with the result of the negotiations. It means that we are to have at our disposal plenty of capital to develop our plants and properties in Nova Scotia and at Sydney particularly. In the next two years we propose to put our works there in a condition which will render them second to none in the world. With the splendid labor we have in Nova Scotia we will then be able to effect a production equal to that in any steel plant existing. The development of our program, however, will require some time, and it may be a year or two before the effects of the improvements and extensions are seen, but when these are realized our employees will share in the fullest measure with the prosperity enjoyed by reason of the increased capital Colonel Morden and his English associates have brought into the enterprise." Mr. Wolvin said that it was the intention of the company to formulate a plan by which the employees at Sydney and elsewhere would participate generously in the fortunes of the undertaking and he looked for the closest co-operation between the executive and its staff of workers in the working out of the great destiny ahead of the company.

D. H. McDougall, president of the Scotia enterprise, who has been close to the interests behind the ambitiouus consolidation, stated that successful culmination of the negotiations was of incalculable importance to New Glasgow and to the Dominion at large. "Hereafter there will be no conflict of interests as acted as a deterrent to the steel and coal industries in the past," he said. "All departments will now be dove-tailed in one harmonious organization, and the effect will be of tremendous significance to both the enterprise and its employees, who will share in the fullest measure possible in the results obtained. We have the splendid coal and iron resources of Nova Scotia to develop and now that we have the capital means to assist us, the future for our workers and shareholders alike is very bright.

Parliament Discusses It

The proposed merger came up for discussion in the House of Commons on May 4th. Sir George Foster stated that the British Empire Steel Corporation had not yet secured a charter, but that their application for one was being carefully considered by the government. Capital was necessary in this country, he asserted, and objections to the merger should not be raised unless on good grounds. Several members of the House spoke againt it, however, although it was admitted that the capitalization was not out of proportion to the assets. It was found necessary to control the corporation, said the minister, and if the government had not the power to do so they could go to parliament for it. R. L. Richardson, Unionist member for Springfield, Man.; Hon. Michael Clark, of Red Deer, and E. W. Nesbitt, of South Oxford, condemned the practice of issuing watered stock. Mr. Richardson said that although the application called for a paid-up capital of $200,000,000, notice was also given that this would be increased to $500,000,000, and possibly $1,000,000,000. "If they secure all the stock for $400,000,000 and are allowed to capitalize that for $500,000,000, then the public will be expected to pay the dividends on the $500,000,000 and not on the actual amount of value involved in the property," he said. "The great curse of high finance in this country has been the over-capitalization. People put tens of millions of dollars of wind and water into an enterprise and the public has been obliged to pay dividends on this vast amount."

Other members pointed out that huge combinations were necessary for success in some industries to-day. Hon. E. Bristol, of Toronto, urged that the proposition was sound, and J. A. Currie, of North Simcoe, and D. D. McKenzie, of North Cape Breton, said that capital in large quantities was necessary for the development of the industry in Canada.

The subject also came up in the Nova Scotia legislature on May 3rd, when Hon. E. H. Armstrong introduced a bill providing for the merger of the Nova Scotia Steel and Coal Co., Ltd., and the Dominion Steel Corporation, Ltd., into the British Empire Steel Corporation, Ltd. The bill states that the two first-named companies may respectively enter into agreements with the Empire Corporation for the acquisition by it of all their outstanding common shares.

Eleven cheques, totalling $550,000, have been issued by the Manitoba government under the Rural Credits Act this year, it was officially announced on April 26th. The government is taking over some of the loans made by the banks during the earlier period of the rural credits when the banks advanced the money.

INSURANCE DEVELOPMENTS IN BRITISH COLUMBIA

The Conflagration Danger, and the Preventive Steps Being Taken—Attempt at State Insurance Was Abortive—Life and Fire Results for 1919 Should be Good

By R. W. Douglas,
Douglas, Mackay and Company, Vancouver

In a recent issue you stated that it is reported that the fire insurance companies in this province have put forward a fire marshal law for consideration of the legislature, the cost to be provided for by a tax not exceeding one-third of one per cent. of the companies' fire premium income within the province. In case this information should cause amazement and concern amongst the head offices in the east, we can assure you that the report, as you printed it, is quite erroneous. We have in this province at the present time a very capable official, who occupies the position, lately created by the government, of fire prevention officer. The laws on the statute book are very clear and stringent in the matter of carelessness which may cause fires, but the enactment of the law is not always enforced, and it was thought that the title of fire marshal should be given to the official in question, and he be clothed with the authority to act under the statutes now in vogue, but which seem to be overlooked or ignored by the various officials throughout the province, who appear to be disinclined to assume the task.

As the fire insurance companies now pay a tax of 2 per cent. on their income to the local government—which represented a contribution of $81,740 on the income of 1918—and the only benefit they obtain is the annual issue of the government returns, the insurance interests here, while anxious to help the department to see the Fire Marshals' Act observed, did not see why they should be taxed to a further extent, instead of advocating the introduction of the measure, they protested against it in no uncertain way, with the result that the suggested bill was withdrawn.

Officials Act as Fire Marshals

It may be of interest to point out that the duties of fire marshal are generally assumed by the chief of the fire departments, where such exist, and in the cities of Vancouver, Victoria, New Westminster, Nelson and other towns. with fully-equipped fire protection, there is not any marked grievance, although, even in such places, it is sometimes very difficult, through defective by-laws and undue influence, to effect necessary remedies, but there is a very perceptible weakness in villages and municipalities, where the duty of fire marshal is relegated to the mayor or reeve. If a glaring case of carelessness comes to the notice of such an official, while he is clothed with the authority of the law, it is not always wise or politic for him to act in the matter, as it is obvious that in a small community a zealous and painstaking official does not always get due reward in seeking to improve conditions which may cause inconvenience or involve his fellow-villager in some little expense. Consequently, all over this province, especially in the unprotected places we have referred to, conditions (from a fire insurance standpoint) are not of the best. Such villages, as your readers doubtless know, are generally of frame construction, with a commerical area of one or two blocks. The rear of these ranges is, as a rule, dirty and ill-kept. Boxes, packing-crates, paper, and the thousand and one things pertaining to the discard of the country store are littered around, and often the whole business area of a place is jeopardized by conditions which are a disgrace and a reflection on the common sense of the community.

In a country of vast spaces we crowd our erections in a congested group and wonder why insurance rates are so high. It is, of course, too late now to amend the by-laws, where such exist, and only a conflagration will secure improvement. But what we require is sanity in laying out our villages and towns, and if the Town Planning Commission, very academic in its theories so far, can only teach public opinion not to ignore the simple ethics in the formation of town sites, the future growth of our province may be on wiser and better lines.

Buildings Might be Separated

We know, of course, that the reasons advanced for this congestion is the real estate argument and the price of lots, but instead of having one range of buildings of, say, two stories—at one corner a hotel (now partly vacant); next, a hardware store, with oils, excelsior (gasoline in a small, wooden building at rear), grocery stock, candy store, hay and feed store, and, say, a clothing store, owned and operated by a Mr. Epstein—why could not each building be separate and distinct—or, at least, have intervening spaces—even a good "break" in the form of a brick wall would be an improvement? The public apathy in these matters is appalling.

If a defective sewer exists in front of our dwelling or an objectionable stable is erected near our bungalow, our protest is at once heard, and we approach the seats of the mighty and demand redress, but we go happily along, with our lives and property daily in jeopardy from the lurking possibilities in crowded basements, congested back yards, careless storage of gasoline and other inflammable commodities, jerry building and defective electric wiring, and the many other causes which contribute to the fire waste which place Canada's fire loss as the highest per capita of any country in the world. The fire loss record of this province is $5 per capita, and while, of course, this high figure is due to our sparse population, it is a record which should bid us pause.

Vancouver city is no worse, and, we fear, no better, than other growing cities, although the fire underwriters and the fire prevention officer, before referred to, in their daily round discover conditions existing which are a menace and a disgrace. The long range of waterfront, with its frame warehouses and docks, sawmills, boat-building workshops, abattoirs, cold storage plants, sugar refinery, etc., with no patrol boats to fight a fire from the water side, is cut off from the city protection in great part by the main line of the Canadian Pacific Railway, more or less congested with cars.

Vancouver Has Been Fortunate

False Creek—but recently a natural fire-break, dividing the city north and south—no longer can be so regarded, as the formation of Industrial Island (a monument to enterprise and business development) brings the north and south shores perilously near, and increases the conflagration possibilities in the physical characteristics of this terminal city. Vancouver has been comparatively free from serious fires, and, saving the outbreak at Messrs. Coughlan's shipyards and the loss of the British Columbia Fir and Cedar Co., the record here for the past two years has been exceptionally good.

The city of Vancouver is now being re-rated under the most up-to-date and approved system of schedule rating; the old and defective building is penalized and the modern and improved structure gets due recognition. Some very decided anomalies have come to light under the scrutiny of careful and minute inspection, as the previous system of rating had been of a nondescript character and the combination of a number of schedules, more or less obsolete. The owner or occupant of the building where dangerous conditions exist cannot understand why the dirty and crowded basement, the defective furnace, with its wornout piping, the unprotected stove and defective electric installation, the rear lanes, crowded with inflammable material, and all the weak points in the armor of defence against the fire fiend, should be taxed so much per cent., and here and there a loud protest is being made against the so-called arbitrary actions of the underwriters.

The health officer and the sanitary department of a city get their mede of praise for their eternal vigilance as guardians of the physical well-being of the community. The police we applaud in their maintenance of law and order, but the Board of Underwriters, who seek to improve conditions in our midst, and prevent the birth of "the little fire, which, being suffered, rivers cannot quench," are despised and rejected of men. We are all optimists in this fair city, and no Jeremiah can be found lamenting in Stanley Park or on Capilano Heights, but it is possible that, while we proudly see our city grow and have visions of our future greatness as a metropolis of maritime importance, we have ceased to remember the conflagrations at St. John, N.B., Montreal, Chelsea, Toronto, Baltimore, Chicago and San Francisco, and may forget to see to it that the destructive element which is ever lurking in our midst is strangled as it sleeps.

Under the auspices of the provincial government, the branch of the Fire Prevention League, in affiliation with the Dominion League, has been formed here, and chapters are being estabilshed throughout the province, with representative citizens at each point, to whom will be delegated the duty of awakening the public conscience to the dangers referred to, and it is hoped that this crusade of education will create due vigilance, and the interest of the public be aroused and maintained in a matter so vital to the welfare of the individual and the state.

The State Insurance Movement

The voice of the reformer is abroad in the land, and one of the leaders in the prohibition movement, not content with the immortality achieved in this direction, being a member of parliament, had suggested launching a bill for state fire insurance. The business seems to be the most popular one for frequent attack, but it is understood that saner and wiser politicians at Victoria prevailed on the member in question to withdraw his suggested measure. Of all the provinces, British Columbia is the least able to venture on the stormy waters of state insurance. No province is more rich in potentialities, but in none is capital more urgently needed to develop the latent resources in mines, minerals, timber, and in the harvest of the sea. Why should a province, whose first necessity is population, divert its energy to establish freakish and experimental legislation?

The province must go to the money markets for help to finance its railway development and the manifold needs of a great, undeveloped country, and it will be a deterrent to investors if our statesmen at Victoria place on the statute book experimental legislation. State health insurance, a women's maternity fund, nursing endowments and other humanitarian schemes are now suggested. A commission appointed by the government has been going over the province, holding meetings of so-called enquiry, but it has been very apparent that the chairman of the commission, Mr. Winn, who is also chairman of the Workmen's Compensation Board of the province, is strongly predisposed in favor of state insurance (health) and the other beneficent schemes by which Birtish Columbia will be a Utopia to the "wage slaves."

Good Results Expected for 1919

The fire returns from the various companies for the year 1919 have now been filed with the government, but have not yet been published. It may be fairly estimated that the income in this province for the year will show an increase of approximately 10 per cent., with a favorable loss ratio.

In life business a steady increase will be reported for 1919. Group insurance is being actively pushed here by certain companies and is finding favor with employers of labor.

A rapid advance will be recorded in automobile insurance, which has grown greatly in this province. While in the fire and theft, and property damage and liability departments the companies have had a moderate profit, the results from writing collision have not been productive of good results.

The British Columbia Automobile Association is making headway, and has now a membership of fifty-four companies. This body is in close affiliation with the Canadian Automobile Association, and, doubtless, ere long a basis of rates will be formulated over the whole Dominion, which, while possibly modified in its application to this province, will be in harmony with the rates in vogue elsewhere.

NEW HUDSON'S BAY BUILDING FOR WINNIPEG

Work May be Started This Year—Rural Credit Societies' Loan $643,000—New Provincial School in Winnipeg

(Special to *The Monetary Times.*)

Winnipeg, May 6, 1920.

IT is announced by James Stewart, chairman of the Canadian Wheat Board, that the board estimates the value of the "participation certificates" will be at least 40 cents per bushel.

Work on the new Hudson's Bay store on Portage Avenue will probably be commenced this season. The estimated cost is $5,000,000.

Hon. C. R. Mitchell, provincial treasurer of Alberta, announces at Edmonton the sale by tender to the Dominion Securities Corporation and associates of $2,000,000 province of Alberta three-year 6 per cent. bonds, at a price of 101.574 in Canadian funds, to cost the province approximately $5.40 per cent. These bonds are payable in Canada and New York, and the sale is considered very satisfactory. The proceeds of the issue will be devoted exclusively to provincial telephone construction.

Approximately $2,000,000 was loaned up to April 30 to farmers in Manitoba through the 52 rural credit societies now in active operation. Since the new system of financing went into effect early in April, 1,213 cheques have been sent out, aggregating $643,000. The authorized capital of the 52 societies is $1,040,000, of this amount $620,000 has been fully paid up, and approximately 4,000 farmers are enrolled as members of the societies.

Specifications and plans having been completed, the provincial department of public works next week will call for tenders for the construction of a $1,000,000 home for the deaf and dumb school here.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅞	98
United Kingdom 5½% (Nov. 1, 1921) ..	95	95¼
United Kingdom 5½% (Nov. 1, 1922) ..	93⅜	93¾
United Kingdom 5½% (Aug. 1, 1929) ..	90¾	91¼
United Kingdom 5½% (Feb. 1, 1937) ..	85½	86
French Cities 6% (Nov. 1, 1934)	87	87½
City of Paris 6% (Oct. 15, 1921)	89¼	89¾
Dominion of Canada 5½% (Aug. 1, 1921)	96⅜	97
Dominion of Canada 5½% (Aug. 1, 1929)	89⅞	90¾
Japanese Govt. 4% (Jan. 1, 1931)	58½	59
Japanese Govt. 1st 4½% (Feb. 15, 1925)	75½	76
Japanese Govt. 2nd 4½% (July 10, 1925)	74½	75

OVERSEAS SECURITIES CORPORATION

Formation of the Overseas Securities Corporation, with an authorized capitalization of $5,000,000, to place foreign securities in the American market, by Canadian and New York City financiers, was announced on April 27. It aims to take advantage of the opportunity provided by the great depreciation in foreign exchange. Frederick T. Walker, agent of the Royal Bank of Canada, New York, is a director, being connected only as an individual member of the corporation. The principal function will be the investment of its capital in securities of foreign countries, or of industries or corporations located in foreign countries; participating in financing or refinancing of business enterprises or corporations in foreign countries; engaging in such other financial operations, primarily abroad, as may from time to time commend themselves to the judgment of the directors. Capitalization consists of 5,000 shares of common stock, par value $1,000, and 10,000 managers' shares, no par value.

VICTORIA RAILWAY AND DOCK FACILITIES

Canadian National Railway Extending to North of Island —Drydock Plans Now Completed

(Special to *The Monetary Times.*)

Victoria, May 6th, 1920.

INDUSTRIAL and business conditions in Victoria are quite good this spring, and the beauties of the capital city of British Columbia just now are unsurpassed by any city in Canada. One prominent wholesaler told *The Monetary Times* that they had not had a failure on their books in the last five years. J. L. Beckwith, president of the Victoria Board of Trade and former mayor, and for many years a resident of Victoria, was very optimistic about the future, especially regarding the shipbuilding industry, which is taking on fresh vigor on account of the people of Victoria backing a local industry, which will keep a large pay-roll in operation. The mining industry is also taking on larger proportions than for many years past. In fact, Victoria is on the eve of an era of industrial activity. The success which has attended the inauguration of the local shipbuilding industry has meant a stimulus to the whole community.

Railway Extensions

The Canadian National Railways are putting on new men to assist in the early completion of that line toward the north end of the island. The C.P.R. are extending their line on the west coast. This will mean the opening up of great productive areas and larger water-power. The Songhees Reserve industrial area, consisting of 117 acres on the inner harbor, is being utilized now as the freight railway terminals connecting with the mainland by car ferry, and are ready for utilization as factory sites. Within the next few weeks preliminary work will commence on the plant which it is proposed to estabilsh here for the manufacture of wool into tweeds, homespuns, blankets, etc. Local and island interests are using every endeavor to promote the establishment of a steel plant at this point, which will utilize the iron ores in this immediate vicinity. The drydock plans and specifications for which have been completed and accepted at Ottawa, and work upon which has already started, will further enhance the value of Greater Victoria as one of the greatest shipping points on the Pacific Coast.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of April:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
April 7	$ 3,617,000	$ 2,921,000	+ $ 696,000
April 14	3,635,000	2,868,000	+ 767,000
April 21	3,624,000	3,037,000	+ 587,000
April 30	4,710,000	3,954,000	+ 756,000
	$15,586,000	$12,780,000	+ $2,806,000

Grand Trunk Railway.

April 7	$1,469,333	$1,274,553	+ $ 194,780
April 14	1,120,792	1,263,483	— 142,691
April 21	1,205,645	1,248,310	— 42,665
April 30	1,682,319	1,571,191	+ 111,128
	$5,478,089	$5,357,537	+ $ 120,547

Canadian National Railways.

April 7	$1,834,118	$1,457,144	+ $ 376,974
April 14	1,818,934	1,590,159	+ 228,775
April 21	1,805,785	1,568,067	+ 237,718
April 30	2,478,641	2,321,065	+ $ 157,576
	$7,937,478	$6,936,435	+ $1,001,043

BANKS MUST CURTAIL CREDIT

BY raising the discount rate from six to seven per cent. on April 15, the Bank of England extended its support to the feeling that the banks must now exert their influence towards restricting the speculation which is so prevalent. Leading bankers in Canada have intimated from time to time during the past few months that money would not be lent so freely this year; more caution is being exercised as the months go by, and seven per cent. is being charged on call loans in many cases. The rate for call money, however, is not the controlling factor in Canada to the extent to which it is in New York, because the whole market here is not a speculative one. The influence of the banks makes itself felt rather in the degree of pressure which is brought to bear upon customers.

The action of the Bank of England was not, of course, entirely voluntary, but was partly the result of difficulty in coping with the demands. Britain's policy of meeting her obligations abroad naturally places a strain upon her gold reserves, and sound banking policy, therefore, required a limitation of credit. Nevertheless, the banks are leaning distinctly towards conservatism. In Canada they are pointing out the danger of customers acquiring large stocks at inflated prices, and of making capital extensions which might prove an excessive burden when business slackens.

A bank which accompanied a period of rising prices and prosperity up to its very climax would not be a safe financial institution, for such crises are invariably strewn with business failures and with debts which cannot be collected. During a time of expansion such as we are experiencing at present our financial institutions must throw their weight on the conservative side, just as in times of depression they must be optimistic. That one industry in particular will be discriminated against in this process of curtailing credit is not probable. The "Grain Growers Guide," complains that "this attitude on the part of the bank amounts to a decision that the development of agriculture, Canada's premier industry, is to be retarded, and large areas of virgin land which ought to be brought under cultivation will lie idle. Some explanation is due from the banks as to why this should be, particularly at a time when the world needs increased supplies and every national consideration demands that every man and every acre should produce to the utmost. The banks are the custodians of the people's money, and they are under an obligation to employ the funds entrusted to them in the interest of the people. No reasonable person expects the banks to lend money to the farmers or anyone else, unless they can furnish proper security, but reports which have reached us indicate that the curtailment of credit to farmers is general and not confined to cases where insufficient security is offered."

Agriculture, however, will not be exempt from a business depression, and a general policy of contraction on the part of the banks, in anticipation of such a depression, must include a tightening of money to farmers. That there is no discrimination is evident from the fact that similar complaints are being made by merchants and by many manufacturers who are anxious to expand their business at risks which the banks do not care to assume.

DOES SAFETY EDUCATION PAY?

DURING the seven years which have elapsed since the Ontario Safety League began its campaign, the population of Toronto has increased from 410,000 to 499,000, while the number of violent deaths (except murder, suicide, etc.) have decreased. Taking 1912 as a basis of calculation, a total of 333 might have been expected in 1919, whereas the actual number was 241. A comparative table prepared by the league is as follows:—

Year	Population	Deaths	Expected totals
1912	410,000	275	...
1913	446,000	291	300
1914	470,000	241	315
1915	464,000	191	311
1916	460,000	207	308
1917	474,000	229	316
1918	490,000	248	329
1919	499,000	241	333

HIGHER RAILWAY RATES AGAIN URGED

HEADS of the Canadian railways are naturally the first to present the case for higher rates. But more is involved than the mere question of the shareholders' return. It is essential to Canadian industry that the rates should be sufficient to maintain service, and an increase should not be refused merely because the Canadian Pacific might make a little more profit. E. W. Beatty, president of the Canadian Pacific, brought up the rate question at the company's annual meeting held in Montreal on May 5. He pointed out that while the gross earnings of the company are the largest in its history, the net earnings showed decreases on previous years because of the rise in the cost of wages and material. He said that the relation between earnings and expenses must receive careful attention. The extent of rate increases fixed by the Dominion Railway Commission had not equalled the increased costs forced on all railway companies.

Mr. Beatty went on to point out that owing to the parity of conditions existing between the United States and Canada, Canadian roads during the war had to accept high wage scales made effective under the government control of the American roads, and had to continue to operate under similar tariff tolls. These tariffs were entirely inadequate, as results in the United States showed. Recent legislation has assured American carriers of rates which will return a fixed percentage on the value of the undertakings used in the public service. No doubt the necessity for rate adjustments would be given earnest consideration by both the Canadian government and the Dominion Railway Board, Mr. Beatty stated.

Mr. Beatty contended further that freight rate adjustments were amply warranted both on the ground of value of service rendered by the carriers and the cost to them of performing such services. The net earnings of the company for 1919, represented a return of only four per cent. on the actual capital invested in the railway itself. Any company conducting so extensive an enterprise must have reasonable surpluses, yet with the C.P.R., the surplus, after deduction of fixed charges and dividends, amounted to less than half of one per cent. of the gross earnings.

The revenues, therefore, were obviously inadequate. The profits earned by a company's efficiency and the extent and character of its equipment and facilities should not be confiscated, nor should revenues accruing to one company from service well performed be taken to supplement the revenue of a competitor less successful. The theory that the rates be not increased, but that deficits be met from the general revenue of the company was economically unsound and discriminating against the public in favor of those railway facilities.

Mr. Beatty closed with a prophecy that immigration to Canada was anticipated on a large scale, and the expression of the company's directors' faith in the future growth and prosperity of Canada.

AMENDMENT TO ONTARIO INSURANCE ACT

STRICTER regulations to govern the issue of agents' licenses are contained in an amendment to the Ontario Insurance Act, which has just been introduced into the legislature. It provides that "no agent shall act for any company in Ontario unless he has fully complied with the provisions of this section, and has secured an agent's certificate of authority from the superintendent of insurance to do the class of insurance which that company is licensed or registered to do in the province."

It also provides for separate licenses for different classes of insurance, as follows: "An agent's certificate of authority may be issued for any one or more of the following divisions of insurance business, viz.: (a) Life insurance; (b) fire insurance; (c) casualty insurance. The superintendent may make regulations specifying the classes of insurance which may be included in these divisions and may include any class of insurance in two or more of the said divisions if in his opinion the character of the business so requires."

Another clause provides that "an agent having received a certificate of authority may act as agent for any company licensed or registered in Ontario to do the class of business to which the said certificate of authority applies during the term of such certificate."

Section 78i of the Insurance Act, 1916, is to be repealed, and the following substituted:—

"A friendly society incorporated under the law of the province of Ontario shall not reinsure or amalgamate with or accept the transfer of membership or funds of any other society registered according to the provisions of this act unless such reinsurance amalgamation or transfer is evidenced by a contract in writing setting out in full the terms and conditions of such reinsurance, amalgamation or transfer, and such a sworn statement of the financial condition of each of such societies by its principal officers and a certificate of such officers duly verified under oath that such reinsurance, amalgamation or transfer has been approved by a vote of two thirds of the members of the supreme legislative or governing body of each of said societies present or duly represented at a meeting regularly called.

"The superintendent may require such additional actuarial or other reports as he may deem necessary, which reports shall be prepared at the expense of the societies.

"If, in his opinion such financial statments are correct and reports satisfactory and the contract in conformity with the provisions of this subsection and such reinsurance, amalgamation or transfer is just, and equitable to the members of the societies and that the interests of such members are properly protected by the contract, he may approve such reinsurance, amalgamation or transfer and issue his certificate to that effect and thereupon such contract shall be of full force and effect and binding upon the societies which are parties thereto and all members thereof.

"If one of the contracting societies is a friendly society not incorporated under the law of the province of Ontario the Superintendent shall not issue his certificate until it has been established to his satisfaction that such society has fully complied with the requirements of the law of the legislative authority under which the society was incorporated; provided that a certificate of the supervising insurance official appointed by such legislative authority that such society has fully complied with the requirements of the law of the said authority shall be sufficient evidence to the Superintendent of that fact."

WHEAT GROWERS DO WELL THIS YEAR

ACCORDING to an announcement made on Wednesday by James Stewart, chairman of the Canadian Wheat Board, Canadian farmers will receive about forty cents a bushel for their 1919 wheat crop, in addition to the $2.15 guaranteed by the government. This means that they get $2.55 for their crop, compared with the United States average of $2.14. The official announcement of the board says:—

"The Canadian Wheat Board feels that some idea should be given as to the probable value of the participation certificates issued by the board. The wheat has not all been marketed by the farmers, and it is indeed difficult to estimate closely the quantity remaining in their hands to be marketed before the new crop. Other factors enter into the situation, such as the values prevailing when and as the wheat is marketed, as well as the quantity required for domestic use before the new crop, a late harvest making a difference of several million bushels.

"Notwithstanding this, the board estimates that it should be able to pay at least 40 cents per bushel against the wheat represented by the participation certificates. At the conclusion of the present season complete returns of the year's operations will be made known and a final report as to the full value of the participation certificates will be issued."

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. A. L. Porter has been made inspector of public trustees in Ontario.

Mr. Edward E. Reid

Mr. J. Stanley Lovell

Mr. Edward E. Reid, the new general manager of the London Life Insurance Company, has risen rapidly in the insurance field in Canada. He was born in 1872 at London, Ont., and graduated in mathematics from Toronto University in 1894. Entering the service of the London Life that year, he pursued the study of insurance and became an Associate of the Institute of Actuaries, and of the Actuarial Society of America. In 1903 Mr. Reid was appointed actuary of the London Life, and in 1905 he was made assistant manager, taking on the duties of secretary as well in 1918. In the position of general manager he succeeds Mr. J. G. Richter, who has been made vice-president. **Mr. J. Stanley Lovell**, formerly assistant secretary, succeeds Mr. Reid in the position of secretary. The work of these officers has contributed much to the success of the London Life. In addition to its ordinary business, this company has built up a substantial industrial life insurance business in Canada. The board of directors is as follows: Honorary president, John McClary; president, A. O. Jeffery, K.C.; vice-presidents, W. M. Spencer and John G. Richter; George M. Reid, J. E. Jeffery, A. M. Smart, Thomas W. Baker, H. S. Blackburn, and William Goodman. These are all London men, and the position maintained by the company speaks well for local enterprise. The 1919 report showed a gain of $16,577,208 in business in force.

Mr. S. D. Flaxman has resigned his position as chief clerk of the Saskatchewan department of municipal affairs.

Mr. J. E. Featherstonhaugh, who has been secretary of the Murray-Kay Company, for several years, has severed his connection with the firm.

Mr. W. H. R. Emmerson, secretary of the London and Scottish Assurance Corporation, Limited, Montreal, expects to sail for England next week.

Mr. W. R. Davidson, general superintendent of the western lines, Grand Trunk Railway System, Montreal, has been transferred to the Chicago office.

Mr. R. J. Mahony has resigned from the staff of the Montreal office of the Employers' Liability Assurance Corporation, and is returning to Ontario.

Hon. Chas. R. Mitchell, treasurer of Alberta, has been appointed minister of Municipal Affairs and Public Health for Alberta to succeed the late Hon. A. G. Mackay.

Mr. Hedley C. Wright has resigned the position of assistant manager and secretary of the General Accident Assurance Company of Canada, and has been appointed assistant to the manager for Canada of the London Guarantee and Accident Company.

Mr. F. J. Penfold has been appointed assistant sales manager of the investment house of Nesbitt, Thomson and Company, Limited. He has been associated with the firm for several years, and will have special supervision over the cities of Ottawa and Quebec, also over the selling organization in the northern part of New York state.

Mr. H. W. Crossin, who has for some years been Toronto fire manager of the Employers' Liability Assurance Corporation, Limited, and who was formerly chief assistant to the secretary of the Canadian Fire Underwriters' Association, has joined Armstrong, Dewitt, Limited. The firm will now be known as Armstrong, Dewitt and Crossin, Ltd.

Mr. W. M. Neal has been appointed assistant general superintendent of the Canadian Pacific Railway for the Ontario district. He succeeds Mr. J. K. Savage, who has been promoted to be general superintendent for the Quebec district. Mr. Neal began his career with the C.P.R. in 1902 as clerk in the office of the superintendent at Toronto. In 1904, he was transferred to Winnipeg, and in 1915 he was moved to Montreal. In 1916, he became assistant district superintendent at Montreal, and in 1917 he was transferred to the Canadian Railway Association for national defence. In 1920, he was assistant general superintendent for the C.P.R. at Montreal, and from the latter post Mr. Neal goes to his new position.

OBITUARIES

Mr. Charles A. Gagnon, died in Montreal, on April 29th. He was inspector for the defunct Banque du Peuple for some time in Montreal.

Mr. Frank Robson, vice-president of the Robson Leather Company, died in Oshawa on May 2nd. The late Mr. Robson was born in Oshawa in 1870.

Mr. John A. Jackson died in Toronto on May 1st. The late Mr. Jackson was born in Victoria county, Eldon township, in 1842, and served as county clerk and treasurer there for a number of years.

Mr. Robt. Junkin, died in Toronto on May 5th. The late Mr. Junkin was born in Victoria county in 1855. For several years he had been connected with the Manufacturers' Life Insurance Company, and since 1918 was one of its directors.

Sir Malachy B. Daly, K.C., M.G., former lieutenant-governor of Nova Scotia, died on April 26th, in Halifax. The late Mr. Daly was born in Marchmont, Que., in 1836.

Mr. J. E. Duval, general superintendent of car service, Grand Trunk Railway, died in Montreal, April 28th. He entered transportation service in 1884 at Coteau Landing, Que., as agent and operator on the Canada Atlantic Railway. In 1902 he left this service to take up the position of chief inspector with the Board of Railway Commissioners.

OTTAWA MARKED TIME THIS WEEK

Discussed Steel Merger, Sessional Indemnities and Grand Trunk Bill—American Visitors Look Into Pulp and Paper Situation

(Special to *The Monetary Times.*)

Ottawa, May 6th, 1920.

WHAT has happened to the budget? This is the question everyone is asking in Ottawa, and which no one can answer. Ordinarily, the budget is brought down comparatively early in the session, and is usually disposed of before the end of the fiscal year. Several weeks ago there were unofficial intimations that the budget, at the latest, would be introduced by May 1st; but May Day is here and gone and the budget is still on the tapis.

Absentee Leadership Not a Success

Naturally, there are all varieties of rumors. Most of them can be discounted. The chief cause of the delay arises from the peculiar situation which Union government has created. There is a cabinet composed of two wings, neither of which is quite sure of the other. Sir Robert Borden, up to the present, has been the link binding the two elements. Liberal and Conservative cabinet ministers have had equal confidence in his integrity, sincerity and spirit of fair play. But Sir Robert has been away this session, and absentee treatment is not proving successful. On ordinary questions it is not so difficult for the cabinet to reach agreement, but the tariff and taxation are, of course, the crux of most Canadian political differences. Upon an agreement as to a tariff policy rests the future of Unionism. There has naturally been a tendency to go slow and to watch every step. Sir Robert, as the leader and the man who will have to cement the two wings, has had to be frequently consulted. Hon. J. A. Calder made the first trip south, and Hon. J. D. Reid was the cabinet messenger last week with what is believed to be the final draft of the budget proposals.

It is said now that the budget will be brought down next Thursday, and that Sir Robert will be back by May 15th, in time to take part in the debate. It is stated that he is greatly improved in health, but no one in the capital, who was conversant with the state of his health before he left for his long holiday, seriously believes that he can, with justice to himself or to his party, take hold of the reins of government again with vigor. It is believed that he will remain at his post until the session is over. He will help formulate a permanent policy for the party, and will then retire to make way for a new leader. This is the impression in the capital, but politics are in such a confused state at the present time, it is unwise to make any definite predictions.

Steel Merger Under Fire

Col. Grant Morden's new British Empire steel merger was under fire in the Commons this week. There is no doubt that there is considerable suspicion as to the merger and a Missouri feeling. Members are afraid that it is some great stock jobbing scheme. They will have to be convinced that there is no huge watered stock promotion job. If they are convinced, then all will be smooth sailing, as the idea of a great Imperial corporation to compete in the world's markets against American concerns of equal magnitude appeals to the imagination and to the spirit of patriotism.

The Pulp and Paper Question

A group of American engineers and politicians from the Western States, led by Senator Walsh, of Montana, have been in Ottawa the past week attending sessions of the International Waterways Commission in regard to reclamation schemes along the Alberta and Montana boundaries. While here they have been garnering some information in regard to the pulp and paper question, which has rather opened their eyes. They are of the opinion that the appointment of a commission to come to Canada to study the question, as proposed by Senator Underwood before the Congressional Committee, would be a good thing for both Canada and the States. In the first place, they were quite astonished to learn that the Dominion government has nothing to do with the embargo on pulp wood cut on Canadian Crown lands. They were surprised to discover that these were provincial regulations, which, they admitted, put an entirely new face on the situation. They were also impressed with the grievance of Canadian publications forced to pay enormous prices for newsprint through the competition of the great American papers.

The Grand Trunk bill reached its second reading in the senate on April 29th, and is still one of the main subjects under discussion here. There is also a strong movement in favor of increasing the members' sessional indemnities above the present figure of $2,500. Some members urge that it be made $5,000, but that certain privileges, such as stationery, franking privileges and stenographic services, be abolished. The pensions committee has now completed the receiving of evidence, and its recommendations are expected shortly.

Trade with West Indies

Sir George Foster announced in the House on April 30th that the trade conference between Canada and the British West Indies had been arranged to open in Ottawa on May 31st. The subjects under discussion would be: (a) Communication, transport and cable; (b) trade relations. The object of the conference would be to enlarge the volume of trade between Canada and the West Indies by an extension of the existing preference. Sir George explained that the preferential tariff agreement reached at the conference of 1912 would expire in 1922. At the coming conference all the British West Indies would be represented, including Jamaica, Bermuda, the Bahamas, British Honduras and Trinidad.

WANT TRAFFIC DIVERTED TO CANADA

Maritime Manufacturers Also Ask that Increased Subsidies be Granted to Provinces—Development of Water Powers Approved

PROPOSITIONS involving the expenditure of more money by the provinces were approved by the maritime division of the Canadian Manufacturers' Association at their annual meeting held in Moncton, N.B., on April 28. One resolution asked that the maritime provinces undertake to pay their share of the cost of maintaining government employment offices. These offices, which had been opened by the Federal Employment Bureau, have been closed because the provinces refused to pay their half of the cost.

The steps taken in the direction of water-power development were approved, and the association further urged the governments to continue action in this direction, and also "to extend to every *bona fide* company which is prepared to proceed to develop these resources every possible encouragement and assistance, and we further recommend that such water-power resources as are now held by individuals or corporations for speculative purposes, should be secured by the provinces and so handled that they may be used for the best welfare of the people."

The manufacturers deprecated any move on the part of the railways to encourage labor to go west for the harvest, in view of the shortage of help experienced this year. They also passed a resolution asking that the preferential tariff apply only to shipments made through Canadian ports, instead of applying on goods imported through United States ports as well.

Another resolution was passed in favor of increased annual subsidies to the provinces, with a view to which "all conditions leading up to and under which these provinces entered Confederation be reviewed, and that the question of transportation be given immediate and particular attention."

One of the last bills passed by the New Brunswick legislature, which prorogued on April 24, was to increase the sessional indemnities of members from $500 to $1,000.

March Bank Statement Indicates Expansion

Current Loans in Canada Increase by $65,000,000—Demand Deposits Increase by $37,000,000 and Savings Deposits by $10,000,000—Banks' Holdings of Gold Diminish, but Holdings of Dominion Notes Increase—Circulation Also Up

	March, 1919.	February, 1920.	March, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 566,797,268	$ 620,069.555	$ 657,412,028	+10.6	+ 5.97
Deposits after notice	1,037,851,766	1,187.027,307	1,197,719,570	+15.4	+ .84
Current loans in Canada	1,117,197,446	1,257,015,902	1,322,267,030	+17.4	+ 5.2
Current loans elsewhere	123,984,608	180,711,238	183,642,658	+48.8	+ 1.7
Loans to municipalities	41,993,305	52.690,790	62,992.675	+53.6	+19.2
Call loans in Canada	87,601,337	127,251.919	128,233,310	+44.6	+ .79
Call loans elsewhere	160,116,443	184.469,882	205.202,133	+28.1	+10.4
Circulation	216,529.576	223,979,666	231.220,770	+ 6.9	+ 3.6

The above are the principal changes in the statement of chartered banks for March 31st, compared with the statement for March 31st, 1919, and for February 29th, 1920. Current loans and demand deposits increased substantially during the month. Another notable change is the expansion in call loans abroad, both for the month and for the year. The banks are probably taking advantage of the money stringency in New York, and are strengthening their own position by increasing their reserves there.

The authorized and subscribed capital of the banks remained unchanged during March; nothing was added to the reserves, but the following additions to paid-up capital are recorded:—

Merchants	$ 8,460
Banque Provinciale	25
Union	2,460
Home Bank	106
Total	$11,051

Notes in circulation at the end of the month were $225,769,628, though a maximum of $231,220,770 was reached during the month. Balances due the Dominion government increased from $217,059,832 to $225,769,628, but those due provincial governments dropped by over $2,000,000. The large increase in demand deposits is accounted for largely by the increase in current loans. Americans are also, it is understood, leaving large balances here because of the exchange rates. The course of current and savings deposits for the past thirteen months was as follows:—

	Deposits payable on demand.	Deposits payable after notice.
1919—March	$566,797,268	$1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570

Deposits elsewhere than in Canada increased from $277,478,631 to $318,277,881.

The course of deposits in Canada for the past six years is shown in the following table:—

March.	On demand.	After notice.	Total.
1915	$339,514.286	$ 676,875,790	$1,016,390,076
1916	389,165,388	738,169,212	1,127.334,600
1917	448,151,528	888,765,698	1,336,917.226
1918	561,042.236	921,080,803	1,482,123,039
1919	566,797,268	1,037,851,766	1,604,649,034
1920	657,412,028	1,197,719,570	1,855,131,598

A comparison of assets with those at the end of February shows the following changes in holdings of coin and notes:—

Gold and sub-coin in Canada	+$ 364,882
Gold and sub-coin elsewhere	— 1,354,269
Total	—$ 989,386
Dominion notes in Canada	+ 1,563,922
Dominion notes elsewhere	+ 684
Total	+$1,564,606

The following table shows the course of principal loan accounts during recent years:—

March.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	$ 769,138,883	$ 41,745,737	$ 68,245,261	$101,938,685
1916	770,139,526	52,705,827	81,747,512	141,889,989
1917	843,054,466	83,551,225	76,478,708	161,616,735
1918	886,995,222	102,317,679	74,257,877	167.296,701
1919	1,117,197,446	123,984.608	87,601,337	160,116,443
1920	1,332,267,030	183,642,658	128,233,310	205,202,133

The following comparison of call loans abroad for a four-year period shows the March figure to be a record one:—

	1917. $	1918. $	1919. $	1920. $
January	155,747,476	132,687,066	140.819,656	170.206,805
February	162,344,556	160,239,494	155,983,681	184,469,882
March	161,616,735	167.296,701	160,116,443	205,202,133
April	159,156,054	179,818,531	155,533,666	....
May	168,692,675	172,259,879	157,176,325	....
June	159,309,133	170,034,476	167,236,045	....
July	151,875,676	167,112,836	178,098,434	....
August	176,610,625	160,544,990	174,176,578	....
September	166,480,004	159,680,810	169,532,489	....
October	151,018,747	157,040,858	158,194,085	....
November	139,832,552	171,035,732	169,626,880	....
December	134,483,482	150,248,322	172,232,161	....

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1919—March	$1,117,197,446	$ 87,601,337
April	1,107,986,523	86,091,844
May	1,071,447,686	89,187,032
June	1,043,712,932	95.852.728
July	1,014.387,206	93,587,497
August	1,011,785,424	95,899,836
September	1,058,572,202	96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,423	121,754.469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015.902	127,251,919
March	1,322.267,030	128,233.310

REGINA - SASK.

Learning "as He Goes Along"

Seldom does it happen that an estate consists only of the kind of property familiar to the personal executor who takes it in hand.

Usually there is some property about which he is inexperienced. Often there is a great deal.

This means that the executor learns, so far as this property is concerned, by experience "as he goes along"—and often at the expense of the estate. Such an education is expensive for the beneficiaries.

Where this Company acts as executor the reverse is true. Wide experience has taught its officers how to treat property problems without unnecessary expense or delay.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended April 30th:—

Hudson Bay Mines, 61,522; Peterson Lake, 60,000; O'Brien Mine, 77,673; Coniagas Mine, 88,000; Mining Corporation of Canada, 240,268; McKinley-Darragh Mine, 189,188. Total, 716,651. The total since January 1st is 5,708,733 pounds, or 2,854.37 tons.

TRUSTEES UNDER MANITOBA SAVINGS ACT

The following board of trustees has been appointed under the Manitoba Savings Act to provide machinery for financing the rural credit societies: E. A. Weir, chairman; Ald. George Fisher, vice-chairman; J. R. Murray, of the United Grain Growers; John Arnott, of Roblin, Man.; and Frank Collyer, of McAuley, Man. The last-named member is also appointed supervisor.

SMITH'S FALLS BOARD OF TRADE

At the annual meeting of the Smith's Falls, Ont., Board of Trade on May 1st the following officers were elected: President, R. A. Vanluven; vice-president, D. S. Noad. Councillors—McKimm, Henninger, Frost, Shannon, Bell, Soper, Burns, Ruby.

YUKON LEGISLATIVE SESSION

The Yukon legislature, after being in session for three weeks, adjourned on April 28th, after passing eleven bills, the most important of which was the one prohibiting the sale of intoxicants for beverage purposes. Other legislation enacted included the re-casting of the wild game laws, providing for the licensing of non-resident big game hunters and fur traders. The export of moose and caribou hides will be prohibited to prevent the slaughter of these animals. The assembly unanimously endorsed the administration of George P. MacKenzie.

23

Will He Like It?

Will your friend or relative whom you name as your Executor like to be burdened with the responsibilities involved?

You will avoid all difficulty and protect your estate by having your lawyer draw up your Will appointing The Union Trust Company as your Executor.

Consultations Invited.

Union Trust Company, Limited

The most important document a person of large or small means is called on to prepare is his

LAST WILL AND TESTAMENT

It means the happiness and welfare of those most dear.
Ask for Booklet: "Make Your Will."

CAPITAL, ISSUED AND SUBSCRIBED ..$1,171,700.00
PAID-UP CAPITAL AND RESERVE...... 1,172,000.00

The Imperial Canadian Trust Co.

Executor, Administrator, Assignee, Trustee, Etc.

HEAD OFFICE: WINNIPEG, CAN.
BRANCHES: SASKATOON, REGINA, EDMONTON, CALGARY, VANCOUVER AND VICTORIA 4

Who Will Manage Your Estate?

SOMEONE will take charge of your affairs after you are gone. You should name the executor in your will; if you do not, a court unfamiliar with your affairs will select an administrator.

If you name an individual, he may become ill, move away or be overburdened with cares of his own.

You may avoid these contingencies by appointing a Trust Company executor of your will and trustee of your estate. It makes a business of handling property, has the facilities for doing so, and is always accessible. The cost is no more than would be paid to an individual in like capacity.

Of the deposit in Central Gold Reserves $10,500,000 is in gold cuin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

BANK OF COMMERCE STAFF MAGAZINE

The "Caduceus," ancient Greek symbol of communication and commerce, is the title given to a staff organ of the Canadian Bank of Commerce, the first number of which, for April, has just made its appearance. This symbol was the wand carried by the Greek herald, and is the bank's crest. It is, therefore, a suitable medium, says the new magazine, "through which the widespread branches of our bank may communicate and keep in touch with one another. But we appeal to every member to bear in mind that he must help to carry the 'Caduceus,' if it is to fulfil its function, with 'winged feet,' as did Hermes in the good days of old. The 'Caduceus' is the magazine of the staff, for the staff, and by the staff. It is not an official medium. The thunders of Olympian Zeus do not penetrate into the sanctum of the editor. Anything that is suggestive of ominous gravity is far removed from the pages of this volume."

MONTREAL FIRE PREVENTIVE MEASURES

A new fire alarm system is being installed in Montreal with a view to keeping district chiefs in closer touch with alarm headquarters. A school of instruction for the firemen has been opened to acquaint them with the new system.

The proposal to compel the installation of automatic sprinklers has not been discarded. As previously mentioned, a by-law of this kind was recently recommended by the Administrative Commission, and the city council still has it under consideration. Dwelling-houses will, however, be exempted. The proposal is that owners or tenants be compelled to install, at their own expenses, one or more dry sprinklers within sixty days after notice is given by the city.

APRIL FIRE LOSSES

Largest Since June, 1919—Winnipeg Car Barns, London Collegiate and Other Disasters Responsible—Four Months Total $9,556,125

If fires continue to do damage as they have during the past four months Canada's fire loss in 1920 will greatly exceed the loss last year, and may reach the figure for the record year 1918. The four months total this year is $9,556,125, according to *The Monetary Times*' estimate, compared with $8,241,289 for the same period in 1919.

The Monetary Times' estimate of Canada's fire losses during April 1920, was $3,229,500 compared with $1,089,070, in April, 1919, and $1,793,200 in March, 1920. The following is the estimate of April losses:—

Fires exceeding $10,000	$ 2,622,200
Small fires reported	107,300
Estimate of unreported fires	500,000
Total	$ 3,229,500

The Monetary Times' record for the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February ..	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May	1,163,110	3,570,014	1,785,130	....
June	1,184,627	3,080,982	3,337,530	....
July	1,101,734	3,369,684	1,118,377	....
August	1,230,183	3,110,445	1,374,495	....
September ..	1,301,700	917,286	1,940,272	....
October	704,605	5,119,145	1,023,288	....
November ...	959,049	1,059,580	2,339,870	....
December ...	5,144,100	1,733,917	2,047,496	....
Totals ..	$20,086,085	$31,815,844	$23,207,647	$ 9,556,125

List of $10,000 Fires

The following is a list of fires at which the loss amounted to $10,000 and over:—

Bawlf, Alta., April 3, Quaker Oats elevator, $35,000.

Kingston, Ont., April 5, McMahon block, $10,000.

Montreal, Que., April 1, Jewish synagogue, $150,000.

Toronto, Ont., April 2, planing mills owned by C. B. Williams, $22,000.

Toronto, Ont., April 12, A. E. Long paper box factory, $50,000.

Westmount, Que., April 2, three-story building, corner of St. Catharine and Gladstone Sts., $75,000.

Winnipeg, Man., April 7, car barns of Winnipeg Street Railway, $400,000.

Fielding, Sask., April 7, business block, $10,000.

Montebello, Que., April 14, Grey Nuns convent, $25,000.

Notre Dame du Lois, Que., April 11, several stores and houses, $150,000.

Inverness, B.C., April 11, Inverness cannery plant, $150,000.

Vancouver, B.C., April 13, White Lunch and British Columbia tailoring store adjoining, $50,000.

Fredericton, N.B., April 18, four houses, $15,000.

Grande Prairie, Alta., April 14, business block, $55,200.

Sydney, N.S., April 17, Harshmans' drug store, $25,000.

Sydney, N.S., April 20, Sydney Milling Co., $40,000.

Watrous, Sask., April 17, business block, $30,000.

Winnipeg, Man., April 9, Gross, Goulding and Skinner Piano Co., $10,000.

Liverpool, N.S., April 25, residence of Judge F. G. Forbes, $25,000.

London, Ont., April 22, London Collegiate Institute, $440,000.

Montreal, Que., April 20, garage of Baillargeon Express Co., $25,000.

Montreal, Que., April 27, factory of St. Henri Shoe Co., Ltd., $200,000.

Peterboro', Ont., April 26, barn on the farm of Hugh Fife, $10,000.

St. Catharines, Ont., April 26, Ensign Refining Co., $75,000.

St. John, N.B., April 27, Dearborn and Co., Ltd., wholesale grocers, $100,000.

Toronto, Ont., April 25, western wing of Union Station, $15,000.

Windsor, Ont., April 28, International Hotel, $30,000.

Windsor, Ont., April 29, Essex County Sanitorium, $200,000.

Sydney, N.S., April 30, Thompson-Christie Block, $40,000.

Carmangay, Alta., April 30, business block, $40,000.

Bordeaux, Que., April 29, garge belonging to A. Lavoie, $20,000.

Killam, Alta., April 28, Pioneer elevator, $100,000.

Buildings Destroyed and Causes

The following structures were destroyed or damaged last month: Residences 21, business blocks 6, convent 1, stores 11, laundry 1, business buildings 8, plants 4, garages 4, factories 8, stables 2, theatre 1, elevators 3, hotels 4, churches 3, mills 3, cafe 1, car barn 1, barns 6, warehouses 2, station 1.

Among the causes reported were: Coal oil engine 1, candles 1, overheated range 1, defective wiring 2, backfire of exhaust pipe in auto 1, incendiarism 1, paper igniting with overheated stovepipe 1, short electric circuit 1, overheated furnace 2, lantern explosion 2, spontaneous combustion 1, cigarette stub 1.

The following is a list of fires at which fatalities occurred last month:—

Winnipeg, Man., April 3, trapped in burning house....	2
Machias, N.B., April 10, playing with fire	1
Regina, Sask., April 14, playing with fire	1
Brantford, Ont., April 26, playing with matches	1
Pembroke, Ont., April 28, smothered by smoke	3
Total	8

DECLINE IN VOLUME OF EMPLOYMENT

Reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, disregarding loss of time due to strikes, there was a nominal decline in the volume of employment during the week ending April 3rd, as compared with returns from the same firms for the preceding week. For the week ending April 10th, however, a large increase was expected. A decline for the week of April 3rd had not been anticipated, as the returns for March 27th indicated an estimated increase. The decrease, however, is no doubt due to conditions attendant upon the Easter holidays. When analysed by provinces, the returns show reductions in Quebec, Ontario and Saskatchewan. All other provinces reported increases. For the week ending April 10th increases were anticipated in Prince Edward Island, Quebec, Ontario, Saskatchewan and Alberta. Nova Scotia, New Brunswick, Manitoba and British Columbia expected to have declines.

Reports for the week ending April 3rd were reported from 5,073 firms. These firms reported 711,600 employees on their pay-rolls as compared with 711,623 persons on their pay-rolls for the week ending March 27th, and with 699,629 employees for the base week. The same firms, however, anticipated adding 2,104 persons to their staffs during the week ending April 10th, an increase of three-tenths of one per cent., the bulk of this estimated increase being in railway construction. When the returns are compared with the base figures, a substantial increase of 11,971 persons, or one and seven-tenths per cent. is indicated.

INDUSTRIAL ACCIDENT PREVENTION ASSOCIATION

More Inspections Made This Year—Board of Directors Will Investigate Conditions in Any Plant Where Accidents are Frequent

THE third annual meeting of the Industrial Accident Prevention Association was held in Toronto on May 4th, and was followed on May 4th, 5th, 6th and 7th by the meetings of the different groups of which the association is made up. This association exists under authority of section 101 of the Ontario Workmen's Compensation Act, and all employers coming under the Act are members, and are divided into groups similar to those used for the administration of the Act. The association is financed by the board, the sum of $8,100 having been granted for the year ended April 30th, 1920. It takes the place of the Federation of Safety Associations, which was the first organization which took up accident prevention under the authority of the Workmen's Compensation Board.

The report of F. M. Tobin, secretary-treasurer of the association, showed that 3,496 inspections had been made during the year, an increase of about 10 per cent., compared with the preceding year. Continuing, the report said:—

Safety Rules and Standards

"The set of safety rules and standards which was prepared by our inspecting staff and approved by the directors, and later approved by the Lieutenant-Governor-in-Council and the Workmen's Compensation Board, has been printed and distributed in all the factories under inspection throughout the province. About 2,700 additional copies have been sent out since the first distribution.

"We are now receiving from the Workmen's Compensation Board daily reports of all accidents occurring in the groups under inspection, giving the date, description of accident and name of injured workman. With this information we are enabled to get into closer touch with the accident probability condition in the different industries. Major accidents are brought to our attention by the board, with the request that we furnish a report concerning them. As these daily reports have only been available for this office since the beginning of the present year, we are unable to give an analysis covering any period of time.

"It has been suggested that, where severe or frequent accidents occur in any one plant, a report be placed in the hands of the directors for the purpose of investigating conditions in the plant. You are requested to give this matter some consideration at this meeting.*

"It does not appear to be fully understood that the difference between the maximum and minimum rate obtained under the system is 45 per cent.

"Your inspectors are finding greater co-operation among the manufacturers whose plants they are visiting. We have frequent requests to send out men for counsel and advice on certain equipment and buildings. There has not been, during the past year, a single case of friction or refusal to comply with instructions or recommendations of our inspectors.

Proposed Amendments to Compensation Act

"From information at hand I am advised that the tentative draft of the proposed amendments to the Workmen's Compensation Act has been placed in the hands of the Canadian Manufacturers' Association. The principal changes are: Proposals to increase the compensation from 55 per cent. to 75 per cent. and increase pensions from $20 and $30 per month to $40. I have furnished the committee in charge of this matter at the Canadian Manufacturers' Association with what information was available concerning our work in the different industries and pointed out that we have had carried out in the neighborhood of twenty thousand recommendations for the improvement of the physical conditions of our plants and safeguarding the hazards found therein. I also pointed out that the principal inducement to the manufacturer to make these changes has been the hope of reduction in assessment, and that, notwithstanding these efforts, amendments have been made to the Act from time to time: First, medical aid for thirty days, and later, medical aid for an indefinite period, each of which have increased the manufacturer's assessment.

"Your attention is called to articles issued by the chairman of the Workmen's Compensation Board, in which he points out the benefits to be derived from accident prevention, and urges further co-operation in the matter of education in our plants for the purpose of avoiding accidents."

---

*A resolution was passed giving effect to this suggestion.

VANCOUVER TO HAVE INSURANCE CONVENTION

Preparation for July Meeting—Local Fire Agents' Association Organized—Fire Protection for City Harbor

(Special to *The Monetary Times*)

Vancouver, May 1st, 1920.

A JOINT meeting of delegates from all branches of insurance met on Wednesday, April 28th, to organize for a big insurance convention, to be held in July next in Vancouver.

Representatives from the Fire Underwriters' Association, Insurance Federation, life insurance and automobile insurance companies have signified their intention of doing everything in their power to make the convention a success. The object of this big "get-together" meeting is to establish an "esprit-de-corps" among the agents of all lines of insurance, and for educational purposes. Prominent speakers, pre-eminent in their own line, will be invited from eastern Canada and United States to address the meetings, some of which will be thrown open to the public.

A bill prohibiting the writing of life insurance on any child under the age of twelve months has been before the provincial legislature. The following conditions are insisted upon: The limits of insurance to be allowed on young children is—2 years, $32; 3 years, $40; 4 years, $48; and so on up to $60 up to a child of ten years. The object is to remove any temptation which excessive insurance on a child's life might give.

Fire Insurance Agents' Association

The Vancouver Fire Insurance Agents' Association has been organized and is in active operation, with A. McCreery, chairman, and A. E. Goodman, secretary-treasurer. All the general, first and second agents, numbering one hundred, have signed the pledge, and by-laws and constitution, and it is believed that efficient machinery has been placed in motion, which will minimize irregularities to a very low point.

The question of a fire boat for Vancouver harbor is again being seriously considered. It is agreed on all sides that the fact that there is no such boat makes the fire hazard on the crowded waterfront a very serious one. The city council seems to think that the harbor commissioners should arrange the matter, while the harbor commissioners, through Col. Kirkpatrick, state that it should be a part of the fire-fighting system of the city. He says that the municipality collected $400,000 in taxes on the waterfront, and, therefore, should provide fire protection.

It is understood that the commission and the city council are to meet and discuss the matter at an early date.

The question of the rule of the road to make it conform with the United States (which is "turn to the right") has been held up owing to legal questions. It has been pointed out that the province has no jurisdiction over the British Columbia Electric Railway Co., as they had passed under the control of the Dominion Railway Board, and if the British Columbia Electric Railway Co. was compelled to arrange for the changed condition, British Columbia would be in for a heavy bill of damages.

DEBENTURES FOR SALE

TOWN OF WALKERVILLE

DEBENTURES FOR SALE

Sealed tenders ,addressed to the undersigned. and marked on the outside, "Tenders for debentures," will be received up to noon of Tuesday, May 11th, 1920, for the purchase of the following debentures and accrued interest.

$38,012.14 Local Improvement Debentures. Payable in 10 equal annual instalments of Principal and Interest. Interest at the rate of 6% per annum.

Debentures will be delivered and must be settled for at the office of the Town Treasurer, Walkerville, Ont.

All debentures are Coupon, Bearer, and carry interest from 14th of December, 1919. Principal and Interest payable at the Canadian Bank of Commerce, Walkerville, on 14th December in each year.

The highest or any tender not necessarily accepted.

For any further information address

A. E. COCK,
Clerk and Treasurer,
Box 329, Walkerville, Ontario. 139

GILBERT PLAINS, MAN.

Tenders for Good Roads Debentures, Rural Municipality of Gilbert Plains, calls for sealed tenders on $30,000 of issue, 30 years, at 6%, payable equal yearly instalments of Principal and Interest.

Tenders to be opened at 2 o'clock p.m., June 7th, 1920.

Highest or any tender not necessarily accepted.

JAS. C. TURNER,
Secretary-treasurer.
Municipality Gilbert Plains, Man. 136

PORT DALHOUSIE, ONT.

The Village of Port Dalhousie is offering for sale by tender, one block of debentures for the amount of $120,000 under provisions of the Waterworks Act. The money secured from this will be used for the installing of a waterworks system, a by-law to this effect having recently been approved by the ratepayers. The debentures will be coupon bearing, and will allow for principal .and interest at 6% to be paid in equal annual instalments over a period of thirty years.

Tenders are to be in the hands of the Clerk of the Municipality by Thursday, 27th May, at 6 o'clock p.m.

Further information apply to the undersigned clerk.

Fewer Repair Bills

THE rapid depreciation of expensive equipment, costly interruptions in production schedule through breakdowns, constant repair bills—these constitute a large factor in the excessive overhead charges of many manufacturing organizations. They can be largely avoided through the use of correct lubricants.

Correct lubrication requires high quality lubricants specifically designed for each particular mechanical need and every service condition. You will find such lubricants in the Imperial line.

Glance over the list on the right. You can choose therefrom the correct lubricant for the efficient and economical operation of every type of machinery in factory, mine or mill.

Not only for industrial power plants but for motor cars, trucks, tractors and other farm machines and even down to the smallest lubrication need of the home, Imperial Lubricants have no superiors and few, if any, equals.

Imperial lubrication Engineers will gladly advise you on anything relating to lubrication. Write us at 56 Church St., Toronto, or at any of our branches.

Canadian Bond Sales Nearly Thirty Millions

April Total Reaches Substantial Proportions Notwithstanding Condition of the Market — Approximately $24,000,000 Secured in the United States — High Prices for Municipals

NOTWITHSTANDING the uncertain condition of the Canadian security market in April, Canadian bond sales for that month reached a large total. According to *The Monetary Times'* record, new financing was completed to the extent of $29,730,434, compared with $48,101,575 in March and $9,749,202 in April a year ago. Last month's total is classified as follows:—

Provincial	$13,150,000
Corporation	11,725,000
Municipal	4,855,434
Total	$29,730,434

As in the preceding months of the year, the bulk of the new issues last month were floated in the United States, the estimated amount being $24,000,000, and, judging from the way in which such issues were absorbed, there was a ready demand for our securities in that market.

Provincial Loans Heavy

Provincial borrowings were particularly heavy last month again, although the total was slightly less than in March. For the first four months of this year such borrowings amount to more than $40,000,000, which is more than 75 per cent. of the total for the whole of 1919.

Municipal Borrowing Expensive

There seemed to be considerable activity in municipals, the total being $4,855,434, against $8,367,299 in the preceding month and $1,549,202 in the same month last year, but borrowing rates were very high. The city of Toronto, which enjoys very high credit, paid more than 6 per cent. for its loan, which is typical of the experiences of other munici-

NEW YORK OFFICE FOR ROYAL SECURITIES

The active entry of Royal Securities Corporation into the United States financial field is indicated in the announcement of the incorporation of a company under New York State laws under the name of Agency of Royal Securities Corporation (Canada), Ltd. The offices of the new branch of the corporation have already been opened at 165 Broadway under the management of Mr. Oliver E. Hurd, who has for some time been connected with the sales department of the corporation. The addition of a New York office to its Canadian and British facilities has been rendered necessary by the growth of the corporation's American business.

PLANS FOR THE C.F.U.A. ANNUAL

Meetings of the various committees of the Canadian Fire Underwriters' Association were held in Montreal on April 26th and 27th, preparations being made for the annual meeting to be held in June. The following Toronto members of the association were present: J. B. Laidlaw, Norwich Union; P. McCallum, Hartford; A. M. Kirkpatrick, Home; W. Robins, Great American; Jos. Murphy, Springfield; C. C. Hall, Nova Scotia; Lyman Root, Sun; T. H. Hall, General, of Perth; J. H. Riddel, British Dominions; E. F. Garrow, British America; Joseph Minty, Union of Canton; J. R. Pringle, Western; W. E. Fudger, Ocean; J. R. Hounsom, London Guarantee, and G. Sherritt, St. Paul.

News of Industrial Development in Canada

Steel Merger of Outstanding Interest—New Ames-Holden Plant to Manufacture Rubber Footwear — Frazer Companies May Acquire Large Tract of Land from New Brunswick Railway

NO single enterprise in the Canadian industrial field approaches in magnitude the British Empire Steel Corporation, the plans of which are described in detail elsewhere in this issue. Its extent entitles it to be compared with our great railways, and with one or two companies engaged in distribution.

Another announcement in connection with the iron and steel industry is that regarding the opening of the Welland, Ont., plant of the Canadian Steel Foundries, Ltd., which has been closed for over a year. The foundry, proper, will start work in three weeks, but will manufacture miscellaneous castings instead of couplers and parts, as it did last year. The rolling mills will be opened shortly after for the manufacture of steel bars and angles, as formerly. Three hundred men will be engaged by the end of May, and from then on more will be employed as needed, until the full force of 700 is on the payroll.

A strong group of Canadian and American capitalists have become identified with the Ontario Smelters and Refiners, Ltd., of Chippawa, Ont., which has just purchased the plant and business of the Metals Chemical Co., of Welland. The primary object in view is to increase the production and treatment of Canadian ores, which hitherto have been going to smelters in the United States. For several years, Metals Chemical Co. have been busy producing cobalt in the form of metal, oxides and other cobalt salts, nickel oxides, sulphate silver bullion and weedkiller, from the ores brought down from Northern Ontario. The new owners are already in possession, installing more machinery and changing the former plant to furnish what is required by this new process.

Ames-Holden Rubber Boot Plant

The directors of the company have authorized the incorporation of Ames-Holden Rubber Boot Co., Ltd., with capital of $3,000,000 upon substantially the same plan as Ames-Holden Tire Co., Ltd., and Ames-Holden Felt Co., Ltd. During the last year the company's business in rubber and canvas footwear has grown to such proportions, and is still increasing, that the capacity of the present plant will not be anywhere nearly adequate to take care of the necessary production. The Mount Royal plant started a daily increasing production on May 3, and its output will supplement the supplies already contracted for next fall's requirements. It is the company's intention to divide its production of the various kinds of rubber footwear between its two factories, as it has so successfully done with the leather footwear in its factories at St. Hyacinthe and Montreal. The St. Hyacinthe factory specializes on staple heavy work shoes, whereas the highest grades and styles of leather footwear are made in the Montreal plant. This has resulted not only in better workmanship and increased output, but has also effected substantial economies.

Fraser Companies' Deal

The sale of the lands of the New Brunswick Railway Co., which consist of 1,700,000 acres, to the Fraser Companies, Ltd., has been recommended by the directors, and a meeting of the shareholders is called for June 1 next, to consider the recommendation of the directors concerning the sale of the company's properties and to authorize the directors to sell or dispose of all or part of the same at such a price and on such terms and conditions as they may approve.

Following the incorporation of the Fraser Paper Co., Ltd., with authority to erect dams and pulp and paper mills at the Tobique Narrows, N.B., negotiations were carried on between the railway company and the paper company in this connection, and it is understood that the deal will be put through if the shareholders of the former concern approve. If the paper company takes all the railway company's lands, the sum involved will run into many millions of dollars.

Miscellaneous Notes of Industry

The establishment of a chain of factories with headquarters in Winnipeg Man., for the manufacture of a patented wood fibre box has been announced by A. C. MacIntosh, of Vancouver, managing director of the Wood Fibre Cases Co., Ltd.

Ratepayers of Aurora, Ont., have carried a by-law authorizing exemption from taxes to the Anchor Construction Co., which company will locate in Aurora and manufacture safety matches.

Property owners of Kingston, Ont., on May 19 next, will be asked to vote on a by-law granting concessions to Chas. A. Eaton, of Turner Falls, Mass., who desires to establish a pocket knife cutlery factory in the city.

The A. C. Spark Plug Co., the largest manufacturers of spark plugs in the world, and a subsidiary of the General Motors Corporation, will establish a plant at Brantford, Ont., immediately. A factory will be constructed at once, and operations will begin with 100 employees, but this, it is said is only preliminary.

COMMISSIONS ON VICTORY LOAN

A total of $1,110,402 was paid out by the Minister of Finance in commissions to canvassers and brokers who handled the last Victory loan. These fees ran proportionally higher in Quebec province than elsewhere; $352,952 was paid on this head in Quebec, representing .22 per cent. of the total subscriptions to the loan.

In Nova Scotia $57,575 was paid out, or .20 per cent. of the subscriptions. In Saskatchewan the figures are $38,900, or .18 per cent.; in New Brunswick $36,500, or .17 per cent.; in Ontario $538,670, or .15 per cent.; in Manitoba $54,200, or .13 per cent.; in Alberta $19,150, or .11 per cent.; and in British Columbia $22,455 or .06 per cent. Prince Edward Island did not cost the federal government anything in brokerage or commissions.

INCREASING SERVICE OF LIFE INSURANCE

"This is the greatest period in the history of Canadian life insurance," said J. W. W. Stewart, managing director of the Monarch Life Assurance Co., Winnipeg, in addressing the life insurance conference held in Regina early this month. Mr. Stewart's subject was "Service." "Even the most sanguine," he continued, "is staggered by the unparalled demand. Truly, the life underwriter is fast coming into his own, after traversing patiently and intelligently a long and tortuous course. In almost every other line of business rates or charges have advanced, but not so with life insurance rates. Commissions have remained the same while the legitimate and uncontrollable expenses of life underwriters have greatly increased. The life insurance business is a practical example of free trade, closely regulated by government supervision, and taxed at every angle. In spite of terrific inroads caused by war and plague, no government relief is proffered, and were any relief sought, there would not likely be any sympathetic response. Mathematical tables cannot be distorted, hence the solving of this problem lies in writing more business and selling larger policies, thus giving greater service to the public, which, after all, must be our prime object."

They Put On More Insurance!
Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

News of Municipal Finance

Unjustifiable Debt Expansion, Long Maturity of Debentures and Operation of Utilities at a Loss Condemned by Toronto's Finance Commissioner—Ontario Legislature Accepts Bill Authorizing Taxation of Dividends from Industrial and Mercantile Concerns—Opposition to this Taken by Manufacturers

IN his report on Toronto's funded debt and sinking fund, issued last week, Mr. Thomas Bradshaw, finance commissioner, denounces three bad practices—viz., unjustifiable debt expansion, the issuing of debentures for longer periods than the life of the work represented and the operation of public utilities at a loss. The advice in the statement, although given specifically for the city which Mr. Bradshaw represents, should be of much value to other municipalities whose financial troubles are many at this time. The report says in part:—

"It is to be earnestly desired that there may not again be experienced such unjustifiably rapid debt expansion, particularly for non-self-supporting services, as there was in the six years 1913-1918, when new loans were floated for 66½ millions, of which no less than 38¾ millions were for non-self-supporting services.

"The new local improvement debts should not be incurred in any one year, at least for some years to come, greater than those which are redeemed in such years. For example, if this course were followed in 1920 and 1921, it would admit of about one and three-quarter millions of new capital being raised in each of these years, an amount which is sufficiently large to cover the cost of essential undertakings, and one which the city is not justified, under existing circumstances, in exceeding.

"In the seven-year period, 1913-1920, debt charges have increased no less than 119 per cent., while in the same period, assessment has only increased 46 per cent., and secondly, that as a consequence of this abnormal disparity, the tax rate for debt charges has increased in the same time from 4.75 to 7.1 mills. This, of course, is only another way of representing the results of an over-mortgaging of the city's resources. It is only now that there are signs of recovery from the past immoderate capital expenditures, and unless there is an adherence to a cautious and sane policy for some years, the taxpayers' burden may become, as it has in some other municipalities, unbearable, and the city's credit be greatly impaired and possibly jeopardized."

Long-Bond Maturity

In speaking of the maturity of bonds, Mr. Bradshaw, for an instance, points out that a million and a-half of local improvement debt, chiefly for improvements in annexing districts by the city, does not fall due until after 1927 and as late as 1947. "By that time," he says, "in many instances, the works represented by the latter amount, will be replaced, and new debts incurred for them, illustrating the injustice the debt has been contracted, and it is regrettable that this period warranted by the service or lifetime of the works for which they have been contracted." He adds:—

"The principle now operative in issuing loans is to make the maturity date of the final installment of principal fall within the estimated lifetime of the work or service for which the debt has been contracted, and it is regrettable that this plan has not always been followed in the past. At present, no loan is issued for more than thirty years, and for that maximum length of time, only in the case of such durable and permanent assets as waterworks, parks, schools, sewers, etc. A contrary and indefensible procedure has been, and still is being, followed by some corporations and enterprises, in order to diminish the effect of a huge debt, by making the immediate carrying charges as light as possible, with a total disregard of the future. The result of this course is a species of deception, since it hides the facts from the present generation, through casting upon the future, debt charges for expenditures, from which they will not receive any benefit."

Regarding public utilities, the commissioner regretted that civic car line fares were not increased, as there was a deficit of $146,220 in 1919, and an accumulated deficit of $1,074,372 to date. He expresses the hope that the Toronto railway, when acquired, will be operated on a fully self-supporting fare.

Ford, Ont.—The town council has reduced the tax rate from 34 mills in 1919 to 31.5 for 1920. On the other hand, the separate school rate has been advanced from nine to ten mills. Expenditures on public works this year will be $30,000.

Walkerville, Ont.—The total assessment for the town is now $9,418,659, an increase of $1,040,000, as compared with last year. Properties, such as churches, schools and public utilities are exempt, leaving a total of $8,724,418 on which taxes may be levied.

Leader, Sask.—The financial statement of the town for the year ended December 31, 1919, shows that receipts exceed expenditures by $1,004. The balance sheet shows a surplus of assets over liabilities of $18,883. Outstanding debentures of the town now amount to $22,837. Taxes collected during the year totalled approximately $25,000. Cash on hand and in the bank at the end of the year was $1,004, as compared with $783 at the end of the previous year.

Ontario.—The municipal committee of the legislature on April 30, accepted a bill fathered by the city of Toronto, authorizing a change in the Assessment Act, that will permit municipalities to tax income derived from dividends from industrial or mercantile concerns. The change was strenuously opposed by counsel for the Canadian Manufacturers' Association, and the Canadian Credit Men's Association, who argued that the taxation of dividends from industrial and mercantile concerns would drive capital from the province.

Sydney, N.S.—Estimated expenditure of the city for 1920, as passed by the council, amounts to $481,274. An assessment rate of 3 per cent., as compared with 3½ per cent. last year, has been set, which, on a valuation of $12,222,708, will bring the city $366,681, while the amount to be raised by taxation is placed at $334,378, thus giving the city an estimated surplus at the end of the present year of $32,303. The council plans to collect $40,000 uncollected taxes, $45,000 from water rates and $30,000 from poll taxes. The estimates show that the bonded indebtedness of the city at present is $2,014,000 with interest charges of $91,885. Sinking fund will be increased to the extent of $27,685.

Montreal, Que.—A new system of government for the city was devised by Mr. Raymond Beaudry and submitted to the Charter Commission of the legislature last week. Briefly, the proposition suggests that the whole island of Montreal shall be divided into seven districts, each district to elect seven aldermen by the vote of all the electors. Each body of seven will then get together and elect one of its number to a central executive body, and this central executive of seven will elect a president, who shall be *ipso facto* mayor of Montreal.

The executive council is to summon into session the city council of 49 aldermen, and submit the estimates for the fiscal year, the projects as to by-laws, taxes and loans. This will constitute something parallel to a Quebec session, though lasting only two or three weeks. The city council will elect its president, or speaker, and the executive, members and part of the council themselves will form the government of this miniature parliament of 49, mayor being in much the same position as the prime minister of a province. The meetings of the council are to be operated on the same rules as guide the legislative assembly of Quebec.

In reply to this suggestion, the Charter Commission on April 29, decided unanimously on one governing body for the city, to be elected by the people, as the suitable form of civic administration.

Victoria, B.C.—In a letter to the city council on the city's finances, Jas. L. Raymur, comptroller, stated:—

"During 1919 we continued to take Victory bonds for taxes. The amount acquired in this way was $237,850, of which $105,800 was paid into the local improvement sinking fund; $103,150 into the general purposes sinking fund, and $25,000 sold for cash; and $3,900 included in sale of $19,650 already mentioned. Our holding of Dominion loans at the 31st of December, 1919, amounted to $1,075,950. Seventy-five per cent. of the current year's taxes were paid, being 5.88 per cent. better than during 1918.

"Treasury certificates and bills amounting to $1,271,000 fell due on February 1st, 1919, and were redeemed, the money to provide for them being obtained from the sale of debentures under the consolidated debenture by-law, 1917; $300,000 being sold in 1919 on a basis of 5.90 per cent. One thousand dollars of these certificates was not presented during 1919, and, as a matter of fact, was not paid until the 20th of March, 1920."

Mr. Raymur also stated in the letter that loans to the amount of $808,170 had been cancelled.

Toronto, Ont.—In his annual report on the city's funded debt and sinking fund published on April 29, Finance Commissioner Bradshaw stated that during 1919, the funded debt was decreased by $2,269,399, or 2.21 per cent., and at the end of the year stood at $101,819,753. "Since 1902," said Mr. Bradshaw, "it had increased yearly, reaching 104 millions at the end of 1918. The reduction made last year was the first in seventeen years.

"The changes in 1919," he continued, "consisted of reductions of $3,603,086 on debt redeemed at maturity and $1,975,313 on debt redeemed before maturity, with an addition of $3,282,000 for new debt incurred. Through the redemption of 1919 maturities, the annual debt charges were reduced by $260,256. Of this, $90,453 was upon $1,683,223, representing the non-self-sustaining part of these debts which had been a charge through the tax rate.

"The amount redeemed before maturity was made up of non-revenue-producing debts. Through their redemption annual debt charges were reduced by $153,417, making a total reduction in such charges of $243,870. Pre-maturity redemptions will reduce debt charges on the war debt by $187,500 in 1925, $330,000 in 1926 and $315,000 in 1927. In the last two years they will be eliminated entirely.

"Distribution of the debt among six essential services is: Local improvements, 20.77 per cent.; water, 15.92 per cent.; schools, 14.85 per cent.; light and power, 8.99 per cent.; sanitation, 6.05 per cent.; and transportation, 5.92 per cent. These six services comprise 72.50 per cent. of the total."

Dominion customs figures for the month of April, 1920, show an increase of more than $6,000,000 over the corresponding period last year, amounting to $17,763,508, as compared with $11,424,989 for April last year.

Government and Municipal Bond Market

Victory Bonds Again Reduced—Nearly Nine Millions of New Provincial Financing—Six Millions go to the American Market — Manitoba Negotiates Sale by Private Tender

THIS week was featured by another reduction in the prices of Victory bonds, ranging from ¼ of a point to one point. In making the announcement, R. A. Daly, secretary of the Victory Bond Special Committee, states that the changes were made necessary to meet prevailing market conditions. The following table compares the old and new selling prices, and gives the present yield. The price at which the dealers will buy is one point less in each case:—

Maturity.	New price.	Former price.	Present yield.
1922	99	99½	5.86
1927	99½	100	5.58
1937	101	102	5.41
1923	99	99¼	5.82
1933	99½	100½	5.55
1924	98	98½	6.01
1934	96	97	5.92

The American Market

Two more bond issues of Canadian provinces have found their way to the American market and have been readily absorbed. This is a favorable sign for Canadian bond issues, in view of prevailing conditions in Canada. The province of Alberta $3,000,000 6 per cent. 3-year bonds were disposed of in one day, while the Manitoba $2,850,000 6 per cent. five-year issue has also been taken up.

While Canadian provinces are borrowing at such exceedingly low rates as 5.40 per cent., as in the case of Alberta, they must take the risk of exchange in paying interest and repaying principal.

Coming Offerings

The following is a list of debentures offered for sale, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Saskatoon, Sask. ...	$988,900	Various	Various	May 10
Minitonas R.M., Man.	50,000	6	30-instal.	May 11
Walkerville, Ont. ...	38,012	6	10-instal.	May 11
Gilbert Plains, Man.	22,000	5½	30-years	May 18
Port Dalhousie, Ont.	120,000	6	30-instal.	May 30
Westbourne R.M., Man.	40,000	6	30-instal.	May 31
Gilbert Plains R.M., Man.	38,000	6	30-instal.	June 7
Glencoe, Ont.	18,000	5½	20-instal.	....
Toronto Separate Schools, Ont.	200,000	5½	20-years	May 12

Glencoe, Ont.—The village is receiving offers for $18,000 5½ per cent. 20-instalment debentures. No date is set.

Toronto, Ont.—The Separate School Board is calling for tenders up till May 12, 1920, for the purchase of $200,000 5½ per cent. 20-year bonds.

Gilbert Plains R.M., Man.—Tenders will be received until June 7, 1920, for the purchase of $30,000 6 per cent. 30-instalment debentures. (See announcement elsewhere in this issue.)

Port Dalhousie, Ont.—Tenders will be received until May 30, 1920, for the purchase of $120,000 6 per cent. 30-instalment waterworks debentures. (See announcement elsewhere in this issue.)

Walkerville, Ont.—Tenders will be received until May 11, 1920, for the purchase of $38,012 6 per cent. 10-instalment local improvement debentures. (See announcement elsewhere in this issue.)

Saltfleet Township, Ont.—Tenders will be received until May 1, 1920, for the purchase of $40,000 6 per cent. 20-instalment debentures for school purposes. The net debenture debt of the township is $43,888, as of December 31, 1919. Erlane Lee, clerk.

Debenture Notes

Timmins, Ont.—A by-law has been passed authorizing the issue of debentures for waterworks extensions.

Winnipeg, Man.—The city redeemed debentures to the amount of $129,202 on April 30 last. A debenture issue of $363,836 falls due on May 15 next.

Bifrost R.M., Man.—On May 22, 1920, ratepayers will be asked to vote on a by-law authorizing the issue of $69,200 6 per cent. 20-year debentures for road purposes.

Calgary, Alta.—The school board has been given authority to issue debentures to the amount of $250,000 for the purpose of providing the city with additional school accommodation.

Hamilton, Ont.—The city council will ask for the return of the $6,000,000 bonds deposited with the Hydro-Radial Association, which are guaranteed by the city. This action was decided upon when Premier Drury stated that the Port Credit-Hamilton hydro radial would not be started for at least a year or two.

Grey R.M., Man.—The council will submit to the ratepayers on May 17 next, of Wingham C.S.D., a by-law authorizing the issuing of debentures to the amount of $50,000. On the same date ratepayers of Elm Creek C.S.D., will also be asked to vote on a debenture by-law, the amount of funds necesary for school purposes being $45,000.

Ontario.—A bill authorizing the provincial treasurer to borrow $10,000,000 at his discretion for carrying on provincial business, and that such bonds were to be exempt from the usual provincial taxation and succession duties, was given first reading in the legislature on April 29. Several members oppose the proposal, but upon the premier's assurance that the right to issue tax-exempt bonds would not be used except under very exceptional circumstances, the legislation was given first reading.

A large deputation representing municipalities east and west of Toronto, where hydro radials have been proposed and endorsed by ratepayers, waited on Premier Drury on April 29, and requested that the province guarantee the bonds for certain hydro-radial projects. The premier committed himself to no promise. He referred to duplication of lines and the present financial situation without any direct opposition to the scheme, but he did state that he thought work on the Chippawa power canal should be pushed forward, as no economy could result from delay at that point. Declaring that he was thinking of the interests of the whole province, Premier Drury said that as soon as the government was convinced that the financial situation was such that it would not be loading up the enterprises with an undue burden, and that labor and equipment were not as costly as at present, the province would be prepared to go ahead.

Bond Sales

Etobicoke, Ont.—Messrs. C. H. Burgess and Co., have purchased $6,000 6 per cent. 10-instalment debentures at 97.54, which is just above a 6½ per cent. basis.

Brantford, Ont.—City Treasurer Bunnell informs *The Monetary Times* that within the last six weeks, debentures to the amount of about $300,000 have been sold to local investors through Brantford brokers, and over the counter.

VICTORY BOND OWNERS

with coupons due May 1st experienced the satisfaction of collecting their interest promptly and conveniently. The wisest thing to do with this interest is to reinvest it either in further Victory Bonds, which offer a substantial interest return, or in other high grade Canadian Government or Municipal Bonds. We offer a selection of these bonds, with a wide choice of maturities, and affording an interest return of as high as 7%.

Can give best of references and guarantee a large volume of first class business at good rates.

Box 295, Monetary Times Toronto

Manitoba.—J. P. Morgan and Co., of New York, purchased last week an issue of $2,850,000 6 per cent. five-year bonds. What price was paid cannot be ascertained as the deal was made privately. The sale of bonds by private tender has been strongly condemned by members of the Manitoba legislature and the promise was made by the government that in the future the bonds would be sold in open market by public tender, but so far such a movement has not been upheld.

York Township, Ont.—Messrs. A. Jarvis & Co., have purchased $40,000 6 per cent. 20-instalment school debentures at 98.073, which is below a basis of 6¼ per cent. Tenders received were as follows:—

A. Jarvis and Co.	98.073
C. H. Burgess & Co.	97.53
Wood, Gundy & Co.	96.13
Dominion Securities Corp.	96.26
Bank of Commerce	96.064
A. E. Ames & Co.	95.97
R. C. Matthews & Co.	95.25

New Brunswick.—The province disposed of on May 1, to a syndicate comprising A. E. Ames and Co. and Wood, Gundy and Co., Toronto, J. M. Robinson and Sons and Eastern Securities Co., Ltd., St. John, N.B., an issue of $2,800,000 6 per cent. 10-year bonds at 97.1747, which is on about a 6⅜ per cent. basis. The bids received were:—

A. E. Ames and Co., Toronto, J. M. Robinson and Sons, St. John, Wood, Gundy and Co., Toronto and Eastern Securities, St. John, 97.1747, with interest and principal payable in New York and Canada, or 96.1579, interest and principal payable in Canada only.

R. A. Daly and Co., Toronto; E. M. Rollins and Sons, Boston, Equitable Trust Co., New York, W. R. Compton Co., New York and Merrill, Oldham and Co., Boston—96.347, interest and principal payable in New York.

Harris, Forbes and Co., Boston, 87.75 in New York funds.

The bid of Harris, Forbes and Co. was ruled out, as not being in accordance with conditions under which tenders were asked, but is about equal to 96 in Canadian funds.

Alberta.—A syndicate, comprising A. E. Ames and Co., Dominion Securities Corporation and Wood, Gundy and Co., of Toronto, and the First National Co., of Detroit, secured this week $3,000,000 6 per cent. three-year bonds at a price of 101.57, which is on a basis of about 5.41. It is understood that all the bonds have been disposed in the American market to yield investors 7½ per cent.

When the province first called for tenders the issue was divided into $2,000,000 three-year and $1,000,000 15-year bonds, the first block being payable in Canada and New York, while the second was payable in Canada only. The tenders on the first block were:—

A. E. Ames and Co., Wood, Gundy and Co. and Dominion Securities Corporation, 101.57.

Canada Bond Corporation, 101.27.

R. A. Daly and Co., Toronto, E. H. Rollins and Sons, Boston, Caffin and Burr, Boston and Equitable Trust Co., New York, 100.43.

The only offer for the second block was from Ames and Co., Dominion Securities and Wood, Gundy and Co., 93.3 An offer was received from R. C. Matthews and Co., of 93.67 for $500,000, and an option on the balance.

These bids were not considered satisfactory, so arrangements were made whereby the full $3,000,000 was made payable in the United States and the maturity changed to three years. Then the deal was concluded as mentioned above.

Saskatchewan.—The following is a list of sales granted by the Local Government Board from March 20, 1920, to April 17, 1920:—

School Districts.—Govan, $2,500, Bunkerhill, $900; Regina Public School Sinking Fund Trustees. Drake, $7,000, Eagle Valley, $4,100, South Frobisher, $4,500, Root, $2,000, Meskanaw, $5,300; Waterman-Waterbury Manufacturing Co., Regina. Eldred, $2,000; G. D. Robertson, Mortlach. Milton, $1,000; C. M. Gripton, St. Catharines, Ont. Creekside, $4,000, Milestone, $2,000, Edenland, $4,500; sold locally. Waterbury, $4,000; E. Toessin. Elfros, $1,800; Canada Landed and National Investment Co., Winnipeg.

Rural Telephones.—Round Plaine, $4,500; T. K. McCallum and Co., Saskatoon. Montgomery, $3,630; Peaker Bros., Yorkton. Riverhurst, $15,000, Kerrobert Southern, $4,200, Sunbeam, $4,750, Sunnyside, $6,000; Harris, Read and Co., Regina. Macrorie, $1,000; Regina Sinking Fund Trustees. South Radisson, $3,500; E. S. Channel, Saskatoon. Idylwylde, $500; Town of Duck Lake Sinking Fund Trustees. Coronation, $650; sold locally. Round Lake, $2,500, Raymore, $1,950, Torondal, $2,000, Tableland, $7,550, Glenrose, $2,000; W. L. McKinnon and Co., Regina. Ebenezer, $24,000; Bond and Debenture Corporation of Canada, Winnipeg. Fishing Lake, $4,000; T. W. Brown, Saskatoon. Naseby, $13,600; Nay and James, Regina.

Villages.—Central Butte, $3,000; W. L. McKinnon and Co., Regina. Edenland, $500; Harris, Read and Co.

City.—Moose Jaw, $4,000; Wood, Gundy and Co., Saskatoon.

Rural Municipality.—Wallace, $3,000; Regina Public School Sinking Fund Trustees.

Irrigation Issue Postponed

Elections and issuing of bonds for the Lethbridge Northern Irrigation District will not be held for another month or more, in order to enable the farmers of the North Macleod and Barons-Carmangay districts to come in on the project. This was strongly counselled by Mr. L. C. Charlesworth, chairman of the irrigation council, when he met and discussed the matter with trustees of the irrigation district last week. It is considered that the added acreage given to the district by the entry into it of the farmers in the areas named, will add to the security of bonds and help to make them more attractive in the market. Though the enlarged area will add, it is computed, $1,500,000 to the cost of the project, making it in all $6,500,000, the distribution of same will reduce the cost, it is estimated per acre, to the farmer from $50 per acre to $43. The trustees are agreed that the addition of North Macleod and Barons-Carmangay areas will mean a few points added to the selling value of the bonds, and the general opinion is that they can be disposed of at 90 in Canadian money.

Paris Loan

Out of an issue of $20,000,000 6 per cent. 10-year coupon gold bonds of the city of Paris, France, $2,000,000 is being offered in Canada by a syndicate of French-Canadian banking houses, comprising La Banque Nationale, La Banque Provinciale du Canada and La Corporation des Obligations Municipales, Ltée, at a price of 95.37 to yield 6½ per cent.

The syndicate, it is understood, has been instructed from France to limit the amount presently to 2,000,000. The reason advanced by the Paris authorities for the curtailment of the issue is that the prices of foodstuffs, towards which the purchase of which the proceeds are to be devoted, are inordinately high at the present time. It is stated that later on a further offering of the bonds will be made as purchases are directed by the city of Paris. The debentures are redeemable in Canadian dollars in gold at maturity, and, contrary to the system established in France, are not subject to drawings and the entire issue is redeemable at the same date. In making the offering, the underwriters state that the loan cannot really be considered as a permanent debt. The proceeds will be used for buying food commodities in Canada, and when the city of Paris has disposed of the goods it will receive the proceeds thereof and use the same as a sinking fund to pay off the indebtedness.

The above bond issue has caused considerable comment in bond circles. The question asked is whether such a deal should be made, in view of the agreement between the dealers and the government in connection with the importing of foreign securities. No steps were taken to prevent it, however, and the government, no doubt, took into consideration the fact that the proceeds will remain in Canada for the purchase of Canadian products.

CORPORATION SECURITIES MARKET

Four Millions of Abitibi Bonds Sold—Three New Stock Offerings—New Capital Issue by Dominion Engineering Company

TRADING in outstanding bonds on the Canadian stock exchanges for the week ended May 5, was light, with the exception of a few issues. Wayagamack furnished sales of 19,500, while Canada Cement, Cedar Rapids and Dominion Iron and Steel were active with sales of 11,000, 10,500 and 10,000, respectively. Most issues were steady, but in a few cases fractional losses were made. In all cases the close was fairly strong.

The Royal Securities Corp. have nearly disposed of the $4,000,000 6 per cent., consolidated refunding 20-year gold bonds of the Abitibi Power and Paper Co. No public offering has been made. The proceeds of the issue will be applied to retiring the debenture stock and the convertible mortgage debentures while the remainder will be devoted to new constructions now in progress.

New Stock Offerings

Included in the new stock offerings this week is that of the Commercial Financial Corp., Ltd. An issue of $600,000 7 per cent., cumulative preferred shares is being made by the Standard Securities Corp., at par, with a bonus of common stock.

The Commercial Finance Corp., Ltd., is a corporation for the financing of commercial paper. The powers contained in its Dominion charter are very wide, but the activities of the company have been confined to the discounting of the notes that arise out of the sale of automobiles and trucks and the profitable placing of insurance thereon. The board of directors includes: Sir Henry M. Pellatt, vice-president, Dominion Steel Corp., president; Chas. Buckham, general manager, Sterling Trusts Corp., vice-president; A. E. Dyment, director of the Royal Bank of Canada, treasurer; A. F. Irwin, director of Western Motors, Ltd., manager.

Messrs. Edward Brown and Co., are offering $325,000 7 per cent., cumulative preferred stock of Allen's Winnipeg Theatres, Ltd., at par, with a bonus of 25 per cent. of common stock.

The Farmers' Packing Co., Ltd., of Manitoba, Winnipeg, Man., which operates a plant at St. Boniface, is receiving applicantions for $1,500,000 capital stock.

Prospective Issues

Shareholders of the Dominion Bridge Co. at their special general meeting in Montreal on May 3, approved unanimously the plan of the directors to form the Dominion Engineering Works, Ltd., for the purpose of taking over the present bridge subsidiary, the Dominion Engineering and Machinery Co., Ltd., which has been incorporated with a capital of $5,000,000 8 per cent. cumulative preferred stock, and a like amount of common, making $10,000,000 in all; $4,000,000 par value of each of the securities will be issued at once. New and important interests will become associated with the bridge company officials in the undertaking, the board of directors of which will include Sir Herbert Holt, George Chahoon, Jr., Julian C. Smith, Howard Murray and H. Birchard Taylor, the latter of whom is vice-president of the Wliliam Cramp and Sons, Ship and Engine Building Co., from whom the Canadian undertaking has secured the exclusive use in the Dominion and elsewhere in the British Empire of its designs for water wheels and other hydraulic machinery.

The shareholders of the Winnipeg Electric Railway Co., at a meeting in Winnipeg on May 3, authorized the issue of $3,000,000 worth of preferred stock, with which the company intends to wipe out a floating liability approximating that amount which was incurred during the war.

The shareholders of the Dominion Steel Products Co., at a meeting held in Brantford on May 4th, approved of an increase in the capital stock from $1,000,000 to $1,500,000 to pay for extensions to the plant, including foundry and machine shop additions.

MERGER STOCKS FEATURE ON LOCAL EXCHANGES

Dominion and Nova Scotia Issues Made Advances—New York Buoyancy Had Effect of Strengthening Canadian Market

FOLLOWING a period of irregularity and unsteadiness, the New York market towards the end of the week ended May 5th, strengthened considerably. The easier tone to call money influenced an improvement in prices, while favorable trade conditions and a better industrial situation were also effective. At the close of the week most of the weak issues had recovered to a large extent, and the opinion was that the general trend of prices was upward.

Stocks on the Canadian exchanges for the week ended May 5th, were generally stronger, and a distinctly better tone was visible. The chief encouragement was given by the rally in New York, while news of the big new steel consolidation was responsible for activity and advances in the cases of some of those companies interested. In Toronto the most active stock was Brazilian, with sales of 1,620, but weakness was prevalent the greater part of the week. In the merger issues, Dominion and Nova Scotia Steel were strong, closing with gains of 5 and 6 points, respectively. Canada Steamships was weaker, losing 1¾ points during the week. Steel of Canada also lost a point at the close. Royal and Merchants banks were active and strong, still responding to the new stock announcements, the former closing with a gain of ½ point. Bank of Montreal was weak, being bid at 217 at the close.

The Montreal market, like Toronto, reflected the New York buoyancy. Merger stocks were prominent, and where the tendency was to weaken, the statement of the standing of the preferred stocks taken in by the amalgamation, giving a clearer conception regarding the deal, had the effect of strengthening Canada Steamships which was weak at 76½, gained ½ point at the close. Dominion Steel, which inclined to the weak side, also gained substantially at the close. In other stocks, Spanish River, both common and preferred; National Breweries, Laurentide and Atlantic Sugar, were weak. At the close, however, in all cases fractional gains were made. Merchants, Montreal and Royal were strong in the banking section. Brompton was the most active issue in industrials, furnishing sales for the week of 10,665. Trading in other stocks was of a lighter volume than in previous weeks.

FIRST FEDERAL FOREIGN BANKING ASSOCIATION

J. E. Aldred and H. J. Fuller are associated with a banking institution now being organized in New York with the above name. It will have a capital of $2,100,000, and is the first to apply for a charter under the new Edge bill. One of the principal functions of the new institution will be to finance foreign trade under the supervision of the Federal Reserve Board, and to assist manufacturers and producers in the building up of European trade connections. The capital of the bank is presently composed of 21,000 shares of a par value of $100, of which 1,000 are founders' or managers' shares. The stock has all been underwritten at $105 per share and there will be none offered to the public. It is expected that the bank will be ready to do business about the first of June next.

The following banks and financial houses, on behalf of manufacturers in their respective localities, are associated in the organization of the First Federal Foreign Banking Association: Aldred and Co., New York; Bank of the Manhattan Co., New York; The New York Trust Co., New York; The Liberty National Bank, New York; Tucker, Anthony and Co., New York and Boston; Citizens' Commercial Trust Co., Buffalo; American Trust Co., Boston; Merchants National Bank, Worcester; Chicopee National Bank, Springfield Mass.; Commercial Trust Co., Philadelphia; The First Bridgeport National Bank, Bridgeport.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

DISCUSS TAXATION OF UNLICENSED INSURANCE

Licensed Companies Maintain That Those Unregistered Should Not Have Unfair Advantage—Canadian Manufacturers Oppose Suggestion

COMPANIES licensed to do insurance business in Canada are required to pay taxes, based on premium income, and they contend that some means should be devised whereby insurance companies which are not registered here, and which do not pay such taxes, should be placed on a similar footing. The Dominion government has, it is understood, considered this question. The All Canada Fire Insurance Federation, Montreal, held a special general meeting on April 27th to consider the proposal, and passed the following resolution:—

"That this body learns with satisfaction of the proposal to impose a tax on fire insurance premiums paid to unlicensed companies, as it is felt that no class in the community should escape bearing its full share of the state's financial obligations, which immunity, those patronizing unlicensed insurance companies, have enjoyed in the past, to the detriment of those contributing through premiums paid to the licensed companies."

The president of the Federation, T. L. Morrisey, points out, in a letter sent to boards of trade throughout Canada, that "those who avail themselves of this unlicensed insurance escape contribution to the burden of taxation borne by those who obtain their insurance from companies duly licensed, complying with the law of the country and forming part of the body politic, with all its responsibilities."

Opposition to the Tax

Many manufacturers, who write their business with these companies, are opposed to the tax. At a meeting of the premium payers' committee, formed under the auspices of the Montreal branch of the Canadian Manufacturers' Association, it was decided to send a committee to Ottawa to interview Sir Henry Drayton, Minister of Finance, in regard to the proposed 15 per cent. tax on premiums paid to non-registered fire insurance bodies. The committee was composed of the following: Sir Charles Gordon, A. K. Cameron, R. M. Ballantyne, C. D. Dettmers, E. C. B. Fetherstonhaugh, A. O. Dawson, R. H. McMaster, T. H. Wardleworth, Thomas M. Barrington and Mr. Lindsay.

Representatives of the unlicensed companies are themselves opposing the tax. A delegation from the American companies arrived in Montreal on April 28th. It was composed of Chas. H. Smith, vice-president of the Blackstone Mutual Fire and Merchants' Mutual Fire Insurance Companies, of Providence, R.I.; George S. Young, secretary-treasurer, Arkwright Mutual Fire Insurance Co., Boston, and Judge Felix Herbert, legal adviser to these companies.

ADDITIONAL INFORMATION CONCERNING FIRES

Burlington, Ont.—April 20—Barn owned by R. W. Dingle was damaged. Estimated loss on stock, $800, and on building, $1,200. Insured in the Perth Insurance Co. for $150 on stock and $150 on building.

Gananoque, Ont.—April 1—Hotel building and contents of W. F. Stevens was damaged. Cause, supposed defective electric wire. Estimated loss on stock, $1,500; on building, $5,500. Insured in the Hartford Insurance Co. for $1,250 on contents, in the British American Insurance Co. for $3,200 on contents, and in the Great American Insurance Co. for $6,500 on building.

Junetown, Ont.—April 4—Cheese and butter factory, owned by William Flood, was destroyed. Estimated loss on stock, $3,000, insurance, $2,000; estimated loss on building, $4,000, insurance, $2,000.

Lakefield, Ont.—April 11—The electric light plant owned by S. R. Liffott was destroyed. Cause, probably heated bearings and spontaneous combustion. Estimated loss, $5,541. Insured in the Gore District Mutual Fire Insurance Co. for $1,750.

Manitoba.—According to the fire chief's report, the fire loss of the province in March was $175,996, as compared with $104,523 for the corresponding month in 1919, showing an increase in the fire loss of $71,473. Winnipeg's fire loss for March was $97,956 in sixty-four fires, as compared with $34,345 in March, 1919, in fifty-eight fires.

Montreal, Que.—April 20—Garage and equipment of the J. B. Baillargeon Express, Ltd., was damaged. Estimated loss on equipment, $9,000; on building, $1,000. Insured in the following companies on stock and equipment: British Empire Underwriters' Agency, $2,000; Union Assurance Society, Ltd., $3,000; the Strathcona Fire Co., $14,500; the Royal Insurance Co., $3,000; Mount Royal Assurance Co., $10,000; British Traders Insurance Co., $2,480. Insurance on building in the British Colonial Fire Co., $15,000.

Montreal, Que.—In the fire which occurred on May 7th on the premises of the Real American Hat and Cap Co., St. Helen Street, the following companies are interested: Union of Canton, $8,000; Northern, $6,000; Liverpool and London and Globe, $19,500; Ætna, $6,500; Continental, $5,000; National of Paris, $5,000; General of Perth, $10,000; Western, $20,000; General of Paris, $7,500; General Accident, $7,500. Total, $95,000. Loss, about 30 per cent. The fire communicated with the stock of W. H. Barry and Co. (ribbons). Insurance as follows: Guardian, $20,000; British Empire, $20,000; Phœnix of London, $10,000; General of Perth, $5,000; Norwich Union, $15,000; Royal, $15,000; Scottish Union, $15,000. Total, $100,000. Loss about $12,000. Insurance on building (Robertson): Scottish Union, $20,000; Alliance, $20,000; Hartford, $16,000. Total, $56,000. Loss about $3,000.

Souris, Man.—April 4—General store of J. H. More was destroyed. Estimated loss on stock, $35,000; on building, $5,500. Insurance on stock, $25,500, and on building, $4,500.

St. John, N.B.—April 27—Building occupied by Dearborn and Co., Ltd., wholesale grocers, which was damaged, is insured in the following companies on building or stock: British Empire, $1,000; Great American, $2,000; Norwich Union, $2,000; National, $3,500; Acadia, $3,000; Liverpool, London and Globe, $5,000; Rochester Union, $1,000; Montreal Underwriters, $1,500; Employers' Liability, $2,500. On stock in main building: Toronto Underwriters, $1,500; Employers' Liability, $4,500; Providence-Washington, $2,500; Continental, $3,500; Quebec, $6,000 On main building, Prince William Street: Providence-Washington, $1,500; Continental, $3,500; Montreal Underwriters, $3,000; Quebec, $3,000; Liverpool and London and Globe, $5,000. Main building on Water Street: National, $2,000; Providence-Washington, $1,000; Continental, $2,000. On spice building and contents: Rochester Underwriters, $1,000; British Empire, $1,000; Great American, $2,000; Norwich Union, $2,000; National, $2,500; Ætna, $3,500; Acadia, $3,000.

Toronto, Ont.—April 5—The Runnymede Iron and Metal Co. was damaged. Estimated loss on stock, $5,000; building, $1,500. No insurance.

Watrous, Sask.—On the 1st instant the general store of Nemetz Bros. was totally destroyed. Insurance as follows: Glens Falls, $2,500; Liverpool and London and Globe, $3,000; Boston, $1,500; Providence-Washington, $2,000; Hampshire, $1,500; London and Lancashire, $1,000; Guardian, $3,000; State of Pennsylvania, $2,500; Union of Canton, $2,500; North Empire, $3,000; Northern, $3,000; Norwich Union, $1,000; Springfield, $5,000. Total, $31,500. On building: Merchants Fire, $3,000; London Guarantee, $5,000. On fixtures: British Colonial, $3,000. Total, $11,000.

Westport, Ont.—April 10—Grand Theatre, owned by Steele Brothers, was destroyed. Estimated loss on stock, $1,810, and on building, $5,200. Insured in the Merchants Fire Insurance Co. for $500 on stock and $2,000 on buildings; in the London Mutual Fire Insurance Co. for $250 on stock and $1,750 on building.

Investments and the Market

Demoralization of Wood Distillation Industry at the Termination of War Affected Standard Chemical Company—Profits of Price Brothers Represent Record in History of the Company—Spanish River Will Pay Preference Arrears—Canada Steamships Sells Some of Its Lines

Southern Canada Power Co.—For the six months ended March 31st, 1920, gross earnings of the company were $337,616, an increase of $41,576, compared with the same period last year. After deducting $168,500 for operating expenses and cost of purchased power, the net remained at $169,115, an increase of $30,414.

Grand Trunk Railway Co.—At the ordinary spring meeting of the company in London, Eng., last week, Sir Alfred Smithers, chairman, maintained that the people of Canada had obtained an advantageous bargain. In replying to some discussion, Sir Alfred said that although there would be some sufferers, the directors in taking the course adopted, had averted a real catastrophe.

Detroit United Railway Co.—A suit has been filed in the United States District Court by the company, asking that the municipal street railway ordinance passed on April 5th, be declared invalid and void, and that city officials be enjoined from proceeding under its authority. The company claims that the ordinance is invalid in that it contemplates seizure of part of the company's property without due process of law. The court is asked to restrain city officials from taking any steps toward the sale of authorized street railway bonds and from acquiring or removing any of the existing street railway lines now operated as part of the D.U.R system.

Canada Steamship Lines, Ltd.—The company has disposed to Furness, Withy and Co., Ltd., the Quebec Steamship Co., and its line from New York to the West Indies. It is thought in Montreal that the plans of the Canada Steamship in connection with the new big merger will mean that its operations will be confined entirely to the St. Lawrence and Upper Lakes route and across the Atlantic from Canadian to British and European ports, and it was on this account that advantage was taken of the favorable opportunity to dispose of the line from New York to the West Indies. The steamships on the service to Bermuda were disposed of to the same company some time ago.

Trinidad Electric Co., Ltd.—Net earnings of the company for the year ended December 31, 1919, were $26,301, as compared with $52,216 for the previous year. W. B. Ross, president, in his report, calls attention to the increased cost of materials and labor, and the way they affected the earnings of the company. He hopes that the government in Trinidad will permit the company to increase the fares.

Operating expenses for the year amounted to $262,185, the highest in any year yet. Passenger receipts were $171,738 and light and power earnings $136,366. In the balance sheet under assets the principal items are: Property and plant, $2,076,800; accounts receivable, $30,088; cash balance, $30,296. Under liabilities: Debentures, 5 per cent., $720,000; bills payable, $10,000; surplus account, $247,736.

Demerara Electric Co., Ltd.—The report of the company for the year 1919 shows surplus earnings of $25,008, as against $26,627 for 1918. W. B. Ross, president, in his report, said:—

"The cost for fuel and general supplies which your directors pointed out last year was abnormal, shows no sign of improvement. In fact, costs of supplies and labor are continuously mounting and to this must be added the very extraordinary rate of exchange which is a great handicap in the purchasing of supplies from the United States, as well as the transferring of money to the head office, and it has been impossible to obtain authority from the municipality to increase the tram fares. The directors are unable to make any statement with regard to the future of the company and the shareholders can only wait the course of events."

The balance sheet shows current assets of $83,125, as against current liabilities of $23,777. The surplus balance amounts to $134,919.

Thompson-Krist Mining Co., Ltd.—The company has called a meeting of the shareholders for May 10 next, to consider and ratify the action of the board of directors who have entered an agreement with the Porcupine-Crown and the Northcrown Mining Companies. Under the arrangement between these companies, a new organization is to be formed called the Northcrown Mining Co., with a capital of $3,000,000. There will be a pooling agreement between the Porcupine-Crown Mines, Ltd., and the Thompson-Krist Mining Co., in which the companies will pool their respective shares of the capital stock of the new company—the Northcrown Porcupine Mines. To the new company the Porcupine-Crown will sell 40 acres, together with equipment and supplies, and the Thompson-Krist Co. will convey to the new company 120 acres of mining land adjoining the above claim. While the latter company will pay $10,000 in consideration of 999,997 shares of the capital stock, the former company will pay $20,000 for 1,999,997 shares.

This proposed combination is the outcome of negotiations covering the past few months. It will combine two adjoining properties, and will make available for the development of the Thompson-Krist Mining Co. the mining and milling plant of the Porcupine-Crown Mines, Ltd.

Price Brothers & Co., Ltd.—Profits of the company for the year ended February 28 last, amounted to $2,055,782, an increase of $561,821 over the 1919 showing, and $681,000 in excess of that of the preceding year. This represents a record in the history of the company. Owing to the fact that there was issued during 1919 over $3,500,000 in new stock, of which $1,534,200 went to shareholders in the form of a bonus and $2,000,000 in payment of new properties acquired, the outstanding share capital of the company stood at the end of its last fiscal year at $8,534,200, compared with $5,000,000 at the close of 1918. The earnings available for application to the common shares, therefore, show a smaller ratio than in the 1918 statement.

After the payment of bond and note interest charges, there remained a balance of $1,621,806, against $1,053,984 in 1918, and $711,452 in the 1917 report. Allowing for the increased capital for the full period—which, however, was not available until well on in the period—earnings on the capital stock of the enterprise were slightly over 19 per cent., compared with 21.8 per cent. last year and 14.2 per cent. in the previous one.

During the year there was distributed to shareholders the amount of $690,684, in the form of dividends and bonus, compared with $400,000 in the two former periods. An employees' pension fund was also inaugurated during the period, the sum of $150,000 being set aside out of earnings for this purpose. In addition, a special distribution of $1,540,000 out of the surplus earnings of the company accumulated prior to January 1st, 1917, was made. After all deductions there remained a surplus in profit and loss account at the end of the year amounting to $2,115,346, compared with $2,874,234 in 1918, and $2,220,239 at the end of the preceding year. An increase of $1,373,000 in bank loans somewhat offset the

(Continued on bottom of next page)

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Tuesday, the First Day of June next, to Shareholders of record of 30th April, 1920.

By Order of the Board.
FREDERICK WILLIAMS-TAYLOR, General Manager.
Montreal, 20th April, 1920. 131

THE ROYAL BANK OF CANADA

DIVIDEND No. 131

Notice is hereby given that a Dividend of Three Per Cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the first day of June next, to shareholders of record at the close of business on the 15th day of May.

By Order of the Board.
C. E. NEILL, General Manager.
Montreal, Que., April 16th, 1920. 133

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 133

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 1st June, 1920. The Transfer Books of the Bank will be closed from the 17th May to 31st May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.
Toronto, 23rd April, 1920. 132

UNION BANK OF CANADA

DIVIDEND No. 133

Notice is hereby given that a dividend at the rate of 10% per annum upon the Paid-up Capital Stock of the Union Bank of Canada, has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after the first day of June, 1920, to shareholders of record at the close of business on the 15th day of May next.

The Transfer Books will be closed from the 17th to the 31st day of May, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, April 22nd, 1920.

THE MERCHANTS BANK OF CANADA
ANNUAL MEETING

The Annual General Meeting of Shareholders, for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the second day of June next. Chair will be taken at 12 o'clock, noon.

By order of the Board.
D. C. MACAROW,
General Manager.
Montreal, 27th April, 1920. 138

INVESTMENTS AND THE MARKET

(Continued from preceding page)

improved cash position. Bank loans at the end of February, 1920, amounted to $1,823,000.

Standard Chemical Co., Ltd.—Gross profits of the company for the year ended December 31, 1919, were $118,607, The sum of $200,000 was transferred to profit and loss account from an inventory revenue fund previously provided out of profits, making a total of $318,607. Out of this $150,000 was applied to depreciation of plants, $86,927 was paid in interest in debentures and bank loans, $60,211 went in maintenance and improvements, leaving a balance of $21,468, which was carried to the surplus account. In his report to shareholders, Mr. L. M. Wood said:—

"Closely following the termination of the war, the wood distillation industry became badly demoralized. The great demand for wood products, occasioned by the colossal munition program of the Allies, created large stocks in the hands of governments, manufacturers of explosives and others, which had to be liquidated during a period when normal consumers were endeavoring to reopen their pre-war business. This situation, coupled with the unusual accumulations of charcoal, caused the whole wood distillation industry in America to be shut down to about 30 per cent. of its normal capacity during the spring and summer months. During the year the funded and deferred liabilities were reduced $41,362 and the current liabilities $545,823, a total reduction of $587,185.

"A satisfactory physical and financial position is the goal toward which your board has been striving for the last five years. Although to accomplish this it was necessary to defer dividends, your directors feel sure that you will appreciate that no other course could have been prudently adopted. From now on, after reasonable provision has been made for depreciation and improvements, the profits will be available for dividends instead of having to be devoted to the rehabilitation of the company, which in 1914 was on the verge of liquidation.

"Market conditions affecting the products of the company have improved during the past six months, and steps are now being taken to bring the operations of the factories up to their full capacity. Conditions are now favorable and should continue to be so during the current year, as a result of which substantial profits may be expected."

As 75 per cent. of the share capital is held by English shareholders, a London committee has been formed, comprising W. S. Poole, John Cross and W. W. Boulton.

Spanish River Pulp and Paper Co.—A circular has been mailed to shareholders of the company calling a meeting for June 23rd, to ratify the proposal of the directors in connection with the payment of dividend arrears on preferred stock. The circular reads in part as follows:—

"During recent years a considerable part of the company's earnings has been utilized for capital expenditure, resulting in an increased output of over 50 per cent., and materially adding to the earning power of the plants. Had this money been paid to shareholders by way of dividends, the company would not be in the strong position it now finds itself. Even if the situation could be met by distribution over the next few years cash payments in liquidation of the arrears of these dividends, the shareholders would meantime continue to lose interest on the amount involved.

"The accumulated and unpaid dividends (exclusive of the vouchers above referred to), as of June 30th, 1920, will amount to 42 per cent. of the total issue of preference shares. Your directors, therefore, believe it to be in the best interests of all the security holders of the company, and they recommend, that the present issue of preference stock be increased by an amount equal to the accumulated and unpaid dividends as at June 30th, 1920, including the voucher.

"Providing that the holders of preference stock now issued accept this plan, a dividend of 42 per cent. and a further dividend of 7 per cent. to cover the outstanding 'dividend vouchers' will be declared and be made payable in preference stock at par, to the registered holders of preference stock as of June 30th, 1920, in full satisfaction of the accumulated and unpaid preference dividends on their shares to that date.

"It will be remembered that in 1915 an arrangement was made with the bondholders that in consideration of certain concessions made by the latter it was agreed that thereafter out of any sum available for dividends to shareholders 10 per cent. of the same should be paid to the bondholders. Under the terms of the present scheme, this 10 per cent. will be paid in preference stock. Your directors confidently expect that if this plan is accepted and the company's operations continue as at present, the future earnings will be sufficient to warrant the payment in cash of regular quarterly dividends on the total issue of preference stock, accruing from July 1st, 1920. The approval of the above proposal will also leave the company free to consider the payment of dividends on its common stock."

Reference was also made to the disposal of the talons and notes representing deferred interest on the first mortgage bond and second mortgage notes by recent financing, thus enabling the directors to submit for consideration a plan for payment of arrears of dividend on preferred since July 1st, 1914, as well as the dividend voucher recently issued covering the previous year with respect to the original issue of $3,000,000.

RECENT FIRES

Sanitorium at Windsor is Heaviest Loss this Week—Business Block in Carmangay, Alta., is Burnt—Elevator Destroyed at Killam, Alta.

Belleville, Ont.—April 28—Dairy of G. A. B. Gay, together with equipment, was destroyed. Insurance carried, $4,000.

Beulah, Man.—April 29—Presbtyerian church was destroyed. Estimated loss, $3,000. Insurance on building, $2,000.

Bordeaux, Que.—April 29—Garage belonging to A. Lavoie was damaged. Cause, lantern explosion. Estimated loss, $20,000, partly covered by insurance.

Bridgeburg, Ont.—April 28—Residence of J. H. Fitzgibbon, Niagara Street, was damaged. Loss is estimated at $2,500, and partly covered by insurance.

Burnaby, B.C.—April 24—Chicken house, property of F. C. Baker, Telford Street, was destroyed and barn damaged. Estimated loss, $1,000.

Carmangay, Alta.—April 30—Business block was damaged. Estimated loss, $50,000.

New Liskeard, Ont.—May 5—Sawmill at Matagami Lake, owned by S. McChesney, destroyed. Loss, $10,000. No insurance.

Fort William, Ont.—April 28—Residence of Echia Paul was damaged. Estimated loss, $400. Insurance, $1,000.

Fredericton, N.B.—April 28—Residence of Alfred Mills, Nashwaaksis, was destroyed. Estimated loss, $1,500. Insurance, $900.

Killam, Alta.—April 28—Pioneer elevator was destroyed, together with a large quantity of grain. Total estimated loss, $100,000, with about 50 per cent. insurance.

Montreal, Que.—May 4—The Imperial Tobacco Co. of Canada, Ltd., 900 St. Antoine Street, was damaged.

Pembroke, Ont.—April 28—Residence of Sergt.-Major Flinter destroyed. Three fatalities.

Port Arthur, Ont.—April 30—The Continental Hotel, corner of Cumberland and Victoria Streets, was damaged. Estimated loss, $5,000. Insurance carried, $7,000.

Sydney, N.S.—April 30—Thompson-Christie Block on Commerical Street was damaged. Estimated loss, $40,000. Insurance carried, $12,000.

Shannonville, Ont.—May 1—Farmhouse and barn of A. Brown, 2nd concession of Thurlow, was destroyed. Loss partly covered by insurance.

Toronto, Ont.—April 29—The Exclusive Skirt Co., 73 Adelaide Street, was damaged. Estimated loss, $1,000.

May 2—Residence of E. Rostock, 2440½ Queen Street, was damaged to the extent of $500. Dry goods store of Joseph Libman, 112 Dundas Street West, was damaged. Estimated loss, $3,400. Insurance, $2,800.

Vancouver, B.C.—April 24—Great Western Metal Smelting Co. was damaged. Cause, sparks from a metal furnace. Estimated loss, $600, covered by insurance.

Windsor, Ont.—April 29—Essex County Sanitorium at Union-on-the-Lake was destroyed. Estimated loss, $200,000.

(For Additional Information see page 45)

A bill was introduced into the Ontario legislature on April 26th to place the fire marshal's office under the supervision of the provincial treasurer instead of the attorney-general.

National Fire Protection Association Annual

Electricity a Frequent Cause of Fire — Further Investigation of Grain Dust Explosions Urged — Five New Chapters of Association Formed, and Membership Shows Large Gain—Fire Underwriters' Uniformity Association

THE twenty-fourth annual meeting of the National Fire Protection Association was held in Chicago, May 4th to 6th. Only a few Canadians were present. The membership of the association made a gain of over twenty-five per cent. last year; the number of new associate members secured was 1,095, or considerably more than the objective of 1,000. The reports of the officers showed a rapid increase in expenses, and it was agreed unannmiously that the annual dues be increased from $30 to $60 per year in the case of active members, and from $6 to $10 in the case of associate members.

F. J. T. Stewart, president, in the course of his address, said:—

"In addressing you at the last annual meeting, it was pointed out that our neighborly enemy—fire—might still be expected to wage war upon us. This, of course, you may say was only to be expected. However, it might interest you to know that recently this neighborly enemy has actually advanced his lines to the extent that the fire loss has been higher during the past few months. This seems to bear out the opinion expressed last year that our sense of patriotism had carried us so far in guarding against the occurrence of fire as to result in a moderate loss during the war period, when an abnormally high loss was greatly to be feared, and even expected. On the other hand, we now hear general criticism of the extent to which we have reacted and become careless in many ways, such as reckless spending and the like. The state of mind indicated by such conditions might logically be expected to result in a corresponding relaxation in our anxiety to prevent fires which has been reflected in an increased loss during recent months. The ground which we have lost, however, should only serve as a timely warning that relaxation is dangerous, and that we must plan to offset the advance of our friendly enemy—fire. I am convinced that we were only saved from an abnormal fire loss during the time we were at war by the great patriotic impulses of our people, their attention having been called to the necessity of preventing fires to win the war. I further believe that if we may expect to hold in check the fire loss in years to come, that appeals for fire prevention must have some relation and be more or less associated with an appeal for patriotism and loyalty to our form of government as opposed to radicalism of the kind that has recently come to our attention."

Mr. Stewart pointed out the prevalence of fires due to electricity, and urged greater carefulness in the installation and use of electrical appliances. Continuing, he said: "You may be interested to know that plans for an American standards organization, referred to at some length last year, have taken definite shape, the scope of the American Engineering Standards Committee having been already broadened along the lines which I then described. Our organization is already co-operating. The importance of the work of our special committees having to do with the preparation of standards is thereby increased."

Reports and Resolutions

Resolutions, embodying the declaration of principles previously set forth by the association, were adopted. W. E. Mallalieu, general manager of the National Board of Fire Underwriters, presented a resolution urging Congress to make an appropriation to continue the investigation of grain dust explosions which has been carried on by the Department of Agriculture.

The report of the treasurer showed receipts for the year of $34,778, of which $23,978 was for membership dues. Franklin H. Wentworth, the secretary, reported that five new chapters are in operation: Spokane, Seattle and Tacoma, Wash.; Portland, Ore., and San Francisco, Cal.; and two more are in prospect—Los Angeles, Cal., and Salt Lake City, Utah. The membership, as of May 1st, was reported at 135, a gain of eight, and associate membership 4,224, a gain of 1,095 for the fiscal year. A number of technical reports were presented and discussed. The delegates attended the first showing of the new three-reel fire prevention motion picture, "America's Greatest Crime," produced by the Ince studios at Los Angeles.

Among the active members reporting on their fire prevention work during the year were the National Lumber Manufacturers' Association, the Motion Picture Industry Association, the American Gas Association, the American Institute of Architects, and the National Association of Insurance Agents.

Prominent men present were W. E. Mallalieu, general manager of the National Board of Fire Underwriters; O. B. Ryon, general counsel of the National Board; Prof. Ira Woolson, Columbia University; John G. Gamber, State Fire Marshal of Illinois; Capt. Conway, Cincinnati Fire Prevention Bureau; J. C. McDonnell, chief of the Chicago Fire Prevention Bureau; Rudolph P. Miller, of the New York Building Department; John H. Kenney, of Baltimore; Gorham Dana, Boston; I. G. Hoagland, of the Automatic Sprinkler Association; Edward R. Hardy, of the New York Board; W. H. Merrill, Jr., president of the Underwriters' Laboratories; H. O. Lacount, of the Associated Factory Mutuals, and representatives of the various boards, bureaus and state inspection offices.

Uniformity Association Meeting

The Fire Underwriters' Uniformity Association held its annual meeting on Monday in Chicago, preceding the National Fire Protection Association gathering. A uniform sprinklered risk report was adopted as a result of several years' work. Madison F. Welch, of the National Liberty at Chicago, delivered an address on "Aviation Insurance." Officers were elected for the ensuing year as follows: President, John H. Kenney, Baltimore; vice-president, William S. Boyd, Chicago; secertary-treasurer, Charles H. Patton, Cleveland.

FACING WORLD'S GREATEST FINANCIAL CRISIS

Sir Robert Kindersley, Governor of Hudson's Bay Co., Warns of Danger of Inflation—Seeding Now Well Under Way in West

(Special to *The Monetary Times.*)

Lethbridge, May 13th, 1920.

SEEDING is in full swing throughout southern Alberta, 40 per cent of the wheat seeding is done in the Lethbridge district, and a most optimistic feeling prevails that southern Alberta is going to produce a crop this year. The weather this week is still unsettled, but considerable progress was made last week in many districts in Alberta when the weather was ideal. There is ample moisture in the ground to give the crop a good start. One day last week the great Noble Foundation Farming Organization seeded twelve hunderd acres of wheat in one day, and have now over ten thousand acres seeded, and will seed ten thousand more.

Irrigation projects around Lethbridge are making progress, and the Lethbridge northern scheme will go ahead this year. President Marnoch, of the Board of Trade, is well satisfied at the spring outlook. He pointed out that Lethbridge stands to be the centre of about one and a half million acres of irrigated land. This in the next few years will mean a great deal to Lethbridge.

The government distribution of seed grain for settlers' spring requirements throughout Alberta is now completed. It is estimated by officials that the seed supplied will represent a money value of $750,000, which is about twice the expenditure of last year.

Present Prosperity is False

Sir Robert Kindersley, Governor of the Hudson's Bay Co., which is now celebrating its 250th anniversary in western Canada, in addressing the Calgary Board of Trade this week, warned against a financial crisis in these words: "Unless we stop sailing along the smooth waters of this false prosperity, brought about through inflation, which gives the world an additional purchasing power which is unreal, I say, if we don't stop now, we shall be faced with the most appalling financial crisis in the next five or six years that the world has ever seen. As a trader I speak to you, because I know, and I tell you that only one way remains for us to reach the goal we seek—prosperity and happiness—and that is for each and every one to devote their energies to a campaign of real productivity and for the elimination of consumption of all luxuries."

Sir Robert Kindersley was chairman of the War Savings Committee in England during the war, and, in addition, is a director of the Bank of England, thereby being in a position to speak with authority on the financial situation of the empire.

Live Stock in Alberta

Live stock losses in Alberta on account of the past severe winter will reach a 7 or 8 per cent loss. There has been a tendency to greatly exaggerate the figures. Mr. Marnock, of Lethbridge, pointed out rather an unusual situation in southern Alberta. He said last year there was more live stock to feed than there was feed for, whereas this year he predicts they will have more feed than live stock can use. Mr. Marnock thinks the co-operation of the banks will be required in getting more breeding stock back into the country.

* * *

At the annual general meetng of the Hamilton, Ont., Bank Clearing House, all the banks were represented, and R. R. Wallace was in the chair. The following were elected a board of management: F. S. Glassco, manager, Imperial Bank, chairman; D. B. Dewar, manager, Canadian Bank of Commerce, vice-chairman; John Stephen, manager, Bank of Toronto; R. H. Harvey, manager, Royal Bank of Canada; E. V. Illsey, manager, Standard Bank of Canada; A. C. Rowe was reappointed manager and secretary-treasurer.

LABOR SHORTAGE WILL RESTRICT PRODUCTION

Manitoba Loan of $2,850,000 Spent on Telephones, Parliament Buildings, Good Roads, Power, Soldiers' Relief and Live Stock Purchase and Sales

(Special to *The Monetary Times.*)

Winnipeg, May 14th, 1920.

THE Manitoba government spent the $2,850,000 it realized from the sale of bonds in New York several weeks ago for the following purposes: Manitoba Telephone Commission, $1,250,000; new parliament buildings, $750,000; good roads, $250,000; Manitoba Power Commission, $250,000; Soldiers' Taxation Reilef Act, $250,000; live stock purchase and sales, $100,000. Total, $2,850,000.

Wheat Lands Will Be Uncultivated

Only about 40 per cent. of Manitoba's wheat lands can be worked this season unless there is a marked increase in the number of people willing to go to work on farms during the next few weeks, Manitoba farmers say. Seeding must be completed shortly in order to obtain the best results, and there are not enough men to get the seed in. The Dominion Employment Bureau in this city is continually besieged by farmers seeking for help, and it is very slow in coming.

* * *

CHANGES IN ONTARIO SUCCESSION DUTIES MODERATED

Proposed increases in Ontario succession duties, reported in *The Monetary Times* recently, have been thought too drastic by Hon. Peter Smith, provincial treasurer, and reductions have been made accordingly. Where the estate goes to one person, the percentage is lowered somewhat. Where the amount exceeds $50,000, and not $100,000, the first rate suggested was 2½ per cent. It will now be 1½ per cent. for amounts exceeding $50,000, and up to $75,000. From $75,000 up to $100,000 it will be 2 per cent. Then the rate goes up, every fifty thousand dollars, instead of every $100,000, until the sum of $300,000 is reached. After that the percentage is decreased on the large amounts, till, when the large sums are reached, the percentage is cut in half.

Where the estate does not pass to a member of the family, but goes to relatives, the fees have been changed. In this there is no change till the estate exceeds $50,000, and then it is increased on amounts between $50,000 and $75,000, but between $75,000 and $100,000 there is a slight reduction. The reduction is then gradually increased until, where the estate exceeds $1,000,000, the tax is only 17 per cent., instead of 23 per cent.

Where the estate goes to one person who is not a direct member of the family, the surtax starts on amounts exceeding $10,000, instead of, as before, amounts exceeding $25,000. After that the tax is about cut in half, so that in the case of a person getting an income exceeding $150,000, and not $250,000, the tax will be 3½ per cent., instead of 10 per cent.

Where the estate is left to a stranger in blood to the deceased, a few of the changes are:—

Exceeding $5,000 and not $10,000, first tax, 10 per cent., new tax 7½.

Exceeding $10,000 and not $50,000, first tax, 15 per cent., new tax 12.

Exceeding $50,000 and not $100,000, first tax, 20 per cent., new tax 15.

Exceeding $100,000 and not $200,000, first tax 25 per cent., new tax 17½.

Exceeding $200,000 and not $300,000, first tax, 30 per cent., new tax 20.

Exceeding $400,000 and not $500,000, first tax, 40 per cent., new tax 25.

Exceeding $800,000, first tax, 60 per cent., new tax 35.

NOVA SCOTIA'S FINANCES ARE BUOYANT

Revenue for Year Just Ended was $3,280,313—Provincial Treasurer Estimates Revenue of $4,008,133 and Expenditure of $3,920,821 for Current Year

REVENUE of $3,280,313 for the fiscal year ended September 30, 1919, was announced by Hon. O. T. Daniels, provincial treasurer of Nova Scotia, in his budget speech in the legislature on April 29. A revenue of $4,008,133 is estimated for the year ended September 30, 1920, and expenditure of $3,920,821. Of the estimated expenditure, $971,252 is for highways. Referring to the revenue from theatre taxes and automobile fees, Mr. Daniels stated that these could still be increased a great deal more.

In bringing down the estimates Mr. Daniels commented upon the financial affairs of the province in very optimistic terms. He said that a large increase over the past years had been shown in the reports of the last fiscal year. The year 1919 was the first time in the history of Nova Scotia that the revenue had passed above the three million dollar mark. The revenue for 1918 had been $2,383,632, and so there had been an increase of $947,681, or almost one million dollars. This year the administration expected to raise the revenue still further, estimating that it would receive $4,008,132 from the various sources, many of which had not had all their possibilities realized. Mr. Daniels also stated that $300,000 might be raised under the Federal Act relating to the aid of provincial highways, but as this was dependent upon the progress made in the provincial road program, the sum had not been included in the estimates.

Mr. Daniels continued that the current estimates were interesting because they proved that the province had reached a period when its financial government might be carried on very differently than it had been before. It was perhaps the first occasion in the history of the province that any large program, such as that of road improvement, could be embarked upon.

Eight-Fold Increase Since Confederation

To illustrate the upward trend of the revenue, Mr. Daniels quoted the revenue in certain years since confederation. In 1868 there had flowed into the provincial treasury $586,696; in 1878, $775,275; in 1881, the low-mark year, $527,864; in 1891, $661,541; in 1896, $841,159; in 1900, $1,014,128; in 1910, $1,592,363; in 1914, $1,885,457; in 1917, $2,118,618. Thus, for the current year, the revenue would be approximately eight times what it had been at confederation. Mr. Daniels emphasized the fact that the climbing of the provincial revenue had only just begun. An era had been entered upon in which the money would come in freely and without doubt, as easily as day followed after night. It was merely the ordinary evolution of affairs.

The Theatre Tax

He then passed to consideration of the estimates proper, devoting particular attention to the $200,000 expected from the theatres and cinematographs tax. He said that, since theatrical business on this continent for 1919 had aggregated $800,000,000, this particular source of revenue would be of the utmost importance in years to come. The good business was due to the splendid prosperity of the people and sobriety induced by prohibitory measures. In respect of the theatre tax of the province, Mr. Daniels also produced comparative statistics. In 1916, when the tax had been inaugurated, the yields had been $1,200; in 1917, $36,000; in 1918, $99,000; and in 1919, $143,000. He also said that $200,000 was the sum expected from succession duties, but it would probably be surpassed.

Dr. Daniels also called the attention of the House to the question of motor vehicles. This year $50,000 is counted upon in initial fees, $180,000 in annual fees, $10,000 in chauffeurs registrations, and $500 in fines, in all $240,000. In 1914 the revenue from this source had been $11,996.

He referred to the fact that Nova Scotia was one of the few places on the continent where motor vehicles were exempted from municipal taxes, and stated that Canada was the second country in the world in car population and led all others in respect to automobiles investment per capita. One person out of twenty-three was the owner of an automobile. In Saskatchewan there was one automobile to every 13.4 persons; in Manitoba the rate was 18.2; in Ontario, 20.2; in British Columbia, 27.5; in New Brunswick, 45.2; in Nova Scotia, 52.5; in Quebec, 66.5; and in Prince Edward Island, 82.8. If Nova Scotia possessed the same number of cars per capita as Saskatchewan, there would be 40,000 automobiles in this province, four times as many as there are at present, and the revenue would be correspondingly increased. Mr. Daniels also said that the Department of the Provincial Treasury, under the jurisdiction of which motor fees fall, had tripled the amount expected from it since 1918 and led all other departments of the government in the production of revenues. He had little to say of the table of expenditures, save to call attention to the item providing for $25,000 for cost of living bonuses to employees.

STOCKBROKERS MAY RAISE COMMISSIONS

Following the annual meeting of the Montreal Stock Exchange, which is to be held on May 14, a special meeting will be held to consider extending the present building to provide accommodation for the additional business being transacted. Another question which the members will consider is one involving the commissions charged on buying and selling orders executed. The by-laws of the institution, as presently constituted, provide for the charge of ¼ of 1 per cent. brokerage fee, but in actual practice this has been disregarded in the case of dealings in Victory bonds. Under the amendment of which notice is given in the circular calling the annual meeting a charge of ⅜ of 1 per cent. would be made on all stocks selling over $150 on the market, and one of ½ of 1 per cent. on securities selling over $200 per share. The adoption of this proposal, it is pointed out, would be along lines adopted some months ago by the New York Stock Exchange.

MARITIME PROVINCES EMPLOYMENT OFFICES

Some of the government employment offices in the maritime provinces have been closed. This is explained by Bryce M. Stewart, Director of the Employment Service, in a letter to *The Monetary Times* as follows:—

"Under the terms of the Employment Offices' Co-ordination Act as it stands at present, the federal government is not empowered to operate local employment offices. In December, 1918, however, when it was apparent that the three martitime provinces had no intention of organizing a provincial system of employment offices, the Department of Labour secured by Order-in-Council authority to establish and maintain employment offices for a period of eighteen months in provinces where such offices did not already exist. This action was taken in view of the labor situation likely to arise during the period of demobilization. The employment offices in the maritimes have been operated under authority of this Order-in-Council since March, 1919, but this authority lapsed on April 30, 1920.

"Some months prior to April 30th the provincial governments of New Brunswick and Nova Scotia were advised that the federal government would be obliged to discontinue the operation of offices in those provinces after that date, and although there has been considerable correspondence between this office and the governments of both provinces, they have not yet advised us as to their policy. It is quite probable that some six or seven of the offices will be reopened under provincial jurisdiction."

After changing the name to the "Aberdeen Fire Insurance Company," the standing Commons committee on banking and commerce on May 5 approved a bill to incorporate the Canadian-American Fire Insurance Company, Edmonton, Alta.

USES OF THE INSURANCE "BLUE BOOK"

A Source of Instruction to Agents and Public, as Well as to Companies—Insurance a Co-operative Enterprise, with Capital as Additional Protection

EVEN if it is right and proper for a government to examine periodically the condition of insurance companies, why should they publish the results, in the form of comparative statements? The general opinion now is that government supervision is desirable. C. C. Sinclair, F.A.S., asks the question as to publication in the Great West Life Bulletin for February, and answers it as follows:—

"Not all companies are equal in management and consequently in results to policyholders. The publication of the blue book consequently must not be considered as an opportunity for invidious comparison between companies, but rather as showing the possibilities of the life insurance business when properly conducted. If a company 'A' shows low expenses, high interest rates and low mortality and there is no doubt a reason, and company 'B,' perhaps not so fortunate in these respects, seeks the reason and seeks to emulate its sister company. A healthy rivalry ensues and the whole tone of the business is raised, to the advantage of the policyholders of the Dominion. We like to consider this the advantage to be derived by the officers of insurance companies in their study of the blue book.

Agents Should Examine Returns

"But the reports should also be studied by the agents of the companies. It is unfortunate that every policyholder could not also be persuaded to read them, but we urge our agents to get carefully acquainted with the essential features of the blue book and on every opportunity to educate their policyholders along sane insurance lines. We shall endeavor to point out some features of the 1918 business of the life insurance companies, as we realize it is rather a formidable task for an agent to read the blue book from cover to cover.

"Before considering our own company we shall look at some of the general features as revealed in the introduction. We might make the anomalous statement that 1918 was both a good and a bad year for life insurance companies. It was good in that a great deal of life insurance was written, and it was bad in that a great many extra death claims were incurred. In connection with the new insurance written, Canadian companies show in 1918 an increase of $6,725,694 over 1917 as compared with an increase in 1917 of $34,502,340 over 1916, while at the same time American companies had in 1918 an increase of $23,545,602 as compared with $16,657,915 in 1917. Inasmuch as Canadian companies can successfully compete in the matter of results to policyholders, does this indicate that we fall down in agency organization or in proper education of the insuring public? It would seem that here is an opportunity to pass along to the public the results as shown in the blue book. The death claims due to war and influenza combined amounted to 53.55 per cent. of the total claims. As the superintendent of insurance says, 'the companies were subjected to a strain which life insurance companies have seldom, if ever, been called upon to bear. That they have survived the strain must be regarded as evidence of the soundness of their position.'

Analysis of Terminations

"An interesting table shows the percentage of terminations from 1913 to 1918 classifying as 'natural' terminations those by 'death,' 'maturity,' 'disability' or 'expiry' and the remaining terminations by 'lapse and surrender' somewhat in the manner that expenditures of municipalities are classified as 'uncontrollable' and 'controllable.' Among Canadian companies the percentage of 'natural' terminations increased from 1.297 per cent. of current risk in 1913, to 1.958 per cent. in 1918 while the lapses and surrenders decreased from 7.609 per cent. to 5.648 per cent. in the same time. The latter is a cause for congratulation but is still much too large. Insurance companies exist to carry out certain contracts to maturity. It is sad to reflect that nearly three times as many of these contracts are terminated by policyholders before maturity as expire in the natural way. Here is another opportunity for the agent to educate the public. Any insurance contract with a reputable company is a profitable transaction if carried to maturity, but cannot be surrendered without some loss. What the total actual monetary loss was, to the insuring public in 1918, when $62,443,799 of business went off the books as lapsed or surrendered, cannot be estimated, to say nothing of the potential loss to the community by the withdrawal of this large amount of insurance protection.

A Co-operative Scheme

"In discussing the premium income the blue book states that out of every $100 of premium income during the year there has been paid during the year to policyholders $60.21 in addition to which $11.96 was carried to reserve and profits. This might be extended to an analysis of certain disbursements, especially in relation to capital stock. Unthinking persons, or perhaps we should say persons not well informed on insurance matters, sometimes regard insurance companies as wealthy corporations, existing for the aggrandizement and profit of their shareholders. This is an altogether incorrect view. The Insurance Act recognizes the fact that an insurance company is a great co-operative society when it provides that a certain number of the directors shall be elected by the policyholders and a certain number by the shareholders. What then is the advantage of the capital stock of the insurance companies, and at what expense to the policyholders is it maintained? The capital stock—and it amounts to about $6,000,000 in the case of Canadian companies is an additional protection to the Canadian policyholder. In addition to the statutory reserves a company is obliged to maintain, the capital stock stands between a policyholder and any loss of his insurance protection. The insurance department would not permit a company to allow its capital to be impaired to any large degree before demanding the reassurance of its policy contracts with some other solvent company. For this additional protection how much of a policyholder's premium is required? We find that about one per cent. of the premium income for 1918 paid all the dividends the shareholders of Canadian companies received. At the same time it is interesting to observe that the taxes imposed by various provinces absorbed about twice as much, or nearly two per cent. What the policyholders of Canadian companies received for this latter contribution we are unable to say, but it certainly has this effect, that the dividends received on their policies are reduced by a like amount."

MANITOBA TO PROTECT FINANCES

That the government of Manitoba will open a ledger account to extend over a period of years, in order that a huge deficit will not be shown by the government in any single year, through the adverse exchange rate, is the statement made by Hon. Edward Brown, provincial treasurer. In the $6,500,000 loan floated last February the government lost approximately $650,000 on the exchange rate. On the recent loan of $2,850,000 the government made about $270,000. The provincial treasurer intends to float another loan of $1,650,000 shortly to cover the capital expenditures voted at the last session of the house. It is expected that this loan will further tend to reduce the loss through exchange rates. The people of the province will then be able to tell the total loss through the exchange situation when matters become normal.

A progressive western life insurance company is looking for a manager for the city of Winnipeg. Further details of this opportunity will be found on page 47 of this issue.

CANADIAN STEEL DEVELOPMENT

NO Canadian industrial enterprise has attracted so much attention in recent years as has the British Empire Steel Corporation, and a great deal of discussion has brought forth no well-founded objection, either from the point of view of its inherent soundness or from the point of view of the general public. The Nova Scotia legislature, in committee of the whole, reported favorably upon the bill authorizing the merger on May 12th. Parliament discussed it last week, and any objections set forth were directed against stock watering in past mergers rather than against the present one. The promoters of the enterprise have been careful to lay emphasis on the modest capitalization, considering the value of the assets to be acquired. This will give the stock of the new corporation a good valuation from the start.

The merger proposal has also been favorably received in Great Britain, where it is regarded as another industrial bond of union within the empire. The prospect of the exhaustion of British iron ores is one which has caused great concern in Britain and any opportunity which leads to the utilization of British capital and technical skill in the colonies always has a favorable hearing there.

The proposal had evidently been carefully worked out before any announcement was made. In fact, the directors of the different companies had been sounded, and terms satisfactory to them had been arranged before anything more than a rumor of the merger had reached the public. The consequence is that any comments made by executives of the companies which it is proposed to acquire are entirely favorable. The promoters have followed up this advantage by a well-planned campaign of education, both directly and through the press. The assent of the shareholders alone remains to be secured, and no great difficulty on this score is anticipated.

As a project to strengthen a group of the leading industries of Canada there can be no valid objection to the merger. For economic development has brought about larger and larger units in all leading countries of the world. And as the products of the new world corporation have a world-wide market, a consolidation of this sort cannot conceivably injure the Canadian public, which must, in any case, buy in competition with the rest of the world. The parliament of Canada possesses at all times the powers to control industries within the Dominion, and has recognized its obligation to do so, where necessary, by the establishment of a Board of Commerce. If the British Empire Steel Corporation can produce more efficiently than can the different companies operating independently, it can confidently be expected that this increased efficiency will react to the benefit of the country as a whole.

OPENING OF CANAL TRAFFIC

THE Transportation Division of the Dominion Bureau of Statistics publishes the following canal statistics for the month of April:—

Sault Ste. Marie Canal opened April 23rd. During the 7 days, 86 vessels with registered tonnage of 90,776 tons carrying 29,670 tons of freight passed through, a decrease of 253,528 tons from last year for 18 days.

The American canal opened April 19th, and had 507,539 tons of freight through in 146 vessels of 522,584 net tonnage.

Welland Canal opened April 19th, 41 vessels registered tonnage 27,276 carrying 69,323 tons of freight passed through, a decrease of 54,179 tons for same period last year.

St. Peters Canal opened April 20th, during the 10 days, 25 vessels with registered tonnage of 1,634 tons carrying 1,437 tons of freight passed through, an increase of 187 tons, over 18 days last year.

Chambly Canal opened April 23rd, 13 vessels with tonnage of 1,823 and carrying 523 tons of freight passed through, an increase of 199 tons over same period last year.

Murray Canal opened April 12th, two days earlier than last year, 27 vessels with tonnage of 6,111 carrying 7,600 tons of freight passed through, an increase of 5,950 tons over 1919.

SHOULD THE INVESTOR RECEIVE ANYTHING?

A NEW way to meet increased operating costs has been devised in London, Ont., where the street railway has pointed out its inability to pay the higher wages asked by the employees unless increased fares are permitted. On May 6 the Ontario Railway and Municipal Board took over the operation of the railway. The company's officials remain, but are under the direction of A. B. Ingram, vice-president of the Board. Thirty-nine cars are being operated, instead of thirty-four as formerly. The employees are to receive the same wages as before, pending the outcome of an investigation into the financial affairs of the company. Whatever increase is granted them will include back pay from the present time.

It is obviously unfair to the employees to keep them in this uncertain position, considering the fact that their present wages are considerably below the prevailing rates in other cities and in other trades. It is equally unjust that the city does not recognize the claims of the shareholders to receive an income from their investment. Street railway service would be gladly extended if rates were sufficient to leave a reasonable net profit after paying operating expenses and fixed charges, but is impossible in view of the present financial position of the company.

WHEN THE AMERICAN DOLLAR WAS DOWN

AN article in the April "Home Bank Monthly" recalls the fact that Canadians had, at the close of the American Civil War, an opportunity to buy United States government bonds on terms much more attractive than those at which our bonds are now being sold across the line. This was due to the depreciation of the American dollar, which went as low as forty cents in Canadian currency. "It is quite evident," says the article, "that the fluctuations of exchange and any prospective decline of Canadian war bonds, will never leave to American investors the opportunities for quick profits and large returns that were available to Canadian speculators in United States bonds during the latter years of, and following the close of the American civil war. Our bonds move between 'points,' while exchange slides back and forth in a comparatively narrow range, with an uncertainty that perplexes the most cautious. In 1864, on the other hand, American money was down sixty per cent.—exchanging at forty cents on the dollar for Canadian money—while United States bonds, backed by the resources of the federal government, which resources comprised the entire wealth of the United States of America after the 9th of April, 1865 (the date of Lee's surrender at Appomattox) were selling at one-third of their face value in August of the preceding year. On the 16th of July, 1864, gold reached a premium of 285 per cent. in New York."

FREIGHT PAYMENT AND CANADIAN CURRENCY

COMPLICATIONS arising from the exchange situation continue to reveal themselves. Due to the depreciation of the Canadian dollar there has been a tendency towards the payment of freight charges, wherever possible, on the Canadian side. The traffic across the line amounts to a large total each month, and this meant that the roads were receiving Canadian money for services performed in the United States. Shippers in the United States could easily arrange to have the freight collected on delivery here, while shippers from this side prepaid the freight. This amounted to a discount of over ten per cent. on the business done in the United States in carrying goods to and from the Canadian border, and both Canadian and United States lines were losing heavily in this way.

To remedy this situation the United States Interstate Commerce Commission passed an order requiring all charges on shipments to Canada to be prepaid. This, of course, gives the roads payment in United States currency for business done in Canada as well as in the United States. The Canadian railways have also decided to refuse and accept shipments to the other side unless charges are to be collected there, and the Board of Railway Commissioners has decided, in response to complaints made by the Toronto and Montreal Boards of Trade on March 16 and 17, that it has no authority to compel the roads to do otherwise. Thus far, therefore, the railroads have the best of the matter. It is understood that negotiations are now being carried on with a view to having payment for haulage in United States territory made in United States currency, and payment for haulage in Canada in Canadian currency.

MORE TAXES ON CORPORATIONS

ACCORDING to legislation drafted by the Ontario government, banks will be required to pay one-fifth of one per cent. on their paid-up capital, instead of one-tenth of one per cent. as in the past. They will pay an additional tax of $3,000 for the principal office in Ontario and $100 for each additional branch or agency. These rates were previously $1,500 and $50.

The tax of $30,000 on insurance companies is also changed. Life insurance companies will pay one and one-quarter (1¼) per cent., and every other insurance company one per cent. on the gross premiums received on business transacted in Ontario. In the case of mutual fire insurance companies which received premiums in cash the tax shall be calculated on the gross premiums received in cash in respect of the insurance transacted on the cash plan in Ontario. In the case of re-insurance by an insurance company, the company re-insured shall be exempt from the tax imposed on the portion of the premium paid to the re-insuring company, but the re-insuring companies shall be liable for the tax in respect thereof as part of its gross premiums. Where the re-insuring company does not transact business in Ontario and has no principal or head office therein, the company re-insured shall retain in its hands so much of the premium for re-insurance as is equivalent to the tax imposed in respect of such premium and it shall be liable for the tax and for the payment thereof to the treasurer.

DANGER OF FOREST DEPLETION

EVERY business and individual is already feeling the effects of the present scarcity of forest products. If this is true to-day, how much more severe must be the effects of a continual depletion of these natural resources? In fact, complete exhaustion of some forest products can now be calculated almost to the year. Dealing with this question in an address before the Rotary Club, Ottawa, on May 10, James White stated that wood, pulp and paper exported from Canada totalled $113,000,000 in 1919, and 80 per cent. went to the United States. One-third of the newsprint used in the United States came from Canada. He stated that it was of the utmost importance that Canada should continue to supply the United States, and that we must have efficient management of our forests to avoid depletion. Our supply was not inexhaustible without conservation.

Mr. White went on to state that a survey showed that Quebec had 155,000,000 cords available, 52 years' supply, cutting 3,000,000 cords per year. Ontario had about 100,000,000 cords of spruce and balsam, possibly 67 years, supply, cutting normally. New Brunswick had 36,000,000 cords of spruce and an annual cut of 1,250,000 cords, had 29 years' supply, and the theoretical increase of 600,000 cords amounted to only half the annual cut. Forests mean something to every one in Canada, said Mr. White, and conservation is a matter of business sense, not sentiment.

TO THE PUBLIC

Your Victory Loan Coupons due 1st May can be cashed at The Canadian Bank of Commerce or left on deposit in a Savings Account.

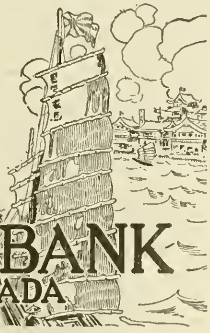
Tokyo

JAPAN'S increasing foreign trade is characteristic of the intelligence and energy of the nation.

Canada's trade with that picturesque country has increased rapidly and continues to expand.

Tokyo, the capital of Japan, home of the Emperor, is in touch with every corner of the Japanese Empire, thus Canadians having trade relations with the Japanese will find the Tokyo branch of the Park-Union Banking Corporation of far-reaching service.



UNION BANK OF CANADA

Park-Union Foreign Banking Corporation jointly owned and controlled by National Park Bank of New York and Union Bank of Canada.

436

Bank of Hamilton

Dividend Notice

NOTICE is hereby given that a Dividend of Three Per Cent. (Twelve per cent. per annum) on the paid up capital of the Bank, for the quarter ending 31st May, has this day been declared, and that the same will be payable at the Bank and its branches on 1st June next, to shareholders of record at close of business May 20th.

By order of the Board,
J. P. BELL,
General Manager.

Hamilton, 26th April, 1920.

PERSONAL NOTES

Mr. Eric Brower has succeeded Mr. Thomas Morris, who has resigned as assistant city treasurer of Hamilton, Ont.

Mr. G. Raymond Smith, Great-West Life, Halifax, has been appointed secretary of the Halifax Life Underwriters' Association.

Captain A. W. Deacon, M.C., will succeed Mr. E. W. Tobin on June 1st next, as secretary of the Stratford, Ont., Chamber of Commerce.

Dr. William H. Merritt, of St. Catharines, Ont., has been elected vice-president of the Imperial Bank of Canada, succeeding the late Elias Rogers. Dr. Merritt has been a director of the bank since 1908.

Dr. W. A. Riddell has resigned his position as Deputy Minister of Labor for Ontario, and has accepted the offer of a position in the International Labor Office of the League of Nations. He will be in charge of the immigration and employment section, and his headquarters, he expects, will be in Geneva, Switzerland.

Sir James McKechnie, K.B.E., managing director of Vickers, Ltd., the big British shipbuilding concern, and one of the greatest naval architects and engineers in the world, arrived at Quebec on May 10. Sir James' mission to Canada is to inspect the shipbuilding plants of the companies involved in the new steel merger in the interests of the British Empire Steel Corporation.

Mr. Albert J. Ralston was elected president of the National Life Assurance Company of Canada at a meeting of the board of directors held on May 6th, succeeding the late president, Mr. Elias Rogers, whose death occurred recently. Mr. Ralston assumed the office of general manager of the company sixteen years ago. Two years later he became managing director, and on the death of the Hon. J. J. Foy, who was then first vice-president, Mr. Ralston was elected to that office. In addition to the office of president, Mr. Ralston still retains the managing directorship of the company. Mr. George W. Beardmore, who has been a director of the company since its inception and for the past few years second vice-president, has been elected first vice-president, succeeding Mr. Ralston in that office. The vacancy on the board of directors of the National Life has been filled by the election of Mr. A. H. Beaton. Mr. Frederick Sparling, who has been secretary of the company for the past twenty-one years, has been appointed assistant-general manager and secretary, and Mr. Wm. C. Wait, for eighteen years accountant, has been appointed assistant secretary.

Mr. J. H. Castle Graham, general secretary-treasurer of the Life Underwriters' Association of Canada, was elected president of McMaster University Alumni Association on May 10. Miss A. M. Udy, who is with the actuarial department of the Imperial Life, was elected first vice-president, and V. Evan Gray, superintendent of insurance in Ontario, second vice-president.

Mr. Harold A. Joselin, for the past nine years special agent for the New York Underwriters' Agency for the Western Canadian provinces, has been appointed superintendent for Canada, in succession to Mr. T. D. Richardson, who has now become associated with the New York office. For eleven years previous to his career with the New York Underwriters, Mr. Joselin was actively engaged in the fire insurance business in Toronto.

Mr. W. A. Barrington has been appointed assistant general manager of the General Accident Assurance Company of Canada. Mr. Barrington was born and educated in Montreal and entered the service of the Canadian Pacific Railway Company there in 1900 as clerk in the office of the general manager and later went to the Canada Car Company as chief clerk in the office of the general superintendent. In 1908 he joined the General Accident Assurance Company, at its head office in Toronto and has been chief inspector of claims for that company since 1910. He is well known and highly regarded in insurance circles from one end of Canada to the other, and his appointment as assistant general manager is a well-earned promotion.

OBITUARIES

Mr. B. D. Rogers, president of the British Columbia Sugar Refinery, Vancouver, B.C., died last week from heart disease at the age of 27 years.

Mr. G. S. Minty, eastern superintendent for Canada of the Union Insurance Society of Canton, died this week. Before becoming associated with the Union Insurance Society, Mr. Minty served with the Rochester Underwriters. He received his early insurance training with the Western Assurance Company.

Mr. Robt. W. Travers, London, Ont., was accidently killed on May 5th. The late Mr. Travers was born in Peterboro, Ont., in 1860. He had spent his entire business life in the service of the Bank of Montreal, and for the past five years was manager of the main branch in London.

Mr. J. Short McMaster, treasurer of McMaster University, Toronto, died at Clifton Springs, New York, this week at the age of 90 years. Born in Ireland, Mr. McMaster came to Canada about 30 years ago, was one of the original partners of the firm of A. R. McMaster Bros., wholesale dry goods dealers, and for a time was manager of the London, England, office of the company.

Mr. C. W. N. Kennedy, well known in Winnipeg real estate, banking and financial circles, died last week at the age of 55 years. Mr. Kennedy was born in Peterboro, Ont., October, 1865, going to Winnipeg in 1871. He was the president of the Victoria Beach Company, vice-president of the Commercial Loan and Trust Company, a director of the British Northwest Fire Insurance Company, the City Investment Company, the North American Investment Company, the Winnipeg Securities Company and several other concerns.

INTEREST RATES ON BANK LOANS

Farmers Regard all Loans as Similar—Differences Which Make Variety of Rates Essential

By A. B. Barker

At a recent convention of the United Farmers, a resolution was passed, recommending long credits on easy terms for farmers, the money to be found by the government. The fact that the government is paying 5½ per cent. on its loans, plus the cost of the organization necessary to ensure the success of the flotation, was not touched on. The essential point was that the money for the farmer must be cheap.

So far as the eastern provinces are concerned, the farmers, as a class, are in better shape, financially, than any other part of the community. They have had the benefit of high prices for their products during the war, and the results are shown in their bank balances to-day. Even before the war it was well known that in the east farmers' deposits, as a whole, were in excess of loans to farmers. There are few instances where a reputable farmer has been unable to obtain bank accommodation for legitimate purposes. Loans to purchase more land have frequently been turned down, but where the money was required in connection with his crop or cattle—his actual business needs—it has been readily advanced. In general, it may be said that credit is more easily obtained in the country than in the cities, and in the latter the terms as a rule are more rigidly insisted on.

Idea of Uniform Rate

Part of the farmers' attitude is due to a misconception of a bank loan. To many, a loan is a loan whether represented by a note or a mortgage, and they want to treat both alike, refusing to see that the one is a long-term investment of funds which are obtained for that particular purpose, while the other comes from funds which are repayable on demand. A bank deals in credit as a merchant deals in goods—it buys credit from its depositors and sells it when it makes a loan or discounts a note. Like a merchant, it must keep its assets in readily available shape, in order to make a success of the business, and be able to supply the demands of its customers. When a merchant allows too much of his assets to get into slow-paying accounts it reduces his working capital and his ability to supply his customers is curtailed to that extent. With a bank exactly the same result occurs when too many of its loans get into the perpetual renewal class; it is unable to supply the requirements of its customers. For this reason, it is essential that bank loans be confined to that class of business, which will give it a constant turnover of its funds. No one questions the fundamental soundness of the farmers' loans—they are generally admitted to be safe—but when the funds from which these loans come, consist of deposits repayable on demand, something more than safety is required.

Part of the price which a bank pays for the credit in which it deals, is that the deposits, which make up this fund, shall be repaid on demand. To be able to carry out the object for which its charter was granted, to assist trade, it must keep these funds working; neither can it use the whole of them, as a certain proportion must be held in cash to provide for any possible demand from its depositors.

Bank Assets Must be Liquid

The function of the bank, therefore, is to supplement the working capital of its clients, and not to provide funds for long-winded and indefinite operations.

Considering the present favorable financial position of the farmers, as a whole, it seems strange that the convention did not suggest some similar plan by which, through co-operation, the farmers themselves would provide the funds for these proposed long-term credits to farmers.

The question of farm credits in the west is being dealt with through the medium of rural credits associations, organized under provincial acts in Manitoba and Saskatchewan. These provide for borrowing for certain specific purposes, and under terms which insure the loans being utilized for these purposes, and that they are paid off when that purpose is accomplished. The money is obtained from the banks by the associations, who in turn lend to their members. The purposes for which loans may be obtained in this way are strictly limited to what may be termed the business of the farm, to supplement the farmers' working capital, and not to be used for land purchases.

APPLICATION FOR BANK CHARTER

Application has been made in Ottawa for the incorporation of a new western bank, to be known as the Bank of Saskatchewan. Toronto and Vancouver capitalists are said to be behind the new financial institution, among the incorporators being W. Herbert Phillips, of the Imperial Federation Corporation, Toronto, and Messrs. Faulkner and Potts, Pacific coast financiers. It is proposed to establish head offices at Regina and a number of branches throughout the province. Application is being made in the form of a bill which will make its first appearance in the Senate. The authorized capital of the institution is ten million dollars, of which a million and a half will be paid up.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the week ending May 7th:—

	1920.	1919.	Inc. or dec.
Canadian Pacific Railway.			
May 7	$3,520,000	$2,856,000	+$ 664,000
Grand Trunk Railway.			
May 7	$1,256,007	$1,130,352	+$ 125,655
Canadian National Railways.			
May 7	$1,896,301	$1,664,673	+$ 231,628

CAPITAL TRUST CORPORATION

During the year 1919, the paid-up capital of the Capital Trust Corporation, Ottawa, was increased by $87,176 and now amounts to $488,241. The subscribed capital was also increased by $61,400, and is now $792,000. Capital assets increased from $450,777 in 1918 to $545,073, the principal advances being in mortgages on real estate, debentures on bonds and cash on hand and in banks. The profit and loss account shows net profit of $26,375, as compared with $19,354 in 1918. The annual meeting was held on February 10.

The directorate of the company is now comprised of the following: President, Hon. M. J. O'Brien, Renfrew; vice-presidents, J. J. Lyons, Ottawa; A. E. Provost, Ottawa; R. P. Gough, Toronto; E. W. Tobin, M.P., Bromptonville. Directors: A. W. Robertson, Montreal; Hugh Doheny, Montreal; P. V. Byrnes, Hamilton; J. J. McFadden, Renfrew; W. H. McAuliffe, Ottawa; J. F. Brown, Toronto; Gordon Grant, C.E., Ottawa; Colonel D. R. Street, Ottawa; Arthur Ferland, Haileybury; J. B. Duford, Ottawa; T. P. Phalen, Toronto; B. G. Connolly, Ottawa.

Indians from northern British Columbia were entertained at the head office of the Union Bank in Winnipeg on May 6. A request had come in from the branch manager at Hazleton on the Skeena River, to permit the visitors, some of whom are customers at Hazleton, to view the offices. They were taken into the vaults and saw the silver and gold carried by the bank.

BANK BRANCH NOTES

Three New Royal, One Merchants and One Commerce Branch Announced This Week—Bank of Commerce Appoints Two New Inspectors

The following is a list of branches of Canadian banks which have been opened recently:—

Thetford Mines, Que.	Merchants Bank of Canada.
Louiseville, Que.	Canadian Bank of Commerce.
Wolfe Island, Ont.	Royal Bank of Canada.
Willowdale, Ont.	Royal Bank of Canada.
Port Morien, N.S.	Royal Bank of Canada.

Two new inspectors have been appointed by the Bank of Commerce. These are Allan McKenzie, who for several years past has been the manager of the branch at Peace River, and C. G. Lewis, the manager for the bank at Warner, Sask. It has not yet been decided who will succeed to the management of the Peace River office. W. W. Orr, of Provost, Sask., will go to Warner, and Don B. Smith, of Fiske, Sask., will move to Provost. When Mr. McKenzie arrived on the banks of the Peace River there were only five or six log buildings there, in one of which he opened the branch of the bank.

PROPOSED MERCHANTS BANK HEAD OFFICE

The above illustration is from the architect's sketch of the proposed Merchants Bank head office building to replace the present one at the corner of St. James and St. Peter Streets, Montreal. Building operations have been postponed until 1921, but it is expected that they will be under way one year hence.

Mr. Gilbert C. Wainwright, who has been in charge of the Main Street office of the Bank of Nova Scotia in Winnipeg, is to be transferred to Toronto to take a position at the head office of the institution. Mr. Wainwright went to Winnipeg in 1917 to take charge of the main office of the Bank of Ottawa there. This was prior to the purchase of the Bank of Ottawa by the Bank of Nova Scotia. Subsequent to the purchase he remained in the same position. He is to be succeeded in Winnipeg by T. B. Sharpe, who has left the head office here to take over the duties in the west. Mr. Sharpe is a former Winnipegger, and was formerly in the service of the Bank of Ottawa in that city. Before going to Winnipeg Mr. Wainwright was for two years manager for the Bank of Ottawa at the main office in the city of Montreal.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter
N.Y. funds	10 13-16 pm	10⅞ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	4.2475	4.2550	....
Cable transfers .	4.2550	4.2625	....

New York quotations of exchange on European countries, as furnished by the National City Co., at May 13, 1920, are as follows:—

Cable, London, 383¼ cheque, London, 382½; cable, Paris, 6.65, cheque, Paris, 6.64; cable, Italy, 4.96, cheque, Italy, 4.95; cheque Belgium, 6.96; cheque, Swiss, 17.55; cheque, Spain, 16.87; cheque, Holland, 36½; cheque, Denmark, 16.82; cheque, Norway, 18.70; cheque, Sweden, 21.12; cheque, Berlin, 2.04; cheque, Greece, 11.50; cheque, Finland, 5.50; cheque, Rumania, 1.85.

WEEKLY BANK CLEARINGS

ONTARIO DIVISION OF CANADIAN MANUFACTURERS

First Annual Convention Held in Toronto—Inquiry into Hydro Workings by Royal Commission Requested—Power Shortage Claimed to be Crippling Industries

THE first annual convention of the Ontario division of the Canadian Manufacturers' Association was held in Toronto on April 29th in the King Edward Hotel.

The secretary's report, submitted by Mr. H. MacDonald, stated that three new branches had been organized in Ontario, namely, Niagara, Peterboro' and Brantford, making five branches in all. Toronto still leads in membership with 920, followed by Hamilton with 238. The division membership includes 2,121 firms and corporations, and the total membership of the association is 4,146.

The election of officers resulted as follows: Chairman, J. R. Shaw; vice-chairman, W. C. Coulter. Executive committee—H. Barrett, Paris; W. R. Breyfogle, Peterboro'; G. C. Cockshutt, Brantford; W. Cowan, Galt; G. H. Douglas, Hamilton; R. H. Easson, Toronto; H. W. Fleury, Aurora; E. H. Gurney, Toronto; Fred Hatch, Whitby; T. A. Hollinrake, Toronto; J. G. Hossack, Toronto; Wm. Inglis, Toronto; J. G. Kent, Toronto; G. M. McGregor, Ford; Thos. Roden, Toronto; H. J. Waddie, Hamilton; C. R. H. Warnock, Galt; S. J. Williams, Kitchener; A. W. White, London; F. H. Whitton, Hamilton.

Complaints Against Hydro

During the meeting an attack on the Hydro was made in the form of a resolution, asking that the workings of the Hydro be investigated by the Royal Commission, which would report to the government. The resolution also asked that before any further radial projects be started that the Hydro fulfill its obligations to supply the power contracted for by manufacturers. It was claimed that power for which contracts had been entered into was not being delivered, and that this was seriously crippling the industries of the province.

Mr. Thomas Roden declared that this power shortage was responsible for much of the industrial unrest in the province through the factories having to close down frequently and thus throw men out of work. As a solution, it was suggested that the Hydro build steam plants throughout the country to supplement the electric power in case of a breakdown or line trouble. Mr. J. F. MacKay suggested that the Hydro fulfill all their present contracts to the letter before indulging in any further projects, radial or otherwise. Mr. S. J. Williams, of Kitchener, stated that the situation there was acute. Several large firms had located in that city on the understanding that the power supply would be good, and now found that it appeared to be intermittent. A Woodstock man declared that industries in the city were unable to get sufficient power, yet that the city was bonusing other industries to which Hydro promised power.

One member of the association stated that his firm had lost 30,000 hours of work through faulty power supply. The whole matter will be brought to the attention of Sir Adam Beck and the Ontario government, and they will be asked if anything can be done. A resolution was passed to this effect in the afternoon.

Substitute Fuel

Another resolution called upon the Dominion government to co-operate with the various provinces in the development of lignite, peat and other fuels to take the place of coal. The government was also asked to pay closer attention to the transportation of coal, as it was felt that the cars were not used to the fullest advantage.

In submitting its report, the executive committee asked that the Moratorium Act should be retained another six months after proper notice had been given. Ontario's products were estimated at $1,267,000,000, enough to pay off the entire debt of the province twenty-two times over each year. The city of Toronto was assailed for what was called the "crushing taxation" it imposed on manufacturers. However, no remedy other than a decrease of the taxes was proposed, and how the city would make up for the loss of revenue was not explained.

Import Duty Protested

During the meeting Mr. S. R. Parsons protested against the 7½ per cent. war duty placed on certain importations. Mr. Parsons thought that this would place the manufacturers in a wrong light before the people, and that it gave the opponents of high protection a lever to argue that the tariff was too high. Statistics showed that the tariff amounted to an average of slightly less than 28 per cent., which, he thought, was rather low. He declared that any lowering of the tariff and the dangerous talk of free trade would result in disaster to the manufacturers and workers of Canada. He further stated that free trade would mean the closing of all American branch factories in Canada, and that at least 1,000,000 Canadian workers would be thrown out of employment. All American firms would close their branch plants and handle their business from their American houses. "The only result of that would be such a slump that the country could never recover from it in the history of any person here to-day," he said.

He asked the manufacturers to combat propaganda in favor of a reduced tariff, which was apparent in the country to-day.

Toronto Branch

The Toronto branch opened its twentieth annual meeting on the conclusion of the Ontario division, and the following officers were elected:—

C. H. Carlisle, Goodyear Tire and Rubber Co. of Canada, Ltd.; F. S. Corrigan, Sheet Metal Products Co. of Canada, Ltd.; E. J. Freyseng, Freyseng Cork Co., Ltd.; W. R. Gibson, Gurney Foundry Co., Ltd.; A. H. Gourlay, Gourlay, Winter and Leeming, Ltd.; A. E. King, Dunlop Tire and Rubber Goods Co., Ltd.; Walter Laidlaw, R. Laidlaw Lumber Co., Ltd.; R. L. McIntyre, McGregor and McIntyre, Ltd.; T. F. Monypenny, Imperial Varnish and Color Co., Ltd.; Chas. Morrison, the Jas. Morrison Brass Manufacturing Co., Ltd.; J. Allan Ross, the Wm. Wrigley Jr. Co., Ltd.; J. A. Scythes, Scythes and Co., Ltd.; W. H. Shapley, Sterling Action and Keys, Ltd.; H. D. Scully, Willys-Overland, Ltd.; E. G. Staunton, Stauntons, Ltd.; J. F. M. Stewart, Point Anne Quarries, Ltd.; H. A. Telfer, Telfer Brothers, Ltd.; Geo. Valentine, Massey-Harris Co., Ltd.; Geo. W. Watts, Canadian General Electric Co., Ltd.

PORT ARTHUR BOARD OF TRADE REORGANIZED

The reorganization of the Port Arthur, Ont., Board of Trade is being proceeded with. At a meeting on April 30, T. M. Andrews was elected to the presidency by acclamation, as was also J. A. Macarthur to the vice-presidency. A number of nominations for seats on the executive were made, and five of these will be chosen to fill the vacancies.

WESTERN LOAN ASSOCIATION'S MEETING

The annual meetings of the provincial associations of loan companies in the west have been arranged for the following dates: British Columbia, at Vancouver, May 7; Alberta, at Calgary, May 13; Saskatoon, at Regina, May 14. The date of the Manitoba meeting, which will be at Winnipeg, has not yet been fixed. John Appleton, secretary of the Dominion Mortgage and Investments Association, is attending these meetings.

Messrs. Ryan, Grier and Hastings, of Montreal, stock brokers, have transferred their offices from the Lewis Building, to 98 Notre Dame St. W.

Messrs. Bryant, Isard and Co., Montreal stock brokers and members of the Toronto Stock Exchange and the Chicago Board of Trade, announce that they have occupied their new offices at 84-90 St. Francois-Xavier St., the premises formerly occupied by Fairbanks, Gosselin and Co

HEALTH INSURANCE A FORCED MOVEMENT

Insurance Section of Vancouver Board of Trade Strongly Opposes Scheme—Maintains Commission was Appointed Not to Obtain Evidence, but to Create Demand

THAT the general desire to obtain something for nothing was the only ground upon which witnesses before the recent provincial health insurance commission favored the movement, is the conclusion of a report of the insurance section of the Vancouver Board of Trade. The report also points out that the address given by E. H. S. Winn, chairman of the British Columbia Workman's Compensation Board, before the board last October, was really part of a scheme to create a demand for such legislation, and that Mr. Winn himself was subsequently appointed chairman.

The report of the insurance section, which is not endorsed by the board as a whole, continues as follows:—

"Insurance men are not particularly interested in this question, as their business would not be materially affected, but it was natural that the insurance section of the board of trade should follow the matter up in the interests of the community as a whole, and as a result of our labors we now beg to report as follows:—

"In the first place we declare that the commission (of which Mr. Winn was chairman) instead of seeking evidence with regard to the need for compulsory health insurance, endeavored in every possible way to create a demand for it, and we submit:

No Demand for It

"(1) That no demand for compulsory health insurance existed prior to the appointment of the commission, and no reliable evidence was presented before the commission which would show there was any demand for it by the people of British Columbia.

"(2) Where witnesses were in favor they in no case gave satisfactory reasons for their belief apart from a desire to obtain something for nothing, and in many cases the question was confused in the minds of the witnesses with maternity benefits, mothers' pensions, public health nursing, etc., which are separate and distinct problems.

"(3) Mr. Winn, and other advocates of such legislation, lay great stress on the alleged success of similar legislation in Germany and England. The result of unbiased investigation has demonstrated clearly that the German system after a trial of 35 years and the English system after eight years trial, are definite failures as measures for health improvement. Even with the help of enormous sums of money from the public treasury, the schemes are now actually insolvent, and the number and duration of sickness cases is greater than before. In other words, public health has not improved, and the morals of both labor and the medical men have been debauched.

Rejected in United States

"(4) In the United States many high-priced legislative committees have investigated the subject in recent years and both state and federal authorities have rejected the system after years of study and argument.

"(5) Even if the need existed, which it certainly does not, it would be unwise for British Columbia to undertake so expensive an experiment at the present time, when hospitals, sanataria, etc., are clamoring for financial aid, and every dollar put into so-called health insurance would be diverted from preventive or relief enterprises.

"(6) Realizing that it would take too long to argue the case in detail at a single session we have provided you with the concrete result of our research in pamphlet form, and further authoritative information is available for any member who wishes it.

"I would move that this board go on record as convinced that there is no present general demand or need for compulsory health insurance and that the board strongly opposes the introduction of such legislation. I would move further that copies of this resolution be forwarded to Premier Oliver and the members of the executive council."

LETTER TO THE EDITOR

RE LIQUIDATION OF BANKRUPT SUBDIVISIONS

Dear Sir,—For seven years, investors and the public have properly decried the subdivision of farm lands in the west as town lots, and Toronto papers have given the defection the utmost publicity. In your issue of April 9th, a Mr. Sundal again says the obvious thing—that if they are not town lots they should again be farm land. What is most objectionable in this article is the suggestion that the public was to blame for "permitting the wild-cat game."

My reason for writing is to draw attention to the fact that more money was lost right in and about the city of Toronto through wild-cat subdivisions and central property, than through probably the whole of western Canada. One Toronto man, in 1913, returned from the west giving out interviews on western speculations. At that same time and since, that man had few peers in Toronto in mis-investing other people's money, chiefly in land schemes. But he had some prominent peers at that! It was not only on Yonge St. and off Yonge St. miles north of Toronto, but in the very heart of the city, that people lost money, and the sums were larger in the latter case. Neither can it be said that the losses were caused by honest overvaluations.

You will appreciate my points. Criticisms such as Mr. Sundal's are too general in being directed against the whole west. The Statute of Limitations, which would bar a debt, should also be applied to these obviously correct criticisms. Toronto lives in a glass house. Let us not forget, but let us be more constructive. Money will be needed in Vancouver for industries that must start if Canada is to grow, and it is bad business to scare it away by general statements that give the impression that the west is inhabited by conscienceless thieves. If the west adopts the idea, now often expressed, that Toronto is attempting to bolster up her own position by assuming a virtuous condemnation of the west, so much the worse for Toronto, and for all of us. Everything that Mr. Sundal's suggestions embody can be said in ten lines or less and can more properly be directed to governmental and municipal authorities.

Yours faithfully,
C. F. MILLAR,
President, Seaport Agencies, Ltd.,
April 26th, 1920. Vancouver, B.C.

CENTRAL TRUST CO. INCORPORATED

The New Brunswick legislature has passed an act incorporating the Central Trust Co. of Canada. The capital stock of the proposed company is placed at $500,000, divided into shares of $100 each, with head offices in the city of Moncton. According to the terms of the Act the company shall not commence business until, at least $250,000 of stock has been bona fide subscribed and $50,000 cash paid thereon and deposited in one of the chartered banks of Canada. It is proposed before commencing business to construct a trust building to carry on the business of the company. It is intended to organize and open for business at the earliest possible date.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended May 7th, 1920:—

McKinley-Darragh, 84,280; La Rose Mine, 87,211; Dominion Reduction Co., 60,000; Nor. Customs Concentrator, 88,000; Coniagas Mine, 60,000; Mining Corp. of Canada, 196,273; total, 575,764. The total since January 1st is 6,284,497 pounds, or 3,142.24 tons.

What is Trusteeship?

Three parties are involved:

1. Grantor—The person who creates the Trust.
2. Trustee—The person who holds the property and carries out the provisions of the Trust.
3. Beneficiary—The person who benefits from the provisions of the Trust.

Trustee under Will is a common form of Trusteeship.

Example: A man may name a Trust Company to act as trustee for his young son. A certain sum of money is set aside as a trust fund. For a specified number of years the income of this fund is to be used for the son's benefit. After that the Trust Company is to pay the principal to the son, or some other beneficiary if the will so directs.

WHOLESALE PRICES STILL RISING

Big Advances in Vegetables, Sugar, Metals and Building Materials

THE movement in prices for the month of March, 1920, continued upward, according to the Department of Labor figures, the chief increases appearing in vegetables, sugar, metals and building materials. There were appreciable increases in grains and fodder, live stock and meats, fruits and miscellaneous foods, with smaller increases in a number of articles in nearly all of the groups. There were seasonal decreases in eggs, fish and hides.

In wholesale prices the index number rose to 349.0 for March, as compared with 343.5 for February, 277.6 for March, 1919, and 137.0 for March, 1914. This means that prices now average about two and one-half times what they did in March, 1914, and are about three and one-half times the average for the ten-year period, 1890-99.

The accompanying table gives details as to the prices and movement during the month of March, with comparisons with prices for February, 1920; March, 1919, and March, 1914.

BUILDING PERMITS UP THREE AND HALF MILLIONS

March Figure Shows Big Advance Both for Month and Year—Nova Scotia and New Brunswick Experience Declines

BUILDING permits issued in fifty-six Canadian cities, according to the figures of the Department of Labor, shows an increase during March, 1920, as compared with the preceding month, the total rising from $4,684,934 in February to $8,258,410, an increase of $3,573,476, or 76.3 per cent. All the provinces registered increases in this comparison, those in Ontario, Quebec, Alberta and Manitoba being very substantial. As compared with the corresponding month in 1919, there was an increase of 148.1 per cent., the value for March, 1919, having been $3,329,050. Nova Scotia and New Brunswick, as during February, were the only provinces to register declines in that comparison.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Returns of the Montreal City and District Savings Bank and of La Caisse d'Economie de Notre Dame de Quebec for the month of March, 1920, show a small reduction in demand deposits, the figure being $813,464, as compared with $844,418 in the preceding month. Notice deposits in the case of the former institution show an increase of $746,096, as compared with the February figure, while in the latter case an increase of only $83,235 is recorded. The following is the summarized statement:—

DOMINION GOVERNMENT SAVINGS BANKS

Deposits in the Dominion government savings banks for March, 1920, exceed those of the preceding month by over $16,000. The balance at the credit of depositors at March 31st was $10,453,853, compared with $10,437,604 at the end of February. The following is the statement:—

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended May 7, 1920, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
May 7	0	6	0	0	1	2	0	1	0	10	9
Apr. 30	3	2	1	1	3	0	0	0	0	10	6
Apr. 23	1	4	1	0	1	1	0	0	0	8	10
Apr. 9	4	3	4	3	2	2	0	0	0	18	8

For the week ended April 29, Bradstreet's report 6 failures, as compared with 7 for the same week in 1919, 19 in 1918, 20 in 1917 and 24 in 1916. For the week ended May 6, the figure was 13, against 5 in 1919, 12 in 1918, 16 in 1917 and 44 in 1916.

Mahan-Westman, Ltd., Vancouver, have purchased a building at 432 Pender St., and after having it remodelled, are now occupying it for office premises.

WORKMEN'S COMPENSATION AND FACTORY LAWS

Recommendations Designed to Promote Uniformity Submitted to Royal Commission by Two Special Committees—Both Reports Adopted

CARRYING out the recommendation of the national industrial conference held last October, the Dominion government called together a conference or conformity in labor legislation. This conference assembled in Ottawa on April 26. It was composed of representatives of the government, the employers and the employees of the Dominion, and of each province. F. A. Acland, deputy minister of labor, was the Dominion government representive, J. G. Merrick, of Toronto, being the employers' delegate and Tom Moore the employees'. The question of workmen's compensation legislation and of control of working conditions were referred to special committees, and the recommendations made by them were adopted by the commission as a whole.

Public Workmen's Compensation Recommended

The recommendations of the committee on workmen's compensation legislation were as follows:—

(1) That all provinces adopt the idea of exclusive state insurance to be administered by a board.

(2) That all workmen, not especially exempted under the act, who work in an industry which comes within the scope of the act, shall be under the act, regardless of the amount of remuneration.

(3) That all employees of provincial governments and of municipalities, including police and firemen, be included within the scope of the act.

(4) That the scope of Compensation Acts be extended as far as practicable to include industries not now covered by the act.

(5) That in all provinces contributions to the accident fund shall be borne exclusively by the employer.

(6) That all medical, surgical and hospital attention be supplied in cases of injury or industrial diseases.

(7) That in every province there should be a time limit within which claims for compensation should be filled.

(8) That, except in special cases, payment of compensation shall be made periodically, direct to the claimant by the board.

(9) That injuries due to disease or accident arising out of and in the course of employment should be considered as coming within the scope of the act.

Province Pay for Administration

(10) That the cost of administration of workman's compensation in each province be borne by the government of that province.

(11) That rules and regulations for prevention of accidents may be made by the board in each province and safety committees, composed of employers and employees, be established in the various places of employment, and further, that first aid appliances be installed at the various plants; all the foregoing to be under the direction of the board.

(12) Where, under any Compensation Act, the employer has the right to bring his employees under the act by election, the employees should have the same right where a majority so decide.

(13) That in cases of death or injury all provinces should adopt a uniform scale of compensation.

The committee's report was accompanied by a comparative table of workmen's compensation legislation in the different provinces.

Protection to Children

The committee on factory laws submitted the following recommendations:—

(1) In view of the limitation in certain provinces of the operations of the Factories Act to the industrial establishments where not less than a certain number of persons are employed, we would recommend:

"All industrial establishments in which one or more persons are employed where articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, shall be subject to inspection."

(2) Employment of boys and girls:—

No boy under fourteen years of age or no girl under fifteen years of age shall be employed in an industrial establishment.

(3) Hours of employment for boys, girls and women:—

In keeping with the draft convention of the Washington conference limiting the hours of labor, we recommend that women, girls and boys shall not be employed for more than 48 hours in any one week, nor before 6 o'clock in the morning, nor later than 10 o'clock in the evening, nor more than 10 hours in any one day, including overtime.

Boy shall mean a male person between the ages of 14 and 16 years.

Mines and Public Utilities

At its closing session on May 1, the commission submitted several other recommendations. The most important of these was to the effect that all disputes in mines and public utilities should be dealt with exclusively by federal legislation. This includes public utilities under control of the provinces. It was also recommended in connection with the mining laws, that all provinces should insert regulations in mining laws providing for not more than eight hours as a legal day's work, as incorporated wholly or partly in the existing laws of Alberta, British Columbia, Ontario, Quebec and Yukon.

In concluding its report the commission stated that it lacked information enabling it to decide upon the advisability of the extension of the present federal law to other industries, and therefore made no recommendation.

PROGRAM FOR LIFE UNDERWRITERS' CONVENTION

The committee which has charge of the program for the 1920 convention of the Life Underwirters' Association of Canada is meeting in Ottawa to-day. An outline of the events has already been prepared. Some of the features are to be addresses by Sir Arthur Currie, Sir Henry Drayton and Haley Fiske. Business, industrial and group insurance, the taxation of life insurance and inheritance taxation will also be discussed. Reservations are now being made, and a good attendance is expected. The Ottawa association has appointed convention committees, with chairmen, as follows: Transportation, J. H. Halpenny; publicity, S. J. Montgomery; reception, W. Lyle Reid; registration, P. A. Holmes; entertainment, W. G. Keddie; finance, A. S. Wickware; accommodation, W. J. Phillips. President, W. T. Lamb; treasurer, B. H. Cole; secretary, P. A. Holmes.

Some of the association's work since the last annual meeting was reviewed at the semi-annual meeting of the executive committee, held in Ottawa on January 19th. The committee on legislation reported that the movement to have license fees in Ontario increased had been blocked, and a new application form was being prepared. The education committee reported that a course on life insurance had been started in the University of Alberta, and a sub-committee was formed, with power to act, to form a school of life insurance salesmanship along the lines of the Carnegie School of Technology. M. H. Bingeman, chairman of the finance committee, resigned, owing to his removal to Winnipeg, and Wm. May, Toronto, was appointed to succeed him in that position. Resolutions calling for change in the Ontario Insurance Act as affecting rebating, and also a resolution dealing with agents' qualifications for licenses were handed to the secretary to be communicated to the committee on legislation.

Bond dealers of Quebec City have organized a Quebec Financial Club, and held their first meeting on May 1. The executive committee is composed of Neuville Belleau, Rene Dupont, Arthur Amos, Oscar Hamel, Leon DesRivieres, H. Boisert, Lieut.-Col. Cook, D.S.O., and Cortlandt Fnges.

TOURIST INDUSTRY ON THE PACIFIC COAST

One Which Can be Immediately Developed, and Which Will Help to Meet Our Immediate Obligations

(Special to *The Monetary Times*)

Vancouver, May 5th, 1920.

"CANADA is in the position of a manufacturer who has many heavy obligations to meet, most of them due in a short time," said J. R. Davison, publicity manager for the city of Vancouver, in speaking to *The Monetary Times*. "This manufacturer may make a line of goods for which he has already the raw material in stock, for which the market is already found and for the sale of which he receives cash in hand. He can manufacture these goods quickly and get almost immediate returns from their delivery. He may also make other products which require considerable time to manufacture for which he may have to search for a market and even when these are sold, he may have to give long term credit, so that he will not get returns for a comparatively long period. Will not this man put his energies first on manufacturing and delivering those goods for which he can get the money to pay his early debt. This is the obvious thing to do.

A Revenue Producer

"In the same way Canada has an industry which can be developed very rapidly and which will turn in, within a very short time, the actual cash returns. I refer to the tourist industry. It seems to me that all across Canada we should try to realize what an immense producer of revenue this industry is in other countries. We should realize the wonderful attractions we in Canada have to offer, should realize that these are immediately available and should then set about to develop this industry on a scale commensurate with the opportunity.

"To my mind, I know of no way in which in such a short time and with such a comparatively small investment can we secure such large and quick returns. We have to the south of us an immense market of one hundred and ten million people. Many of these have been accustomed for years to spend their holidays in Europe and other points outside the United States. Proper publicity and attention to giving service is all that is needed to bring into Canada tens of thousands of people who have never been as free with their money, with the resultant benefit to Canadian business men all across the country. With the facilities we now have we can easily double our income from travellers from the United States and elsewhere and a comparatively small expenditure would still further increase our capacity for taking care of this tide.

Five Million Dollars Last Year

"We in British Columbia have demonstrated this very definitely, though on a small scale. Vancouver and Victoria have for several years been seeking to promote travel from across the border, with the result that last year, in the case of Vancouver the takings from the tourist amounted to some five million dollars and it has become such an obvious means of bringing business to the community that bankers and other business men, even the most conservative, are realizing its importance and as yet, we in Vancouver have only touched the fringe.

"We are advertising now in California and from the results secured demonstrate that those to the south of us are glad to go, to what is to them, a 'foreign' country, to see the different customs, to get the different flavor and to enjoy our unexcelled summer climate and scenic beauties.

"I would like to see a greater interest in this industry right across Canada and a determination too, to provide facilities, particularly the roads that we need so badly to link up the east and west.

"We should by no means neglect to utilize our other resources to increase the number of factories in Canada, the production from field, forest and mine and as one of the surest means of doing this, we should develop the tourist traffic which has this development as its second result.

"There are now in Ontario and Quebec, men at the head of manufacturing plants who came first to hunt or fish in Muskoka or in the north. We have in British Columbia as fruit growers, ranchers, manufacturers, lumbermen, miners, those who saw the wonderful possibilities of this province when here as pleasure seekers in the woods and on the streams and lakes. We anticipate a heavy season this year and are planning to take good care of all visitors."

INTERNATIONAL MINING CONVENTION AT SEATTLE

Puget Sound May Have Iron and Steel Plant—Demand for Gold for Commercial Purposes a Factor in Diminishing Supply Available for Currency

BRITISH COLUMBIA was well represented at the International Mining Convention, held in Seattle, Wash., April 7th to 10th, 1920. Last year this convention met in Vancouver, and mining developments in British Columbia received considerable attention. Many of the features this year also interested the Canadian visitors. The convention was not restrictive, but each state, province or territory was entitled to appoint ten delegates, and each state or provincial department five.

One of the features of the convention was the exhibit of mining machinery. Mineral resources of the western states and provinces were also described at length. Dean Milnor Roberts, of the University of Washington, spoke on "A Proposed Iron and Steel Plant on Puget Sound." He outlined the history of the several small plants in the northwest, and pointed out the situation of the available iron ore deposits, both in Pacific coast states and in British Columbia. Efforts to establish a larger steel industry have, however, not been limited to reports and discussions, he said, for three years ago a group of men made a thorough study of the situation, and an announcement was made at that time that large interests, both in the east and in the west, would carry out the proposed plans. Certain Seattle men had been asked to join the enterprise, which was a private concern, and about which only general features were permitted to be published. Mr. Roberts said that he was informed that the enterprise was to be taken up again, the war having interfered with the previous plans.

Restore Currency to Gold Basis

In discussing gold production and the use of the metal as currency, Vandeveer Curtis, of the University of Washington, said that, from the viewpoint of the economist, it was an unsound principle to reduce the amount of gold in the dollar. He opposed any tampering with the gold dollar, and recommended placing the currency back on a gold basis as soon as possible. To stimulate the use of gold in currency would, in his judgment, do away with inflation, and monetary problems would soon adjust themselves.

John Clausen, vice-president of the Union National Bank of Seattle, urged that the monetary gold reserve of the United States be protected from excessive withdrawals for other than monetary uses, and expressed his approval of the legislative proposal suggested by the American Mining Congress, that a fund be cerated by imposing an excise upon the manufacture and sale of gold for other than monetary purposes, this fund to be utilized as a premium to producers of gold in order to stimulate production.

Governor Emmet D. Boyle, of Nevada, asked for support for the McFadden bill, now under consideration. "I do not believe that payment of a bonus on gold production is practicable at this time," he said. "I do believe that if a producer sells gold to a manufacturer as a commodity, he has a right to sell at a profit. More gold is used in the arts than is produced. A reliable average price of the jeweller's resale of gold is $145 per ounce. To preserve the necessary amount of gold for credit purposes, its production must not be cut off. It is sound and practicable business for commerical users of gold to pay an extra bonus for gold, and this would in no way affect the gold standard."

RELIEF AGAINST THE PROVISIONS OF A WILL

Application of Saskatchewan Devolution of Estates Act—Widow May Obtain Relief if Will is Less Favorable Than Would be Intestate Succession

IN a recent case before the Saskatchewan Court of Appeal, it was held that a widow may obtain relief against the provisions of a will by which she is left a lesser share of her husband's property than she would have received had he died intestate.

This is an application by the widow of the late Thomas H. C. Baker for an order that the executors of the will of her late husband pay to her one-third of the proceeds of all properties of which her husband died possessed. Baker died in December, 1918, leaving a widow and three infant children. He left property to the value of $30,000. By his will, which was made in March, 1915, he left all his property to his executors in trust to realize the same, pay his debts and funeral expenses and invest the remainder in good securities, followed by these provisions:—

Provisions of the Will

"Thirdly, to pay over to my wife or until she shall remarry or until her death, whichever event shall happen first, the entire interest or proceeds from the aforesaid investments. And I direct my said wife to apply the said proceeds so long as the same shall be paid to her for her maintenance and the support and maintenance of my children.

"Fourthly, should my wife remarry or die while any of my said children are under the age of twenty-one years, I direct my executors and trustees to then apply the interest and proceeds from the said investments towards the maintenance, support and education of my said children in such proportions as their needs may require, and the funds at the disposal of my said executors and trustees may admit of, until such time as my youngest living child shall be of the age of twenty-one years, at which time I direct my executors and trustees to realize upon the said securities and pay over to my children then living all my property, share and share alike."

Might Apply to Supreme Court

An application was made by the widow under the Devolution of Estates Act, R.S.S. (1909) Cap. 43, as amended, on the following sections: "11a. The widow of a man who dies leaving a will by the terms of which his said widow would in the opinion of the judge before whom the application is made, receives less than if he had died intestate, leaving a widow and children, may apply to the Supreme Court for relief."

"11g. On any such application, the Court may make such allowance to the applicant out of the estate of her husband disposed of by will, as shall on the opinion of the trial judge be equal to what would have gone to such widow under this Act had her deceased husband died intestate, leaving a widow and children."

The application was refused by the trial judge and this appeal was then lodged.

Entitled to the Appeal

Haultain, C. J. S., reversed this decision as follows: "If the deceased had died intestate his widow would have been entitled to one-third of all his property absolutely. It cannot be argued, therefore, that under the terms of the will she would not receive less than if he had died intestate. Under those terms, she is obliged to apply the income arising from the trust fund for her maintenance and support and the maintenance and support of the three children, so long as they live. That practically means that she will only have the benefit of one-quarter of the estate and that only so long as she remains unmarried. I will not go so far as to hold that the wife's right under this legislation is absolute and that relief should always be granted without regard to all the circumstances of the case.

"It is quite clear from section 11g of the Act that the wife has not an absolute right to one-third of the property, as that section gives a large discretion to the judge as to the nature and amount of the allowance to be made. But whereas in this case the wife is left manifestly worse off than she would have been in the case of intestacy and has done nothing to disentitle her to relief, I think the relief might be granted. I would allow the appeal."

EMPLOYMENT REPORT REFLECTS SPRINGTIME EXPANSION

The Employment Service of the Department of Labor reports that returns from the Dominion and provincial offices of the Employment Service of Canada for the week ending April 17th, 1920, shows the highest number of placements in any week since September 27th, 1919. The reports indicate that the normal springtime expansion in demand is well under way. Every weekly report in the period from November 1st to April 1st has shown a surplus of labor in comparison with the demand, but every report since April 1st has shown demand in excess of supply. The number of vacancies offered by employers in the week ended April 17th is the largest since the harvest demand of last autumn. All provinces show marked increases in the number of placements, a new weekly record for placements being established in Ontario, and British Columbia also in the last two weeks has exceeded all previous records. The offices reported that they had referred 9,889 persons to regular positions, and that 8,630 of these received employment. This represents an increase of 747, as compared with the returns of the previous week, when 7,883 persons were placed. In addition, 1,650 casual jobs were supplied, as compared with 1,418 during the week ended April 10th.

During the week 10,828 applicants were registered, of whom 956 were women and 9,872 were men. This represents an increase of 774 applications when compared with the 10,054 of the preceding week. The number of vacancies notified by employers totalled 11,118, of which 1,597 were for women and 9,521 were for men. When compared with the 10,530 vacancies of the preceding week, an increase of 563 is shown. The number of applicants remaining unplaced at the end of the week totalled 20,717, while the number of vacancies remaining unfilled was 12,882. This compares with 21,654 unplaced applicants and 12,915 unfilled vacancies at the end of April 10th. Of the placements in regular employment, 615 were women workers and 8,015 were men. The number of ex-service men reported as placed was 3,552.

For the week ending April 24th there was a still higher placement figure. An increase is noted in most of the provinces, the maritime provinces establishing a new record of placements, while a nominal decline was registered in Ontario, Alberta and British Columbia. The offices reported that they had referred 10,038 applicants to regular positions, and that 8,689 of these received employment. This represents an increase of 59, as compared with the returns of the previous week, when 8,630 persons were placed. In addition, 1,774 casual jobs were supplied, as compared with 1,650 during the week ended April 17th. The placements were reported by provinces as follows: Prince Edward Island, 44; Nova Scotia, 177; New Brunswick, 516; Quebec, 640; Ontario, 2,560; Manitoba, 1,585; Saskatchewan, 894; Alberta, 940; British Columbia, 1,333. During the week 11,064 applicants were registered, of whom 941 were women and 10,123 were men. This represents an increase of 236 applications, as compared with the preceding week. The number of vacancies notified by employers totalled 10,930, of which 1,348 were for women and 9,582 were for men. When compared with the previous week, a decrease of 188 is shown. Of the placements in regular employment, 621 were women workers and 8,068 were men. The number of ex-service men reported as placed was 3,289.

News of Industrial Development in Canada

Present Hydro Situation in Ontario Seriously Affecting Industries—Work on Baldwin's Steel Plant Stopped—Problem of Great Lakes Paper Site Nearing Solution—American Industries to Locate in Quebec Province

THE Hydro power situation in the province of Ontario is becoming acute, and industries are affected to no small extent. While the difficulties of the Hydro are fully realized, it is contended that the commission should not oversell its power supply, which is apparently the case now. Contracts have been entered into with manufacturers, but the Hydro has not fulfilled its obligations, and, therefore, Ontario industries are suffering.

One typical case is that of the Baldwin's Canadian Steel Corporation, which company decided to locate in Toronto, following a satisfactory arrangement with the Hydro Commission, and up to the present time building operations have been carried on at Ashbridge's Bay to a very large extent. Owing to inability to secure a satisfactory contract for power, the building operations have now been discontinued, and it is possible that Toronto may lose a very important industry. Speaking of the situation, A. M. Russell, president of the Steel Corporation, said:—

"We realize the difficulties, and that the Hydro has oversold its power supply, but it would be impossible to operate our plant on the quanitity of power offered us. The 2,500 horse-power available would only aggravate the situation. We notified Sir Adam Beck that we could not possibly operate unless we were assured of getting, in addition to the 2,500 horse-power now offered, 2,500 more on June 1st, 2,500 additional on September 1st, and 3,500 on January 1st next. This would be the very minimum on which we could operate. We would, under the development contemplated, require very shortly 20,000 horse-power, and our agents, when negotiations looking to our establishing in Toronto, were on, were assured that ample power would be available, and I may say, that the promise of cheap power was the determining factor in bringing us to Toronto. It was, therefore, a severe blow to us when we received a letter from Sir Adam Beck, saying that he could not give us the power we require at present. We have expended a great deal of money here. Roger Miller and Son, who have a half million dollar contract for plant construction, have completed more than two-thirds of this undertaking. We have been operating two furnaces at night, taking advantage of power available during the off-peak, and have been producing steel castings for the construction of our big plant, and also for the trade. We expected to have 2,500 men working here very shortly. What will ultimately be done with the plant will depend upon the decision of the directors in England."

It has been frequently suggested that the Hydro build steam plants throughout the province for reserve, and, presumably in reply to such requests, the commission has announced its intention of undertaking the erection of a steam-power plant to help out until the Chippawa power project is able to make good the deficiency in power. Such a plan, it is hoped, will relieve the situation considerably.

Pulp and Paper Industry

It is understood that the Ontario government will give consent to the Great Lakes Pulp and Paper Co. to locate at Mission, near Fort William, instead of at Bear Point, near Port Arthur. The company has had considerable difficulty in obtaining a site, the power problem being the chief setback, but it is hoped now that with the new arrangements the problem will be solved. The Great Lakes Co. sought location at Mission, near the mouth of the Kaministiquia River, on the understanding that it would be able to get its power from the Kaministiquia company, but the Ontario government has no intention of allowing the paper firm to break its implied agreement with the government, that it get its power from the Hydro-Electric Commission, as the development of Nipigon power was begun on the assumption that the Great Lakes company would use a substantial amount of that power. It is understood that the government is arranging to have Hydro power developed in the Nipigon and transmitted to the Great Lakes company on the mouth of the Kaministiquia River. There would, of course, be a slight increase in cost because of having to transmit the power from the Nipigon to Mission.

A. Alcorn, of Blackville, and Frank C. Murchie, of Milltown, N.B., have completed arrangements for the formation of a company, which will probably be known as the Alcorn-Murchie Pulpwood Co. The company will be wholly owned and controlled by these gentlemen, and its object will be to procure all the pulpwood that can be purchased by them, both for Dominion use and for foreign export.

Announcement is made of the sale by Edward London, of Canterbury, of 2,200 acres of wild land on the Shogomoc waters, in York county, New Brunswick, to James M. Pierce, of Houlton, Me., and Arthur Patterson, of Penobscot, Me. It is understood that the pulpwood secured on this land will be shipped to the United States.

The Fraser Companies, Ltd., of Edmundston, N.B., have exercised an option they have recently held on the Dominion Pulp Co.'s mills near Chatham, N.B., on the Miramichi, and holding of 288 square miles of Crown land timber limits. somewhat more than $1,000,000 is involved in the transaction. The Dominion Pulp Co.'s mills have a present capacity of fifty tons daily.

Construction of an 18,000-ton pulp mill will be undertaken at East Angus, Que., by the Brompton Pulp and Paper Co., Ltd. This plant will probably be in operation before the end of the year.

Iron and Steel

The view has been expressed by many that the connection of the Canada Steamship Lines, Ltd., with the new British Empire Steel Corporation is most vital and advantageous. Speaking of the situation, President J. W. Norcross, of the Steamships company, said:—

"It is quite obvious that any corporation with a large tonnage of both manufactured and raw materials to be moved should be in absolute control of its water transportation necessities. Without this the company would be dependent in respect to one of its fundamental requirements on the vagaries of rates of any big shipping combination in control of the situation, adverse or arbitrary action on the part of which would vitally affect its profitable operation. Such combinations are being arranged in both Great Britain and the United States to-day, the many small concerns are being absorbed by the few large transportation interests. It is essential, therefore, to the success of the new corporation that it be completely independent in this respect and not at the mercy of any combination of shippers. On the other hand, it is very good business for the Canada Steamship Lines to link up with the British Empire Steel enterprise, which will control the movement of an enormous tonnage of material. We have carefully studied the subject from every angle, and we are convinced that the arrangement which is shortly to be submitted to our shareholders will prove a highly profitable one in every way."

The inclusion of Canada Steamship Lines in the scheme, Mr. Norcross stated, was desirable also from the viewpoint of inland navigation. The principal steel products marketed in the Dominion, he pointed out, consist of rails, for which business the British Empire Steel Corporation would find it difficult to compete successfully in the Canadian West unless

the company were able to control sufficient tonnage for water transportation.

"By absorbing the Canada Steamship Lines," he said, "they will have a very efficient and modern inland transportation system, which can be utilized to the fullest extent, thereby putting the new corporation on a better competitive basis with the other steel manufacturing plants situated in Ontario and elsewhere.

Another large development in the steel industry of central Canada is the construction of the structural steel mill by the Algoma Steel Corporation at the cost of approximately $7,000,000. Work has already been commenced at Sault Ste. Marie, Ont., and it will be completed within the course of the next twelve months, according to the plans of the company. Equipment will be installed that will enable the corporation to produce structural steel shapes up to 24-inch channels and beams. Ultimately, it is intended to produce 27-inch beams when the demand for this size is sufficiently large in Canada to warrant this. Canada's imports of structural steel of all descriptions have been estimated at approximately 300,000 tons a year. At the outset the Algoma Corporation plans to produce about one-third of the entire requirements of the Dominion, and it will eventually manufacture enough structural material to provide for all domestic needs. In addition to the initial output of 100,000 tons of structural steel, it is planned to roll the greater part of the corporation's rail products in the new mill. Thus within the next year the output at the Sault will be raised from 300,000 to 400,000 tons of steel per year, and the number of men on the pay-roll will be raised from 3,000 to 3,600. Steel rails are rolled in the present mill at the Sault up to 105 pounds. It is the intention now to provide for the rolling of rails up to 125 pounds in connection with the new structural steel mill. The four blast furnaces have a monthly capacity of 45,000 tons of pig iron, and the by-product coke ovens have a maximum output of 45,000 to 50,000 tons per month.

American Manufacturers and Quebec Industry

The announcement is made from the office of the Canadian Manufacturers' Association at Montreal, Que., that many American firms are contempalting locating branch plants in the province. Among the industries that are seeking factory homes, preferably in the vicinity of Montreal, for shipping purposes, is the Thos. A. Edison Co., of Orange, N.J. The company is considering the building of an extensive plant there, and have sent a series of questionnaires to the Canadian Manufacturers' Association to secure information as to taxation, prices, duties, preferentials, etc., which will dictate their location. The White Motor Truck Co., of New York, is also negotiating with a view to the establishment of a branch factory near Montreal, and have been in communication with the C.M.A. with regard to harbor facilities, costs, etc., and to labor conditions.

The Locomotive Superheater Co. have established a plant at Sherbrooke, under the name of the Sherbrooke Foundry Co., for the manufacture of superheaters for locomotives, which will employ a large number of hands. It is also stated that eighteen other American manufacturing firms are negotiating for factory sites in the province of Quebec, and it is expected that a number of these will start building operations during the coming summer. Most of these would be located at points outside Montreal, in order to avoid the high costs here, while selecting points where shipping facilities would be adequate to carry on their business.

The first reason why these firms wished to establish in Quebec, was the comparative immunity of the province from serious labor troubles, which have latterly caused so much loss to American industry. These firms also desired to establish there in order to avoid the duty on goods coming into Canada, while they also wished to manufacture in Canada in order to secure the benefit of the British trade preferential on exports within the British Empire.

The Lake Superior Loader Co., of Duluth, manufacturing the "Armstrong Shovel," has opened negotiations to locate the Canadian plant in Port Arthur, Ont.

NEW INCORPORATIONS

The Pas Oil, Development and Exploration Co., Ltd., $2,000,000—Marshall-Wells, B.C., Ltd., $1,000,000—Glenn Farms, Ltd., $1,000,000

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

THIS SPRING

arrange your Life Insurance. Every year you delay means added cost. Every year means the added possibility of being unable to get Insurance. It is well to remember that 8% of all applicants are refused for ill-health and other considerations.

Obtain particulars of the Great-West Life Policies. They are well worth investigating. And so many people have thought them well worth applying for that the Company has now over $212,000,000 of Insurance in force.

Your request for rates will imply no obligation to insure. The Company is pleased to give the fullest information and advice by mail—and will, if desired, send specimen Policies.

News of Municipal Finance

Large Increase in Ontario Tax Rates Since Pre-War Days — Border Cities May Amalgamate — Montreal Revenue and Expenditure — Big Increase in Edmonton Tax Rate — Winnipeg Tax Collections Make Good Showing

In addition to the list of tax rates of Canadian municipalities in a recent issue of *The Monetary Times*, another interesting comparison has been prepared, showing to what extent such rates of Ontario cities have increased since pre-war days. The following table gives the 1919 mill rate, the rate immediately before the war and the increase:—

	1920 tax rate.	Rate prior to war.	Increase.
Brantford	40	22.5	17.5
Fort William	36	23	13
Galt	38	26	12
Guelph	32	24.8	7.2
Hamilton	35	20	15
Kingston	35.5	25.5	10
Kitchener	30.5	23.75	6.75
London	40	25.5	14.5
Ottawa	27.5	20.8	6.7
Peterboro	35	26	9
Port Arthur	37	20.5	16.5
St. Catharines	36	23.25	12.75
Sarnia	40	24.5	15.5
Sault Ste. Marie	38	18	20
Toronto	30.5	19.25	11.25
Welland	33	27.5	5.5
Windsor	34	22	12
Woodstock	37.7	23	14.7

Windsor, Ont.—Walkerville, Ford, Sandwich, and Windsor are planning to consolidate under one name. The financial side of the amalgamation is now being discussed, and until this is concluded, nothing definite will be known.

Winnipeg, Man.—According to tax collector Pattinson, tax collections for 1919-20 total $7,477,915, being 68.73 per cent. of the assessment, as against a percentage of 63.21 per cent. collected last year. Business tax collections total $372,104.26, 99.39 per cent. of the assessment, as compared with 98.99 per cent. collected last year in the same period. Total amounts paid the treasurer during the fiscal year amounted to $8,161,595. Collections this year exceed last year's total by $1,072,154. The civic fiscal year ended April 30th.

Montreal, Que.—A statement of the city's receipts and expenditures for 1919, has been submitted to the Administrative Commission by the city treasurer. It is summarized as follows:—

RECEIPTS.

Balance in bank, January 1st, 1919		$ 203,969
General revenue	$19,848,374	
Less refunds	39,723	
		19,808,651
Receipts on account of loans and special receipts.		14,650,651
Banks outside of Canada		162,369
		$34,825,668

EXPENDITURES.

Administrative expenses on Current Account		$19,882,860	
Capital and special expenditure		14,620,588	
Banks outside of Canada:—			
Bank of Montreal, London	$15,515		
Bank of Montreal, New York	1,565		
National Bank of Scotland	2		
		16,982	
			$34,520,432
Balance in bank January 1st, 1920			$ 305,236

Edmonton, Alta.—The city's tax rate for 1920 for public school supporters is 45 mills, and for separate school supporters, 41.76 in both cases, being a big increase over last year. The net assessment for municipal purposes is $79,191,550. In 1919 the amount was $79,199,320. Estimated expenditure for 1920 is $3,542,395, as compared with $2,804,133 last year, and is divided as follows: General municipal purposes, general debenture interest and redemption, $898,824; public schools, $1,112,900; separate schools, $106,015; library board, $49,098.

PUBLICATIONS RECEIVED

Financial Calendar, 1920.—Financial News Bureau of Canada, Montreal. 50 cents per copy. This calendar, which has appeared annually for several years, shows in chronological order the annual meetings to be held, interest payments on bonds and debentures, dividends due, and other financial events. This information is supplemented by a company survey, giving concise information about leading commerical and financial institutions of the Dominion.

Armenia and the Armenians.—By Kevork Aslan. Macmillan Co. of Canada, Toronto. 138 pages. $1.50. Following an introductory chapter on the Armenian question, this book surveys Armenian history from the earliest times down to the present day. The geographical situation, the climate, the origin of the Armenians and their subsequent history, are some of the subjects discussed. The author avoids the mistake of going too much into detail, confining himself to facts which the average well-informed person desires to know about the country and its people.

New Resource Map of Canada.—A "Map of the Dominion of Canada, indicating Natural Resources, Transportation and Trade Routes," scale, 100 miles to the inch, has just been published by the Department of the Interior. On this map varieties of mineral, agricultural and fishery resources, and the timber and fur in general, are printed in red lettering in their proper locations. The sites of important water powers, developed and undeveloped, are indicated, and the lines of all railroads completed up to date are clearly defined. The map can be obtained free of cost on application to the Superintendent, Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

Canadian Historical Review. — University of Toronto Press, Toronto. 50 cents per copy, $2 per year. This new monthly takes the place of the quarterly "Review of Historical Publications Relating to Canada," the work of which it continues and develops. Leading articles in this issue are: "Canada and the Imperial War Council," by George M. Wrong; "Notes on the Quebec Conference," by A. G. Doughty; "A British Secret Service Report on Canada, 1711," by James F. Kenney; "An Unpublished State Paper, 1688," by A. H. U. Colquhoun. The review of books and of recent publications relating to Canada is thorough. The "Canadian Historical Review" has a strong board of editors, and merits the support of Canadian readers.

Canadian Trade Index, 1920-21.—Canadian Manufacturers' Association, Toronto. 832 pages. $6. One of the valuable services rendered to manufacturers of Canada by the Canadian Manufacturers' Association is the publication of this complete reference list. The object of the index is to provide all buyers of Canadian manufactured goods, in whatever country they may be, with a dependable list of the articles made in Canada and the names of the manufacturers making them. In addition to the list, arranged alphabetically under the names of the products, this edition introduces two new features: a continuous alphabetical list of all manufacturers, whether members of the association or not; and a translation section in French and Spanish.

DEBENTURES FOR SALE

PORT DALHOUSIE, ONT.

The Village of Port Dalhousie is offering for sale by tender, one block of debentures for the amount of $120,000 under provisions of the Waterworks Act. The money secured from this will be used for the installing of a waterworks system, a by-law to this effect having recently been approved by the ratepayers. The debentures will be coupon bearing, and will allow for principal and interest at 6% to be paid in equal annual instalments over a period of thirty years.

Tenders are to be in the hands of the Clerk of the Municipality by Thursday, 27th May, at 6 o'clock p.m.

Further information apply to the undersigned clerk.

J. M. A. WAUGH,
Box 25, Port Dalhousie. 137

DEBENTURES FOR SALE

TOWN OF PEMBROKE

Tenders will be received by the undersigned, and marked, "Tenders for Debentures" on the outside, up to noon, Friday, May 28th, 1920, for the purchase of the following, with accrued interest:—

Local Improvement, $22,663.58, balance of $14,776.17, all payable in ten instalments, with interest at six per cent.

Principal and interest payable May 15th at Bank of Nova Scotia, Pembroke, in each year.

The highest or any tender not necessarily accepted.

S. L. BIGGS,
Clerk-Treasurer.
Pembroke, Ont., May 10th, 1920. 141

Government and Municipal Bond Market

Conditions Remain Unchanged — Budget May Clear Up the Situation — Halifax Trying the "Over-the-Counter" Method—St. John Also Offering Bonds Direct to Local Citizens.

BOND dealers do not find very much room for optimism these days. One prominent dealer even predicts a further reduction in Victory bonds, but, generally, the opinion is that they will hold steady for a while. The budget may throw some light on affairs, but Ottawa is holding pretty tight this year, so that the best bond men can do is to take a good guess at the outcome. The absorption powers of the market have been tested, and there is found to be very little demand for even the best bonds.

Some municipalities are trying to sell their bonds locally to combat the high cost of borrowing, but such a practice is not considered advisable, except in centres where investment conditions are excellent. Halifax, N.S., is trying the "over-the-counter" method, having failed to dispose of its bonds through the usual channels, while St. John, N.B., is also indulging in the same practice.

Coming Offerings

The following is a list of debentures offered for sale, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
York Township, Ont.	$ 18,000	5½	20-instal.	May 17
Gilbert Plains, Man.	$ 22,000	5½	30-years	May 18
Macdonald R.M., Man.	40,000	6	20-instal.	May 19
Massey River S.D., Man.	12,000	..	20-instal.	May 24
Pembroke, Ont.	37,439	6	10-instal.	May 28
Port Dalhousie, Ont.	120,000	6	30-instal.	May 30
Westbourne R.M., Man.	40,000	6	30-instal.	May 31
Gilbert Plains R.M., Man.	38,000	6	30-instal.	June 7
Glencoe, Ont.	18,000	5½	20-instal.	....

Massey River S.D., Man.—Tenders will be received until May 24, 1920, for the purchase of $12,000 20-instalment debentures. D. F. Wilson, Fort River, Man.

Township of York, Ont.—Tenders will be received until May 17th, 1920, for the purchase of $18,000 5½. 20-instalment public school debentures.

Macdonald R.M., Man.—Tenders will be received until May 19, 1920, for the purchase of $40,000 6 per cent. 20-instalment debentures, issued in denominations to suit purchaser. H. Grills, Sanford, Man.

Pembroke, Ont.—Tenders will be received until May 28th, 1920, for the purchase of $22,663 6 per cent. 10-instalment local improvement debentures and $14,776 6 per cent. 10-instalment debentures. (See advertisement elsewhere in this issue.)

Debenture Notes

Sherbrooke, Que.—The city will raise $566,000 for an extension of the programme of drains, sidewalks and building.

Glace Bay, N.S.—Trustees of School Section No. 14 will borrow enough money to build a modern six-roomed school house.

Sarnia, Ont.—Notice has been given of a by-law authorizing the issuance of $200,000 debentures for the Housing Commission.

Esquimalt, B.C.—The council has redeemed $25,000 debentures, which are part of a parcel of 50-year sewer bonds issued in 1913.

Lennoxville, Que.—Ratepayers have voted in favor of the consolidation of the floating debt of the municipality. A by-law has also been passed authorizing the raising of $75,000 for a new water system.

Montreal, Que.—The Catholic School Commission has provided for the raising of $900,000 for the construction of six new schools. For the present only $690,000 has been voted, the balance to be voted as need arises.

Saltfleet Township, Ont.—The council decided that none of the bids on the $40,000 6 per cent. 20-instalment debentures were satisfactory, so all were rejected. The township will try to dispose of the issue locally at par.

Saskatchewan.—When A. E. Ames and Co. and the Dominion Securities Corporation purchased $1,000,000 6 per cent. 4-year bonds last month at 102.20, they also took an option on another $1,000,000 at the same price. This option has expired, but has not been exercised.

Woodstock, N.B.—Authority has been given to raise $30,000 by 6 per cent. debentures, for sidewalks. It is understood that the issue will be disposed of locally. The council has decided to guarantee the bonds of the Agricultural Society, and a vote of ratepayers will be taken on June 14.

London, Ont.—At the next meeting of the Board of Education, Trustee Rowe will move the construction of a new $500,000 collegiate. Mr. Rowe would have the board secure authority to use the $170,000 debentures secured some time ago for a branch collegiate, for the purpose of the new building.

St. Hyacinthe, Que.—The city council has passed a by-law authorizing the issue of $165,000 of debentures for paving and other purposes. The bonds will be in denominations of $500, with interest at 5 per cent., and will mature serially from 1921 to 1940. They will be payable at La Banque Nationale, St. Hyacinthe, Quebec and Montreal.

Halifax, N.S.—Not satisfied with the offers received on its bond issues, the highest being at a price which would cost the city more than 6.80 per cent., it was decided to reject all tenders. Another attempt will be made to market the $482,490 6 per cent. 10-year bonds, and with regard to the remaining $500,000 5½ per cent. thirty-three year bonds, these were embodied by a resolution of council in a further loan of $1,074,000, which it is intended to float at a future date.

Fredericton, N.B.—An issue of $200,000 of city bonds being made to pay for permanent streets have all been turned back by a bond house on the ground that they were improperly numbered. The act under which the bonds were issued calls for them to be numbered consecutively, but the printing house which printed the bonds numbered each lot falling due each year consecutively. They will be sent back, numbered consecutively for the entire issue and then it is said to be the intention of the finance committee of the city council to sell them over the counter with the expectation that they will be taken up largely by local people.

Regina, Sask.—The city has up to the present failed to solve the problem in regard to the payment of its sterling bonds domiciled in Canada. Several letters have been studied from various bond dealers, all of which are in a more or less reproachful in character at the city's action in paying this interest at the current rate of exchange. At a meeting of the council last week, City Solicitor Blair was asked to give his opinon on Ald. Peart's compromse proposal to pay par of exchange on bonds domiciled in Canada where holders were able to give an affidavit that they had acquired bonds prior to July 1, 1919. Mr. Blair replied that the practicability or otherwise of this proposal was a question of fact rather than of legal opinion and stated that the city treasurer would be in a better position to answer that question than he was. After several motions and amendments, nothing definite was decided, except that the special committee meet at a later date to make the final decision.

Manitoba.—The item appearing in these columns last week in regard to the sale of Manitoba bonds is liable to

VICTORY BOND OWNERS

with coupons due May 1st experienced the satisfaction of collecting their interest promptly and conveniently. The wisest thing to do with this interest is to reinvest it either in further Victory Bonds, which offer a substantial interest return, or in other high grade Canadian Government or Municipal Bonds. We offer a selection of these bonds, with a wide choice of maturities, and affording an interest return of as high as 7%.

Box 295, Monetary Times Toronto

prove misleading. The government has never committed itself to any promise in regard to the sale of bonds by private tender, although such a practice has been condemned by some of the members of the legislature from time to time. When the provincial treasurer disposed of the bonds in New York he was apparently acting in the best interests of his government in view of the present market conditions.

The government is about to issue bonds to cover capital expenditures voted at the last session of the legislature, Hon. Edward Brown, provincial treasurer, states. Tenders will be called for moneys voted for the following items within the next few weeks: The Rural Credits Societies; Manitoba Farm Loans Association; housing purposes; the Manitoba telephone commission; the good roads; the hydro extension; and in addition, public biuldings now in process of erection.

Hon. Edward Brown has also issued a statement regarding the private sale of $2,850,000 bonds in New York. The issue in question represents the capital expenditures of the government during the last five months of the fiscal year, which ended the 30th of November last, and the amount appeared in the liabilities of the province as presented to the House at the recent session in the form of treasury bills outstanding.

Mr. Brown says:—

"The reason why the issue was not made in 1919 was on account of the fact that before the money had been actually spent in its entirety we had entered the period of Victory loan campaign, extending from September 1 to December 1. When we were in a position to go to the market on December 1, we had to devote all our attention to the item of 6½ millions of the debt of the province, which matured on February 1 in New York. However, we were able to make a very advantageous arrangement as to carrying the amount until May 1, by means of treasury bills. Of the total amount one million was carried at 5%, $750,000 at 5¼%, and $1,100,000 at 5½%. It was not until April 1 that we had finally disposed of the refunding issue of $6,500,000, and the time remaining before the treasury bills matured was very short. The market was not in a very satisfactory condition as was in evidence by the fact that when the Greater Winnipeg water district called for tenders for one million dollars only one bid was received.

"After giving the matter due consideration a very satisfactory understanding was reached with J. P. Morgan and Company, New York, by means of which we disposed of an issue of five-year 6 per cent bonds at price of 92.841 per cent. par, payable in American funds. Upon receipt of the proceeds of the issue a very satisfactory sale has been effected of the funds in question, the premium received amounting to $274,724 so that we are now in a position to report the net results of the transaction. The five-year 6 per cent. bond sale shows a net price to the province of 102.48 in Canadian funds or net interests rate of 5.40 per cent. In view of the fact that Liberty bonds in the United States during the same period have been sold to yield to the investor 7 per cent. and over, and the further fact that the British government during the same period have paid as high as 6½ per cent. for money, the net results of this transaction will be regarded no doubt as being of a satisfactory character. The treasury bills, which were outstanding and which matured May 1, have been retired, thus relieving the credit of the province of a considerable strain and enabling the government to go forward in a satisfactory way with its undertakings for the current season, concludes the statement."

Bond Sales

Sarnia, Ont.—Messrs. W. L. McKinnon and Co. have purchased $35,000 5½ per cent. 10-instalment debentures.

Glencoe, Ont.—Messrs. Turner, Spragge and Co. have purchased $18,000 5½ per cent. 20-instalment debentures.

Walkerville, Ont.—Messrs. Wood, Gundy and Co. have purchased $38,012 6 per cent. 10-instalment debentures at 96.63. Other bids were: Geo. Carruthers and Co., 96.20; C. H. Burgess and Co., 95.53; R. C. Matthews and Co., 95.24; Brent, Noxon and Co., 95.24. The bonds are now being offered to yield 6⅜ per cent.

Toronto, Ont.—When bids on the $200,000 5½ per cent. 20-year bonds of the Separate School Board were opened on May 12th, it was found that the two highest were the same, namely, Dyment, Anderson and Co. and Wood, Gundy and Co., both companies asking for a one month's option at 90. As Dyment, Anderson and Co. had purchased the previous issue of the board, they were given the preference. Other bids received were: C. H. Burgess and Co., 87.04; A. E. Ames and Co., 86.19; National City Co., Ltd., 85.93, while Brent, Noxon and Co. asked for two weeks' option on a bid at 86.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	98	98¼

AUTOMOBILE INSURANCE RATES REDUCED

Rates for automobile insurance of the companies in the Automobile Underwriters' Association have been reduced. The changes are by charging for a territory, the rates applicable to a lower rated territory, as indicated in the following instructions to agents:—

Public Liability and Property Damage.—Agents in Territory 2, page 5 of the Manual, will use rates applying to Territory 3, page 8, for Public Liability and Property Damage.

Fire.—No change in Fire Rates.

Theft.—Agents in territory represented in Schedule 1, page 23, will use rates in Schedule 2, page 24, on Theft insurance. Minimum rate, 20c.

Collision.—Territory 2, appearing on page 6, take Territory 4 rates. Territories 3 and 4, appearing on pages 8 and 10, take Territory 4, less 10 per cent.

Deductible Average.—All agents will use $25 deductible average instead of $50 deductible average for Collision.

INTERNATIONAL LOAN COMPANY

The seventh annual statement of the International Loan Co., Ltd., of Winnipeg, which appears elsewhere in this issue, shows the progress made by the company for the year ended January 31st, 1920. Mortgages and agreements receivable, which in 1919 were $264,710, rose more than $100,000 to $376,487 for the year under review. The company's assets, which consist practically of mortgages, now total $403,402, as against $288,079 of a year ago. The total indebtedness of the company at January 31st amounted to $44,444, compared with less than $7,500 last year. The large increase is due chiefly to a bank loan of $30,000.

Just a short time ago the International Loan Co. secured a federal charter, with permission to increase its authorized capital to $20,000,000. The reason for this is that much capital is needed for the development of agricultural resources and no new money is coming from Europe, which in pre-war periods advanced scores of millions. The plan of the company is to secure funds from the people of the province through the sale of its common stock. It is not intended to place debentures either in the local market or elsewhere. Shareholders of the company number 1,100, the great majority of whom are farmers, and the loans are made solely to farmers. The company is mutual, and it is the expectation that it will continue so. The amount of stock sold in the past year was equal in amount to all the stock sold in previous years.

BROMPTON AND BRAZILIAN FEATURE EXCHANGES

Both Issues Show Strength and Activity—"Merger" and Bank Stocks Not so Prominent This Week—New York Session Accompanied by Weakness

FOR the greater part of the week, stocks on the New York market were heavy and irregular, and at the close on May 12, practically all issues were lower. Unfavorable industrial conditions, superceding the credit situation, was responsible. Call loans, which for the most part were made around 8 per cent., rose to 10 per cent., although a slight recession took place at the close.

Generally, stocks on the Canadian market for the week ended May 12, were not very active, the bulk of the total dealings being furnished by a few issues. Those issues featuring in the new British Empire steel merger were not so prominent as in the previous week, in most cases the close being weaker, although Steel of Canada showed a fractional strengthening. The effect of the announcement of the new bank stock issues seemed to have worn off considerably, and Royal, Montreal and Merchants closed with losses.

Brompton Leader in Montreal

In Montreal, Brompton was the feature, with sales of 16,012, as against 10,665 last week. A record was reached when the stock advanced to a new level of 103. This high point was not maintained, however, there being a recession shortly afterwards to 100½, around which point the price fractionally fluctuated until the close at 101½, which was 5¾ points above the close of the previous week. The strength and activity of Brompton is attributed to the abandonment of the original plan to issue new stock at $20 or $25 per share to provide the company with additional capital, and to issue stock at par. There is also talk of raising the dividend rate, because it is not considered possible for the company to market the new stock with the rate at 6 per cent. Atlantic Sugar was an active issue, furnishing trading of 6,218 shares, as compared with 2,329 of the previous week. A gain of 2 points was also made, the stock closing at 93½. In the paper issues, Abitibi, new, was a feature, closing 3¾ points stronger than at the end of the previous week. Trading was also heavy, total sales amounting to 9,113. Such actions are attributed to pool operations which took hold of the stock and moved it up. The revival of the rumour that Laurentide is seeking to buy up Wayagamack for the sake of its timber limits, is reflected in the movement of both those issues.

Brazilian a Feature

Trading on the Toronto Exchange was extremely light in comparison with previous weeks, the most active issues being Brazilian and Atlantic Sugar, with sales of 1,148 and 635, respectively. The actions of Brazilian have attracted considerable attention during the past month or two, the rise and fall of the price corresponding to the exchange rate. About two months ago when exchange, which had been so adverse against Brazil, showed signs of improvement, Brazilian showed strength, rising to 48½. Since then exchange has gone somewhat backward, likewise Brazilian, which at the close on May 12, stood at 42⅝. Corresponding to these factors was dividend talk, which talk is prevalent now notwithstanding the fact that exchange is not as favorable as it was two months ago, and the net earnings of the company will be affected. Judging from the report of the company just made public, there is obviously no reason why the company might not pay a dividend.

Atlantic Sugar showed particular strength, gaining 1¾ points for the week, while Rogers, common, advanced 4 points. The advance of 2 points in Winnipeg Electric is connected with the new stock announcements of the company, which are viewed with favor. Losses and gains on the other stocks were not of a notable character.

Sales on the Montreal, Toronto and Winnipeg Stock Exchanges are shown on page 44 of this issue, together with sales of Canadian securities on the London and New York Stock Exchanges.

CORPORATION SECURITIES MARKET

Bell Telephone Co. to Increase Capital $35,000,000—Banque Provinciale to Issue One Million in Stock—Offering of Winnipeg Railway Preferred Shares

WITH the exception of Quebec Railway, very little activity was displayed in outstanding bond issues on the Canadian stock exchanges for the week ending May 12. Quebec Railway experienced a gain in price, but weakened at the close. Other issues were steady.

Public offering will shortly be made of the unsold balance of the $4,000,000 6 per cent., 20-year, general mortgage sinking fund gold bonds of the Abitibi Pulp and Paper Co., announcement of which was made in these columns last week, by the Royal Securities Corp. Principal and semi-annual interest of the bonds are payable at Montreal and Toronto, or, at the option of the holder, in New York, or in England. Coupon bonds are issued in denominations of $1,000 and $500, with privilege of registration as to principal only. They are callable in whole or in part at any time, at the option of the company, on three months' notice at 105 and accrued interest. The bonds are secured by a specific mortgage and charge upon the company's plant, machinery, timber limits and water powers, etc., subject only to $4,017,500 first mortgage bonds now outstanding, which latter are reduced each year by serial redemption. The sinking fund will operate to retire 90 per cent. of the new bonds before maturity.

Price Bros. and Co., Ltd., are about to apply the sum of $161,397 towards the redemption of the issue of $6,000,000 5 per cent. first mortgage bonds. Holders desirous of selling their bonds are invited to submit the price, inclusive of accrued interest from May 1st, 1920, at which they are willing to sell, for delivery on and after May 15th. The trustees do not undertake to accept the lowest or any tender or to purchase the whole or any part of the bonds offered.

Tenders of bonds should be addressed to: The Trustees Corporation, Ltd., Winchester House, London, E.C., 2, or to their agents George A. Touche and Co., Lewis Building, Montreal.

New Stock Offerings

The Eternal Battery Co. of Canada, Ltd., of Winnipeg, Man., is offering through the Notre Dame Investment Co., Ltd., of Winnipeg, $300,000 7 per cent., cumulative participating preferred stock at par. No bonds, debentures or other funded debt ranking ahead of the preferred can be created without funded consent of two-thirds of the shareholders, and the preferred shares participate after the common receives 10 per cent., at the rate of ½ per cent., for every additional 1 per cent., paid to the common until the preferred reaches 15 per cent. A special preferred dividend reserve is provided before the common receives any dividend.

Messrs. Foster, Barret, Riepert and Low, Ltd., are offering the unsold balance of $365,000 7 per cent., cumulative preferred stock of the Standard Paving Co., Ltd., at 97, carrying a bonus of 50 per cent., common stock. The Standard Paving Company has no bonded indebtedness and the preferred stock is the first charge on all its assets. The company owns and operates the Ottawa Construction Co., Ltd., and the Standard Paving Co., Ltd.

Bell Telephone Co.

The railway committee of the Dominion legislature has passed the application of the Bell Telephone Company of Canada to increase its capital stock from $30,000,000 to $75,000,000. Abnormal increase in the demand for telephones, and the prospect of even larger business during the next five or ten years, were the main reasons given for such an enormous advance by C. F. Sise, vice-president and general manager of the company, who appeared before the committee.

"The growth of the company's business had been simply enormous during the past few years," said Mr. Sise. "Last year, which was expected to be a lean year owing to the after-effects of the war, had seen 34,000 telephones added, and this year new subscribers had been added to the lists at

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

the rate of 1,000 a week. The budget of expenditure this year would be over $10,000,000, and within the next five years the company expects to spend at least $50,000,000."

None of the new stock will be issued under par, according to Lawrence MacFarlane, K.C., Montreal, counsel for the company, and the company has no intention of melon-cutting.

Banque Provinciale Issue

The Banque Provinciale du Canada announces that it will issue $1,000,000 new capital stock which will bring the total up to $3,000,000. The issue will be made at the ratio of $120 per share in the ratio of one new to two old shares to shareholders of record on May 31. The issue which was made by the bank last year was largely over-subscribed. Dividends will shortly be placed on a 9 per cent., basis, it is understood, being an increase of 1 per cent.

At a meeting of the Winnipeg Electric Railway Co., last week, shareholders authorized the issuance of new preferred stock to the amount of $3,000,000, and in consequence applications are now being received by the company. Sir Augustus Nanton who presided, explained that the meeting was called for the purpose of authorizing the issue of 30,000 shares of preference stock of the company, at the par value of $100 each, the holders of this preference stock to have fixed cumulative preferential dividends at the rate of 7 per cent. per annum on the paid-up capital of such shares, and such preference shares, in the event of liquidation or winding-up of the company or of a general sale or distribution of the company's assets, to rank both as regards capital and dividend in priority to the shares of any common stock. The president further explained that the proceeds from the sale of this preference stock would be used to pay off the floating indebtedness of the company, and that by issuing it the company did not increase its interest obligations. In view of the present conditions of the money market, it was stated, the company decided it was advisable to give a bonus of 20 per cent. of common stock; that is one share of common stock with five shares of preferred stock.

A new issue of $150,000 8 per cent. cumulative participating preferred stock of the Dominion Loose Leaf Co., Ltd., is being offered by Housser, Woods and Co. The object of the new issue is to provide additional working capital. Rapid growth has accompanied the operations of the company since its inception in 1913. Earnings which were then $34,774, have risen to $301,214.

NEW FACTORY FOR LONDON

The W. T. Rawleigh Co., one of the largest manufacturers of medicines, flavors, spices, toilet articles, stock and poultry preparations, insecticides, stock dip, disinfectants, etc., in America, will build a plant at London, Ont. W. R. Jackson, secretary, and A. R. Dry, chief counsel for the firm, were in the city recently, and completed the purchase of three acres of land, extending north from the C.P.R. line to Rattle Street. The London Hosiery Co. has one corner of this block, but the remainder will be used by the Rawleigh Co., on which to erect offices, factory buildings and warehouses. At present this company has its head office for Canada in Toronto, but with the erection of the London factory this city will become the headquarters. Another large branch is operating in Winnipeg. The head office of the company is in Freeport, Illinois, and there are branches in Memphis, Chester, Oakland and Minneapolis.

The National Life Underwriters' Association executive met in New York, March 29th, at which the Life Underwriters' Association of Canada were represented by Messrs. John A. Tory, W. Lyle Reid, J. T. Wilson and the general secretary. Several important matters were taken up and further plans made for the holding of the next international convention in Canada in the summer of 1922.

7% Cumulative, Participating, Preferred Shares

The Eternal Battery of Canada, Limited

Head Office and Factory - - Winnipeg, Man.

Preferred shares have priority over the Common on all assets of the Company both as to capital and fixed cumulative dividend at 7%.

No bonds, debentures or other Funded Debt ranking ahead of the Preferred can be created without the consent of two-thirds of the Shareholders at a Special General Meeting held for the purpose.

Preferred Shares participate after the Common receives 10% at the rate of ½% for every additional 1% paid to the Common until the preferred Dividend reaches 15%.

A special Preferred Dividend Reserve is provided for before the Common receives any dividend.

Investments and the Market

Financial Report of Western Grocers for 1919 Shows Some Satisfactory Advances —Evidence on Bell Telephone Case Before Privy Council—Average Grade of Ore, However, was Higher — Good Showing Made by Brazilian so Far This Year

Winnipeg Electric Railway.—Gross earnings of the company for March, 1920 amounted to $456,914, and net, after operation expenses, to $103,681. The surplus for the month after fixed charges was $37,726.

North Crown Mining Co.—Shareholders of the Thompson-Krist Mining Co., Ltd., have expressed their willingness for an amalgamation with the Porcupine Crown Mining Co., under the name of the North Crown Mining Co., and on May 15th, the new control was assumed.

Brazilian Traction, Light and Power Co., Ltd.—Total gross earnings for March, 1920, amounted to 9,900,000 milreis, as compared with 9,330,000 milreis a year ago. Net earnings advanced 297,000 milreis for the month, the figure being 5,310,000, as against 5,013,000 milreis in March, 1919. Aggregate net earnings since January 1st, made a particularly good showing, the increase over the same period last year being 2,244,000 milreis.

Ottawa Electric Railway.—The Ottawa Electric and Gas Co. is prepared to negotiate for the sale of its systems to the city of Ottawa. Col. D. R. Street, has written the city clerk that the company has had prepared a valuation of the physical assets and is now prepared to negotiate with the city as suggested in June, 1918, when the company wrote that it was arranging to have an appraisal made by recognized appraisers whose valuations were acceptable by leading concerns.

Toronto Railway Co.—The company is applying to the Ontario legislature for an increase in fares during the balance of its franchise period, in order to meet the wage demands of its employees.

This application is being opposed by the city of Toronto, it being contended that had the company properly applied the profits derived from the period in the twenty-eight years which it had enjoyed prosperity, the company would have been able to bear the burden of the two lean years. It is not expected that the company will be allowed to break or amend the terms and conditions of the franchise.

Montreal Light, Heat and Power Consolidated.—The company has applied to the Quebec Public Service Commission for authority to increase its rates for gas from $1 per thousand feet gross and 85 and 80 cents net, the present rates, to $1.10 gross and $1 net when accounts are paid within ten days. The company has made the application with considerable reluctance and only under the pressure of increased costs in all directions which they say leaves them no other alternative. The present rates have been in operation since 1914 since which time the company states there have been heavy increases in the cost of labor and materials, so that they now fail to cover the actual costs without taking into account any return on investment.

Mining Corporation of Canada, Ltd.—Net profits of the company for 1919 were $908,748, compared with $925,760 in 1918, and $2,557,091 two years ago. There was a production of 1,230,652 ounces of silver during the year, as compared with 1,708,252 in the previous year, and 1,485,541 in 1917. Notwithstanding the decrease in production, which was due to the strike in the summer, profits were very little below those of 1918. This result was due to the satisfactory underground developments, which made it possible for a high average grade of ore to the mills to be maintained throughout the year, and the increased price for silver. Ore reserves showed an increase, the figure being 1,307,220, as against 1,240,550 last year. After payment of three dividends, there was at the credit of the profit and loss account $3,311,577, as compared with $3,025,347.

Granby Consolidated Mining and Smelting Co.—Gross profits of the company for the six months ended December 31, last, amounted to $599,381, but the large deductions for taxes, etc., especially because the fact that war profits were assessed back for three years, reduced this amount to such an extent that only $60,000 was added to the surplus.

Production of the company during the six months was 11,260,585 lbs. of copper, 670,486 ozs. of silver and 9,697 ozs. of gold. About one-half the silver output came from the Granby's mines and the other half from ore smelted. The net cost f.o.b. at the smelter was 14.2c. per pound of copper and the cost delivered 16.7c. per pound. During the period the company was operating at about two-thirds of capacity and work is still being carried on at about that rate.

The report for the six months which will be soon issued, will show an increase in capital of $501,000, and an increase in current liabilities of $441,000.

Western Grocers, Ltd.—Net profits of the company for the year ended December 31, 1919, of $324,118, exceeded those of the previous year by $20,665. The balance at the credit of profit and loss according to the account, was $201,564, but subsequent to the closing of the books, the sum of $71,658 was credited to special reserve account, leaving a net balance of $129,906. Dividends to the amount of $167,202 were paid on the preference shares during the year.

In the balance sheet, particular attention is drawn to the increase of $621,800 in the outstanding preference shares, which is due to the preference shareholders of the company consenting to reinvest the unpaid dividends, which had accumulated during the five years ended December 31, 1918, in an equal amount of preference shares at par. Current assets increased $413,724, the amount being $3,679,217, against $3,265,493 in 1918. Total assets at $8,047,806, increased $576,254. Under liabilities, bank loans were increased $236,554 to $1,950,650. Surplus showed a reduction of $221,341.

In his report, W. P. Riley, president, points out that sales for the year showed a satisfactory increase over those of the previous year, with a corresponding favorable net result. "Trade prospects continue favorable," he says.

Bell Telephone Co.—The right of the company to utilize its reserve fund for extension to business while it is continuing to charge emergency increases in exchange right was discussed before the Privy Council of Canada on May 10 at Ottawa. Counsel for the cities of Montreal, Toronto, Quebec, Brantford and other Ontario and Quebec municipalities, as well as for property owners in Montreal, appealed to the cabinet against a ruling of the Railway Commission under which the Bell Telephone Co. was granted a temporary increase of ten per cent. in its rates. The main arguments for the appeal were consolidated and presented by Reginald Geary, K.C., of Toronto. The company was charging too much to depreciation funds, and was using its substantial reserve funds for its own purposes, while these should be applied to such an emergency as that on which they based their increased rates, counsel submitted.

Glynn Osler, K.C., for the company, pointed out that reserve funds had been spent for some years on new equipment and general extension of business, and that no objection to this or to the company's allotment to depreciation had been established at the original hearing before the Railway Commission, which had given its decision in favor of the company after exhaustive inquiry and "with reluctance," as the ruling had said. The Bell Telephone Co. would have

Halifax, N.S.—May 8—Seven large huts, formerly occupied by soldiers, were destroyed. Estimated loss, $30,000.

Ingersoll, Ont.—May 6—Farmhouse of Reuben Nancekivell, Dereham township, was destroyed. Loss partly covered by insurance.

Kitchener, Ont.—May 6—Barn and contents, together with live stock, on farm of Wm. Shantz, Petersburg Road, was destroyed. Estimated loss, $10,000.

Liverpool, N.S.—April 26—Residence of Judge J. G. Forbes was completely destroyed. Total insurance, $9,000.

Montreal, Que.—May 10—Building damaged at 182 St. Denis Street.

New Liskeard, Ont.—May 5—Sawmill of Sam McCresney, Matagami Lake, was destroyed. Estimated loss, $10,000.

Newmarket, Ont.—May 6—House of Robert Stewart was partly destroyed. Estimated loss, upwards of $5,000. Loss partly covered by insurance.

St. Thomas, Ont.—May 7—Barn and the interior of a large frame house were destroyed. Estimated loss between $2,000 and $3,000, covered by insurance.

Salem, Ont.—May 11—General store destroyed. Insurance, $4,500. Total loss, about $9,000.

Toronto, Ont.—May 10—Four garages, several cars and material were destroyed at rear of 106 Lee Avenue. Estimated loss, $3,100.

Woodstock, Ont.—May 8—Shed was destroyed, also back of Round's photo gallery, Wilson's jewellery store and Shanley's book store were damaged. Fire started by rubbish.

ADDITIONAL INFORMATION CONCERNING FIRES

Montreal, Que.—April 16—Some interesting statistics are contained in the report on the operations of the fire department for the year 1919, which was submitted to the Administrative Commission on April 16th. In a statement accompanying the report, which is signed by Chief Chevalier, the following tabular summary gives the ascertained causes of the 1,831 fires for the year. It will be noted, however, of the total fires, the origin of one-half is classified as being unknown. The table follows: Defective chimneys 65, candles 16, embers and ashes 33, combustibles near fire 2, sparks and live coals 9, sparks from neighboring chimneys 3, stoves and furnaces 178, matches 38, children playing with matches 83, gas jets, stoves, leaks 43, electricity 121, motors 42, thawing frozen pipes 20, chemical products, combustion and explosion 16, machine friction 15, overheating of oven 9, movie films 2, melted metal 2, grease 4, gasoline vapor 26, tar 20, incendiary or supposed 11, bonfires, firecrackers, etc., 29, spontaneous combustion 54, ruins 7, lightning 4, unknown 927, rats 2, imprudence of smokers 28, making a total of 1,831.

The report classifies the location of fires as follows: Factories 123, stores and warehouses 328, office buildings 10, in various institutions 15, theatres, churches and schools 34, dwellings 665, sheds and outbuildings 222, miscellaneous fires outside buildings 434.

The report estimates the fire loss during the year amounted to 1,584,881, divided as follows by months: January, $214,494; February, $96,095; March, $226,084; April, $119,286; May, $88,580; June, $52,199; July, $95,786; August, $129,116; September, $60,618; October, $199,918; November, $225,855; December, $76,850. Estimating Montreal's population at $684,464, the per capita fire loss is stated to be $2.33.

The Fire Prevention Bureau made 1,119 inspections of theatres during the year, 906 inspections of schools, 1,581 inspections of apartment houses, 78 inspections of hospitals and 221 inspections of churches and presbyteries. During the year 5,242 buildings were found in dangerous condition, of which 4,926 complied with the regulations, and 80 having failed to comply, 74 complaints were made in court and action in six other cases was suspended.

The Underwriters' Association reported 27 buildings as being in dangerous condition, and 54 complaints of the same kind were received from citizens. The department sent notices to 148 landlords whose buildings were without protection against fire, and the department also reported to the city building inspector 55 cases of buildings without fire escapes, etc.

Vancouver, B.C.—Fire Chief Carlisle has submitted the following report of fire losses for the month of March:—

The total loss sustained by fire for the month was $1,260, of which amount $1,130 was covered by insurance, leaving the property loss above insurance at $130. The total value of the property at risk was $352,110, with insurance to the amount of $146,200 carried on same.

The following shows the causes of fires, alarms, etc.: Blow-torch left too near woodwork 1, bush fires 6, carelessness with cigarettes, matches, etc., 1, coal piled over hot furnace flue 1, chimney fires 19, defective fireplaces 1, defective forges 1, defective furnace pipes 1, defective hot-air register 1, electrical origin (auto wiring) 1, false alarms 12, grease on range catching fire 1, hot ashes placed against wooden partition 1, incendiary (presumed) 1, lead melting-pot placed on planks 1, out of city limits 1, rags left on hot exhaust pipe 1, rubbish fires 2, smoke scares 4, sparks flying, chimneys, etc., 6, unknown 1, unprotected stovepipe 1.

The total property loss from fire in Vancouver above insurance carried was only $1,775 for the first three months of the year, according to the quarterly report of the Vancouver fire department. The total fire loss for the period was $14,197, and the value of the property at risk, $1,312,980. The number of alarms turned in last month was 65, damage occurring in the case of 11, one of which is reported to have been of incendiary origin.

Winnipeg, Man.—On the fire which occurred on April 7th in the premises of the Winnipeg Electric Railway Co. the apportionment of insurance losses are as follows: Atlas, $2,833; Alliance of London, $5,667; Alliance of Philadelphia, $5,667; Ætna, $5,667; Beaver, $8,500; British America, $8,500; Boston, $2,833; British Traders, $2,833; Commercial Union, $2,833; Caledonian, $1,890; Century, $2,833; Canada National, $14,167; Continental, $8,500; Eagle Star, $2,833; Employers', $2,833; Fidelity Underwriters, $11,333; Fidelity Phenix, $5,667; Globe and Rutgers, $1,417; Guardian, $5,666; General of Perth, $2,833; Glens Falls, $2,833; General Accident, $8,500; General of Perth, $5,667; Hartford, $2,833; Imperial Underwriters, $8,500; State of Pennsylvania, $5,667; Liverpool and London and Globe, $1,417; London and Lancashire, $6,610; Law Union, $8,500; London Guarantee $8,500; Liverpool-Manitoba, $8,500; Minnesota Underwriters, $11,333; Mount Royal, $2,833; North British and Mercantile, $2,833; Norwich Union, $5,667; North Empire, $2,833; New Hampshire, $2,833; New York Underwriters, $14,167; Northern, $8,500; Pacific Coast, $5,667; Phenix of Paris, $5,667; Phœnix of London, $2,833; Queen, $8,500; Quebec, $4,250; St. Paul, $2,833; Springfield, $2,833; Scottish Union, $4,250; Union of Canton, $2,833; Union of Paris, $2,833; Western, $14,167; Yorkshire, $2,833.

Taxation of Luxuries Feature of Budget Speech

Heavy Excise Duties Will Be Levied on Purchases of Expensive Goods—Business Profits Tax Reduced—Higher Rates on Large Incomes—Tariff Investigation Has Already Begun --Currency Situation Now Sound, but Deflation Anticipated During Coming Year

SIR HENRY DRAYTON, minister of finance in the Dominion government, delivered his first budget speech on Tuesday afternoon. First he gave a comprehensive review of the financial and economic position of the Dominion. Conditions obtaining not only in Canada, but all over the world, he said, were very different from the conditions which prevailed while the war was in progress. Then the compelling necessity of the moment required the raising of large sums of money. It was absolutely imperative that there should be no check on production, no hindering of the war effort. To-day conditions were changed. The war was won; expenses were great; Canada, with other countries which participated in the titanic struggle, was faced with a pyramid of debt. "The duty to-day," Sir Henry declared, "is not only to carry on the government of the country without any additions to the debt, but, on the other hand, to promote measures which will reduce the nation's indebtedness."

Revenue for the fiscal year 1919-20 would reach approximately $388,000,000, the largest revenue Canada had ever collected. It was no less than $255,000,000 greater than that of the first year of the war. The chief sources of the revenue were:—

Customs	$169,000,000
Excise	43,000,000
Postoffice	22,000,000
Business profits war tax	44,000,000
Income tax	20,000,000
Other war taxation	17,000,000

Consolidated fund ordinary expenditure for 1919-20 would be approximately $349,000,000. This included $108,500,000 interest on public debt, $26,000,000 for pensions and $49,000,000 for soldiers' re-establishment. For investment and capital outlays, beyond the ordinary current expenditure of $349,000,000, an expenditure of $187,856,991 was estimated. The resultant total of $536,741,110 represented the outlay of Canada for all purposes apart from war during the past year. With a total revenue of $388,000,000, and an ordinary expenditure of $349,000,000, it would be seen that during the fiscal year the government, after meeting all ordinary expenditure, including an increased amount for interest account and pensions over the previous year totalling nearly $39,000,000, had a surplus of approximately $39,000,000 over ordinary expenditure, to apply to capital expenditure.

Demobilization expenditure for 1919-20 would amount to $350,000,000, making a total outlay for the year of $886,741,110. Total expenditure for the war up to and including March 31, 1920, amounted to $1,674,000,000, apart altogether from such expenses resulting from the war as pensions, soldiers' civil re-establishment, soldiers' land settlement and interest on war debt. During the year the country paid off a floating debt of $247,000,000 out of the proceeds of the Victory Loan issue of 1919. The short-date indebtedness for the year amounted to only $88,956,000. The addition to the debt during the year amounted to $395,000,000.

Main estimates for 1920-21 totalled $537,149,428 ($328,500,000 on ordinary account), and supplementary estimates for civil servants bonus, $12,500,000. The question of main supplementary estimates was still standing. Revenue for the fiscal year 1920-21, estimated an the basis of existing fiscal legislation, and assuming that values of importations for Customs purposes should practically remain the same as for 1919-20, should amount to $381,000,000.

No More Borrowing

Including the cash on hand and outstanding accounts, including balances due from Great Britain, made a whole total of $720,441,752.88. In all probability the whole of these accounts would not be collected within the year, and $571,000,000 would more accurately represent the actual cash resources for the year. No further loan ought to be made, Sir Henry added. In addition to the commitments already mentioned, certain floating obligations matured this year, totaling $74,058,400. "The revenue of the year," declared the Minister, "should at least not only carry current expenditure but retire this debt."

Current expenditure, however, would be greater this year than that already indicated. Deficits on the railway system had been reported in the main estimates. These deficits, during the readjustment period, would be materially increased by the acquisition of the Grand Trunk. Some economies ought to be effected in the near future, but with the arbitration pending, it was improbable that full benefit of the Grand Trunk acquisition could be expected in the current year. It would be necessary to make advances to the company to cover past due operation obligations. These advances would constitute obligations of the company, and must be taken into account in the arbitration. In addition, advances of necessity would be made to provide for this year's operations. The approximate amount to cover advances for the purposes above mentioned was $28,000,000. Charges of unfairness levelled against Canada by different shareholders at Grand Trunk meetings, were unfounded. If the Grand Trunk had not been taken over, the shareholders in all human probability would have lost their whole investment.

New Taxation to be Levied

The minister described the new taxation proposals as follows:—

"Not only is more revenue necessary, but extravagant and luxurious expenditure ought to be checked. Just so long as expenditure on non-essentials and extravagant expenditure continue, just so much longer will the drop in the value of essentials be postponed. On those having income more than necessary for properly maintaining themselves and families there rests a special duty of saving whenever possible, and in this manner adding to the available financial resources for development. Extravagant buying should stop. With this end in view, as well as for necessary revenue, it is proposed to levy on certain specified articles an excise tax which is to be paid by the purchaser to the vendor at the time of sale for consumption or use, or importation for use other than sale.

"Upon certain articles of wearing apparel, such as boots, shoes, etc., in excess of $9 a pair; men's and boys' suits in excess of $45 each; fur coats and robes in excess of $100 each; women's dresses in excess of $45 each; women's suits in excess of $60 each; men's and women's overcoats in excess of $50 each; hats, hose, neckwear, shirts, purses and gloves bought above specified prices, and on fans and opera cloaks, it is proposed to levy a tax of ten per cent. of the total purchase price. The same rate of tax is to apply to trunks in excess of $40 each; valises and suitcases, etc., in excess of $25 each; ivory-handled cutlery, cut-glass ware, velvet and silk fabrics, lace, ribbons, silk embroideries and sporting goods.

French Treaty to Expire

"Under the terms of the French Treaty, silks, velvets, lace and silk embroideries were given preferential treatment. Not only was France interested in the treaty, but other countries making like importations received the full benefit of the treaty. These countries amounted to eleven in number, including Japan and Switzerland. The operation of the French Treaty ceases on June 19 next, and thereafter—subject to what further action may be taken when the tariff is revised—these articles will take rates from thirty to thirty-five per cent. instead of the present rates, ranging from twenty to twenty-seven and a half per cent. In addition to this these luxuries will be subject to the above excise tax of ten per cent. on the whole of their purchase price.

"A similar tax of twenty per cent. of the total purchase price is to be levied upon such articles as cigar and cigarette holders and pipes in excess of $2.50 each; humidors and other equipment for smokers, hunting, shooting and riding garments, fancy pocket knives, gold, silver, ebony and ivory toiletware, articles of silver adapted for household or office use, jewelry, fur wearing apparel, except as provided above; liveries, Oriental rugs, expensive carpets and curtains and chandeliers.

"An excise tax of ten per cent. will also be payable at the time of sale by the Canadian manufacturer, or when imported, on boats, yachts, canoes and motorboats. When used for commercial purposes, a refund of this tax is provided for. Cameras, candy and confectionery, firearms, shells or cartridges, pianos, organs, musical instruments and plated ware adapted for household use are also taxed at ten per cent.

"A tax of 20 per cent. will be imposed upon mechanical player-pianos, graphophones and mechanical musical instruments and records used therewith. Articles of gold adapted for household or office use will be taxed similarly to 50 per cent. of the selling prices. A specific tax on playing cards is also provided for. On all cards selling at wholesele rates not over $25 per gross packs, the tax will be 25 cents a pack, and in excess of $25, 50 cents a pack.

More Taxes on Motors

"A large revenue was received during the year from taxation on motors, which totalled $12,962,365, of this amount $6,378,171 being for customs duties, and $6,584,194 from excise. The taxation on motors would seem to be a reasonable and proper source of revenue. The field, however, has been always occupied by the provinces, and instead of taxing motors generally it has been determined to increase the excise tax, which is chargeable both on Canadian and imported cars, from 10 to 15 per cent. It is also proposed to increase the duties on beer, wines and spirits. The proposals call for an increase on beer of 30 cents a gallon; on non-sparkling wines, 30 cents a gallon; on spirits, $2 a gallon, and on sparkling wines, $3 a gallon.

Importers, Manufacturers and Wholesalers

"In view of the necessities of increased revenues, a tax of one per cent. on the sales of all manufacturers, wholesale dealers, jobbers and importers is proposed. The tax will not include retailers as such, but will include the goods manufactured or imported by any retailer although manufactured or imported by such retailer for retail sale by himself. Consideration must also be given to the cost of essentials, and on this account it has been determined that the tax will not apply to sales of meats (fresh, salted or pickled), butter, cheese, oleomargarine, butterine or any other substitute for butter, lard, eggs, vegetables, fruits, grains, and seeds in their natural state, buckwheat meal or flour, pot, pearl, rolled, roasted or ground barley, cornmeal, oatmeal or rolled oats, rye flour, wheat flour, coffee (green, roasted or ground), tea, salt, cattle foods, hay and straw, nursery stock, fish (fresh, pickled, salted, smoked, dried or boneless), sugar, syrups and molasses, anthracite or bituminous coal, artificial limbs and parts thereof, or to goods exported.

"The sales tax ought not to be used as a basis of further profits, and must not, therefore, be included in the manufacturers' or wholesalers' costs on which profit is calculated. The tax when not absorbed by the vendor must then be included in his invoice as a separate item.

"The existing tax on cheques will be continued, but the rate increased on bills of exchange and promissory notes, so as to provide a 2-cent tax on all bills or notes of $100 or less, and for every additional $100 or fractional part thereof, 2 cents more. A tax of 2 cents for each share of stock transferred is also proposed.

"The method of collecting stamp duties on patent and proprietary medicines and perfumery will be changed by having the stamps affixed by the manufacturer or importer, instead of the retailer, at the time of sale. The stamps are not to be included in the costs of the manufacturer or importer, but if not absorbed by the seller, are to be added in the invoice as a separate item.

Tax on Movie Films

"Under existing legislation a special tax is collected on films used in moving picture theatres. The tax provided is a charge of 15 cents per film for each day upon which such film is used. It has been found that this duty has worked a hardship on small movie theatres. Many complaints have been received, and it has become apparent that the tax in the case of the small theatres sometimes represents a charge of as high as six or seven per cent. of its total receipts, already subject to municipal and provincial taxation, while in the case of large theatres the tax amounts to less than one per cent. of the receipts. Undoubtedly the present tax is unfair in its incidence, and it has been decided to remove it. Movie theatres and other forms of amusement would appear in the first instance proper subjects of taxation, but it is felt that if these theatres are to be subject to further taxation, it ought to be done by an increase in the existing forms of taxation imposed by the provincial and municipal authorities, rather than by a new federal tax.

"The income tax rate was substantially increased last year, so as to bring it up to the increased United States rates. The increase was material as the following examples indicates: On incomes of $5,000, from $100 to $120, an increase of $20; on incomes of $10,000, from $392 to $590, an increase of $198; on incomes of $20,000, from $1,382 to $1,990, an increase of $608; on incomes of $30,000, from $2,702 to $3,890, an increase of $1,188; on incomes of $50,000, from $5,782 to $9,190, an increase of $3,408; on incomes of $100,000, from $17,607 to $31,190, an increase of $13,583; on incomes of $200,000, from $50,957 to $93,190, an increase of $42,234; on incomes of $500,000, from $195,407 to $303,190, an increase of $107,783; on incomes of $1,000,000, from $499,157 to $663,190, an increase of $164,038.

"The corporation tax was in like manner increased from six to ten per cent.

Still Higher Income Tax

"These large increases will be payable this year for the first time. It is anticipated that they will yield approximately an additional $15,000,000. That our measures of taxation must, in view of our geographical situation, have regard to United States legislation is a principle that has found general acceptance. I do not desire to question it. But revenue is urgently required, and a difference of five per cent. in these individual and corporation taxes will not deter immigration and the investment of outside capital so essential to our national development and growth. It is therefore proposed to increase these taxes on incomes of $5,000 and upwards by five per cent. The increase will be made effective this year. As a result, the tax on a personal income of $5,000 will be $126, as against a levy of $100 last year; and on an income of $50,000, $9,649.50, as against $5,782 last year. In the case of a corporation with an income of $100,000, the rate this year will be $10,500, as against $6,000 last year.

"These taxes are not collected with desirable despatch, and under the existing acts there is reason for vexatious delays. An assessment once made by the department stands. As a result, any zealous officer makes no assessment until satisfied that he has made every possible check and has exhausted all avenues of information bearing on the taxpayers' incomes. In addition to this, the business profits tax requires an exhaustive inquiry into the company affected, an inquiry which covers the question of the true amount at which capital stock should be valued, often resulting in shares being valued considerably below their actual selling market value, and also covers the liquid and other debts and obligations, liquid and other assets, depreciation and maintenance. In many cases personal incomes depend on the ascertainment of business profits taxes. The result is delay, loss of interest, and added difficulties in finally collecting the tax.

Pay Quarter on Making Return

"Delay is inseparable from the business profits tax. The situation can be, however, materially improved, in so far as the ordinary income tax is concerned. A bill will be introduced making each taxpayer in the first instance his own assessor. For the guidance of the taxpayer, a plain table will be either attached to or included in the form of return showing exactly what taxes are payable on incomes of various amounts. The taxpayer will, with his return, include his cheque, either for the taxes properly payable by him or for an amount not less than 25 per cent. of that sum, the remainder, 75 per cent., to be paid in three equal bi-monthly installments, the first of such bi-monthly installments to be paid at the expiration of two months after the return is made, and so that the whole amount of the tax will be paid in six months after the return is made. Interest will be charged at the rate of 6 per cent. on all payments made on installments. The returns will be carefully checked by the department, and in all cases where it is discovered that overpayment has been made by the ratepayer a refund for the amount must be immediately made to him or applied on any installment due or becoming due. If investigation shows that the taxpayer has misstated his income penalties will be provided. A mistake of ten per cent. in income might well arise from *bona fide* errors, and no penalty is proposed, except that the further payment found to be due will carry interest at the rate of ten per cent. per annum. Where the actual income exceeds ten per cent. and does not exceed 20 per cent. of the amount shown by the taxpayer's return, a penalty of 50 per cent. will be provided, and where the deficiency is greater than 20 per cent. a penalty of 100 per cent. will be provided. These penalties will be calculated on the amount the returns are deficient. The proper tax, with interest at ten per cent., must also be paid.

Retain Business Profits Tax

"Many representations have been made against the continuance of the business profits war tax. The tax is charged with being largely responsible for the high cost of living. It is held that it is impossible to collect fairly and administer the tax, owing to the different characteristics of different businesses, and to the fact that what is a fair profit in one class of business is enirely inadequate in another, and, further, that the capitalization of companies differs very, very widely in proportion to their activities and to their resultant profits, so that some companies are taxed on the same amount of income, derived from the same class of business, very much more heavily than others. It is attacked on the ground that it directly contributes to extravagance, and places a premium on inefficiency, that in many instances the company in providing for the tax have advanced their costs in far greater proportion than was at all necessary to provide for these payments, and still keep their business in a flourishing condition. It is further contended that much of the profits are represented by necessary plant extensions and by stocks of commodities on hand which have been bought, and are valued at current high prices, so that 100 per cent. of profits shown by the books are rarely, if ever, represented by cash.

"Much undoubtedly can be said against the business profits war tax. Under normal conditions it would indeed be hard to find any argument which would justify its continuance. We are not yet, however, under normal conditions. Supply has not yet caught up to demand, and in some lines of business activity, at any rate, the salutary effects of competition are, as a result, not in play, and whatever can be said against the business profits tax, it at least has meant that a substantial sum of money has been recovered for the country out of large profits.

"Business in 1919 was carried on under the existing business profits tax, and to the full extent that it was possible for companies to avoid the tax and pass the full incidence to others, that will already have been done. During the current fiscal year our business profits revenues will come from 1919 profits, the tax being levied under last year's act at the maximum rates.

Amounts Will be Less

"It may possibly be that with another year business will be more normal and that no business profits tax ought to be levied. It undoubtedly is probable that some measure of deflation and retrenchment will have occurred, that there will be some decrease in the inflated prices of commodities, and it is in the interest of the country that business concerns should be able to make some provision for shrinking price lists and decreased buying power of their customers. Our business profits tax is at a high rate. It makes no allowance for pre-war profits, however, large they may have been, but fixes an arbitrary return of seven per cent. on the capital employed before the tax commences to operate. Unquestionably with the higher return money to-day commands, seven per cent. is not a reasonable reward for commercial ventures. It has been determined that it is impossible to stop immediately the imposition of the business profits tax, and a resolution will be introduced which will provide for the continuance of a tax of this character, but on a reduced scale, on the profits derived during the year 1920, the tax being payable in 1921. The present exemption will be extended from 7 to 10 per cent., the schedule of taxation to be as follows: On profits in excess of 10 per cent., but not exceeding 15 per cent., 20 per cent. tax; on profits in excess of 15 per cent., but not exceeding 20 per cent., 30 per cent. tax; on profits in excess of 20 per cent., but not exceeding 30 per cent., 60 per cent. tax.

"The present act provides a different scale of taxation for the profits of businesses with capital of not less than $25,000 and under $50,000, being one-quarter of all profits exceeding 10 per cent. on the amount of the capital employed; it is proposed to reduce this tax from 25 to 20 per cent. It has been felt that the concessions made in the proposed amendments are sufficient for the purpose of enabling firms to set aside more of their profits to reserves or plant extensions and to put their businesses in a better position to meet the deflation period, while at the same time a check will still be held on abnormal profits.

Abolish Extra War Duty

"The general war customs duty of 7½ per cent. was repealed last year in so far as articles of food, clothing, agricultural implements and fertilizers, as well as some other items are concerned. It, however, still obtains on a large part of our importations, approximately thirty million dollars of revenue accruing from this source last year. It is a tax which has been blamed, perhaps, much as any tax with the exception of the business profits war tax, as a reason for the high cost of living. Notwithstanding the need of revenue, in view of the fact that it is impossible at the present time to revise intelligently the tariff, and the further fact that the incidence of this tax, placed as it is in a general blanket way, works and maintains inconsistencies, it is proposed to abolish entirely this 7½ per cent. war duty.

Minor Tariff Changes

"A very apparent anomaly exists in the present tariff which ought to be corrected, and the correction of which can do no possible harm to any Canadian trade or industry. The anomaly consists in the tariff items which allow the importation free of duty of novels and other books, other than scientific, when printed in languages other than English or French. It is proposed to remove the discrimination in favor of foreign publications by placing them in the same category as those published in English or French. Owing to the fact that the blind population of Canada has been increased by the war, it is deemed a small measure of justice to remove the duty on books and other essentials for the blind which are not manufactured in Canada or which are only of special use and advantage to blind people."

Tariff Investigation

Sir Henry quoted the government statement of December 15 last which, in turn, quotes Sir Thomas White's observation when delivering the last budget speech, that "the tariff cannot be revised intelligently" while international trade is unsettled, for labor conditions are uncertain, exchange violently fluctuating and prices unstable. That speech expressed the hope that within a year conditions would be so stabilized as to permit of a general revision long overdue, but that such a revision should be preceded by a Commission of Inquiry by the Minister of Finance and other Ministers.

Sir Thomas White thought such inquiry should have commenced last autumn. The statement referred to said that owing to the situation not having become normal most countries were still refraining from tariff rearrangements. Instead of a Ministerial Commission, everyone interested was invited to send in written statements giving complaints of the present tariff and proposed remedies.

The minister then made the important announcement that: "The tariff investigation has commenced, and public sittings will be held throughout Canada after prorogation. The investigation will be conducted by the Department of Finance, with the assistance of such experts and other advisers as will be necessary to conduct a thorough inquiry. I am further of the opinion that not only should the investigation proceed, but that information should now be given of the principles and policies of the government, in the light of which effect will be given in the tariff revision to follow in the inquiry to the evidence and facts developed.

"Our policy calls for a thorough revision of the tariff with a view to the adoption of such reasonable measures as are necessary: (a) To assist in providing adequate revenues; (b) to stabilize legitimate industries, and to encourage the establishment of new industries essential to the proper economic development of the nation, to the end that a proper and ever-increasing field of useful and remunerative employment be available for the nations workers; (c) to develop the fullest extent our natural resources; (d) to promote specially and increase trade with the mother country, the sister Dominions and colonies and crown dependents; (e) to prevent the abuse of the tariff for the exploitation of the consumer, and, (f) to safeguard the interests of the Canadian people in the existing world struggles for commercial and industrial supremacy."

New York quotations of exchange on European countries, supplied by the National City Co., as at May 20th, 1920, are as follows: Cable, London, 381¾; cheque, London, 381; cable, Paris, 7.10; cheque, Paris, 7.09; cable, Italy, 5.02; cheque, Italy, 5.01; cheque, Belgium, 7.32; cheque, Swiss, 17.65; cheque, Spain, 16.72; cheque, Holland, 36.40; cheque, Denmark, 16.40; cheque, Norway, 18.35; cheque, Sweden, 20.87; cheque, Berlin, 2.25; cheque, Greece, 11.45; cheque, Finland, 5.35; cheque, Roumania, 1.90.

STEADY LOAN DEMAND IN NORTHERN ALBERTA

Land Sales Greatly Exceed Sales Last Year—Seeding Completed, With Decrease in Acreage

(Special to *The Monetary Times.*)

Edmonton, May 19th, 1920.

SEEDING is progressing rapidly in northern Alberta, and the whole outlook is now brighter. Wheat seeding is practically completed with a considerably decreased acreage sown. Coarse grains, however, will have increased acreage, but on the whole, from all reports, total acreage will be below last year. Splendid growing weather prevails in this district. Alberta is essentially a mixed farming province. Large herds of stock are to be seen everywhere, and while the season has been a late one for seeding, the farmer's are optimistic as to the results. Land values in northern Alberta have increased considerably in the last three years.

Generally fine weather during the past two weeks has brought along seeding with a rush in all parts of Alberta, according to the semi-monthly crop report of the province, issued on May 8th by Crop Statistician James McCaig. In the south over 60 per cent. of the wheat seeding is completed, and about 30 per cent. of the oats is sown. In central Alberta progress has not been so rapid, and not more than 20 per cent. of the seeding is completed. Rains in the Peace River have seriously delayed spring operations.

Great Activity in Lands

Ex-Mayor Evans, manager of the Western Canada Land Company, of London, England, states that land sales for the first four months of this year are fifty per cent. greater than same period last year, and this following the most severe winter in the history of Western Canada. He also pointed out collections were seventy-five per cent. greater, covering same period, so that, generally speaking, Alberta conditions are brighter than was anticipated.

In discussing loaning conditions with F. A. Beddard, manager of the Edmonton branch of the Huron and Erie Mortgage Corporation, he stated that there is a steady demand for loans on improved farm lands throughout central and northern Alberta, possibly more so than a year ago.

There are many factors accountable for the demand, namely, by the purchase of additional lands, thereby adding to the holdings already created. The erection of new buildings, and lastly, and perhaps the chief reason, the large amount of feed the farmers were compelled to purchase at high prices to bring their stock through the long winter just passed. The situation was aggravated by the fact that northern and central Alberta shipped to southern Alberta thousands of tons of feed during the early stage of last winter: this situation being brought about by the long dry spell in the southern part of the province,, then followed the longest winter known in the memory of old-timers, with the result that feed ran short, and high prices prevailed.

Edmonton Business Good

Marked activity is reported this year in the development of wholesale business in Edmonton and, as a result, this city will be even more firmly established as an important distributing point for Alberta.

Marshall Wells Alberta Company, Limited, wholesale hardware, have started work on a new warehouse, which when completed, will cover an area of 200 by 150 feet, nine stories in height, and which will be the largest hardware warehouse west of Winnipeg. The building will be equipped with a gymnasium, shower baths, restaurant and recreation rooms.

Revillion Wholesale, Limited, are also building a large addition to their warehouse, which will give 81,000 square feet of additional floor space. Another large wholesale warehouse will be built this year by J. H. Ashdown Company, of Winnipeg, while Carroll Wilson, Limited, plumbers' supplies, have just completed and are now occupying a new building.

TAXING WHAT THE TAXPAYER CAN BEAR

WHATEVER may be the real effects of the legislation outlined by the finance minister in his budget speech on Tuesday, there can at least be no doubt as to who is intended to pay the new taxes. In carrying out the principal of ability to pay, the action of the government is entirely in accord with the whole tendency in fiscal legislation in recent years. Succession duties, progressive income taxes, amusement taxes, taxation of luxuries—they are all alike, inasmuch as they represent the attempt of the many whose voting power is final evidence of their political status, to shift the growing burden of public finance to the shoulders of the prosperous few. If this is to be the fashion of democracy in the field of finance, then Sir Henry Drayton's budget is unquestionably the most democratic Canada has thus far produced.

As to the wisdom of levying new taxes, there can be no doubt, seeing as it is apparently impossible to reduce the current expenditures to the level of present revenues. A few reductions are made, notably the removal of the 7½ per cent. war levy from the commodities on which it is still imposed, and these reductions will, no doubt, relieve the cost of living slightly. In fact he who will walk the straight and narrow path of economy will find no cause to complain of this budget.

Like every other tax, of course, an excise tax on luxuries cannot be expected to work out perfectly. As with the income tax, there will be many loopholes of escape until good collection machinery is developed. As a matter of principle, moreover, taxation of consumption does not by any means fall on those best able to pay, for it is income which is the real detriment of this ability. Extravagance may well be made to contribute its portion to the public purse, but it is not *per se* an offence against the public welfare. He who is thrifty and saves, is equally able to pay, and the financial rewards of his saving are ample reward for his self-denial. The imposition of taxes on luxuries in fact appears to be a tacit admission of the present-day view that the greatest benefits of life accrue to those who indulge most freely in those things which money can buy.

From a political point of view the budget appears to be an entire success. The farmers, though they will be hard hit in the case of some lines of goods, can find little fault with taxes so closely akin to those of which they are in favor. Labor cannot object to measures which exempt the great mass of the population. And the old line political parties can apparently do little to stem the tide of popular opinion which is now so highly organized and so effectively expressed.

TWENTY MILLION IDLE ACRES

SINCE the earliest beginnings of western settlement no project has come out of the prairie country with such strong support as that now being presented to the business men of the east by the Western Canada Colonization Association. These gentlemen are the plenipotentiaries of sound industrial and financial interests of the provinces of Manitoba, Saskatchewan and Alberta. They seek the support of eastern business men for a plan that will provide solutions of some of the great national problems of to-day and make for a more populous, prosperous and contented Canada.

A great problem which has been discerned by everyone who has visited the west is the existence of vast tracts (aggregating 20,000,000 acres) of unsettled land, lying within twenty miles of the railroads. Millions have been spent in providing railway facilities for their development Yet they remain locked up in the hands of private owners, in many parts of the world, who have made no attempt to settle or cultivate them. Because these lands are privately owned, the federal government is in a position of deadlock with regard to them. It cannot spend money in settling them; and corporations, like the C.P.R. and Hudson's Bay Co., which do admirable colonization work, have their own fish to fry. The task has, therefore, devolved upon the business men of Canada, who will be the chief beneficiaries.

The Western Canada Colonization Association was formed at Calgary on April 2nd by well-known figures in the commerical world of the west, who have a profound grip of its problems. They aim not only at filling up the gaps along the railway lines, and, therefore, providing the basis of greater production and a stronger and more cohesive community spirit; but they propose to go farther, and take care of the interests of the incoming settler from the day of his arrival. They will secure holdings for him as cheaply as possible, give him advice that will enable him to make the best use of his opportunities, assist in securing for him municipal conditions which make for good citizenship, and in every way promote a recognition of the fact that a settler is a great national asset. On this latter phase of the project it is worth noting that railway statisticians estimate that the per capita annual value of a prairie settler to transportation companies alone is $746.33. If we were able to add to this sum his per capita value to Canada as a whole as a producer of foodstuffs and as a consumer of manufactured articles, it would open the eyes of most readers.

UNNECESSARY RAILWAY OPERATING COSTS

THE Railway Association makes an appeal for the full utilization of space in freight cars.

"Ho, Bill! That'll hold her! Slam her shut! Call it a car! Hey, there, you checker! Jam your blinkin' seal on that door! . . . Couple on and yank her out! Us guys is quick workers. We got two more to load to-night! Call it a car!"

Such is the simple and good-natured formula—or approximately the formula by which something like $18,000,000 may be said to have been added unnecessarily to the past twelve months' cost of operating the Canadian railways.* It is the jocular touch of an indifferent hand—by which the "safety margin" of car supply over car demand in Canada was, and still is, being cut down every day in spite of the railways. It is the little episode—repeated thousands of times a day at thousands of loading points—which added 500,000 unnecessary car trips to the Canadian transportation program in the last year—each trip averaging 243 miles under lead and 89 miles empty and occupying 14 car days.

Thus the constant service of 10,000 freight cars was devoted to unnecessary work instead of remaining in reserve to meet emergencies Thus 4,000 unnecessary trains were moved. Thus 8,000 unnecessary engines were employed instead of being in reserve. Thus 79 miles of precious trackroom were occupied instead of being free to preserve the elasticity of terminal and passing track capacity, thus reducing the margin between an easy car movement—and possible congestion, with embargos. Thus 10,000 times 17 tons of tare weight (the weight of the car alone) was added to the constant burden of the railways the whole year through—or 170,000 extra tons. Thus 6,000,000 tons of coal were taken from the available supply. Thus all movement was slower. Thus the entire machinery of Canadian business was slowed up! Depressing, subtly, but surely, the volume of business in your factories and warehouses! Cutting down the rate of turnover! Running up the overhead per unit of sale! Thinning your profits!

When shippers were on their toes during the war, average load per car rose to 27.05 tons. Now it is averaging 22.69 tons! The loss is almost five tons per car! This loss is almost wholly explainable by reference to the relaxed attitude of the shipper. His employees have a tendency to "let down" and to adopt something like the formula quoted at the top of this appeal. It is good business for *you*, for the country, and for your railway service to banish that attitude and substitute for it: "Ho, Bill! Call *that* a car? Not on your life! Open her up again! We'll cram her till the axles bust!" But they won't "bust." Try!

---

*Figures based on 1918 government statistics regarding average performance.

MUCH NEW FINANCING IN BRITAIN

GREAT BRITAIN, as well as Canada, is experiencing a flood of new security issues; bank credit is in great demand for speculative purposes, while the market for good securities is stagnant. "Whatever else may happen," says the April number of "United Empire," the journal of the Royal Colonial Institute, "so long as the industrial activity at home continues, the resources of the banks will be strained, and the general rate of interest will remain high. The tendency now is for it to go higher month by month, and this will not render the path of the colonial borrower too easy in Lombard Street. The flood of new industrials is steadily depreciating gilt-edged securities, both British and colonial; this will only be temporary, no doubt, but while it lasts the depreciation of capital and the increase of interest must be taken into account. It will still be worth while for colonial governments to borrow in the city for necessary public works, of course, and, fortunately, there is a class of solid investor who prefers these staid government loans to the inevitable risks and chances of more speculative industrials; but there is no disguising the fact that the fashion for the moment is with the latter. At the same time, the tendency will be in the long run to swing back to the gilt-edged, and the partial abolition of double income tax—a grave injustice which the recent increase of taxation has made intolerable—recommended by the Income Tax Commisison, will do something, if not very much, to assist that tendency.

"One direction in which Dominion co-operation with the mother country might be developed is in the financial assistance that Great Britain is called upon to give to China. This assistance is under the control of a consortium of banks, in which, before the war, British, French, Japanese, Russian and German houses participated. American banks had previously withdrawn from the combination, but now, under the altered conditions prevailing, with German and Russian banks eliminated, are rejoining the consortium, with a much more powerful organization. There would seem to be an opportunity, therefore, for strengthening the British group, which is confined to four or five banks. The inclusion in their number of the Commonwealth Bank of Australia, as well as of a Canadian and a South African bank, would be a tactful recognition in the sphere of finance of the new political status of the Dominions. It must not be overlooked that while the future development of China holds out great potentialities for British trade, the advantages of proximity to this vast market rest with Canada and Australia, both of which are in a position to supply many of the wants of China."

Changes announced in the budget speech are still upward—even the exemption from the business profits tax is increased.

* * * * *

The labor difficulties of the Ontario Hydro-Electric Commisison again evince the fact that public ownership does not solve, but rather accentuates, the question of industrial relations.

* * * * *

Australia has a debt of £300,000,000 and no assets beyond the morale of the people, says Hon. W. A. Watt, treasurer of the commonwealth. Even Canada can make a better showing than that, but Canada's experience with advanced legislation is not so extensive as that of Australia.

* * * * *

Two bank clerks' unions are to be formed in Canada instead of one. Labor organizers found it impossible to harmonize the views of the bank employees in Quebec province with those of the main body, and an independent organization is being formed, with headquarters in Montreal.

Exports

A special Department of this Bank is devoted to the interests of the foreign business of its customers.

Exporters and others having business relations with foreign countries are invited to avail themselves of the very complete information which has been gathered by the Bank's Foreign Department. This may be done through any one of the Bank's many branches.

J. P. BELL - - General Manager

PERSONAL NOTES

Sir George Perley, High Commissioner in London; **J. H. Gundy**, Toronto, and **G. C. Castles**, manager of the Bank of Montreal, London, will represent the Canadian government at the League of Nations financial conference which opens in Brussels on May 28.

Mr. R. Savage, who was four years with the Anderson Lumney Company, and who for the past three years has been a farm loan inspector and general field agent for the Wells-Dickey Company, Regina, is resigning at the end of May to join the C. L. Tanner Land Company, Saskatoon, and other financial interests. Mr. Savage will be engaged in colonization work, placing settlers on lands in the Canadian west.

Mr. John Fanning has been appointed fire manager of the Employers' Liability Assurance Corporation, Limited. Mr. Fanning prior to coming to Canada was connected with the State Assurance Company of England. Following this he spent three years with the Royal Insurance Company, Montreal. His connection with the Employers' Liability dates back five years, until his recent appointment having been inspector for western Ontario.

Mr. Joseph Campbell, commissioner in Canada for the Trust and Loan Company of Canada, is the first Canadian to rise to that position, the higher offices in the past having been filled from England. Mr. Campbell entered the company's service in 1895, and was promoted to manager at Regina, for Saskatchewan and Alberta, in 1904. He returned to Winnipeg in 1915 as commissioner for the company in the west, succeeding the late Captain R. D. McDonnell. When Col. Edye, of Montreal, retired in 1917, Mr. Campbell was made sole commissioner in Canada. The head office of the Trust and Loan Company is in London, Eng., and the board of directors is made up of Col. the Hon. Sidney Peel, D.S.O., president; Sir Vincent Caillard, vice-president; Russel Stephenson; F. W. Stobart; Jas. N. Newcomb; Col. Edye; John Galt, of Winnipeg; and Joseph Campbell, of Winnipeg.

Mr. L. A. Jones has been appointed superintendent of agencies of the Canada Accident and Fire Insurance Company for the province of Ontario. Prior to his present appointment. Mr. Jones served the Ocean Accident and Guarantee and the Dominion Gresham Insurance Companies in a similar capacity for some years.

Mr. A. E. Phipps, at present superintendent of branches of the Imperial Bank of Canada, has been appointed to the position of assistant general manager. Mr. Phipps joined the Imperial Bank as a junior clerk at Brandon, Man., in 1891, and served in various capacities up to the position of western superintendent. Upon the retirement of Mr. Edward Hay, as general manager, and the appointment of Mr. William Moffat as his successor, Mr. Phipps was transferred to the head office as superintendent of branches.

MONTREAL STOCK EXCHANGE ANNUAL

At the annual meeting of the Montreal Stock Exchange, held on May 14, Edgar M. Smith retired from the position of chairman. The following executive was elected:—

C. Simpson Garland, chairman of the governing committee; Malcom C. Oswald, of Oswald Bros., vice-chairman; H. Austin Ekers, of Ekers, Cushing and Co., sec.-treas., with the following members named for the committee: Purvis McDougall, of McDougall and Cowans; Hartland B. MacDougall, of Meredith and Co.; C. H. Branchaud, of L. G. Beaubien and Co.; B. Hazen Porteous, of Burnett, Porteous and Co.; Hope Scott, of H. C. Scott and Co., and Geo. W. S. Henderson, of Burnett and Co.

The amendment to the by-laws of the institution, providing for an increase in brokerage charges to be applied to high-priced stocks, was carried, so that hereafter issues above a quoted value of $150 per share will be subject to a commission of ⅜ of 1 per cent. and those of $200 and upwards to ½ of 1 per cent. The charge on war loan bonds will still be ⅛ of 1 per cent. No action was taken on the proposal to extend the present premises of the stock exchange, the matter being left over for further discussion and study.

C. Simpson Garland
Chairman, Montreal Stock Exchange, 1920-21

In his inaugural speech, the newly elected chairman, Mr. Garland, reviewed the operations for the record year, 1919, and urged that the members of the exchange keep abreast of the times and to put forward every effort to place the Montreal Stock Exchange in the position it was entitled to occupy as the principal security market of the Dominion. The year 1919, Mr. Garland stated, while a banner one in the history of the local institution, was productive of dealings in some 3,800,000 shares of listed stocks, whereas trading in some 100,000,000 had been reported to date in 1920 on the New York market.

OBITUARIES

Mr. Wm. P. Patterson, who was associated with the Mutual Reserve Insurance Company, died in Montreal last week in his sixty-first year.

Mr. Wm. Graham Browne, head of the Montreal bond firm of W. Graham Browne and Company, and who was some years ago manager of the Sovereign Bank at the time of its collapse, shot and killed himself in the Bank of Ottawa Building, Montreal, on May 14th, following his arrest on a charge of theft of $50,000 from the Royal Bank of Canada. Mr. Browne was prominent in financial and business circles in his district, and took an active part in the Victory Loan campaigns. He was 46 years old being born at Galt, Ont., May 28th, 1874. He graduated from Toronto University in 1898, and joined the Canadian Bank of Commerce at Galt, holding positions with that institution successfully at Toronto and New York. Going to Montreal, Mr. Browne joined the Sovereign Bank as local manager, and in 1907 established W. Graham Browne and Company, bankers and dealers in bonds, after he had dissociated himself from difficulties caused by the failure of the Sovereign Bank.

Ottawa Has Little Criticism For Budget

Need for Additional Revenue is Recognized—Unionists are in Accord on Tariff — Financial Results of Canadian Northern Railway Operation — Collection of Income Tax

(Special to *The Monetary Times*)

Ottawa, May 21th, 1920.

WITH Sir Robert Borden back at his desk and the budget announced the decks are clear for the long-promised and often-delayed formation of the Unionist party into a permanent organization. A caucus will be held within the next week to decide on the future of the party.

The question of policy, it is believed, now will not be difficult. There is only one plank upon which the two wings of the party are likely to split and this is the tariff. This is the crucial problem. However, on this the cabinet is apparently now agreed. They are united on the taxation of this year and Sir Henry Drayton outlined in the course of his speech what he believed should be the permanent tariff policy. It can be taken for granted he would not have made such a declaration without consulting his colleagues. It is taken at Ottawa that this is the policy which will be laid before the caucus for approval. If this is correct it is a momentous statement.

May be Basis of New Party

Whether this tariff policy is acceptable to the Unionist following in the House remains to be seen. It is believed it will be and that with this as a basis it will be decided to form a permanent new party. There may be some of the westerners who will want to go further along free trade lines and some of the high protectionists who will not be satisfied. However, it is believed that the majority will agree on this as a basis.

As to the wisdom of forming a new Unionist party and scrapping the old Liberal-Conservative party there is considerable difference of opinion. Many old time Tories in the House do not like the idea. That party workers through the country are objecting is seen by the conferences that Hon. Robert Rogers is holding. It is significant that in Ottawa a resolution at the annual meeting of the Unionist Association to change the name back to Liberal-Conservative Association all but carried. As it was there was a motion passed forwarding to Sir Robert Borden a resolution asking that he return to the old time name. On the other hand the view taken by the Prime Minister and his Tory Colleagues is, apparently, that to change the name back would be a notice to all the Liberal-Unionist ministers they were no longer wanted. They would have to get out or turn Conservative. Altogether it is a nice political muddle and the next couple of weeks should see some vital and momentous political decisions.

Budget Has Been Well Received

To return to the budget. Sir Henry Drayton's first budget is being well received at the capital. There are naturally objections. It is realized that he must have money if he is to carry out his fixed intention of borrowing no more. He has bravely set forth to attain this object. He made no camouflage as to our actual position. He wiped off the slate a lot of assets, which are not real assets and placed our debt at the stupendous figure of $2.273,305,436. The estimated expenditures for the year including certain railway deficits he placed at $625,000,000. The estimated revenue from existing and new taxation, balance of Victory Loan proceeds, and amount owed us by Great Britain, he placed at $671,000,000, leaving a balance of some $44,000,000 to take care of floating obligations.

The budget might be summed up at a glance in the following terms:—

(1) No more borrowing.

(2) Taxation imposed; (a) Tax of one per cent. on sales of all manufacturers, wholesale dealers, jobbers and importers; tax not including retailers excepting in cases where they import or manufacture goods; and tax not applying to foodstuffs, coal, and other necessities of life; (b) excise tax on motor cars increased from ten to fifteen per cent.; (c) increased excise taxation of beer, wine and spirits; (d) increase in stamp tax on bills and notes over $100; (e) increase of five per cent. in income taxation on incomes from $5,000 and upwards; increase to be 5 per cent. present tax, not on amount of income; (f) tax of two cents a share on all stock transfers.

(3) Taxation reduced or removed: (a) Business profits tax substantially reduced; (b) tax on moving picture films removed; (c) war duties tax of 7½ per cent. abolished.

(4) Estimated increase in revenue from new taxation, $100,000,000.

Estimated loss from taxation abolished, $30,000,000.
Net gain revenue, $70,000,000.

Soldiers' Settlement Figures

Hon. Arthur Meighen had a singular triumph in the House last week when he presented the statement of the Soldier's Settlement Board and asked for millions to carry on the work. Mr. Meighen is not beloved by the Opposition and it was expected that there would be a regular storm of criticism. But his estimates went through with nothing but approval. If ever there was a scheme which lent itself to political maniuplation it is the Soldiers' Settlement Board. Millions were being spent and land purchased in nearly every riding in Canada. Yet there was not a word to show that politics had been allowed to interfere with the word of the board. The number of soldiers actually installed on the land up to March 31st was 13,489. Only men who had previous experience as farmers or had taken a course were accepted. There are many thousands more who have passed the board and to whom loans have been approved and who will start operations this spring. Whatever may be said of the government's other soldier reconstruction policies its land policy at least has been a fine achievement.

The estimates for the Land Settlement Board for 1920-21 are $56,017,000. Up to March 27, 1920, loans to the amount of $58,741,605 had been approved, of which $42,000,000 had already been loaned. More than 50,000 applications had been received from men desirous of taking up land; 36,000 of such applications had been approved, 19,181 actually had taken up land, and of this number 15,234 had been advanced loans. The average loan per settler was $3,700. Sixty-nine applicants had discharged their obligations in full. Of the number of applicants 3,424 were from Ontario. In 1919, 83 per cent. of the applicants were qualified to take up land; thus far this year the percentage had been only 65 per cent.

Canadian Northern Railway Deficit

Gross earnings of the Canadian Northern Railway for the year ended December 31, 1919, were $53,562,177, according to the fifth annual report of the directors, tabled in the House on May 12, by Hon. J. D. Reid, Minister of Railways. These were derived as follows: From passenger traffic, $10,775,708; freight traffic, $39,175,552; express, mail and telegraphs, $1,588,902; miscellaneous, $2,022,014. In addition there were interest and profits from elevator and

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning. Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

372 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents

London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager.

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

other subsidiary companies, investments, etc., amounting to $1,791,752, making a total of $55,353,930. The working expenses amounted to $60,034,023, and hire of equipment, taxes, rentals and miscellaneous charges were $1,020,553, making the total expenses $61,054,577. The deficit was $5,700,647, and interest charges $19,969,710, a total deficit of $25,670,358.

The directors call attention to the fact that their report covers only the operation of Canadian Northern Railway lines, forming part of the Canadian National system.

The total mileage operated at the end of the year was 9,685.7, compared with 9,566.5 at the end of 1918, being an increase of 119.2 miles. The average mileage in operation throughout the year was 9,636 miles.

Operating revenues for the year 1919 increased by $6,252,165, or 13.22 per cent. over the previous twelve months. The increases were derived from passenger traffic, $2,951,264, or 37.72 per cent.; freight traffic, $2,439,682, or 6.64 per cent.; other traffic, $861,219, or 31.32 per cent.

The increase in passenger earnings during the year, says the report, is due in part to the removal of restrictions on travel applicable to war-time traffic, augmented by the movement of troops for demobilization. A decline in business took place in the first half year as a result of the cessation of activities dependent on the war. The loss in freight tonnage from January 1 to July 31 was 1,500,000 tons, after which the tonnage showed an increase over 1918 to the extent that by the end of the year the net loss in tonnage was cut down to 850,327 tons. 'A gratifying feature of the situation," says the report, "is the additional long haul business, which is indicated by the increase of 23 miles in the average distance each ton of freight was hauled."

A total profit of $1,406,767 on operation of the government merchant marine from the commencement of the service on March 1, 1919, to December 31, 1919, is shown in the annual report of the Canadian government merchant marine tabled in the House of Commons yesterday. The report shows that 19 of the 63 ships contracted for by the government were delivered during 1919. About 100,000 deadweight tons of shipping is in operation with 280,530 deadweight tons still in course of construction. The work is being done in Canada at different shipyards. Government ships made 23 trips to the West Indies last year, three to South America, 11 to the United Kingdom from Atlantic and three from Pacific ports, two trips to French ports and five to Newfoundland. Other routes, including the Antipodes, will be tapped by government ships during this year.

Income Tax Possibilities

Evidence given by R. W. Breadner, commissioner of taxation, before a committee of the whole house on May 7th has done much to satisfy critics of the income tax administration. About one million persons in Canada would make returns this year, he showed, as compared with about half that number in 1917, when the Act was passed. The system had already won commendation from other countries, including Great Britain and the United States, and it was the ultimate aim to see that no person escaped his or her full duty right back from 1917. Every class in the community was being reached, and there were only two now outside the pale of taxation. These were "coupon clippers" and miners or fishermen, who had a dozen homes in various parts of the country within a year. He hoped to see legislation passed to get the former into line, and, as to the latter, the department might adopt a system of compelling employers to take one per cent. from the man's monthly salary, provided it went to $100. Mr. Breadner denied that the forms were cumbersome or that there was any discrimination.

A well-established agency in British Columbia is anxious to secure the representation of a fire insurance company which is prepared to enter that province. An advertisement appears elsewhere in this issue, and further particulars may be obtained from Jas. J. Salmond, c o *The Monetary Times*, Toronto.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Windsor, Ont.	Bank of Montreal
Sarnia, Ont.	Dominion Bank
Timmins, Ont.	Dominion Bank
Bailieboro, Ont.	The Bank of Toronto
Wolfe Island, Ont.	Royal Bank of Canada
Kingston, Jamaica	Canadian Bank of Commerce
Prince George, B.C.	Canadian Bank of Commerce

The Bank of Hamilton is now giving a daily service at Warrenton, Man., Mr. G. H. Larmont being authorized to sign as sub-manager. The branch of the Bank of Hamilton at Lake Valley, Sask., has been closed.

Mr. R. G. H. Travers who has been local manager of the Royal Bank at Napanee, Ont., for the past 14 years has now been appointed manager of the Walkerville Ont., branch.

Mr. G. N. Geddy who has been manager of the Royal Bank at Dutton, Ont., for several years has resigned and is going to the west. T. E. Gage manager of the branch at Southville, Ont., succeeds Mr. Geddy.

Mr. Crawford Gordon who was assistant manager of the Bank of Commerce, Winnipeg, is leaving for Jamaica to open up a branch there.

Mr. Arthur Dunbar, manager of the Lethbridge, Alta., branch of the Union Bank has been appointed inspector of branch returns at the sub-head office of the bank in Toronto.

BRITISH COLUMBIA MORTGAGE & TRUST MEETING

Want Full Provision of Municipal Sinking Funds Under Supervision of a Local Government Board—Threatened Inroads on Mortgagees' Security

(Special to *The Monetary Times.*)

Vancouver, B.C., May 9, 1920.

MEMBERS of the British Columbia Mortgage and Trust Companies' Association had before them at their annual meeting on May 7th, a varied agenda covering matters which strike at the root of investors' confidence. Some of them, to the average citizen, may not appear to be of importance, or of such interest as to gain their attention. One matter, that with respect to the amount of cash to be paid down by the purchaser of a property put up for sale by a municipality so as to realize the taxes levied against it, caused some discussion after the situation had been explained by the president.

Cash Down in B.C. Tax Sales

It appears that the government was urged to amend the Municipal Act, at its last session, providing that the purchaser at a tax sale be not required to pay down at the time of sale any sum greater than the amount of the arrears of taxes and the expense of the sale, and that the balance, if any, should be paid on the delivery of tax sale deed, "subject to the legal claims of all those having registered charges, including the lien of the vendor under an agreement of sale."

The government did not agree to this change, or, at any rate, it was not made. It was argued, and with apparent force, that all the municipality should be interested in, was the securing of the taxes. But they get more. If, for instance, the amount on a given property due as taxes was $500 and the price was bid up to $1,000, the municipality gets the $1,000 in cash and holds that amount for two years, the period during which the registered owner has the right to redeem. If he does redeem, the tax sale purchaser gets back his money plus interest charges. If he fails, the balance of the purchase price in excess of the amount of taxes and charges is paid to the registered owner. The mortgagee's position would therefore be in the position of having lost his security and would have left only the covenant of the borrower which cannot be very highly regarded, after defaulting as a taxpayer. The amendment proposed would divert to encumbrances any such balance which would appear to be the equitable course.

Service Charges as Prior Lien

The tendency to ignore the proper claims of a mortgagee as instanced in the matter of tax sales, receives further corroboration in their treatment by municipalities operating water and electric light services. An occupant, who may be tenant or owner, may fail to pay his water light or power charges for a considerable period, and then vacate the property. The owner, or perhaps the mortgagee, may then for self-protection, have to find a new occupant. When they do so, they cannot get any of the services named until the arrears are paid up. They may represent a large or small amount, but nevertheless many municipalities in this province, refuse to give service until they are paid. The law requires, or it ought to, that any citizen should be entitled to the use of any public service when payment for it is tendered. But knowing these services are requisite, and compulsory, the new occupant, in cases where the prior occupant has left arrears, must either pay them or go to the courts to enforce service. Neither citizen nor mortgagee in possession cares to do this. The lender when invoking the law incurs popular displeasure and the occupant, with the citizens common aversion to fighting the public authority, usually submits to the indignity of paying for service rendered to others.

This local "Kaiserism" has apparently become somewhat common in British Columbia, and hence this association suggested to the government that the law be made specific on the point—making it mandatory that such services be supplied, and that a new occupant may be obliged to pay for arrears of a prior occupant for not more than, say, a month. The assumption of liability for arrears for even that short space of time was regarded as a dangerous concession. Some of the members held that under any circumstances an occupant should be entitled to service upon his tendering payment for the same or giving satisfactory undertakings that such charges would be paid.

The foregoing are but a couple of other instances which might be given as showing how the law here has been drawn so as to expose the mortgage lender to liability, and needless to say, it makes it more difficult for the financial men belonging to this association to get money for investment in this province.

New Municipal Act

The major question discussed was the draft municipal act considered but not passed at the last session. It will be taken up next year and the association will request many changes. They favor very strongly the adoption of the principle of control along the lines of a local government board with powers to supervise financial operations of municipalities. In the draft act it was provided that the proposed board should handle all sinking funds, but the association prefers that the securities in which sinking funds shall be invested should be specified and the board should see that the funds are forthcoming and that they be invested as authorized. In this connection the association favors standard forms of assessment and tax receipts and that the latter should state upon them the particular lands which the taxes have been paid and that they should be binding upon the city issuing them. Instances were given of tax receipts stating that "John Smith" paid so much in taxes, neither the years, nor the property involved being specified. Revision of assessment should be made not by a council or a committee of any local authority, but by a court of appeal constituted of independent parties.

The proposed new land registry act was found by the government to be faulty in many respects, and in consequence, was not proceeded with this session. The executive reported that several changes were being considered.

The foregoing represents the nature of the questions discussed at a well-attended meeting. John Appleton, secretary of the Dominion Association, was present and in a short address, discussed matters of an inter-provincial character. The president, G. L. Smellie, and the secretary, Geo. L. Schetky, were both re-elected. Mr. Awrey and Mr. Grace were the new members of the executive to be elected.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended May 7th, 1920:—

Coniagas Mine, 87,360; O'Brien Mine, 64,255; Mining Corporation of Canada, 214,809; Nipissing Mine, 388,707. Total, 755,131. The total since January 1st is 7,039,628 pounds, or 3,519.81 tons.

NATIONAL FIRE PROTECTION OFFICERS

The officers elected at the annual meeting of the National Fire Protection Association, held in Chicago, May th to 6th, were as follows: President, W. E. Mallalieu, general manager of the National Board of Fire Underwirters; st vice-president, H. O. Lacount, Boston, Mass.; second ce-president, W. C. Robinson, Chicago; secretary-treaser, Franklin H. Wentworth, Boston, Mass; chairman of ecutive committee, Rudolph P. Miller, New York. Execuve committee (for three years)—George H. Greenfield, ntreal; Walter A. Hull, Washington; H. L. Miner, Wilngton, Del.; Benjamin Richards, Chicago; Robert Scott, lmington, N.C. Nominating committee for 1921—Henry Thayer, Boston, chairman; Henry A. Fiske, Providence; orge W. Booth, New York.

DOMINION CROP CONDITIONS BACKWARD

Seeding Latest on Record—Fall Wheat Not Badly Killed, Due to Good Depth of Snow and Late Spring

THE first crop report of the season of 1920 was issued to-day by the Dominion Bureau of Statistics. It deals with the winter killing of fall-sown wheat, the condition of fall wheat and of hay and clover meadows and the progress of spring seeding, the report being compiled from the returns of crop correspondents from all parts of Canada on April 30.

Winter Killing of Fall Wheat

Notwithstanding the severity of the past winter, the proportion of fall-sown wheat that has been killed is reported to be very small, amounting in fact to not more than 4 per cent. of the area sown. This is the smallest proportion on record, and compares with 5 per cent. last year after an extraordinarily mild winter and 52 per cent. in 1918 after the severe winter of 1917-18. The small proportion this year is due to the depth of the snow and the late spring, as usually fall-sown wheat in Canada is damaged more by alternating frosts and thaws during March and April than by cold in the depth of the winter when the ground is covered with snow. Deducting the areas reported as winter killed, representing 4 per cent., or 28,700 acres, in Ontario, 1 per cent., or 400 acres, in Alberta and 4 per cent., or 600 acres, in British Columbia, the total reduction by winter killing is 29,700 acres, leaving 740,300 acres as the area of fall wheat to be harvested for 1920, as compared with 672,793 acres, the finally estimated harvest area of 1919. The average condition of fall wheat on April 30 last is 98, representing the promise of a yield 2 per cent. below the average of the ten years 1910-1919. Last year at the same date the condition was 3 per cent. above the average of the previous ten years. The condition on April 30 is 98 per cent. for both Ontario and Alberta and 95 per cent. for British Columbia.

Hay and Clover Meadows

About 5 per cent. of the area under hay and clover is reported as winter killed, as compared with 6 per cent. last year and 11 per cent. in 1918. The condition of hay and clover meadows on April 30 is reported as 95 per cent., or 5 per cent. below the average of the ten years 1910-19. By provinces, the condition is as follows: Prince Edward Island and Nova Scotia 100, New Brunswick 101, Quebec 98, Ontario 92, Manitoba 93, Saskatchewan 88, Alberta 96, and British Columbia 95.

Progress of Spring Seeding

The seeding season this year is later than in any previous year since annual systematic records were begun by the Census and Statistics Office in 1910. In the maritime provinces, where seeding as a rule does not take place until May; work on the land, owing to cold, wet weather, will not begin until the second week of May. In Quebec, scarcely any seeding had been accomplished by the end of April, and, owing to cold and the absence of sunshine, operations were not expected to begin before the second week of May. The ground was reported as very moist, and several days' sunshine were requisite to get it into good condition. In Ontario, about23 per cent., or nearly one-quarter of the total seeding of wheat, and 19 per cent. of oats and barley, had been done by April 30; last year the proportions were 68 per cent. for wheat, 50 per cent. for oats and 49 per cent. for barley. In Manitoba and Alberta wet and cold weather and in Saskatchewan snowfalls and frosty nights have prevailed; so that in the prairie provinces very little seeding of wheat had been accomplished in April and practically none of oats and barley. Such a state of backwardness is rare in the prairie provinces, as usually from 40 to 50 per cent. of seeding is done in April. At the end of April, 1919, when the spring was also later than the average date 40 per cent. of wheat had been sown in Manitoba, 62 per cent. in Saskatchewan and 77 per cent. in Alberta. In British Columbia 22 per cent. of wheat seeding had been done in April as against 45 per cent. in April, 1919. Correspondents report generally an abundance of moisture in the ground, which, if the weather be favorable after seeding, should ensure rapid growth and carry the crops well on into June.

ABOLISHES PUBLIC UTILITIES COMMISSION

Attorney-General of British Columbia Intimates Provincial Jurisdiction Over B.C. Electric Will Not be Restored —Utilities' Commissioner Criticizes Government's Action

ACTION of the British Columbia government in abolishing the public utilities commission, which had been established by legislation passed at the 1919 session of the legislature, was severely criticized by J. L. Retallack, who had been the public utilities commissioner, at a meeting of the Vancouver Board of Trade on May 11. The repeal act was passed at the 1920 session.

"My office," said Mr. Retallack, "was attached to the attorney-general's department and the correspondence caused me to conclude that it was the desire of the executive to impede rather than to aid me in my work. Important letters were left unanswered for weeks and then only acknowledged and not dealt with. My suggestions in relation to the act were ignored. As to the question of the jurisdiction of the British Columbia Telephone Company, the official correspondence conveyed the impression that the attorney-general was assisting the company rather than aiding me in my efforts to bring out the facts. Had the government desired to make use of the commission, it had powers under the act to extend its functions rather than retard them. The government took the power in the repeal act to compensate me with three months' salary, but I did not accept this. As to the value of the work of the commission if it was properly conducted, its prime value was to the public—it was free from political influence."

Reasons for Government Action

J. R. de B. Farris, replying in defence of the government, described how the commission was first organized. "In 1917," he said, "there were a series of strikes at the B.C. Electric Railway and other places in Vancouver. I came here and then advised the premier to deal with these conditions through the medium of the public utilities." Regarding the abolition of the department, he said: "By an almost unanimous vote it was decided to abolish the office, only three members in the house voting against it. I have never received assurance that the British Columbia Electric Company will be brought back under the jurisdiction of the province. Though I am breaking a confidence, I may say I have received a communication which leads me to believe it never will. It was for the legislature to consider whether the public utilities should be continued or not—and not for a man who considers he has been dealt with in a summary manner."

PREMISES FOR RURAL CREDITS DEPOSITS

The Manitoba government plans to secure a good site on Portage Avenue, Winnipeg, to be fitted up as banking premises for receiving deposits to be used for the rural credit societies. The Manitoba Farm Loan Association offices, which are now in the Scott Building, on Main Street, might be moved to the same premises.

The members of the staff of the Royal Bank of Canada have formed an association, to be known as the Royal Bank of Canada Staff Association. The aims of the organization are: The general advancement of the interests of the staff and bank, and to promote the social welfare of the staff. The members of the association have no intention of affiliating with any similar organizations or any other organized interests.

Safe Deposit Boxes

The only element about a safe deposit box more important than inaccessibility is accessibility. It should be beyond the reach of every individual in the world save the owner; and yet, at the same time, it should be constantly and easily accessible to him or his deputy.

Boxes in our modern Safe Deposit Vaults may be rented at $2.00 per year and upwards.

Insurance Companies Extended Business In April

Number of Licenses Issued Last Month Reflects Growth in Many Classes of Business — Automobile Risks Popular — Travelers to Write Aircraft Insurance—Recent Agency Changes

THE number of new licenses issued last month, is another indication of the growth and strength of the Canadian insurance business. While a few new companies are represented, in the majority of cases the license issued was just an extension of authority already given. Automobile insurance continues to be popular, corresponding to the growth of the automobile industry, and many companies have had this class of business included in their powers. The increasing demand for fire and life insurance is also reflected. Inland transportation and marine insurance seem to be increasing in popularity.

Dominion Charters

The Home Insurance Co. has been authorized to transact in Canada the business of burglary insurance and property damage insurance, in addition to the classes for which it is already licensed.

License has been issued to the Fireman's Fund Insurance Co., authorizing it to transact in Canada the business of fire, inland transportation and automobile insurance, excluding loss by reason of bodily injury to the person. This license replaces that at present held by the company.

The Alliance Insurance Co., of Philadelphia, has been licensed to transact in Canada the business of inland transportation insurance, in addition to the classes for which it is already licensed.

License has been issued to the Knights of Columbus organization, authorizing it to transact in Canada, as a Fraternal Benefit Society, the business of life insurance. The chief agent is J. J. Leddy, Saskatoon, Sask.

The Bee Hail Insurance Co. has been licensed to transact in Canada the business of hail insurance. Chief agent is J. E. Clement, Montreal, Que.

The Pacific Marine Insurance Co. has been authorized to transact in Canada, inland marine, fire, inland transportation and automobile insurance in addition to other classes of business. A bill to this effect has been passed in the Dominion legislature.

By an Act passed in the Dominion legislature, the charter of the Pacific Coast Fire Insurance Co. has been amended to include inland transportation, automobile, tornado, explosion, hail, marine, sprinkler leakage, burglary and accident insurance.

The Armour Life Assurance Co. has been incorporated by an Act of parliament to transact in Canada life insurance. The company may grant, sell or purchase life annuities, grant endowments depending on the contingency of human life and generally carry on the business of life insurance in all its branches and forms. The capital stock will be $500,000. Head office of the company is to be at Edmonton, Alta.

A bill has been passed in the Dominion legislature, incorporating the United Canada Fire Insurance Co., with a capital of $3,000,000, and head office at Winnipeg, Man. The company may make contracts of all kinds and classes of insurance excepting life.

Provincial Licenses

A certificate of registry has been issued to the Caledonian-American Insurance Co., of New York, N.Y., authorizing it to transact throughout the province of Quebec, the business of fire insurance. Chief agent for the province is J. G. Borthwick, 145 St. James St., Montreal, P.Q.

The certificate of registry issued to the Imperial Guarantee and Accident Insurance Co. of Canada, of Toronto, Ont., authorizing it to transact, throughout the province of Quebec, the business of guarantee, accident, sickness, automobile, plate glass insurance and insurance on automobiles against fire has been extended to include the business of burglary-insurance. The chief agent for the province is G. K. Martin, 30 Canada Life Building, Montreal, P.Q.

A certificate of registry has been issued to the Canadian Fire Insurance Co., of Winnipeg, Man., authorizing it to transact, throughout the province of Quebec, the business of fire insurance. The chief agent for the province is Franck J. Know, Dominion Express Building, Montreal, P.Q.

The Alliance Insurance Co., of Philadelphia, has been licensed to transact in British Columbia, inland transportation insurance in addition to marine and automobile insurance (excluding insurance against loss by reason of injury to the person) for which it has already been licensed.

The Royal Scottish Insurance Co., Ltd., has been licensed to transact in British Columbia the business of fire insurance. The head office of the company in British Columbia is situated at Vancouver, and James Herbert Watson, insurance agent, Vancouver, is the attorney for the company.

The Motor Union Insurance Co., specializing in automobile insurance, and which has hitherto confined its operations in Canada to the province of Ontario, will now write business in British Columbia and Quebec, licenses for that purpose having been issued.

License has been issued to the Washington Marine Insurance Co., of New York, authorizing it to transact in the province of Quebec, inland marine and ocean marine insurance. Chief agent, C. E. Hull, 260 St. James St., Montreal.

Write Canadian Aircraft Insurance

The Travelers Insurance Co., of Hartford, is now prepared to write personal liability and property damage insurance on Canadian aircraft. Personal liability insurance protects the owner of the machine against all suits arising from the injuries inflicted by his machine on the general public. It is written in 10/30 limits. That is, the policy will pay up to $10,000 for any one person killed or injured in any one accident, and up to $30,000 for two or more people killed or injured in any one accident. Property damage, or protection against suits arising from the damage done by the machine to the property of other person or persons, will be written in limits up to $5,000. These policies definitely exclude liability on passengers or property carried in the machine at the time of the accident.

The company, by supplying this necessary protection, is eager to promote the lawful use of the flying machine. But to avoid any misunderstanding and to protect itself from the implication that it might be fostering the unlawful use of the airplane in smuggling liquor across the border into the United States, the Travelers is adding an endorsement to the policies, definitely stating that it does not cover any machine while it is engaged in this illegal undertaking. The Travelers is also writing accident insurance tickets for airplane passengers. The public is familiar with the railroad accident tickets sold at the ticket offices in railway stations, which, for a small sum, pay $5,000 in case the passenger is killed, and other amounts in proportion in case he is injured during the journey. The aircraft accident tickets are very similar to these, except that they are written against a greater risk of death or injury.

Agency Notes and Appointments

The Halifax Fire Insurance Co. is seeking authorization from the New Brunswick legislature to increase its capital to $1,000,000, to permit it to engage in other lines of insurance.

The Royal Indemnity Co., a casualty adjunct of the Royal Insurance Co., of England, which has a Dominion

license, but at the present will confine its operations to Ontario and Quebec only. The head office for Canada is Royal Insurance Building, Montreal. Mr. R. J. Bond is superintendent for the Dominion.

Announcement is made that the business of St. Germain and Fraas, Ltd., has been acquired by James E. Fraas, Ltd., who will continue a general insurance and real estate business in the same office, 69 Bank St., Ottawa, under the firm name of James E. Fraas, Ltd. The president of the new company, Mr. James E. Fraas, previous to going to Ottawa, was connected with the Guardian Insurance Co. for 15 years, and for many years its inspector. The new firm represents the following companies: Guardian, Commercial Union, London and Lancashire, Continental, National of Hartford and General of Perth.

The following appointments of Canadian agencies in the west, have been announced by the Continental Casualty Co.:—

Calgary, Alta.—First agency, Lowes-Dunham Insurance Agency, Ltd., general agents all casualty lines for province of Alberta; second agency, Insurance and General Agency, Ltd., to act as general agents for Southern Alberta.

Regina, Sask.—Armstrong-Logan Agency, Ltd., general agents all casualty lines for territory of Southern Saskatchewan.

Saskatoon, Sask.—Trotter-Stewart Agency, Ltd., general agents all casualty lines for territory of Northern Saskatchewan.

Winnipeg, Man.—Ryan Agency, Ltd., general agents for Manitoba territory.

W. M. Jarvis, general agent for the Maritime Provinces for the Liverpool and London and Globe Fire Insurance Co., who has been associated with that company for 49 years, has retired from business on account of advancing years and failing health.

Charles E. Otton and Roy W. Hamilton, two business men of Regina, Sask., have joined forces, and commenced business on May 1, under the firm name of the Otton and Hamilton Agencies, carrying on a general insurance, loan and conveyancing business.

Mr. Wm. May has been made assistant manager for the Western Ontario division of the Sun Life Assurance Co. Mr. John Tory is supervisor for the division.

Mr. H. E. Lloyd Owen has been appointed district manager of the North American Life Assurance Co., at Port Arthur, Ont

Mr. C. W. Nash has been appointed agency superintendent of the Equitable Assurance Society in Manitoba.

Mr. Geo. E. Archibald, Sydney, N.S., district manager for Cape Breton of the Canada Life Assurance Co., has taken into partnership with him, Mr. John MacKinnon.

Mr. Frank Hannam has been promoted to superintendent of the Halifax district of the London Life Insurance Co., on the retirement of Mr. John J. McCarthy through ill-health. Mr. Hannam was formerly assistant superintendent to Mr. McSweeney, Toronto, east district of the London Life.

The Great-West Life Assurance Co. announces the following appointments: Colin W. Patterson, inspector of Portage district, Man.; A. F. Bateman, formerly inspector of the Portage district, takes charge of the Fort William territory; F. W. Atkinson, in charge of the Fort William territory, appointed manager for the state of Minnesota.

Joseph James has been appointed inspector for the province of Saskatchewan of the Pacific Coast Fire Insurance Co., the Vulcan Fire Co. and the Century Fire Insurance Co., with headquarters at Saskatoon, Sask. F. C. Banks is inspector for the same companies for Alberta, with office in Calgary.

R. G. MacPherson, who was postmaster for the city of Vancouver for over ten years, is now British Columbia manager of the National Life Assurance Co.

The Halifax Life Underwriters' Association are making tentative arrangements for an Educational Congress to be held in the early fall.

SASKATCHEWAN COURT OF EXECUTORY DEVISE

Rules Against Perpetuities Not Applicable—Gift Not Restricted by Legal Rules of Perpetuities

In an appeal from a decision of the Chief Justice of the Court of King's Bench for Saskatchewan as to the interpretation of a will, it was held that a devise of property in which interests for life were created, such devise depending on the death of the parties having such interests for life and depending on the failure of or death of children during the life of the parties having the life interests, did not transgress any of the rules against holding land in perpetuity.

The will in question gave to the wife of the testator an estate for the duration of her life in all his property and then made provision that after the death of the wife, "the rents or interest derived from all my property, stock, implements and my personal effects, I bequeath for the use of my daughter Sarah Agnes McRann and in the event of the death of her husband, John W. McRann, the said property, lands, stock and implements, personal effects, etc., are to be deeded to my daughter Sarah Agnes McRann. In the event of her death, all of my before-mentioned property or moneys derived from the sale of same, I hereby bequeath to the children of Sarah Agnes McRann for their use and in the event of their dying or of the said Sarah Agnes McRann not having any children, all of my before-mentioned property or moneys from the sale of the same, I hereby bequeath to my wife's nephew, John Dennis Downes."

Last Clause Held Void

Certain questions in regard to the interpretation of the will were answered by the Chief Justice of the King's Bench, and from one of these answers this appeal was made. The answer in question was to the effect that the devise under the will to John Dennis Downes was void as being against the laws relating to perpetuities.

Decision Reversed

Newlands J.A., reversed this decision, explaining the question as follows:—

"The devise to his daughter, in the first place, is of the rents and interest, that is, the income of the property, therefore, the subsequent devises 'in the event of her death,' mean not in the event of her death before the testator, but a gift to take event on her death. The subsequent gifts are only in the event of her surviving her husband, because in the event of her surviving her husband, the whole property is to be deeded to her and once she takes the absolute property, there is nothing left for the subsequent legatees.

"It was clearly his (the testator's) intention to give her only the income during her husband's lifetime and the property itself only in the event of his death during her lifetime.

"The gift to the children is an absolute gift of the whole of his property and therefore if she has any children and they survive her, her husband being still alive, the gift over to Downes cannot take effect.

"The gift to Downes is in the event of her death during her husband's lifetime leaving no children, the words of the will being 'in the event of their (i.e., the children) dying, or the said Sarah Agnes McRann leaving no children,' which clearly refers to their dying during the lifetime of Sarah Agnes McRann.

"I would, therefore, interpret the will to mean:—

"1. Sarah Agnes McRann is to have the income of the estate during the lifetime of her husband, and in the event of his dying during her lifetime, the whole of the property of the testator.

"2. In the event of her death during the lifetime of her husband, leaving children they are to take the whole of the property of the testator.

"3. In the event of her death during the lifetime of her husband, leaving no children, then John Dennis Downes takes the whole of the testator's property."

HIGH PRICES FOR WEST INDIA PRODUCTS

Great Spread Cannot be Accounted for by Damages—Indirect Routing an Important Factor

By A. T. Drummond, LL.D.

THE very high prices which Canadian consumers are charged for British West India fruits and other products strongly suggests the need of greatly improved commercial relations with these crown colonies. Taking, for illustration, the retail prices in February at Kingston, Jamaica, for a few of these products, the following contrast with those charged in the retail shops of Ontario and Quebec is striking:—

	Jamaica	Canada
Oranges, per doz.	12c.	60c. to $1
Grapefruit, each	3c.	12c. to 15c.
Bananas, per doz.	14c.	45c. to 55c.
Sweet potatoes, per lb. ..	4c.	12c. upward

Another authority in the same island gives the public market prices for 1919 for these articles as very much lower, and adds that they are there always one-third more, and sometimes twice as much, as the actual growers charge. For export, prices favored the buyer to an even greater degree. It is said that last year pine-apples were sold for export as low as 50 cents to 75 cents per dozen, whilst what is there termed "fine" coffee in the bean was purchased at $8.75 per 100 lbs., and raw cocoa at $9.75 to $10.75 per 100 lbs.—a strange contrast with the 60 cents to 70 cents per lb. which the Canadian housewife has to pay for these last two articles in the semi-prepared state.

Damage is Exaggerated

A frequent, but greatly exaggerated reason given by importers of tropical fruits for high prices is the alleged losses, through spoiling, in the course of transit, of perishable fruits. If they are purchased in good condition in the New York and Boston markets, and brought into Canada by express, there should be practically no more loss than in the case, for instance, of peaches and cherries, shipped every year over long distances by train to the extent of hundreds of thousands of packages from the Niagara district here. Practically, in bananas alone is there much risk. If, however, after arrival in Canada, the fruit is held in warehouse or shop for long periods at high prices, and loss ensues, when lower prices would ensure quick sale, the importer and shopkeeper must alone bear the blame.

In speaking for possible reasons for the enormous spreads between retail prices in the tropics, and those prevailing in Canada, we are at once confronted by the fact that, except in the cases of molasses, sugar and, to some extent, cocoanuts, the great bulk of our imports of British West Indian products does not come by the direct route from these crown colonies by way of Montreal, Halifax and St. John, but is purchased in the New York and Boston markets, this additional handling alone entailing a large increase in the cost, besides throwing into the hands of American manufacturers the furnishing of the return cargoes of the vessels which brought the tropical products to these American Atlantic ports.

Government Service and West Indies

The Canadian government is to be commended for placing several vessels of its new merchant marine on the route to the West Indies, but these steamships have been constructed for general freight purposes, are slow in speed and are not equipped with cold storage, ventilation and other requirements for carrying perishable products. The Royal Mail Steam Packet Company's vessels are much in the same position. Both organizations are, however, understood to have the whole subject of improved facilities under consideration. The intention of the Canadian government, apparently, is to place refrigerating apparatus on some of its steamships, and there is a probability that it will add to its fleet vessels adapted to the passenger service, and, therefore, of higher speed than those now on the route.

Fast Service Necessary

What is needed to change the current of trade from the United States markets to the direct route and to considerably lower the cost of British West India fruits and other products, and, in this way, largely increase their consumption in Canada, is a fast, properly equipped rail and ocean service, running in close connection, and ensuring delivery in Montreal, Toronto and even Detroit and Chicago within 16 to 18 days from time of loading in the West Indies. Halifax and St. John are only a day to a day and a half's journey by steamship farther than Boston, and the cooler atmosphere and colder waters would be advantageous in the case of perishable products. These two ports would be available throughout the year, whilst Montreal, although entailing three to four days further steaming, could also be utilized in the early spring months. Is it not then practicable for the Canadian National and Canadian Pacific railways to provide close connections at the ship's side, and fast services westward, for tropical products, in cars properly equipped for carrying these, and to lay down these products in Montreal, Toronto and cities even farther west in as good order and practically as short time as presently these same products are delivered by way of Boston and New York. Fish in carloads have been delivered by them in Toronto in less than two days time from Canso in Nova Scotia, when pressed by the government to do this. And is there not, to the railways, the attraction of providing the vessels with Canadian manufactured products as return cargo? Refrigerator cars for summer shipments, and heated cars for winter shipments, of perishable articles are, however, essential, and the steamship authorities will require to see that in addition to their own equipment, there are at the points of shipment in the West Indies, cold storage warehouses where these perishable products can be placed, pending the arrival of the steamships.

No doubt all this involves capital, but it must be recalled that the business which it is thus desirable to divert from the United States to our own direct route, reaches probably forty millions of dollars or more in value, and includes not merely fruits, but so many articles from cocoa to vegetable oils and mahogany, and that the return cargoes of the vessels to the West Indies could comprise Canadian manufactures to probably another forty millions of dollars in value—an amount which would largely increase if our government would enter into better preferential customs arrangements with these crown colonies or with a federated British West Indies.

RAILWAY PASSENGERS ASSURANCE CO.

As the figures given elsewhere in this issue show, the amounts transferred to the profit and loss account of the Railway Passengers Assurance Co. at the end of 1919 totalled $525,610. Premiums in the personal accident account totalled $781,110, payments under policies were $283,260, commission $128,270 and expenses $165,000. In the employers' liability account, the premiums were $1,109,255, payments were $429,880, commissions, $125,875 and expenses $262,890. The general account shows premiums $1,548,265, payments $637,570, commissions $239,760 and expenses $286,550. The employers' liability and the general funds were increased substantially during the year.

The balance sheet shows the assets of the company now to be $6,457,135, this is an increase of $700,000 for the year. Investments total $5,480,175, compared with $5,218,420 at the end of 1918. Insurance funds total $2,460,535, and the balance in profit and loss account is $2,603,255.

Established in 1849, as the first accident insurance company, the Railway Passengers now includes guarantee, burglary and other casualty lines in its business. It secured a Dominion license in 1902, and last year, under the management of F. H. Russell, of Montreal, further progress in the Canadian business was recorded.

MATTHEW C. HINSHAW, Montreal, Manager for Canada

BRING MORE SETTLERS TO CANADA

Western Canada Colonization Association, Financed by Subscription, Will Increase Population of West

TWENTY million acres of vacant land are situated within twenty miles of existing railways in Manitoba, Saskatchewan and Alberta, and it is the purpose of the Western Canada Colonization Association to settle these accessible areas with a suitable population. These twenty million acres are exclusive of the lands held by the government, the Hudson Bay Co., and the transportation companies.

Objects of the Association

The following advantages to be derived from settlement of these vacant lands are pointed out: a greatly enlarged food production; a rapidly expanding export trade; a corresponding growth in national wealth; a progressive correction of the present adverse exchange rate; corresponding facilities in the liquidation of public and private debts owed abroad; such an increase in the population as will make the national war debt easier to carry; a lightening of the per capita taxation; such an improvement in passenger and freight traffic as will lessen the current deficit on the national railways and in time convert these transcontinental lines into a self-supporting enterprise; a notable expansion of the domestic market for Canadian manufactures; a speedier development of oil, coal and other natural resources in which the west abounds.

"In brief," says the association in a circular, "a closer settlement of the Canadian west will prove a short route to financial security for Canada as a nation and for the whole Canadian population as individuals. The government cannot spend money on the settlement of privately owned lands. This leaves the work to be done by the business interests of the country, which will be the chief beneficiaries."

Large Subscriptions Already Received

The association has a strong executive council in Alberta, where it originated, and also in Saskatchewan and Manitoba. Prominent figures on these executives are: M. R. Jennings, Edmonton, president of the Daily Newspaper Association of Canada; P. Burns, of Calgary; M. A. Brown, mayor of Medicine Hat; F. J. James, president of the Regina Board of Trade; J. H. Ashdown, of Winnipeg; and F. L. Patton, chairman of the western division of the Canadian Bankers' Association.

An appeal is being made for $1,500,000 to carry on the work, and a delegation arrived in the east last week to secure assistance here. Over $300,000 has already been obtained, and it is proposed to complete the raising of the $1,500,000 by May 28th. Among the contributing founders are: Lord Shaughnessy, Sir Vincent Meredith, Jas. A. Carruthers, Chas. R. Hosmer, Sir Herbert Holt, Sir Charles Gordon, Brig.-Gen. F. S. Meighen, Huntley R. Drummond, Col. W. Grant Morden, R. B. Angus, Sir H. Montague Allan, Sir John Eaton, Sir Joseph Flavelle, Sir Edmund Osler, and Sir Augustus Nanton.

How Work Will be Carried Out

The Western Canada Colonization Association aims to set up an organization in every western community to take care of the settlers as they arrive. This organization will welcome the newcomers, give them such information and advice as they require, and stand by them during the early days of their pioneer effort.

A still further aim of the association is to encourage interprovincial migration—that is, to promote the settlement in other parts of Canada of both eastern and western Canadians who are intent on leaving their present places of abode. In this way the association hopes to achieve something in the way of checking emigration to other countries. It also plans to work in the closest accord with the government and the railways. A logical result will be an increase in the independent appropriations which both the federal administration and the transportation agencies will set aside for colonization and settlement purposes.

PLATE GLASS UNDERWRITERS MAY ORGANIZE

Recent Developments in Insurance Circles at the Coast—Vancouver Takes Blanket Policy on Police Force

(Special to The Monetary Times)

Vancouver, May 15th, 1920.

A MOVEMENT is on foot in Vancouver to start a plate glass association among the representatives of the twenty-five companies who are selling plate glass insurance in the city. Their plans are not definitely formed, but the idea is to establish a community of interests as regards rates, and to adopt rules and regulations to govern the conduct of agents engaged in this class of business. It is stated that owing to competition, none of the companies are making money, and some are doing business at a loss.

A somewhat new adventure for the large employers of labor in British Columbia has been carried out by the Consolidated Mining and Smelting Company, Trail, B.C., the company buying life insurance policies for every employee under the age of 55. Six months' services in the employ of the firm was awarded with a policy of $500, and an additional $100 is put on for every six months' services in the company until the maximum amount is reached.

Mr. Perry, manager for Canada of the Ocean Accident and Guarantee Insurance Company, visited the city this week. Mr. Perry is chairman of the Ontario Automobile Underwriters' Association, and vice-chairman of the Canadian Automobile Underwriters' Association. He reports great activity in insurance circles in the east.

Mr. Chas. Barsotti, assistant manager of the Fire Insurance Association of Philadelphia, and Victory Insurance Company, of San Francisco, was in the city last week on a business trip. He made his headquarters with the general agents of his company—Messrs. Richards, Acroyd & Gall. At the regular weekly luncheon of the "Blue Goose," Mr. Barsotti was an honored guest, and renewed his associations with his insurance friends in Vancouver.

A scheme has been adopted by the city of Vancouver to put a "blanket insurance policy" on the members of the police force. There were sixteen bids for this insurance, the lowest being accepted. The insurance will cost the city $5,500 a year. If a member of the force is off duty owing to sickness, accident, or other causes, he will receive $100 a month as a result of this insurance. It is said the city will save money by this scheme, for in the past year they had paid out $9,000 in moral obligations to sick police officers. In case of death under this insurance scheme, the widow receives funeral expenses to the extent of $500.

LIFE COMPANIES JOIN ASSOCIATION

At the May meeting of the executive committee of the Association of Life Insurance Presidents, the Confederation Life Association and the Imperial Life Assurance Co., both of Toronto, were admitted to membership by a unanimous vote. Including these two new members, the total membership of the association is forty-four, comprising thirty-seven United States companies and seven Canadian companies.

"Your Banker" is the title of a booklet just issued by the Life Underwriters' Association of Canada, quoting opinions of managers of Canadian and United States banks to the effect that life insurance is an important factor in a customer's credit.

The annual report of the Royal Bank, now published in booklet form, contains the usual statistical information about production, trade, banking, etc. Some of the important developments during the fifty years of the bank's history are also covered.

NOTICE OF MORTGAGE SALE

OF VALUABLE RESIDENTIAL PROPERTY IN THE CITY OF TORONTO

Under and by virtue of the Power of Sale contained in certain Charges or Mortgages, which will be produced at the time of sale, there will be offered for sale by Public Auction, at the Auction Rooms of Walter Ward Price, Auctioneer, 30 Adelaide Street, East, Toronto, on Monday, May 31st, 1920, at the hour of twelve o'clock noon, the following property in the City of Toronto:—

FIRSTLY: The westerly half of Lot 116, and the easterly twenty feet from front to rear of Lot One Hundred and Seventeen (117), as shown on Plan "M37," filed in the Office of Land Titles at Toronto, together with the right-of-way at all times, and for all purposes, in, over and along a strip of land sixty-six feet wide, lying immediately in front of Lots One Hundred and Fourteen to One Hundred and Eighteen (114 to 118), and also in front of Kenilworth Avenue, in common with all others entitled thereto.

SECONDLY: All the water lot lying immediately in front of the hereinbefore described lands, and extending out into the Lake a distance of seven hundred and ninety feet (790′), more or less, to the southerly boundary of the said water lots.

Subject to a right-of-way over and along the northerly sixty-six feet (66′) thereof.

And subject to the exceptions and reservations, conditions, covenants and easements, more particularly described and set forth in the original mortgage, filed in the Office of Land Titles at Toronto as No. 39552. Particulars of which can be had on applying to the undersigned.

Upon the easterly twenty-two feet six inches (22′ 6″) of the said firstly described lands, is said to be erected a six-room frame house, containing modern conveniences, known as House Number 72 Lakefront, and upon the westerly twenty-two feet six inches (22′ 6″) of the firstly described lands is said to be erected a six-room frame house, containing modern conveniences, known as House Number 70 Lakefront.

TERMS AND CONDITIONS: Ten per cent. of the purchase price shall be paid in cash at the time of sale, and the balance to be paid within twenty days thereof. The property will be offered for sale subject to a reserve bid. Further particulars and conditions of sale will be made known at the time of sale, or may be ascertained by application to Messrs. Henderson & McGuire, Sun Life Bldg., 60 Victoria St., Toronto, Solicitors for the Vendor.

To People the Prairies

With "Hand-Picked" Settlers

Big Colonization Movement Under Way

Through the foresight and determination of public-spirited Western business men, an association has been formed to grapple with a question vital to all Canada.

The Western Canada Colonization Association is a development from minor organizations, which were unable to cope with a work of such importance—that of bringing under crop twenty million acres of privately-owned land, all lying idle within twenty miles of railways in the Prairie Provinces. The settlement of this land promises great and beneficial results for the whole Dominion.

Our Stubborn Financial Problem

An adverse exchange rate bears heavily upon Canada. The only remedy is to increase our exports to the utmost. The direct way to do this is to people millions of acres lying idle in the West. A great mine of gold lies in these fertile fields, and the time has come to work it.

The West Yearns for Development

The Prairie Provinces yearn for immigrants—of the "hand-picked" class. The movement now afoot is heartily welcomed and supported. From the Rockies to the Great Lakes, prominent public and business men are devoting themselves to the furtherance of the project.

A strong representative Western Committee is at present visiting Eastern cities. Their mission is to make clear that the movement is vital to all Canada.

A Partnership of East and West

The East will hold a permanent partnership and beneficial interest in the movement. The policies of the Association will not be definitely shaped until the fullest co-operation of Eastern Canada has been elicited. Then a joint executive council, representative of both East and West, will become responsible for the formation of plans mutually satisfactory, and with the one aim in view—an ever-progressing and richer Canada.

Out in the West, lie idle no less than twenty million acres of arable land—all within twenty miles of existing transportation facilities! An unique opportunity for colonization and increased food production, hitherto wasted, is now to be realized.

There is no time for further delay—this is a matter for prompt action—vigorous impetus has already been given to the movement by many of Canada's distinguished men, in both the East and the West.

1919 Insurance In British Columbia

Net Amount of Life Insurance in Force on Dec. 31st was $141,549,458, Compared with $112,978,918 Last Year—Fire Insurance Business Also Increases Substantially—Fire Loss Ratio 29 per cent. Against 30.4 per cent. in 1918

Both fire and life insurance in British Columbia enjoyed a healthy growth during 1919, according to preliminary figures just issued by H. G. Garrett, superintendent of insurance for the province. The life insurance results compare with the results for 1918 as follows:—

	1918.	1919.
Premiums	$ 4,026,057	$ 4,766,713
Amount of policies new and taken up	22,981,412	38,908,525
Net amount in force....	112,978,918	141,549,458
Net amount become claims	1,772,603	1,434,947
Claims paid	1,558,574	1,850,673
Unsettled claims not resisted	613,447	209,885

	1918.	1919.
Amount invested in British Columbia on mortgages	6,826,824	6,096,365
On other securities.....	9,352,329	12,242,126

The figures for each company are shown in the accompanying table.

Fire Premiums and Losses.

Compared with 1918, the results for all the companies writing fire insurace were as follows:—

	1918.	1919.
Net premiums	$4,081,978	$4,366,727
Net losses incurred	1,241,353	1,267,909
Net losses paid	1,147,666	1,180,657

EMPLOYERS' LIABILITY ASSURANCE CORPORATION

Premium income of the Employers' Liability Assurance Corporation for the year 1919 was $28,278,805, compared with $25,476,505 for 1918. This increase indicates the general expansion which took place in the company's business during the year. Payments under policies totalled $13,357,975, or about 47 per cent. of the premiums. Commissions were $6,113,555, and management expenses $2,012,300. The insurance fund, which was $17,879,620 at the beginning of the year, was increased to $21,066,230, and $3,729,730 was also transferred to profit and loss. Dividends to the amount of $1,000,000 were paid.

The directors, in their report, refer to the acquisition of the shares of the Merchants' Marine Insurance Co., Ltd., as a result of an agreement reached last June. A subdivision of the company's shares and a rearrangement of the capital has also been undertaken.

Assets of the Employers' Liability at the end of 1919 totalled $39,346,735, compared with $30,710,362 at the end of 1918, and almost double the assets on December 31st, 1917. Most of the investments are now in government and municipal securities.

In Canada, under the management of W. C. I. Woodland, the company has continued to make rapid progress. Premiums written in this country in 1919 were as follows: Fire, $703,173; accident, $138,630; automobile, $311,837; burglary, $4,629; liability, $538,419; explosion, $450; guarantee, $81,148; hail, $105,665; sickness, $83,775. Operations in burglary, expolsiton and hail insurance were commenced only late in the year, and boiler and plate glass insurance have also been added to the company's lines.

That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

Write for our free booklet which tells all about it.

Assurance Company of Canada
HEAD OFFICE - TORONTO

Helping the Operator

We suggest that subscribers practise the following :—

1. Always consult our latest directory, because numbers are frequently changed.
2. In a moderate tone, speak slowly and distinctly directly into the mouthpiece with your lips not more than an inch away.
3. Answer promptly when your bell rings. It saves "Central" ringing again; saves the calling party's time, and speeds up business generally.
4. When you answer give your name or the name of your firm instead of the old-fashioned "Hello," thus allowing the conversation to begin without waste of time.

Co-operation with the operator, as above, cannot but help your service.

CANADIAN TRADE MAKES STRIDE TOWARDS NEW RECORD

Imports Exceed Previous High Levels by More Than $100,000,000—Showing of Exports Not So Favorable, but Some Steady Gains are Noted

TRADE of Canada for the year ended March, 1920, made some notable advances over the preceding year, and a big step was taken towards the establishment of a better record than that which was made in 1918. Imports, in fact, were in excess of those of 1918 by more than $100,000,000, but, on the other hand, exports were somewhat $300,000,000 below the figure of two years ago. Imports for the year under review showed an increase of approximately $145,000,000 as compared with 1919, while exports gained about $18,000,000.

For the year just ended Canada exported nearly $363,000,000 more in goods to the United Kingdom than was imported, but this favorable balance is being lessened each year. The same comparison applied to our trade with the United States results in a reversal, there being an adverse balance of about $338,000,000. It is an encouraging fact, however, that, while exports to the United Kingdom are falling away, those to the United States are largely on the increase.

With the exception of Australia and British South Africa, Canada's trade with the British colonies and foreign countries during the past year advanced considerably. The more notable gains are found under the heading of exports.

The following table, compiled by the Dominion Bureau of statistics, shows trade of Canada for the fiscal year ended March, 1920, with comparisons:—

	Twelve Months ending March		
	1918	1919	1920
Imports for Consumption	$	$	$
Dutiable Goods	542,319,623	526,475,717	693,643,211

News of Industrial Development in Canada

Increased Production by Pulp Companies May Lead to Lower Prices—Possibilities of Paper Industry in Saskatchewan to be Investigated—Consolidation of British Columbia Iron and Steel Companies Considered

THE expansion of the pulp and paper trade in Canada is being discussed with much interest in industrial circles. At present the demand is far in excess of the output, but it is predicted that the time is not far hence when this position will be reversed, and in view of the frequent announcements by leading pulp and paper concerns, it would seem that such a change is inevitable. Speaking of the situation, Major F. C. Shorey, director of the Meige Pulpwood Company, which operates in the province of Quebec, said recently:

"The price of pulpwood is doomed to fall within a few months. Most of the pulpwood companies in Canada are increasing their production considerably. Last year was one of the leanest for pulpwood production—this year is one of the greatest. Our company has practically doubled its former production. The United States is the principal buyer of Canadian pulpwood. Our company sells to America exclusively. In my opinion there is no chance of the embargo being lifted on shipments of pulpwood outside the limits of the Crown lands and this will mean that the mills in the United States will be compelled to either locate in Canada or go out of business."

In connection with new developments, it is announced that the Great Eastern Paper Company, Limited, which owns 450 square miles, or approximately 300,000 acres of timber limits in Gaspe County, province of Quebec, on the St. Lawrence River, will open a new industry. The plant of the company comprises a barking mill, a new mill with a capacity of 10,000,000 board feet a year, a ground woodpulp mill with a capacity of 20,000 tons a year and water power development with 5,000 horsepower unit installed and a total capacity of 27,000 horsepower. The company owns also a railway of 7½ miles from the plant to the St. Lawrence with the necessary rolling stock and equipment and the deck, shipping facilities, lighters, etc., at this terminal. Montreal and New York interests are identified with the new enterprise, it is stated.

The Spanish River Pulp and Paper Company also announces its intention to further increase its production, and in consequence the Northern Ontario plants will be enlarged. It is expected that by the end of the present year the company will have a total capacity of 650 tons of newsprint daily. Two new machines of 100 tons capacity were announced recently, and now another 50-ton machine is being ordered for the Sturgeon Falls mill. The respective capacity of the three mills will then be: Sturgeon Falls, 175 tons; Espanola, 225 tons, and Sault Ste. Marie, 250 tons. The construction and installation of these machines requires upwards of six months.

Western Possibilities

The new developments in the pulp and paper industry, however, are practically confined to the Eastern provinces, and from all events, it appears that the West is being neglected, even though the possibilities for the establishment of such an industry there, are claimed to be great. It is understood that Saskatchewan particularly, has tremendous potentialities as a producer of pulp and paper, and a letter from an authority in the lumber business in Saskatoon, points out that large quantities of poplar, which is suitable for pulpwood, are scattered over the northern part of the province. At the present time settlers are burning miles of this valuable timber, because it is impossible for them to handle it in any other way. There are also large deposits of sodium sulphite, which are important to the output of by-products manufactured from the pulp, the most important of which is artificial silk.

The letter further contends that without much difficulty the transportation facilities could be brought up to a higher standard, and render the marketing of the product easier.

Saskatchewan Industrial Bureau

The Saskatchewan government has formed a new department, which is known as the Bureau of Labour and Industries. Hon. Chas. Dunning, provincial treasurer, in explaining the facts to various Saskatchewan boards of trade, stated that the new department will undertake the industrial development of the known resources in the province; that it will investigate the practicability of every industry which might appear possible of development in the province because of the presence of raw materials and other favorable conditions; that the bureau will do all in its power in an educational way to bring to the people of Saskatchewan the necessity of supporting their home industries when established.

Important in its investigations, the bureau will get facts in connection with the pulp and paper industry and make them available to those who may be interested in that particular business. The destruction of valuable timber by fire, through lack of proper production, will also be investigated.

Miscellaneous Trade Notes

The Bird-Archer Company, which has been in operation at Cobourg, Ont., for the past three years, manufacturing boiler compounds, has leased the old Steel Company building which was used for the manufacture of shells during the war, for five years, with the option of buying. Possession of the new premises will be taken on May 24, and will install a plant for manufacturing all its Canadian goods. The new industry will be in operation by May, it is expected.

Woodtite Laboratories, of Modesto, Cal., recently advised the Vancouver office of the association that it is the intention of that company to establish a plant in Vancouver, B.C. This plant is for the purpose of meeting present and future requirements of the Canadian trade west of Winnipeg. The Woodtite company manufactures specialties in auto accessories for which there is a wide demand in Canada.

The Draper Manufacturing Co., Port Huron, announce that they are re-opening and extending their plant at Petrolia, Ont., which was closed down some time ago. The company manufactures valve facing tools, ball check valves, ball globe valves, balanced brass balls, perfect iron and steel balls, perfect brass balls, etc. Their business will be principally with the railways and paper mills and with other users of brass balls.

Lord Leverhulme when recently in Vancouver, B.C., completed negotiations for the purchase of extensive water front property on Vancouver harbor. The intention of the purchaser is to erect a factory as an adjunct to the present local industry, and to build docks and wharves.

The Sterling Twine Co., Limited, capitalized at $100,000, have recently been incorporated at Walkerton, Ont., for the purpose of manufacturing commercial twine of all kinds (but not binder twine), for sale to the wholesale trade. They have acquired three buildings in the business portion of the town near the C.P.R. station.

The John Hall & Sons, Ltd., pipe machinery manufacturers, of Brantford, Ont., have merged with the Williams Tool Corporation, of Erie, the largest manufacturers of pipe machinery in the United States with a capital of $1,000,000. John H. Hall and Sons, Ltd., are the largest manufacturers of pipe machinery in Canada. The local plant will be known as the Hall plant of the Williams Tool Corporation. A larger plant will possibly be built, although nothing definite in that regard has been announced.

U. L. Appleford, owner and controller of the economic process of dehydrating milk in Canada, has announced that the Appleford's Milk Products, Ltd., has been organized in Ottawa, with a capitalization of $1,000,000, the money having been subscribed by Ottawa, Brantford and Kingston in-

vestors. This will be the parent company of Canada, Mr. Appleford states, and will control a chain of powdered milk factories throughout the Dominion. The site of the first factory is at Trenton, Ont.

Major D. B. Martyn, D.S.O., commissioner of industries for British Columbia, has under consideration a scheme for the consolidation of the several companies at present manufacturing steel from scrap iron on the mainland and islands of this province. There are at present in British Columbia a number of companies engaged in the steel industry, each of them using scrap iron with imported pig iron as their basic material. The British Columbia government consider the industry of such intrinsic importance that the plan now being considered will probably result in the amalgamation of existing plants, possibly assisted financially by the government in order to place the industry on a well-founded and profitable basis. The companies at present existing possess among them sufficient machinery and equipment to provide for one plant of considerable dimensions.

NEW INCORPORATIONS

Ames Holden Rubber Co., Ltd., $3,000,000—Jenckes Canadian Co., Ltd., $3,000,000—Jas. Smart Manufacturing Co., Ltd., $2,000,000—Sugars of Canada, $2,000,000

INSTITUTE OF COMPANY SECRETARIES

A Canadian branch of the Chartered Institute of Secretaries of Joint Stock Companies has been inaugurated, with headquarters in Montreal. The following officers have been elected: Chairman, Wm. MacInnes, Norwich Union Fire Insurance Society, Ltd.; vice-chairman, E. R. Whitrod; "Star" Publishing Co., Ltd.; honorary treasurer, H. J. Williams, Harrisons and Crosfield, Ltd.; honorary secretary, J. W. Benson, Canadian Import Co. The examinations for the professional membership of the institute are held at McGill University, and embrace mercantile law, company law, economics, secretarial practice, accounting and certain optional subjects relating more particularly to the special phase of secretarial activity to which a candidate is engaged.

Dinning and Co., Montreal, have removed from their old premises in the Merchants Bank Building to new offices in the Marcil Trust Building, 288 St. James Street.

1870 —— OUR GOLDEN JUBILEE —— 1920

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

Charity Begins at Home

and the best and most fitting form of home charity lies in the direction of Life Insurance. In no other way can the head of the home so surely provide for the permanent welfare of those who look to him for support.

The Great-West Life Policies provide such Insurance on most attractive terms. The fact that, in 27 years, the Company has placed over $226,000,000 of Insurance in force, carries its own argument.

Full information and personal rates will be sent to any address on request.

News of Municipal Finance

Edmonton Sinking Fund Report Shows Profit — Moose Jaw Will Not Take Advantage of Exchange Rate — Calgary Estimates Expenditure at More Than $3,500,000 — An Increase of Half Million Over Last Year

St. Thomas, Ont.—The total assessment for 1920 is $3,002,525, an increase of $573,578 over 1919.

Raymond, Alta.—The tax rate for 1920 will probably be 40 mills, an increase of 5 mills over last year.

Victoria, B.C.—The city has broken off relations with the Union of British Columbia Municipalities, by a vote of 7 to 4 by the council.

Toronto, Ont.—The bill providing for the purchase of the Toronto Street Railway has passed the Private Bills Committee of the legislature.

London, Ont.—It is planned to add about $15,000,000 to the assessment of the city, making a total of $56,000,000. By this means it is hoped to cut the tax rate down to about 30 mills next year.

Wingham, Ont.—The assessment for this year is as follows:—Land value, $224,130; buildings, $685,130; business assessment, $95,405; income, $38,200; total, $1,042,865. The total represents an increase over last year's figure of $12,000.

Leamington, Ont.—This year's assessment is $2,841,527, an increase of $490,743 over last year. The total is divided as follows: Land values, $785,825; buildings, $1,389,825; business, $256,577; income, $28,800; local improvement, $380,500.

Collingwood, Ont.—With a deficit of $47,000 from 1919 operations, the town has set the tax rate at 50 mills. This is 10 mills higher than last year. Even with the present tax rate, the council anticipates a deficit of $30,000 at the end of this year.

Scott, Sask.—The financial statement of the town for 1919 shows excess liabilities over assets of $6,607. Outstanding debentures amount to $136,226. The balance of cash on hand and in the bank is $8,637, representing the surplus of receipts over expenditures.

Walkerville, Ont.—The town's assessment of $8,724,418 for 1920, is made up of the following amounts: Land, $1,498,473; buildings, $4,723,807; business, $2,026,290; income, $475,848. Last year's rate was $1,034,937 below this year's rate. The tax rate will be struck at the July session of the council.

Moose Jaw, Sask.—The council has passed on estimates totalling $204,450, and it is likely that further expenditures amounting to $40,893 will be passed shortly. This makes a total of $245,343, to which would be added $20,000 for the floating of the loans and the meeting of interest and discount charges.

Regina, Sask.—As the result of negotiations between the provincial government officials and the banks, loans will be made to municipalities for school purposes in the southwest part of the province. Due to poor crops, municipal councils are unable to collect taxes, consequently the banks have shown some reluctance to make advances.

Calgary, Alta.—The final total of civic estimated expenditures is $3,540,032, as against $3,009,379 actually expended last year, an increase of $530,653. On these expenditures the tax rate of 44 mills is calculated, with an addition of $^3/_4$ of a mill for special levy to cover losses in collections, and 1 mill on land valuation alone for the provincial supplementary revenue tax.

Winnipeg, Man.—Estimates amounting to more than $2,000,000 have been passed for public school purposes.

Tax rates for 1920 will be struck some time in June, and will likely be higher than last year, because of heavy proposed civic expenditures. Total realty assessment for the year is shown at $236,970,140, with exemptions of $40,971,930. Of the total assessment the value of the land comes to $144,332,700, and the buildings $92,637,710.

Moose Jaw, Sask.—With the arrival of another date upon which the city will be required to make payment of $25,000 to retire debentures issued in denominations of English money, it was decided that Canadian holders of the debentures would receive an equivalent in Canadian money and only the holders in England would receive the face value of the debentures.

The debentures are for £2 5s. each, and are payable at London, Eng.; Montreal, Toronto and Moose Jaw. By taking advantage of the exchange situation and paying the Canadian holders only the present equivalent of £2 5s. for each debenture, the city might save about $4,000. The decision of the finance committee means that the city will save nothing upon the payments to Canadian holders, but will make between $1,000 and $2,000 on the holdings in England, where no more than £2 5s. will be expected.

Medicine Hat, Alta.—In supreme court the city lost in an action to recover taxes as an ordinary debt. The city brought suit by ordinary action against John E. Howson for arrears of taxes for the years 1915 to 1919 inclusive, the amount of taxes being $1,652.76. The defendant said that the charter does not give the city any such right of action, but restricts the method of recovery to enforcement of lien, distress and tax sale proceedings. Mr. Justice Simmons held that the defendant's contention was right, and he dismissed the action.

Edson, Alta.—The municipal district of Edson, No. 555, has been disorganized and will in future be known as an improvement district under the same number. During the war the rails were lifted from a part of the Canadian Northern railway track. A considerable decrease in population within the bounds of the Edson municipal district then developed, and by 1918 the total assessable area in the district had fallen to 47,000 acres, with a further reduction to 37,000 acres in 1919. It has, therefore, been found necessary to disorganize the district, the total revenue from which has latterly not proved sufficient to keep up the municipal machinery and the running expenses of a municipal district office.

Edmonton, Alta.—A profit of $40,756 was made by the sinking fund board last year, according to a statement given out by City Comptroller Mitchell. In the previous year the board made a gain of $15,104. The total funds of the board at the end of last December amounted to $5,371,395, which included surplus earnings of $232,338, which, however, are subject to the results of realization on mortgage loans. The increase over the funds for 1918 was $778,297. Interest earnings on mortgages, bonds, debentures and guaranteed stocks amounted to $277,245, as compared with $213,888 for the previous year. The sinking fund requirements for the year were $236,489, showing the excess earnings as given.

Included in the board's investments are: War loan bonds, $448,000; bonds and securities guaranteed by the provinces of Canada, $680,198; debentures of municipalities and school districts, $773,299; Edmonton debentures, $400,000; Edmonton short-term debentures issued against arrears, $893,574. First mortgages over Edmonton real estate amount to $1,140,520, while real estate acquired at cash value totals $73,408. Under the head city of Edmonton, bills receivable, there is $658,412, while interest due and accrued stands at $264,452.

Hon. Edward Brown, provincial treasurer of Manitoba, stated on May 11, that so far this year a total of $264,000 had been loaned by the government for the purchase of seed grain. Last year the total loans of this character amounted to $125,000. It is expected that this year more than $300,000 will be utilized in this manner. Mr. Brown stated that the government had provided this amount for this purpose, but that the legislature had not set any limit on the amount of money that could be appropriated for this purpose.

BANK OF MONTREAL HALF-YEARLY STATEMENT

Increased demand for bank accommodation, and substantial growth of deposits are reflected in the statement of the Bank of Montreal for the six months ended April 30. Profits for the half-year amounted to $1,802,585, compared with $1,751,237 in the corresponding period a year ago, representing an increase of $51,348. Out of the results of the half-year were paid the usual quarterly dividends at the rate of 12 per cent. per annum, amounting to $1,200,000, while there was written off bank premises the sum of $225,000, or $25,000 in excess of the amount shown in the 1919 statement. Other deductions included an allowance of $100,000 for war tax on note circulation, being an increase of over $9,000 over a year ago and $20,000 more than that allowed for in the first half of the bank's 1918 fiscal year. After all deductions, surplus, profits, as at April 30 last, amounted to $277,585, which, added to the balance carried into the current year's accounts left the amount of $2,090,440 to bring into the second half of 1920.

It is in the balance sheet figures, however, where the most significant changes from the position occupied by the bank a year ago are shown. Combined notice and demand deposits at upwards of $470,000,000 stand some $77,000,000 over those at the end of April, 1919, those of the demand class contributing $33,000,000 of the gain, with savings accounts approximately $44,000,000 in excess of $312,000,000.

Liquid assets of the banks shown at $302,821,820 are higher by almost $97,000,000 than those on April 30, 1919, but liabilities to the public owing chiefly to the sharp increase in deposits of both classes grew from $441,595,847 at the end of the first half of 1919 to $518,975,429 in the statement under review lowering the ratio of assets of a quick nature to public liabilities from 66.57 per cent. a year ago to 58.35 per cent.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned, and marked on the outside, "Tenders for Debentures," will be received up to noon on Tuesday, the 22nd day of June, A.D. 1920, for the purchase of Fifty thousand dollars ($50,000.00) twenty (20) year six per cent. debentures of the Rural Municipality of Lawrence, issued under "The Municipal Act" and amendments thereto. The highest or any tender not necessarily accepted.

For further information, address

Government and Municipal Bond Market

Bond Market Unaffected By Budget — Improvements in Victories Expected — Nova Scotia Makes Favorable Loan—Saskatoon Bonds Not Sold—Commissioner Yorath Explains Situation

VERY little immediate effect on the bond market has been produced by the budget speech. The increase in the tax on higher incomes has, of course, made tax-exempt war bonds still more desirable to the man of wealth, but this change was evidently discounted some time ago. Just what effect the taxes on luxuries will have on saving and on the demand for first-class securities is too uncertain to greatly influence the market at present. It was also understood that there would be no government loan this year, and the minister's statement that borrowing must cease confirms this.

As regards the general condition of the market, it is considered that the tone is slightly improved. The New Brunswick and Toronto Separate School bonds have all been taken up, chiefly by Canadians. A feature of the sale of these two issues is the lack of institutional buying.

Coming Offerings

The following is a list of debentures offered for sale, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Massey River S.D., Man.	$ 12,000	..	20-instal.	May 24
Pembroke, Ont.	37,439	6	10-instal.	May 28
Port Dalhousie, Ont.	120,000	6	30-instal.	May 30
Westbourne R.M., Man.	40,000	6	30-instal.	May 31
Gilbert Plains R.M., Man.	38,000	6	30-instal.	June 7
Glencoe, Ont.	18,000	5½	20-instal.	....
Province of Manitoba	2,769,000	6	5-years	May 26
Alberta School Districts	116,500	7	Various	June 1
Milford, Ont.	58,700	6½	10 & 20-inst.	June 7
Vermilion, Alta.	26,000	6½ & 7	20-instal.	June 14
Sarnia, Ont.	100,000	5½	20-years	....
Lawrence R.M., Man	50,000	6	20-years	June 22

Sarnia, Ont.—Tenders are being received for $100,000 5½ per cent. 20-year debentures.. James Wood, treasurer.

Milford, Ont.—The town will receive tenders until June 7th, 1920, for the purchase of the following 6½ per cent. debentures: For sewers, $36,000, 20-instalment; for electric light, $22,000, 10-instalment; for waterworks, $700, 20-instalment.

Vermilion, Alta.—Tenders will be received until June 14th, 1920, for the purchase of the following debentures:—$20,000 6½ per cent. 20-instalment, for fire purposes; $6,000 7 per cent. 20-instalment, for electric light and power extension. (See advertisement elsewhere in this issue).

Chatham, Ont.—The city treasurer has announced that towards the end of this month he will have an issue of local improvement debentures for sale. The debentures would be for a period of one to ten years, and would bear interest at the rate of 6 per cent. As in the past the issue will be sold locally, and already a large amount has been spoken for.

Alberta School Districts.—Tenders will be received until June 1st, 1920, for the purchase of thirty blocks of school district debentures, aggregating $116,500, as follows: Rurals, 15-years 7 per cent., $27,100; rurals, 10-years 7 per cent., $20,700; village school districts, 10-years 7 per cent., $22,000; village school district, 15-years 7 per cent., $9,000; rurals, 5-years 7 per cent., $1,575; town school district, 25-years 7 per cent, $25,000; consolidated school district, 20-years 7 per cent., $11,000. J. T. Ross, Deputy Minister of Education, Edmonton.

Manitoba.—The province is calling for tenders up till May 26th, 1920, for the purchase of $2,769,000 5-year 6 per cent. bonds, the proceeds of which will be used for housing and other improvements. Interest and principal are payable in New York, Toronto, Montreal and Winnipeg. A feature of the issue is the conversion privilege, which is a new departure in the issuing of Canadian bonds. There will be a provision in the definitive bond, giving to the holder the right of exchange at maturity for a 15-year 5½ per cent. bond at par, by giving three months' notice before maturity of the bond. Bonds to be exchanged, with the exception of the interest rate, will be similar in every respect to the present issue.

Debenture Notes

Niagara Falls, Ont.—A by-law to raise $250,000 for sewer construction has been passed.

Nova Scotia..—A bill providing for the loan of $8,000,000 for highway construction has been passed.

Fredericton, N.B.—A bond issue of $200,000 for the construction and upkeep of the hospital, is proposed.

Niagara Falls, Ont.—The council has authorized the issue of $200,000 bonds for the purpose of carrying on under the new provisions of the housing act.

Winchester R.M., Man.—Ratepayers on May 28th, will be asked to vote on a by-law authorizing the issue of debentures to the amount of $9,840.

Brunkild, C.S.D., Man.—Ratepayers will be asked to vote on June 1st, on a by-law authorizing the issuance of $35,000 7 per cent. 20-instalment debentures.

Winnipeg, Man.—On June 11th, 1920, ratepayers will be asked to vote on the following money by-laws: $1,500,000 for schools; $279,000 for hospitals; $300,000 for Maryland bridge.

Lethbridge, Alta.—The commissioners are going over various items of capital expenditure, during a period of some ten years, for which bonds were not provided, with a view of consolidating them and issuing debentures for the whole amount, which exceeds $200,000.

Bond Sales

Manitoba.—The province recently sold to Messrs. Wood, Gundy and Co. at par $500,000 5½ per cent. 3-year bonds, the proceeds of which will be used for the purpose of financing the Farm Loans Association, according to an announcement just made.

York Township, Ont.—Messrs. A. Jarvis and Co. have been awarded $18,000 5½ per cent. 20-instalment public school debentures at 93.19. Tenders received were: A. Jarvis and Co., 93.19; C. H. Burgess and Co., 92.32; R. C. Matthews and Co., 91.70; United Financial Corporation, Ltd., 91.33; Housser, Wood and Co., 90.57.

Nova Scotia.—The province has disposed of $2,200,000 6 per cent. five-year bonds for construction purposes at 101.19, and $800,000 6 per cent. five-year bonds for refunding in the United States at 91.21. At these rates the province paid about 5.72 per cent. for its money. The successful syndicate in both cases was comprised of the following companies: R. A. Daly and Co. and W. A. Mackenzie and Co., Toronto; Merrill, Oldham and Co., Boston; Lee, Higginson and Co., New York; E. H. Rollins and Sons, Boston. Other bids were: A. E. Ames and Co., Harris, Forbes and Co. and National City Co., 100.655, Halifax, 91.194, New York, for first and second blocks, respectively; Dominion Securities Corporation and Wood, Gundy and Co., 100.137, Halifax, and 90.837; New York; Housser, Wood and Co. and C. H. Burgess and Co., 90.82 for $800,000 and 101 and interest for an option on the other block; Canada Bond Corporation, 99.53 and 90.07.

Saskatoon Issue

In regard to the $988,900 debenture issue of Saskatoon, Sask., Commissioner Yorath reported to the council on May 10th, that no direct bid had been made. Messrs. Wood, Gundy and Co., however, asked for options as follows: For the entire issue, 85.80 and accrued interest, payment in Saskatoon funds; for $368,900 of the bonds, excluding block No. 2, at 86.26 and accrued interest, payment in Saskatoon funds. The above bonds carried interest at 5 and 6 per cent., and matured in .20 and 30 years. In case the city considered the price too high for that type of bond, Wood, Gundy and Co., made an offer to sell $250,000 5-year 6 per cent. bonds in the United States market. An option was also asked for this block, the price being 86.50 and interest, payment in New York funds. This would mean that the city could secure the benefit of whatever premium there is on United States exchange, and at present rates this will bring the price up to a fairly substantial rate in Saskatoon funds.

Although the latter offer was considered the best, the objection was taken to selling the securities in the United States because the city would probably have to pay a premium for New York funds at time of both principal and interest. If the same rate of exchange continues the city would have to pay on interest an increase of 12 per cent., a discount of 10 per cent. in the United States being approximately equivalent to 12 per cent. premium in Canada, or $112 for $100 of every principal redeemed. On the average this would mean that the cost of the money to the city would be approximately on a basis of 9.2 per cent., i.e., if the same rate of exchange continues. No definite decision was made, however, and the matter will be taken up with the Bank of Montreal. The possibility of making a local issue will also be considered.

Effect of Defaults

In concluding his report to the council Commissioner Yorath said: "It was ascertained by your commissioner when in the east, from a very reliable source, that the default of the city of Prince Albert and other municipalities in the province of Saskatchewan in the payment of interest, has adversely affected all Saskatchewan municipal securities, and that some of the big financial and investment corporations have struck these securities from their list. It will be realized that this situation will adversely affect the price of all municipal debentures throughout the province. The matter is of such importance that some combined action should be taken by the municipalities in an endeavor to persuade the provincial government to take steps to remove the uncertainty which has arisen in financial circles regarding Saskatchewan municipal securities, arising from the default of a few municipalities."

Lawrence R.M., Man.—Tenders will be received until June 22nd, 1920, for the purchase of $50,000 6 per cent. 10-year debentures. (See announcement elsewhere in this issue).

STERLING BANK OF CANADA

There is no truth in the rumour that the Sterling Bank is going to be absorbed or sold, said G. T. Somers, president of the Sterling Bank, at the annual meeting held in Toronto on May 18. Mr. Somers also announced that the dividend rate had been increased to 8 per cent. The report submitted showed profits of $251,346 for the year ended April 30th, 1920, compared with $213,632 for the preceding year. This, added to the balance of 40,909 brought forward from 1919, made a total of $292,256 available for distribution. Dividends at 7 per cent. absorbed $85,883, $50,000 was transferred to reserve, $70,000 to contingent account for depreciation of assets, etc., $20,000 was written off bank premises, $23,429 set aside for taxes and the balance of $42,942 carried forward in profit and loss.

Very substantial gains have been made in the volume of business, as the following comparisons show:—

	1919.	1920.
Circulation	$ 1,216,300	$ 1,290,337
Demand deposits	4,706.154	4,809,021
Savings deposits	11,661,815	12,666,999
Cash assets	3,730,597	3,906,748
Securities and call loans	12,354,919	17,353,809
Current loans and other assets	7,075,964	9,022,057
Total assets	19,430,884	26,375,867

LONDON AND LANCASHIRE FIRE

Premium income of the London and Lancashire Fire Insurance Co. during the year 1919 totalled $33,795,295, compared with $31,262,299 in 1918; the fire premiums increased from $12,186,115 to $16,351,492, and the accident from $4,522,582 to $6,434,338, but the marine premiums dropped from $14,533,602 to $11,009,465. Losses and expenses were $20,952,330 in 1918, and $26,819,470 in 1919, an increase of almost $6,000,000. The surplus, together with interest, amounted to $8,333;371, from which $1,694,030 was set aside for Dominion taxes, and $1,000,000 for the cost of business acquired.

The financial position of the company has been still further strengthened. The funds are now $32,175,058, and the uncalled capital $14,348,600, compared with $27,831,045 and $14,109,640, respectively, at the end of 1918. The security to policyholders totals $46,523,658.

The London and Lancashire Fire Insurance Co. was established in 1861, and commenced business in Canada in 1880. The chief agent and manager here is Alfred Wright, who is not only well known in insurance work but also takes a broad interest in fire prevention and in other matters connected with fire insurance.

POLICYHOLDERS' MUTUAL LIFE INSURANCE CO.

Business written up to April 7th, 1920, by the Policyholders' Mutual Life Insurance Co. equalled the total done in the whole year 1919. This indicates that the rapid increase in the volume of new life insurance business is by no means falling off. The company's premium income in 1919 totalled $98,160, and the total income was $106,948. Claims were only $10,500, in addition to which $1,696 was paid in surrender values. The expenses were $42,372, made up chiefly of commission $22,456, salaries and auditors' fees $8,356 and medical fees $2,860.

Assets at the end of 1919 totalled $217,667, of which securities comprised $115,119. The reinsurance reserve is $177,880, and total liabilities outside of capital stock were $178,256. The paid-up capital is $46,640. The Policyholders' Mutual has an Ontario charter, doing business under provincial license, and has also extended to New Brunswick, Nova Scotia and some of the western provinces.

CORPORATION SECURITIES MARKET

Issue of $15,000,000 Canadian National Railway Equipment Trust Certificates Offered in New York—Preferred Stock of Great Eastern Paper Co. to Be Soon on the Market

THERE was considerable activity in outstanding bonds on the Canadian stock exchanges during the week ended May 19, at least more so than in previous weeks, in which Quebec Railway and Riordon were the features. In some cases prices were steady, but generally the tendency was to lower levels.

In new issues, the features of the week was the offering of $15,000,000 7 per cent. 15-year equipment trust gold certificates of the Canadian National Railways in New York, by Wm. A. Read and Co., at 99 and interest, to yield over 7.10 per cent. Semi-annual payments of $500,000 provide for the retirement of the certificates by maturity, but the issue is not callable. These $15,000,000 certificates are issued against new railway equipment costing $20,204,500, an initial payment of $5,024,500 or over 25 per cent. of the cash contract cost being made. The statement from New York says:—

"The advantages of the serial equipment trust plan is retained by providing semi-annual payments sufficient to retire the entire issue by the maturity date, May 1, 1935. These payments, instead of being used to retire specific maturities, must be used by the trustees to purchase certificates in the open market at or below par if obtainable. The fixed rentals may be increased from time to time to buy certificates at a premium if the railway elects. Each payment is held by the trustees until the next one is due, unless absorbed in the meantime by the purchases of the certificates from holders. If the semi-annual payment is not used up by the compulsory purchases of the certificates up to par or by the optional purchases at a premium, the payment must be invested in obligations of the Dominion of Canada maturing at or before the maturity date of the certificates."

Fraser Companies, Ltd., have disposed, through the Royal Securities Corporation, $450,000 6 per cent. 10-year first mortgage serial gold bonds. This is the unsold balance of a $2,000,000 issue made last year. It is understood that the Fraser Companies will use the proceeds for developments at Chatham, N.B.

Messrs. Versailles, Vidricaire, Boulais, Ltée., Montreal, have secured $85,000 10-year 5½ per cent. gold bonds of the Ha Ha Bay Land and Building Co., endorsed by the Chicoutimi Pulp Co., and the town of Val Jalbert, and $222,500 endorsed by the Ha Ha Bay Sulphite Co. and the town of Port Alfred. The issues will be offered shortly to yield 6.1 per cent.

Great Eastern Paper Stock

The Great Eastern Paper Co., Ltd., will offer $2,500,000 8 per cent. cumulative preferred stock. It is expected that a good part of the securities will be placed in the United States, the underwriters being Thornton, Davidson and Co., of Montreal, and Lawrence Chamberlain and Co., Inc., of New York. The proceeds of the issue will be used for the development of a big pulp and paper industry in the province of Quebec, plans of which are announced elsewhere in this issue. Tangible assets, according to appraisal, are $9,198,000 net worth. This is a value of $351.61 a share for preferred stock and $157.25 for common stock.

Identified with the new enterprise are prominent New York interests, as will be seen by the names of the following directors: Charles W. Mullen, president and general manager; W. M. Dobell, vice-president, late of Dobell, Beckett and Co.; H. C. Foy, of H. R. Goodday and Co., lumber exporters, Quebec; A. H. Cook, K.C., Quebec; Henry Holgate, consulting engineer, Montreal; Lawrence Chamberlain, investment banker, New York; John Mullen, pulp and paper manufacturer, Bangor, Me.; Fergus Murphy, secretary, lawyer, Quebec.

CANADIAN STOCKS FALL OFF TO SOME EXTENT

DULLNESS prevailed in the New York market for the week ended May 19, but for the most part prices were steady. Towards the close, however, an excited weakness was visible and most issues finished with losses. The responsible influences were those which have combined against a constructive effort for the past few weeks—namely, disturbances in the business and credit fields. Banking opinion in Wall Street is that there will be a marked improvement in the credit situation within the next few months. It is believed that the peak has been reached, and that an orderly recession in bank loans will soon get under way.

The actions of the Canadian exchanges reflected the position of the New York market, although losses were not great, the unsettled conditions of late having let traders to prepare for sudden changes. In Toronto trading was very light, Brazilian being the most active with sales of 1,300. A gain of ¾ of a point was also made, the close being at 43. Bank stocks were steady, with the exception of Merchants and Royal, which showed declines of 3 points each. In loan and trust Canada Permanent was weaker at 174.

Pulp and paper stocks featured the Montreal market, most of those issues showing advances and considerable activity. Brompton furnished sales of 7,126, with a gain of 1 point, while Laurentide was fractionally higher, with a turnover of 3,403 shares. Wayagamack, however, showed a decline, 1,570 shares changing hands. Howard Smith was most notable, closing strong with a gain of 5 points. This advance is attributed to the large earnings of the company to which the market readily responds in view of the small floating supply. The company recently increased the output of its high-grade paper at the Beauharnois plant and the sulphite production at the Cornwall plant is also being increased materially. The company has also strengthened its position in the matter of a supply of raw materials by the acquisition of timber limits in the Gaspe region. The statement regarding the strong position of the two leading textile companies did not seem to materially affect those issues. Bank stocks showed considerable losses.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

G. T. SOMERS, President.
Toronto, April 30th, 1920.

A. H. WALKER,
General Manager

AUDITOR'S REPORT

This statement has been duly vouched by comparing all entries with the books at the Chief Office, and certified returns from the Branches, and in my opinion is properly drawn up so as to exhibit a correct view of the condition of the Bank.

Cash and Securities have been checked at the Chief Office at 30th April, 1920, as well as at another time during the year, as required by Section 56 of the Bank Act.

I have obtained all the information and explanations required, and am of the opinion that the transactions of the Bank, which have come under my notice, have been within the powers of the Bank.

J. J. ROBSON, L.I.A., Auditor.

FREDERICK WILLIAMS-TAYLOR,
General Manager

Investments and the Market

Dolly Varden Mining Case Concluded—Taylor Engineering Interests Upheld—Asbestos Corporation Seeking Control of Black Lake Company—Kettle Valley Railway Board Changes

Kettle Valley Railway.—The company which operates 396 miles of railway in British Columbia, has been formally incorporated with the Canadian Pacific system. J. J. Warren, former president of the company, has retired and assumed the position of chairman of the board, and D. C. Coleman, vice-president of the western lines of the C.P.R., has succeeded him. The other directors of the company are: Grant Hall, I. G. Ogden, W. R. McInnes and A. D. MacTier, of Montreal; J. J. Warren, of Toronto, and A. C. Flummerfelt, of Victoria. The annual meeting was held on May 6th.

Canadian Cottons, Ltd.—As previously predicted, the earnings for 1919 constitute a record in the history of the company. Manufacturing profits, rentals and interest on investments amounted to $1,839,443, after allowing for excess profits tax. This compares with $1,563,103 in the 1918-19 showing, representing an increase of $275,340, or slightly in excess of 17 per cent., and with $1,126,125 in the previous year. After all deductions and allowances, including two items of $400,000 each, one of which was added to replacement reserve and the other to depreciation, the balance, available for application to the common shares, representing an earning power of 23.24 per cent., as against 19 per cent. a year ago, 14.6 per cent. in 1918, 12.4 per cent. in 1917, and 10.2 per cent. in the preceding year. Gross sales of the company during the twelve months aggregated $11,148,438, as compared with $10,828,326 in the 1918-19 period, and $7,573,777 in 1917-18. All allowances and deductions made, there remained a surplus out of the year's profits of $454,585 to add to the balance carried forward from the previous year's accounts, as compared with $355,783 in the previous statement, bringing the total surplus at the credit of profit and loss account up to $2,683,479.

The balance sheet shows that current assets exceeded current liabilities by more than $2,000,000. The comfortable position in respect to working capital, however, is offset by an increase of $1,200,000 in bank advances, which are shown at $1,358,217, as compared with $150,000 last year.

Black Lake Asbestos and Chrome Co., Ltd.—An invitation has been issued by the Asbestos Corporation of Canada, Ltd., to shareholders of the Black Lake Co. to send their proxies to the Asbestos Corp., preparatory to a special meeting called for May 26. According to the circular issued by the Black Lake directors, one of the objects of the meeting is to consider the position of the company in view of the legal proceedings which have prevented the carrying out of the agreement of March 3 with J. A. Jacobs, also to consider any propositions which may be submitted by or on behalf of J. A. Jacobs or by or on behalf of any other persons or any corporation for the taking over of the conduct of the company's operations, and to elect new directors in the place and stead of such of the present directors as may desire to retire. In asking for proxies of Black Lake shareholders, the Asbestos Corporation states:—

"The owners of a large amount of stock, both preferred and common, approximately one-third the shares of the company, and in the interests of all shareholders we are asking you to send us your proxy to represent you at the meeting, should you find it impossible to be personally present. We are not requesting this due to any reflection on the present directors, but we are requesting your proxy on account of the fact, that, according to the shareholders' list, they are very small holders of the stock, and are consequently in not as good a position to judge as to what is best for the company as those who not only have a very heavy investment in securities of the company, but as having considerable experience in the asbestos business."

The contention is made that any offer for the shareholders to consider should be sent to them in advance of the meeting.

Taylor Engineering Co., Ltd.—The Dolly Varden Mines case, which started late in 1918, has drawn to a close. From all events, an attempt was made to secure the influence of the Dominion government, failing which, an effort was made to carry the matter to the courts. Through the efforts of the British Columbia legislature, however, an agreement was reached whereby the interests of the Taylor Engineering Co. have been upheld. Briefly, the history of the case is as follows:—

The Dolly Varden Mines Co., consisting of American owners operating claims at Alice Arms, B.C., obtained authority from the legislature to build a light railway on the public highway from tidewater to their claims. This work was done by the Taylor Engineering Co., of Vancouver, for which it was unable to obtain payment, and these claims ultimately ran close to $500,000. The railway not being completed in the statutory time, viz., December 31, 1918, the Dolly Varden Co. approached the British Columbia legislature for an extension and a regrant of its privileges. The Taylor Co. counterclaim with the request for an inquiry into the way in which these privileges had been exercised, and finally the two companies jointly sought a special committee of the legislature to go into the merits of the two petitions. In the meantime, the Dolly Varden Co. had granted an option to the Temiskaming Co. at a figure that would only net the Dolly Varden Co. less than $400,000. Among other provisions, the Temiskaming Co. agreed to pay off the mortgage and any claims on account of the railway necessary to get the charter extended and not to exceed the sum of $150,000, this in turn to be secured by a mortgage on the property to be paid out of the first proceeds of the mines. All the parties concerned appeared before the special committee in Victoria, and the result was an unanimous passage of the Dolly Varden Amendment Act of 1918. The legislative committee on which the legislature's action was based found that the Taylor Engineering Co. had resumed its work on the railway in 1916, on very ample assurances from the Dolly Varden Co. as to their protection, that the work was carried on in 1918 upon the capital and credit of the Taylor Co. to such an extent that it could not stop construction without ruin and that after the Dolly Varden Co. had refused to accept the offer of the Granby Consolidated Co. for the property, Mr. Taylor, of the Taylor Engineering Co. had himself introduced the Temiskaming Mining Co. as a purchaser at a price of $1,000,000, giving his services without charge, and that later the president of the Dolly Varden Co. and a representative of the Temiskaming Milling Co. arranged a sale, subject to a commisison of $50,000 to be divided between the two of them, the sale to be conditioned upon a renewal of the charter for the railway.

The legislative committee found that the Taylor Co. was entitled to be paid in full, and therefore extended the time for the completion of the railway, and gave the Dolly Varden Co. thirty days to pay its bills. In the event of failure to make payment the property was to be turned over to the Taylor Co. The Dolly Varden Co. failed to comply with the statutory requirements and the Taylor Co. took hold and was incorporated with a capital of $1,500,000. Wage claims to the amount of $140,000 were retired, and $200,000 was raised by local debenture issue. The Taylor Co. also proceeded to float a debenture issue for $1,000,000, with which to retire the charges against the property so that the old owners would not have to wait for net profits from the mine.

DEBENTURES FOR SALE

TOWN OF VERMILION

DEBENTURES FOR SALE

Sealed tenders, marked, "Tenders for Debentures," will be received by the undersigned up to 6 p.m. on Monday, June 14th, 1920:—

$20,000.00—6½%, 20-years, repayable in twenty equal annual instalments of principal and interest.

Purpose—(A) Fire Hall, $9,000.00.
(B) Fire Protection, $11,000.00.

$6,000.00—7%, 20-years, repayable as above.

Purpose—Electric Light and Power Extension.

The highest or any tender not necessarily accepted.

H. P. LONG,
Secretary-Treasurer,
Vermilion, Alberta.

RECENT FIRES

Garage at Digby, N.S., Loss was Heaviest this Week—Ottawa, Winnipeg, Picton and Bromptonville also Scenes of Destructive Fires

Bromptonville, Que.—May 13—Bakery and dwelling belonging to D. Godbout were destroyed; also a neighboring house belonging to J. Tobin. The shop and dwelling were valued at about $8,000, and 475 bags of flour was destroyed. Mr. Tobin's loss is about $1,200.

Calgary, Alta.—May 10—Residence of W. Meade was damaged. Fire supposed to have been caused by leaking gas. The value of effects destroyed amounted to $1,000. They were not insured. House, destroyed to the amount of $1,000, was fully insured.

Digby, N.S.—May 15—Garage, along with thirty-eight cars, were destroyed. Estimated loss, $100,000.

Fort William, Ont.—May 16—Shafthouse and cookhouse on Silver Birch Island were destroyed. Much valuable timber was destroyed.

Moosomin, Sask.—May 13—Barn and graneries, together with their contents, were destroyed by fire.

Ottawa, Ont.—May 6—Shed at the rear of 109 Sherwood Street destroyed, also two houses damaged. Fire was caused by children burning matches. Estimated loss, $5,000, covered by insurance.

May 13—Dr. Hagar's hospital was damaged by fire and two lives were lost.

May 18—Store belonging to A. J. Alexander, Ltd., was damaged. Valuable furs were destroyed. Estimated loss, between $75,000 and $100,000, of which the greater part was covered by insurance.

Peterboro County, Ont.—May 15—Large bush fires have occurred as a result of dry weather. Thirty-five head of cattle belonging to the ranch of J. G. Jopling and Sons have not been located.

Picton, Ont.—May 17—Planing mills were destroyed by fire. The building and machinery are a total loss. The building is valued at $10,000. Insurance, $2,000.

Pittston, Ont.—May 14—An automobile repair shop and contents were destroyed as the result of a car blowing up.

Prince Albert, Sask.—May 8—Sheriff Seath's property was damaged when a bush fire commenced and spread to the house. Estimated loss, $500, covered by insurance. There were also two bush fires. Believed to have been caused by a spark from a passing locomotive.

St. Therese, Que.—Eight dwellings were badly damaged when Mrs. A. Mellieur poured oil on a stove and caused an explosion. Mrs. Mellieur was injured. The loss was partly covered by insurance.

Sherbrooke, Que.—Storehouse and garage of A. A. Gunning was badly damaged. The loss was partly covered by insurance.

Toronto, Ont.—May 10—Child fatally burned while playing with matches at his home, 795 College Street. The Indian suit he was wearing caught fire.

Winnipeg, Man.—May 12—Strathcona Hotel was damaged by fire. Estimated loss, $20,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Crediton, Ont.—April 18—Residence of W. B. Gaiser damaged. Fire caused by spark from chimney on roof. Estimated loss, $1,500. Insurance, $1,350, in Hay Mutual Fire Insurance Co.

London, Ont.—April 22—Wood shops of A. B. Greer and Sons' carriage factory were destroyed. Fire caused by lightning. Total damage to building, $3,000; damage to contents, $10,000. Insurance on building, $10,000; insurance on contents, $45,000.

April 22—London Collegiate Institute. Fire supposed to have been caused by lightning. Estimated loss, $215,000. Insurance on building, $60,000; on contents, $10,000.

Manitoba.—One hundred and forty-five fires occurred in the province during the month of April, with a monetary loss of $491,044, as compared with 135 fires, with a loss of $186,278, during the same period last year. Ninety-one fires, with a loss of $405,731, occurred in the city of Winnipeg in April, 1920, as against 79 fires, with a loss of $97,982, for April, 1919. This increase is due to the fire which destroyed the main car barns on April 7th with a loss of $350,000. During the present year 505 fires have been reported as occurring in the province, with a loss of $940,126; for the same period last year 447 fires were reported, with a loss of $445,178, showing an increase for 1920 over that of 1919 of 58 fires, with a corresponding increase in the amount of loss of $494,948. The large fires occurring in the province during April were: Main car barns, Winnipeg, $350,000; store building, Souris, $31,025; general store, Haskett, $23,898; Edward Block, Winnipeg, $36,138. Two fatalities occurre during the month, the two children of Mrs. Cossar, 62 Lansdowne Avenue, Winnipeg, losing their lives when the home was destroyed by fire on April 3rd.

Montreal, Que.—Secretary Boileau, of the Fire Commission, reported that there were 127 fires under review by the commission during the month of April last, as against 141 for the same month of the previous year. Of these 127 fires, 75 were of that class in which the cause is denominated as "unknown." Eighty-six investigations were made by Constable Constantin at the scene of the fire, and 115 subpœnas were issued. The inquiries before the commission numbered 36.

Montreal, Que.—April 27—Factory of the St. Henri Shoe Co., Ltd., at the corner of Greene Avenue and Workman Street, was destroyed and adjoining stores were damaged. Total loss, $177,000. They were insured in the Union Assurance Co. for $88,500.

Pembroke, Ont.—April 28—Two dwellings, owned by Mrs. Nellie Flinter and Mrs. L. Davies, were damaged by fire. The fire was caused from the cook stove. Total loss, $3,300. Insurance: Dwelling of Mrs. Davies, Guardian, on contents, $1,000, and Western, on building, $1,500; dwelling of Mrs. Flinter, Ocean, on contents, $1,000, Western, on building, $1,250. Sergt.-Maj. P. S. Flinter, owner of one of the dwellings, along with his two sons, were suffocated to death.

Peterboro, Ont.—March 30—Barn on farm of Hugh Fife, Otonabee township, destroyed. Cause unknown. Estimated loss, $13,000. Total insurance, $4,000.

ATLAS ASSURANCE CO., LTD.

Net premiums in the fire department of the Atlas Assurance Co., Ltd., of London, Eng., for 1919, totalled $9,550,790, and losses were $3,983,360, a ratio of about 40 per cent. Commissions were $1,974,465 and expenses of management $1,251,190. The sum of $1,941,360 was transferred to profit and loss, and the balance in the fire insurance fund at the end of the year was $9,500,000, compared with $8,500,000 at the beginning of the year.

The assets of the Atlas now total $32,892,675, an increase of $1,692,000. Government securities predominate among the investments, the amount at loan on mortgage being less than it was at the close of 1918. Total investments are $27,265,920, an increase of $1,000,000. The paid-up capital is $1,320,000, and in addition to the above-mentioned fire insurance fund of $9,500,000, there is a life insurance and annuity fund of $13,389,185, life insurance being one of the lines written by the Atlas elsewhere than in Canada. In these figures the pound sterling has been considered as the equivalent of $5.

The Atlas was established in 1808, and has been doing business in Canada since 1887, the manager here being M. C. Hinshaw, Montreal. At the end of 1919 a net amount of $77,066,032 was at risk in Canada, an increase of almost $5,000,000 for the year.

Ottawa Has Little Criticism For Budget

Government's Position Has Not Suffered Thus Far Through New Taxes—Conference With West Indian Delegates to Strengthen Trade Relations—Budget Debate Will Close Soon—Civil Service Superannuation Bill—Bureau of Standards and Research Institute Proposed

(Special to *The Monetary Times.*)

Ottawa, May 26, 1920.

THIS week will probably see the wind up of the budget debate. The discussion is already beginning to drag. Generally speaking the proposals of Sir Henry Drayton are satisfactory to its supporters; that is as satisfactory as any tax proposals can be, because taxation is never popular. The man who is hit always thinks that he is bearing the chief burden. The government will have no trouble in holding its majority. In a party so loosely bound together as the present Unionist party this is a pretty good indication that the budget is acceptable. There may be a half-dozen western Liberal Unionists who would like to see a greater cut in agricultural implement duties who will bolt, but this will be the limit of any revolt. Some of the high protectionist Tories think there has been too great a compromise to the Liberal Unionists in abolishing the 7½ per cent. war duty, but their objections will not go further than a gentle protest.

Following the winding up of the budget debate there will be another couple of weeks in committee. Some minor amendments may be made as it is a question in the imposition of the so-called luxury taxes whether the line of demarcation between luxuries and necessities has not been drawn too low. For instance, the shoe men are protesting against $9 being the exemption line on shoes. It is claimed that it should be at least $12. Just how the luxury tax is going to work out it is hard to say; there is bound to be much confusion and much evasion and in many cases it will be a hardship on retailers to make them tax collectors. The tax which promises to be the greatest revenue producer, and from which the department of finance is expecting its greatest results, is the 1 per cent. tax on the turnover of all manufacturers and wholesalers. The wholesalers are already making a big protest on this tax. They claim that it will drive retailers to deal direct with manufacturers, as otherwise there will be a double tax—one on the turnover of the manufacturer and the second on the turnover of the wholesaler or jobber. They claim there is a possibility of its almost putting the middleman out of business.

With the budget debate out of the way there will be a government caucus to consider the future of the party. The budget and the budget debate has about settled this question. By accepting the budget and the principles enunciated by Sir Henry Drayton, the Liberal Unionists have irrevocably committed themselves to a policy of moderate protection. The cabinet ministers have apparently crossed the rubicon and burned their bridges behind them. It is rather noteworthy that so far the chief contribution to the debate from the government side have been from the Liberal Unionists, and all have gone out of their way to announce their adherence to the budget and to the tariff principles laid down in it. Hon. C. C. Ballantyne was particularly outspoken in his views. He looks for the next election to be fought on the fiscal issue.

Conference With West Indian Delegates

There will open on Monday in Ottawa a conference of more than unusual interest and importance. It will be a conference between the British West Indies and the Dominion with Great Britain also represented by Col. Amery, M..P, Under Secretary for the Colonies. Primarily, there will be discussed trade questions, particularly the renewal of the present preference and better transportation and cable facilities. The last conference was held in 1912, when a 20 per cent. reciprocal preference was arranged. Before the preference was fully tested, the war broke out and all the Atlantic channels of trade upset. However, despite these handicaps there has been a big development of trade. Now it is proposed to renew this treaty and the British West Indies delegates have intimated their willingness for an increase in the preference to 50 per cent. The government has given no hint of its intentions.

Increased preference is useless without better transportation facilities. Heretofore, the shipping facilities between the two countries have not been of the best. However, with Canada owning her own mercantile marine, there seems no reason why a line of steamers cannot be arranged. Incidentally, the old question of annexation of the West Indies to Canada may arise. There are many earnest advocates of this policy. However, the feeling at Ottawa is that commercial union for the time being is sufficient and that Canada has enough problems on her hands without undertaking the annexation of distant tropical islands, with large colored populations.

Another Railway for North

Permission for the construction of a railway north of the Great Slave Lake to take care of reported oil finds, was agreed to by the railway committee of the Commons on May 18. W. A. Boys (Simcoe), who is handling the bill, said the object was to open up oil fields and mining areas which the promoters believed existed there. The proposed line would go to the Nelson River, and carriage would be made to the Hudson Bay. The line would be in operation four or five months of the year. The capital stock is fixed at one million dollars. Headquarters of the company, which is known as the Northwest Route, Ltd., are at London. Construction of the road must be begun within two years.

H. H. Stevens (Vancouver) thought the resources in the vast hinterland north of Athabaska Landing should be developed to every possible extent. It was folly to place this application on a par with railways in more settled parts in regard to time for completion. Between two and five years for completion was ample, he thought. J. F. Smellie, counsel for the promoters, said a similar bill was passed by the committee last year, but was defeated by the Senate railway committee.

A National Bureau of Standards should be established in Canada, according to a report of the select committee on Scientific and Industrial Research which was presented to the House of Commons on May 7. Hume Cronyn, chairman of the committee, has been a strong supporter of the movement for national research. It is recommended that such an institute should be located on a site of 50 acres in the vicinity of Ottawa, conveniently located for water, gas and electric power supply, and that the first building should be constructed of the best modern material suitable for laboratory work. It is estimated that $650,000 would be required to carry out the plan proposed. $500,000 of this amount to be used for the purchase of the site and the construction of the building, $100,000 for the purchase of scientific equipment, and $50,000 for salaries and maintenance the first year. The committee recommended that this amount should be provided by the government this year and that necessary legislation should be enacted at this session of Parliament.

Civil Service Act

A government Civil Service Superannuation Act, introduced by Hon. J. A. Calder, applies to all Dominion government employees except temporary ones. The Civil Service Commission will report at once on all who are over 65, and they can remain in the service only upon certificates of efficiency. Every government employe over 60 who is retired will receive two months' salary. Where the service has been over 10 years he or she will be paid for every year of service one-sixtieth of the average salary received in the three years previous to retirement, but not to exceed in any case one-half the salary.

This is the pension provision. As for retiring gratuities the scale is graduated. Those between 55 and 60 will get one month's salary for each year of service, but not more than eight months; between 50 and 55 years one month's salary for every two years' service, but not more than six months' salary in all; between 45 and 50 the scale provides one month's salary for every four years, not exceeding in all four months' salary. Where a government employe becomes physically disabled the gratuities may be increased, but not more than doubled, if the Civil Service Commission so recommends.

The agitation for an increase in the sessional indemnity from the present figure of $2,500 to $4,000 or possibly $5,000 has petered out. The government took the view that such an increase would not be consistent with its policy of reducing expenditures.

An increase in the maximum registration fee from five to ten cents on letters or other articles sent by registered mail is proposed in a resolution introduced in the Commons on May 7 by the Minister of Customs and Inland Revenue. The resolution, which will be considered in Parliament at an early date, also proposes an increased postage on weekly newspapers and periodicals within a distance of forty miles from the place of publication. Between January 1, 1921, and January 1, 1922, the rate is to be one cent, and one and a half cents thereafter. It is not proposed to eliminate the free postage facilities enjoyed by members during sessions.

New Canadian Cent Coined

Authority has been given for the issue of the new Canadian cent and the first ones were struck on May 19. The coin will not, however, actually be in circulation till toward the end of the month. The cent is slightly larger than the Canadian ten-cent piece, or three-quarters of an inch in diameter. It bears the following design: Obverse impression: His Majesty's crowned effigy, consisting of head and bust, wearing the Royal robes, and looking to left, with the inscription "George V., Dei Gra.: Rex et Ind. Imp." Reverse impression: The words "One Cent," supported by a maple leaf on each side, and bearing the word "Canada" above and the date of issue below.

Supplementary Estimates Tabled

Supplementary estimates to cover expenditure made during the last fiscal year were tabled in the House of Commons on May 17 by Sir Henry Drayton, Minister of Finance. They total $19,051,199, and include a vote of $8,993,867 for soldiers' civil re-establishment (outside service); $400,000 for reconstruction of the Port Colborne elevator; $392,000 for restoration of the Parliament Buildings; $4,550,000 for arts and agriculture; 55,120 for penitentiaries, and $159,640 for charges of management. There is also a vote of $600,000 for salaries and contingent expenses of the Pensions Board.

Sales of War Supplies

A total of $6,047,010 in surplus stores was disposed of by the various government departments through the War Purchasing Commission between December 1, 1918, and March 31, 1920, according to a return tabled in the House of Commons on May 14. The Department of Militia and Defence sold a total of $5,852,747 in stores, which included blankets, $1,507,955; textiles, including woollen and cotton piece goods, $1,386,560, and footwear, $1,288,442.

Purchasers of these surplus stores were: Trade, $1,507,955; government departments, $754,143; public institutions, $101,407; returned men and dependents, $62,884. Sales by the Naval Service Branch totalled $186,900. The chief item in this was provisions, $182,571. The Department of Soldiers' Civil Re-establishment sales totalled $6,236; Public Works Department, $625, and Pensions Board, $500. The grand total of stores sold was $6,047,010, divided as follows: Trade, $5,092,751; departments of Government, $784,169; public institutions, $106,425; returned men and dependents, $63,664.

Control of Electric Railways

First reading was given on May 17 to a bill which seeks to bring the control of electric roads under the jurisdiction of provincial governments rather than under the control of the Railway Commissioners. Last year a clause was put in the Railway Act placing the Quebec Central road under federal control, but it was found later that the clause took in all electric lines. This new bill, Hon. J. D. Reid explained, was to place electric lines back under the jurisdiction of provincial governments. Replying to W. F. Maclean (South York), Dr. Reid said no provision had been made to extend the jurisdiction of the Railway Commissioners with regard to telephone companies.

Legislation Affecting Insurance

On May 11th the following bills were assented to and became Acts: An Act to amend the Government Annuities Act, 1908; an Act to incorporate the Scottish-Canadian Assurance Corporation; an Act to incorporate the T. Eaton Life Assurance Co.; an Act to incorporate the T. Eaton General Insurance Co.; an Act respecting the Pacific Marine Insurance Co.; an Act to incorporate the Armour Life Assurance Co.; an Act to incorporate the Canada Security Assurance Co.; an Act respecting the Pacific Coast Fire Insurance Co.

An Act to incorporate the United Canada Fire Insurance Co. of Winnipeg, a new company with capitalization of $3,000,000, also passed the select committee on banking and commerce on May 19. There was some discussion on the name before passage was allowed, as the committee two years ago had passed an act to incorporate the "United Canadian Fire Insurance Co." However, it was pointed out that the charter to the latter company would expire on May 24, and no steps to secure a license had been taken by the promoters after receiving their charter.

The special committee of the House of Commons on Pension and Re-establishment has been considering insurance for veterans who cannot secure policies with the regular companies because of their war service. The committee consulted G. D. Finlayson, superintendent of insurance, on this point, and it is expected that some plan will be suggested.

MORTGAGE LOANS' ASSOCIATION OF ALBERTA

Legislation Establishing Irrigation Districts, and Changes in Land Titles Act Were Important Subjects Discussed—Cost of Doing Business Increased

(Special to *The Monetary Times*)

Calgary, May 15th, 1920.

MEMBERS of the Mortgage Loans Association of the Province of Alberta have their annual meeting alternately at Edmonton and Calgary, it being the good fortune of the latter city to have its turn this year, the meeting being held on May 13. At each of the several sessions there were present about forty representatives of investment institutions doing business in the province. John Appleton, secretary of the Dominion Mortgage and Investments Association also attended.

Current Year's Legislation

The subject uppermost in the minds of those present was the effect of legislation passed at the session which terminated a few weeks ago. S. B. Woods at the mid-day luncheon meeting discussed at length various changes that had been made in the two most important measures—the first with regard to personal covenant in mortgages and the second as to the protection of mortgagees' interests under the irrigation legislation. It will be recalled that when the general Irrigation Act was introduced into the legislature, it did not provide for the protection of mortgagees. To make that point clear it might be as well to point out that existing statutes made it possible to establish irrigation districts and to make all charges for operating an irrigation system by them, including interest upon capital and working fund charges rank ahead of mortgages and other encumbrances which might have existed prior to the establishing of the district. For reasons which it is not necessary to explain here, the government brought in a new Act to take the place of the one on the Statute Book and in this new Act as in the old one, the rights of existing encumbrances were ignored.

Large Investments Affected

Of course, the members of the association were very much interested for the reason that they represented institutions with large investments in the province and which investments would be prejudiced by the passing of the new legislation. They also realized that it would be difficult for them to carry on their business in bringing capital to Alberta if the new Act were passed and mortgagees generally became aware of the possibility of a prior lien resting in the proposed legislation. As citizens of Alberta they manifested a lively interest in the future welfare of the province. No class of men realizes more keenly than they do that the province needs capital as much as irrigation for its future development. In consequence they became the spearhead of the attack upon the proposed invasion of the rights of an investor. Through their representations the members of the legislature were convinced that it would be desirable to protect the interests of first mortgagees and at the same time difficulties in the way of establishing irrigation districts were removed.

In the case of the proposed Lethbridge Northern system, the government undertakes, if the said system is carried out, to indemnify mortgagees against any loss they may sustain by reason of the establishment of the system. That particular system was authorized by a special Act, and in addition legislation of a general character passed provided for the establishment of irrigation districts. It was found that this legislation as drawn by the government's officers did not include the redemption clauses operative in case of loss by first mortgagees. As members of the association felt the government intended to have this in, its absence was drawn to the attention of the government and, of course, the defect was quickly remedied. The members, therefore, were disposed to congratulate the government upon the attitude it had taken on the whole. In their opinion the continuation of such an attitude would result in bringing far more capital to the province for general purposes than would would have been the case if irrigation projects had been given an impetus by violating existing rights.

Personal Covenant in Mortgages

Recent changes in the Land Titles Act were not generally understood by the members and for that reason Mr. Woods was asked to explain them in detail. From his explanation it would appear that while the contract in a mortgage made prior to April, 1916, is not absolutely restored, it has been made more effective. Under the recent changes a judgment can now be obtained against the mortgagor which ties up his entire assets and they can be held in that position until a settlement is made with the mortgagee obtaining the judgment. Prior to his change and subsequent to April, 1916, a mortgagee in an effort to recover a debt had to realize upon the security named in a mortgage settlement and if the amount realized was not sufficient to liquidate the debt, he could then obtain judgment for the balance. This in principle was unsatisfactory and in practice quite impossible. In 1917, 1918 and 1919 cases were continuously developing in which mortgagors simply ignored their indebtedness and laughed at the mortgagees. It is only fair to point out that on the whole the farmers took care of their obligations and generally speaking those who ignored them were the speculators in urban properties. This was a matter which occupied a considerable portion of the time spent in the sessions held.

Remuneration for Institutional Services

In a new province like Alberta problems with respect to taxes; cost of services rendered and cost of transacting business generally find a place in the discussions between financial men when they gather together. The Alberta convention was no exception to the rule. It was frequently pointed out that statutory charges grew higher from year to year; solicitors' fees of necessity had also risen appreciably, but actual charges for the use of money and for the use of services by the institutions had not shown appreciation since prior to the war. Some change in this respect was regarded as being imperative if the institutions had to continue in the performance of the essential services which they were rendering to the public. For instance in handling trusts the charges were practically the same although the cost of maintaining a complete staff had about doubled. Necessary adjustment, it was the general opinion, ought not to be longer delayed. Whilst there was a tendency to dwell on these matters, it would be a mistake to infer that the members of the Alberta Mortgage Loans Association are in any respect pessimistic with regard to the future of their province. While fully conscious of the difficulties which legislation has imposed upon them, they feel that the people will ultimately remove these difficulties and give the province a chance to attract the capital it needs for its future development. They are very hopeful in this respect and their confidence in the natural wealth of the province is unbounded.

W. T. Creighton was again elected president of the association and H. A. Howard vice-president. Few changes were made in the two executives, one representing northern Alberta and one southern Alberta having their headquarters, respectively at Edmonton and Calgary.

SASKATCHEWAN MUNICIPAL HAIL INSURANCE

A meeting of the directors of the Saskatchewan Municipal Hail Insurance Association will be held early in June. The new legislation provides for a rebate of premium in cases where crops have been damaged by causes other than hail early in the crop season. The rates of rebate are to vary according to varying periods of the crop season, and these periods will have to be fixed and the amounts allowed rebate within those periods determined.

SEEDING FINISHED AND SOIL CONDITIONS GOOD

Reports From West Indicate Rapid Progress During First Three Weeks of May—Good Supply of Labor for Summer

FARMERS in the west are rapidly getting the important cereals into the ground, according to a detailed report covering operations along the territories from the great lakes to the Rocky Mountains, served by the national railways, which was received at the head offices of the company on May 15. Wheat seeding has been general over all areas where the ground was dry enough to work, and it was indicated by the majority of the agents reporting from the "late" points that wheat seeding would be general there by the middle of May.

It is, of course, obvious, that with such a wide range of territory as that covered in the C.N.R. report there should be marked climatic differences. It is clear that the utmost advantage has been taken where the weather has been favorable and it would appear also that where the wetness of the soil or the cold spell has kept the farmers from work, the first opportunity will find the operations in full swing.

The majority of the reports indicate that there is abundance of moisture in the ground and that once the seeding has been completed and the warmth is in the air, the prospects should be most bright.

Farmers Not Taking Chances

The first 1920 crop report of the Manitoba Free Press, issued last week, is a more cheerful document than might have been expected from the very late seeding. Perhaps its very best feature is the fact that farmers are wise and are not attempting to go on seeding wheat long after the middle of May. Speaking broadly, wheat seeding is 90 per cent. done and the supply of moisture is excellent, the soil in fine condition and growth very good, not a few districts reporting wheat up two to four inches and no set-backs since seeding started. Of course, there is a decrease in acreage in wheat, but as that was expected it is no surprise. As nearly as can be estimated from the returns (194 points have been heard from) the decrease is 15 per cent. in Saskatchewan and 10 per cent. in Manitoba and Alberta, or in other words in 1920 the acreage in wheat is something over 15,370,000 acres as against 17,670,000 in 1919; and given a continuance of the present favorable conditions it will be quite possible for the west to reap more wheat from the reduced acreage than it did from the larger acreage of 1919. The only disappointment in the report is the apparent small increase in coarse grains, the reports indicate that while there will be increases at many points, at many points there will be no increases at all. The increases will be mainly in barley and flax.

Farmers are preparing to do extensive summer fallowing which is a good thing and much needed after the war period. Supplies of feed and labor are decidedly better than was anticipated and horses are not in as poor a condition for spring work as might have been expected after the exceptionally hard winter. In the districts where there was hopper trouble last year they were asked to report on that condition and the reports are uniformly to the effect that so far no trouble is indicated and preparations are made for fighting it should it occur.

Saskatchewan Official Report

From 75 to 80 per cent. of the wheat seeding is completed in northern and central Saskatchewan, and conditions at time of writing are excellent. There is plenty of moisture to carry the crop well into June. Wheat acreage will be decreased. General conditions as regards business and collections are good in Saskatoon.

A fortnightly report of the Saskatchewan Department Agriculture, dated May 17th, states that three-quarters wheat seeding in the province is completed. In many dis[illegible]s seeding will be fully completed this week, and oat seeding is now under way and will be general within a few days. The weather has been ideal, and the land is in splendid condition for seeding, so much so, that in many places wheat appeared above the ground in three days from being sown. Heavy winds occurred in some places, but no damage was done. There is ample moisture to insure growth, but rain is needed in the northern districts. Regarding the supply of potatoes for seed, there appears to be sufficient at from $2.50 to $4 a bushel. With the good growth of grass, cattle are picking up well, and all live stock is in fair condition. Although the spring is late, wheat seeding will be completed not more than seven days later than last year.

Reports from the Melville district, dated May 15th, state that 65 per cent. of the wheat sown is showing above ground. A much higher percentage is claimed for the Qu'Appelle valley, estimates running as high as 90 per cent. Along the valley farmers have started to plough for oats. Reports from Pense claim only 70 per cent. of the wheat sown. Some oats have already been sown.

HUDSON BAY ROAD WOULD HELP WEST

Winnipeg Board of Trade Urges Completion of Line—Weather Good for Growing, but Seed Blown Out in Some Places

(Special to *The Monetary Times.*)

Winnipeg, May 27th, 1920.

SEEDING of coarse grains in Manitoba and throughout the west is proceeding, and good growing weather prevails. It is estimated that the decrease in acreage will be from 10 to 15 per cent. Every effort is being made to check the grasshopper plague in southern Manitoba. Severe winds in various parts of the west have resulted in a small percentage of acreage being blown out, but no serious reports on this have come to hand. Good rains have fallen in many localities, which have been of great benefit in preventing blowing.

The crop outlook in the prairie provinces at this date is quite satisfactory. There is ample moisture in the ground, and, with warm weather coming in June, there is every probability that the west will reap a larger crop from less acreage than was the case last year.

Want Hudson Bay Road Completed

The completion of the Hudson's Bay Railway is receiving considerable attention in the west just now, and representations are being made to the authorities for the completion of this road. This subject has held the attention of western citizens for many years, being more or less of a political question.

The Winnipeg Board of Trade has done considerable research work on the subject during the past two months, and the Research Bureau has brought out some important points in connection with it, stating that the completion of the Hudson's Bay Railway is a matter of paramount importance to the wealth of western Canada, and holds such wonderful possibilities for the future development of the three western provinces that every effort should be made to have it completed as soon as possible. The Board of Trade Research Department, in an investigation of the project, has collected a vast amount of data, and this bureau goes on to state that the further the subject is investigated the better it looks. The northern part of Manitoba adjacent to the Hudson Bay is undoubtedly rich in mineral wealth, has great water-powers, and is adaptable for agriculture.

At a meeting of the Royal Arcanum in Montreal on May 26th, it was announced that the association had received permission from the governor of Massachusetts, where it was formed, to invest in Canadian securities. This is the first time that any organization of this kind in the state of Massachusetts has been allowed to invest outside of the United States.

WILL THE CONSUMER PAY?

PARLIAMENT and the country have now had ample opportunity to digest the proposals set forth by Sir Henry Drayton in his budget speech on May 18th. The members have been able to find little fault with it, and taxes which do not fall upon the shoulders of the ordinary citizen appear to meet with general approval throughout the country. The main objections to the new taxes seem to be that they require the setting up of an entirely new machinery for collection; that they will substantially increase the amount of clerical work on the part of the firms which are required to collect them; that this additional work which has been shifted to private institutions is really a part of the cost of collection which, though it will not accrue to the Dominion government, must nevertheless be borne by the country as a whole; and that the immediate enforcement of the taxes caused great confusion and uncertainty to firms and to the buying public.

The government apparently took the view that to make ends meet it would be necessary to tap new sources of revenue, and certainly they have chosen one which should be the least burdensome and at the same time very productive. The additional work and cost of collection will probably be no more than in the case of customs duties, and certainly the new excise duties are preferable to import duties in that they do not discriminate against imported goods. They really open the door towards tariff reduction, and on this account they have met with the approval of the farmers. Immediate enforcement was necessary to avoid a mania of buying, and any confusion created should soon be removed as a system of regulations for the collection of the taxes is built up.

But what is most essential to the success of the new taxes is that they should produce a large amount of revenue annually, for if they do not, then the government must go still farther afield for more income, or else reduce its expenditure to a seemingly impossible degree. Heavy taxes on consumption are either great revenue producers, or else they reduce buying extensively. Sir Henry Drayton evidently had this in mind, and if revenue is not obtained, extravagance at least will be curtailed, for the new taxes fall not on articles of common consumption, but on the more expensive varieties. That an addition of about 20 per cent. to the cost of goods will turn the tide towards economy and thrift seems scarcely possible, considering the readiness with which the public has paid natural increases in prices. There is, however a general feeling that the public was already turning, or was being forced, to economy, and if this is the case then the luxuries tax will merely help along the movement. Reliable reports of a general slackening in business, and lowering in prices, confirm this view, and the existence of such a permanent condition will have a vital effect on the finances of the government, as well as on the business of the country as a whole.

MAINTAINING PUBLIC UTILITY SERVICE

ANOTHER critical public utility situation has developed in the case of the Toronto Railway Co. This company's franchise expires on January 1st, 1921, and in the meantime its franchise prevents the fares being increased except through action on the part of the provincial legislature. The company did well financially until about 1916, since when it has been barely able to meet operating expenses, dividend payments having been suspended and the depreciation account sacrificed. Neither are extensions and improvements in the service being made in proportion to the growth of the city of Toronto. Last year the company had to meet a substantial increase in the wages of its employees, and new demands have been presented which, it is maintained, make an increase of rates absolutely necessary if the service is to be maintained at all.

The Ontario legislature first considered a bill, known as the McCrea bill, authorizing the Ontario Railway

Municipal Board to increase the fares if they considered an increase necessary. This bill was not passed, but a second one, drafted by the board itself, leaves it to the city council to decide whether an increase is desirable, and the council may if it sees fit refer the question to the vote of the ratepayers. This bill passed the legal bills committee on May 25.

Whatever solution is reached, it is at least necessary that service be maintained with no interruption if possible. A contract entered into by the company should be binding upon it during its term of operation, and in the prosperous years provision should have been made for such a contingency as at present exists. But, on the other hand, if the government has permitted the breaking of short-term contracts entered into by building and contracting firms, by labor unions, and other organizations, should it be so strict in enforcing a twenty-year contract in view of the greatly changed and unexpected conditions which have arisen during this period? The maintenance of a reasonable standard of service may well be worth whatever increase in rates is required, for the balance of the present year, for certainly the fares must be increased when the city takes over the operation of the system at the new year. No street railway can keep in business on a fare averaging less than four cents, which is probably the lowest to be found on this continent at the present time.

STATISTICS AND THEIR COLLECTION

UNDER the "Statistics Act," 1918, a Dominion Bureau of Statistics was organized at Ottawa, taking the place of the Census and Statistics Office which had been in existence since 1905. The work of collecting statistics in Canada has undergone a rapid development since 1900, and much has been accomplished towards producing figures which are of great value in the economic life of the country. The first annual report of the Dominion statistician, R. H. Coats, for the fiscal year ended March 31, 1919, was recently published, and gives a concise account of the progress which has been made.

Canada has in the past been fairly well supplied with statistical information, for not only was the Dominion required by the British North American Act to prepare a census every ten years, but the various administrative departments of the Dominion and provincial goverments have also included in their annual reports many figures relating to their respective fields. There was very little uniformity in the methods of collecting these figures in the different provinces, however, and the results could not be combined in such a way as to show statistics for the Dominion as a whole. The work of the new bureau, therefore, consists in bringing about such uniformity as may be practicable, and in incorporating the results on a national scale, rather than in building up an entirely new organization.

The collection of statistics is work which can be satisfactorily accomplished only by the government. Private organizations have not the necessary inquisitorial powers to secure the information, nor is there any satisfactory way in which the figures, when collected, could be copyrighted so that the financial benefits would accrue to those doing the work. With government collection, on the other hand, there is always a difficulty in knowing to what scale statistics may be profitably extended, for it is obvious that the benefits derived must be commensurate with the work and the expense involved.

CANADIAN RESOURCES AND FOREIGN CAPITAL

EAGER eyes are being turned on this country as a profitable field for the investment of capital, according to Sir Lomer Gouin, premier of Quebec province, who has just returned from a trip to Europe. "While in France and Belgium," he says, "I conversed with many distinguished capitalists whose eyes are focussed on Canada. Many of them expressed the intention of investing in Canada, and in the province of Quebec, and I expect to see a large influx of technical men in the near future to explore our mineral resources, and later a flow of immigration from France, Belgium and England.

"What is to-day causing the greatest interest in Europe is our wealth of forests. The demand for paper has become so great in France, Belgium and England that capitalists are now turning their attention to Canada for a supply. I had to answer many inquiries on this question from capitalists who wanted to know where they could secure limits, and there are several syndicates with large capital, both in France and England, who are coming out to this province to acquire forest lands. In England I found capitalists as keen to invest in the resources of this country as were those of France and Belgium. In England there seems to be a perfect craze to come to this province for the wood that will prevent a paper famine."

This attention is an expression of confidence, in the stability of political conditions in Canada, and in the economic future of the country. It is in an even greater degree, however, an admission of the fact that the great industries of the future will be found, for the most part, in those countries which have supplies of raw material. New capital may be welcomed to Canada, but it must not deprive this country of those natural resources upon which our economic future depends. The greatest immediate benefit can no doubt be obtained by a lavish waste of raw materials, but vastly greater industries may be built up on a permanent basis if those raw materials are conserved and replaced as far as possible.

File your income tax return now—your king and country need the money.

* * * * *

With the return of warm, dry weather, forest fires are reported at several points. The newsprint shortage is not due entirely to the lavishness of the press.

* * * * *

Life insurance companies are proud of their record during the past year. But taking into consideration the depreciation of the dollar, the average Canadian is really not carrying as much insurance protection as he did in 1914.

* * * * *

Employees of the Ontario Hydro-Electric Power Commission have demanded wages amounting in some cases to 335%, of the pre-war wages. Prices of some goods have increased this much, and why shouldn't there be profiteering in wages as well as in profits?

* * * * *

The imposition of taxes on luxuries is a public admission that the blame rests on the shoulders of the wasteful consumer. How could the regulation of prices or of profits be effective so long as the public, through extravagant and careless buying, was doing its utmost to boost prices and profits?

* * * * *

"Those of optimistic mentality discern signs indicating that deflation is under way in every direction," says the Merchants Bank in its letter of May 21st, "and while these signs may not be so readily apprehended by others, there is undoubtedly a slowing down in personal extravagance, and a tendency on the part of business to cut its coat according to its cloth—i.e., to take into careful account the restricted credit now generally prevailing. The banks here, as in the United States, fully realize the present situation and, with careful apportionment, sufficient credit has been, and no doubt will continue to be found available for legitimate needs. The future, however, is perplexing and the return to normal conditions will unquestionably be a slow process."

FOREIGN BUSINESS

Much attention is being directed at the present time to export business. This Bank has a number of foreign branches as well as close working arrangements with banks of the highest standing in many other countries which enable it to offer special facilities in the financing of trade with foreign points.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. H. N. DeWitt, of Armstrong, DeWitt and Crossin, general insurance agents, Toronto, has returned from a visit to England.

Mr. Lewis Laing, assistant manager for Canada of the Liverpool and London and Globe Insurance Company, is visiting England on a holiday trip.

Mr. G. F. R. Harris, manager for Manitoba for the Canada Permanent Mortgage Corporation, has resigned, after serving 35 years with that company.

Mr. W. T. Ferry, Canadian manager of the Ocean Accident and Guarantee Corporation, has returned to Toronto after spending a month visiting the western agencies of the company.

Mr. C. M. Saunders, treasurer of the Canada Life Assurance Company, sailed for England on May 14, where he will join Mr. H. C. Cox, president, and inspect the company's English investments.

Colonel W. Grant Morden, M.P., is the central figure in the promotion of the $500,000,000 British Empire Steel Corporation, the consummation of which is considered one of the greatest economic developments in the inter-imperial history of the Empire. The principal interests involved include the Dominion Steel Corporation, the Nova Scotia Steel and Coal Company and the Canada Steamship Lines, and several other enterprises. The project has been favorably received in business and financial circles, and though some criticism has been directed against it in parliament, the general opinion is that the government has no reason to prevent it. Col. Morden spent his early life in Toronto, is now a member of the British House of Commons, and is actively identified with several large industrial enterprises.

Canadian Newspaper Service Photo

Mr. John Aird, Jr., has been appointed Canadian manager of W. B. Richards and Company, Limited, whose head office is in New York. Canadian headquarters are at 107 St. James Street, Montreal.

Mr. J. G. Richter, alderman, of London, Ont., has accepted an offer to act as assistant to Mr. Stephen Grant, assessment commissioner. Mr. Richter was for many years manager of the London Life Insurance Company, and has a reputation as an actuary and an expert at figures. He will begin work when the assessment now being made for 1921, is completed.

Mr. A. F. Mitchell, Montreal manager of the New York brokerage firm of Laidlaw and Company, who has been visiting England, has returned. Mr. Mitchell states that the problem which faces the world to-day, is the depreciation of European credit and currency, due to the fact that gold is the standard of value, and the greater the supply of paper money, the greater its depreciation. "Europe with its enormous paper debts, has lost its gold paying strength," he said, "holdings of the metal having passed to the United States, and, to a lesser degree, to several of the countries neutral in the war."

Mr. Hedley C. Wright, formerly assistant manager and secretary of the General Accident Assurance Company of Canada, has rejoined the London Guarantee and Accident Company, to assist the manager for Canada, Mr. Geo. Weir. Mr. Wright joined the London Guarantee Company, as a junior at the head office in London, England, coming to Canada in 1911 to take charge of the personal accident department, and in 1912 went to Calgary as special representative for Alberta. He held other positions till 1917, when he joined the General Accident Company, as assistant manager. Mr. Wright was recently elected president for 1920 of the Western Casualty Underwriters' Association.

OBITUARIES

Mr. Gilbert Cartier, assistant comptroller of the city of Montreal, died on May 16th, at his home in that city.

Mr. Thomas Esmona Peck, president of the Peck Rolling Mills, Limited, died at Montreal last week at the age of 41 years. Mr. Peck was born in Montreal.

Mr. John S. Meredith, aged seventy-six years, former manager of the Merchants Bank in London for more than fifteen years, died at his residence, 565 Talbot Street, London, Ont., on May 26th.

Mr. John F. Kelley, managing director of Kelley's, Limited, the large wholesale and retail leather house of Halifax, N.S., dropped dead at his home on May 22nd. Mr. Kelley was about seventy years of age.

Mr. John McKergow, ex-mayor of Westmount, Que., and well known in Montreal business circles, died at his home at 343 Kensington Ave., Montreal, from pneumonia on May 16th. Mr. McKergow was born in Scotland about 75 years ago, and received his public and high school training in Montreal. He started his career as a junior in the wholesale provision business of A. A. Ayer Company, becoming vice-president of that firm several years later. At the time of his death he was president of the Montreal Lumber Company, Limited, and director of the Sun Life Assurance Company, the Crown Trust Company, and the Peter Lyall and Sons Construction Company.

Canadian Bank of Commerce Bank of Montreal

IMPERIAL BANK HAD GOOD YEAR

General expansion of business is shown by the Imperial Bank of Canada's statement for the year ended April 30th, 1920. Profits reached the sum of $1,379,313, compared with $1,247,516, a gain of over 10 per cent. Deposits increased from $83,198,234 to $97,784,217, or a gain of over 17 per cent., while in the case of current loans in Canada, the increase from $48,544,711 to $60,452,943 represents a change of about 25 per cent. Since the armistice, Imperial Bank has opened 76 new branches, of which 42 were established in the fiscal year just closed. In the case of deposits, the larger increase was made in savings accounts, which is considered good evidence of the recovery of the people from the heavy calls for government loans.

Among the year's disbursements, the shareholders received an extra 1 per cent. bonus, amounting to $70,000, making the distribution in that direction $910,000. The usual grants were made to pension fund and officers' guarantee fund, amounting, in all, to $142,500, and the Dominion government taxes, including war tax on circulation and reserve for war income tax, amounted to $125,000, compared with $70,000 in the previous year. At the end of last year the reserve fund amounted to $7,500,000, as against a paid-up capital of $7,000,000, and no transfer to reserve was made in the year just closed. The balance carried forward was $1,062,278, as against $865,459 in the previous year. Cash assets and specie, together with call loans, constitute 32 per cent. of the bank's liabilities to the public, while these assets, together with the second reserve of bonds, securities, etc., equal 53 per cent. of the liabilities to the public. Note circulation grew by about $1,500,000 during the year.

At the annual meeting, held on Wednesday, the president, Peleg Howland, said there never was a time in his recollection when conditions were so uncertain, and when it was so difficult to form an opinion as to what was in store for us. He spoke of the large government expenditures; the expansion of pulp and paper industries; the demand for lumber at extraordinary prices, and the continued activity of manufacturers in nearly all lines, while wages continued high, with the limit perhaps not yet reached, and an almost unlimited demand for housing at any cost. Against that was the comparatively small residue of crops from last year, the adverse spring conditions for agriculture, reduced acreage, and an increase in imports and decrease in exports, together with a growing public debt and increased burden of taxation for many worthy purposes. He was optimistic about the future. While, sooner or later, we must have reaction, it could scarcely be more than temporary. "It is difficult," he concluded, "to see how there can be permanent reduction in prices or a lengthy depression until real work supplies an overplus of goods."

General Manager William Moffat, in addition to reviewing the year's statement, spoke of the business outlook, and said: "The reaction from high prices has not yet occurred, and, although there is undoubtedly a feeling, not only in Canada, but also in the United States, that the crest of the wave has been reached, there have been few definite signs that the reaction is near. The feeling as to the future is becoming less optimistic, but the insistent home demands on our agriculture and manufacturing resources show few signs of abatement."

BRITISH COLUMBIA'S WAGE BILL

A total of $56,734,040.62 was the amount of money paid to wage-earners, not including salaries, in British Columbia for the twelve months ending July 31st, 1919. This sum applies to fifty groups of industries and 1,207 firms in the province, and is the compilation made in the annual report of the Department of Labor at Victoria issued on May 12th. The report further states that among the industries paying he largest amount in wages during the year the leading osition is held by shipbuilding, with a payroll of $10,223,-4.67. Next in order come coal mining, $7,391,088.19; saw-'ing, $1,800.098.17; and metal mining, $4,527,802.30.

OCEAN ACCIDENT AND GUARANTEE CORPORATION

Assets of the Ocean Accident and Guarantee Corp., Ltd., at the end of the year 1919, amounted to $33,212,080, an increase of $4,433,420, as compared with the previous year. Investments represent the greater part of this advance. Revenue for the year amounted to $22,657,700, an increase of $3,007,365. Premiums amounted to $21,641,440, as against $18,846,300. Claims paid and provided for were $11,116,900. This represents 54.9 per cent., on earned income. The corporation's balance sheet is shown in detail elsewhere in this issue.

E. Roger Owen, chairman of the corporation, in his address at the annual meeting, said: "On the whole, we feel that we have done a useful year's work. It has not been exceptionally eventful, but many new problems have come up for consideration and solution. The advantage of having a large business is that losses can in most cases be spread over the whole undertaking. Although some of our heavy departments have shown a heavy claims ratio, I am glad to say that the underwriting profit for the whole year works out at a little more than 5 per cent. This is not as much as in normal years we should like to see, because emergencies, contingencies and catastrophes have to be provided for, but in view of the exceptional times in which we are living, we consider that 5 per cent. of underwriting profit is satisfactory."

Good progress was made in the Canadian field during the year, almost $40,000,000 of fire insurance business now being in force in this country. The company commenced business in Canada in 1895, the present manager being W. T. Perry.

MERCHANTS BANK HAD YEAR OF EXPANSION

Important progress is recorded in the report of the Merchants Bank for the year ended April 30th, to be submitted at the annual meeting on June 2nd. Net profits amounted to $1,686,156, an increase of $302,587 over those of last year, and $449,476 in excess of the net earnings of two years ago. During the year an issue of $1,400,000 of new stock was made to shareholders at $150 per share and the $700,000 of premium from this source, together with the undivided profits of $574,043 carried forward from last year being added to the profits for the year just ended, gave a total of $2,960,199 to be dealt with. After distributing $1,068,285 in dividends at 12 per cent. with one per cent. bonus, the balance was apportioned as follows: Government war tax on note circulation, $81,138; transferred to reserve fund from premium on new stock, $700,000, and from profits $700,000; written off bank premises, $100,000; contributed to officers' pension fund, $50,000; and carried forward, undivided, $260,774. It will be observed that the reserve fund has been increased by $1,400,000, thus bringing it up to the same figure as the paid-up capital, $8,400,000.

The total assets show the heaviest year's growth in the bank's history, the gains for the twelve months under this heading being $30,662,451, the total having reached the commanding figure of $197,387,855. The liquid position has been well maintained, the cash holdings standing at 17.94 per cent. of the liabilities to the public, while total liquid assets show 40.81 per cent., both ratios being practically unchanged from last year's figures, notwithstanding the heavy demands for credit throughut the period as reflected by the important increase in commercial discounts. The total deposits now stand at $163,080,452, exceeding last year's total by $24,903,471, or 18.04 per cent. Interest-bearing or notice deposits increased 24.18 per cent. to $114,132,175. Current loans in Canada increased during the twelve months by $17,324,487, or 18.07 per cent. to $113,198,913.

A circular issued by W. L. McKinnon and Co., Toronto, shows the new income tax rates as provided by the budget speech, the amount of tax levied on a schedule of incomes, and the percentage of income.

Lac Du Bonnet, Man.	Royal Bank of Canada.
West Vancouver, B.C.	Royal Bank of Canada.
St. James, Winnipeg, Man.	Royal Bank of Canada.
Prince George, B.C.	Bank of Commerce.
Winnipeg, Man.	Bank of Commerce.
Dover Centre, Ont.	Bank of Commerce.
Little Bras d'Or, N.S.	Bank of Nova Scotia.
Quesnal, B.C.	Bank of Commerce.

A branch of the Canadian Bank of Commerce has been opened at Quesnel, B.C., temporarily in charge of Mr. L. P. Dallaire.

The Bankers Trust, Ltd., have purchased the Pratt estate at the Corner of Drummond and St. Catherine Sts., Montreal, the price reported being over half a million dollars. The property will, it is understood, be converted into a branch of the Merchants Bank in the near future.

A new Imperial Bank head office building is to be built at the corner of King and Yonge Sts., Toronto, according to a statement made at the annual meeting held on Wednesday. at the annual meeting held on Wednesday.

Branches Opened in April

Forty-six branches of Canadian banks were opened in April, distributed among the various banks, as follows:—

Montreal, 1; Nova Scotia, 3; Royal, 7; Commerce, 4; Dominion, 4; Toronto, 1; Nationale, 7; Merchants, 6; Provinciale, 5; Molsons, 1; Home, 1; Hochelaga, 2; Standard, 3.

The following nine branches were closed in April:—

Avon, Ont., Royal; Craven, Sask., Dominion; Mount Elgin, Ont., Imperial; Perkins, Que., Provinciale; St. Elizabeth, Man., Hochelaga; Snipe Lake, Sask., Standard; Trois Rivieres Sta., Que., Nationale; Vita, Man., Hochelaga; Wolfestown Sta., Que., Nationale.

The following is a list of branches of Canadian banks which were opened in April, and which have not already been mentioned in *The Monetary Times*:—

Avondale, Nfld., Nova Scotia; Abbotsford, B.C., Montreal; Bala, Ont., Royal; Bartonville, Ont., Royal; Barwick, Ont., Commerce; Calgary, Alta., stockyard, Dominion; Cap de la Madeleine, Que., Toronto; Centre, Nationale; Pont St. Maurice, Nationale; Combermere, Ont., Merchants; Eganville. Ont., Nova Scotia; Edmonton, Alta., stockyard, Dominion; Grande Freniere, Que., Provincial; Halifax, N.S., Young and Gottingen, Royal; Hesketh, Alta., Merchants; Howick Sta., Que., Nationale; Hymers, Ont., Merchants; L'Anse St. Jean, Que., Nationale; London, Ont., Market branch, Molsons; Marquette, Man., Home; Montreal, Que., Chevrier St. and Hubert, Nationale; New Westminster, B.C., Nova Scotia; Notre Dame du Bon Conseil, Que., Hochelaga; Palermo, Ont., Merchants; Plumbridge, Sask., Standard; Port Alfred, Que., Nationale; Pt. Morien, N.S., Royal; Roblin, Ont., Dominion; S. Antonin de Temiscouata, Que.. Provinciale; S. Bruno de Kamouraska, Que., Provinciale; St. Fereol, Que., Nationale; S. Louis de Kent, Que., Provinciale; S. Paul de la Croix, Que., Provinciale; Sarnia, Ont., Christina and Confederation, Royal; Silviera, Cuba, Royal; Stratton, Ont., Commerce; Thetford Mines, Que., Merchants; Thornhill, Ont., Royal; Toronto, Ont., Bathurst and Dupont, Standard; Vancouver Heights, B.C., Commerce; Vimy, Alta., Hochelaga; West Summerland, B.C., Commerce; White Bear, Sask., Standard; Woodlands, Man., Merchants; Yorkton, Sask., Dominion.

BANK FIGURES STILL GROW

The statements of chartered banks as at April 30, shows a continued increase in loans and in deposits. Some of the figures, in comparison with those for March, are as follows:—

	April, 1920.	March, 1920.
Reserve fund	$ 126,475,000	$ 124,925,000
Note circulation	223,387,731	225,769,628
Demand deposit	652,918,760	657,412,028
Notice deposit	1,209,574,990	1,197,719,570
Call loans in Canada	125,644,859	128,233,310
Call loans outside Canada	206,229,451	205,202,133
Current loans in Canada	1,347,238,230	1,322,267,030
Total liabilities	2,811,434,155	2,789,254,730
Total assets	3,083,537,664	3,061,826,474

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter
N.Y. funds	12½ pm	12¾ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.34	$4.36	....
Cable transfers	4.35	4.37	....

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., as at May 27, 1920, are as follows: Cable, London, 388½, cheque, London, 387¾; cable, Paris, 7.90, cheque, Paris, 7.89; cable, Italy, 6.03, cheque, Italy, 6.02; cheque, Belgium, 8.18.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended May 27, 1920, compared with the corresponding week last year:—

	Week ended May 27, '20.	Week ended May 29, '19.		Changes.
Montreal	$124,369,506	$114,275,775	+	$10,093;731
Toronto	87,143,947	72,273,077	+	14,870,870

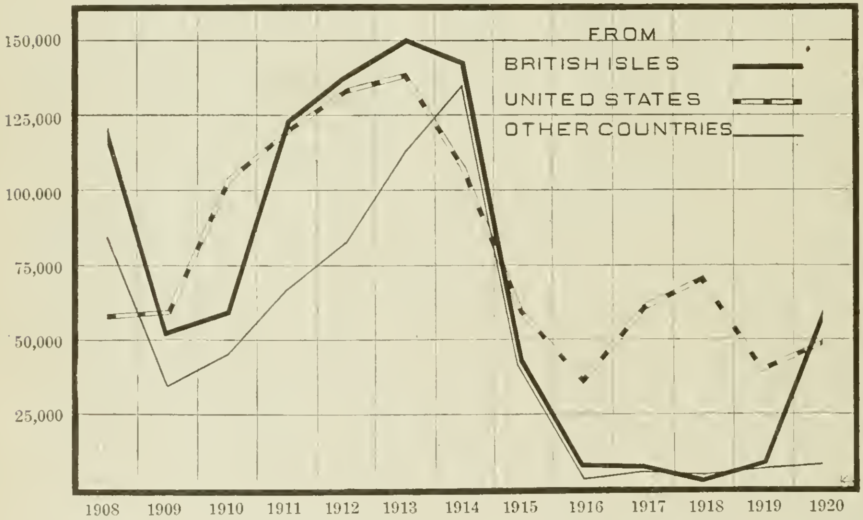
Canadian Lands Available For Immigrants

Movement From United States Was Big Factor in War Period—British Immigration Now Growing Rapidly—Demand For Western Lands Indicated by Rapid Increase in Values — Large Expenditure on Soldiers' Settlement

IMMIGRATION is a subject which is receiving widespread attention in Canada at present, particularly in the west. Just how extensive the movement in this direction will be when European conditions are more normal is not certain, and just what quantity and class of immigration is best suited to this country is not agreed upon. The demand for lands in the west is now large. Discussing this problem, the Bank of Commerce commerical letter for May says:—

"If the volume of emigration now being directed to Canada is to be satisfactorily assimilated, it is necessary that suitable agricultural land should be available at a relatively low price, within a moderate distance of railroad, educational and other facilities conducive to tolerable social comfort. The value of occupied farm lands in all parts of Canada has advanced to an average of $52 per acre, as compared with $40 per acre just prior to the war, or by 30 per cent. On the praries, the average price per acre has advanced $7, in Ontario and Quebec from $12 to $25, and in the maritime provinces from $6 to $13 per acre. Even with these advances the price remains relatively low, varying from $29 in Alberta to $72 in Quebec and $174 in British Columbia. These prices, however, are for improved lands, and particularly in the west, are much higher than those of wild lands, of which the Superintendent of Immigration says there are 128,000,000 acres awaiting development in the three prairie provinces. It is evident, therefore, that the opportunities for increased settlement and production are much more favorable in Canada than in other more densely-settled areas of North America. In some parts of the United States land prices have more than doubled, and are still advancing. For instance, in the state of Iowa $900,000 was paid in March for 2,322 acres, or $387 an acre, while in May a year ago 1,571 acres were purchased for $353,583 which were resold by August for $457,647, the spread being $104,064. A leading bank of that state says that in recent litigation involving a land-selling company, one salesman testified that he had received $455,000 in salary and commissions for seven months' work, the high prices prevailing for agricultural produce being quoted as the justification for these conditions. In Canada, where the prices for produce vary but little from those in the Uinted States, land values have advanced only moderately, and offer opportunities which should induce immigration. As this is again assuming large proportions, it is reasonable to hope for farm production on a larger scale, and present conditions in domestic manufacturing centres, and in those countries to which our trade extends, are such as to justify the expectation that the demand for food stuffs will maintain prices that will be profitable to the producer.

IMMIGRATION TO CANADA (For fiscal years ending March 31)



"There continues to be a steady migration from rural to urban centres, and, as many of the men who left the farms for military service during the course of the war are not now disposed to return to farming, it is doubtful if the resulting loss in the efficiency of agricultural labor will be repaired by the efforts of the Soldiers' Settlement Board to place ex-service men on the land, notwithstanding the fact that, in addition to the $45,000,000 voted last year by parliament for this purpose, $50,000,00 have been placed in the current year's estimates to carry on the work. Fortunately, many of those reestablished on the land will be better equipped for carrying on farming than they were before entering military service. In response to the national call for greater food production during the war, farmers as a whole increased their equipment so as to overcome as far as possible the difficulties caused by the shortage of labor.

"Men returning from active service have by general consent been given the preference in the allotment of all free homestead lands within fifteen miles of a railway, and this acknowledgment of the value of their services has removed one of the chief attractions offered to prospective immigrants. There remain, however, the inducements of good wages and highly productive lands offered for sale at reasonable prices, and from recent immigration returns it would appear that these are appreciated. For the ten months ending January immigration to Canada from all countries totalled 101,940 persons, an increase of 140 per cent. over last year, and during the calendar year 1919, 117,633 immigrants entered Canada, or 67,393 more than in 1918. At present all passenger boats to this country are filled to capacity and it is difficult to obtain a passage, while the number of immigrants arriving from the United States is larger than at any similar period since the war began."

REPORT ON INSURANCE IN ONTARIO

Business of Mutual Companies Shows Substantial Growth—Results of Life, Fire and Casualty Companies

IN an abstract report for the year 1919, the superintendent of insurance for Ontario, summarizes the results of the only two life companies operating under provincial license. The more important figures are as follows:—

	Equity Life.	Policyholders' Mutual.
Gross premiums	$ 104,176	$ 98,160
Interest	34,521	8,762
Total income	163,728	106,948
Expenses of management	34,108	42,372
Claims	28,000	10,500
Total expenditure	83,597	65,143
Total assets	668,107	217,667
Liabilities (except paid-up stock)	623,280	178,256
Net amount at risk	3,547,103	3,178,421

Joint Stock Fire Companies

Two joint stock fire insurance companies are also covered by the report. Their more important figures are as follows:—

	Merchants'.	Queen City.
Gross premiums	$ 414,829	$ 139,465
Total income	446,630	188,562
Expenses of management	166,422	54,492
Losses	144,516	51,884
Total expenditures	335,441	171,440
Total assets	608,949	524,806
Liabilities (except paid-up stock)	323,329	132,042
Net amount at risk	68,884,055	18,810,653

Cash Mutual Fire Companies

Cash mutuals are distinguished into those having no joint stock capital, and those having joint stock capital. There are four of the former class, the Economical Mutual Fire, the Gore District Mutual Fire, the Perth Mutual Fire and the Waterloo Mutual Fire. Their results may be summarized as follows:—

	Economical.	Gore District.	Perth,	Waterloo.
Losses paid	$ 70,117	$ 107,144	$ 63,325	$ 100,934
Expenses	69,459	74,643	66,018	80,620
Total expenditure	187,081	242,877	157,496	319,336
Fixed payments	65,371	70,127	58,793	77,876
Cash premiums	126,610	163,305	116,916	164,585
Total receipts	309,950	293,705	228,456	422,930
Total assets	989,728	1,046,893	868,231	1,189,268
Total liabilities	102,079	140,257	107,310	279,189
Net amount at risk	$25,951,226	$32,619,385	$31,606,752	$40,752,554

Cash Mutuals With Joint Stock Capital

There are five cash mutuals having joint stock capital. These are the Fire Insurance Exchange, the Hand-in-Hand, the Millers' and Manufacturers', the Monarch and the Wellington.

The Fire Insurance Exchange had losses, $39,611; expenses, $14,672; total expenditure, $61,215; cash premiums, $49,841; total receipts, $65,422; total assets, $105,342; total liabilities, except capital stock, $53,017; net amount at risk, $12,356,332.

The Hand-in-Hand had losses, $61,929; expenses, $42,432; total expenditure, $148,518; cash premiums, $131,194; total receipts, $164,832; total assets, $246,234; total liabilities, except capital stock, $115,281; net amount at risk, $12,996,016.

The figures for the Millers' and Manufacturers' were: Losses paid, $45,239; expenses, $29,294; total expenditure, $92,690; cash premiums, $101,062; total receipts, $117,178; total assets, $177,228; total liabilities, except paid-up capital stock, $83,053; net amount at risk, $16,360,238.

The Monarch had losses, $24,585; expenses, $28,172; total expenditure, $65,283; cash premiums, $63,888; total receipts, $92,327; total assets, $105,561; total liabilities, except paid-up capital, $42,829; net amount at risk, $8,070,133.

The figures for the Wellington show: Losses paid, $49,541; expenses, $42,321; total expenditure, $105,536; cash premiums, $107,628; total receipts, $204,536; total assets, $220,331; total liabilities, except paid-up capital stock, $83,341; net amount at risk, $10,817,853.

Purely Mutual Fire Companies

The report also summarizes the results of 71 purely mutual fire companies. Their assets at the end of 1919 totalled $12,506,102, made up chiefly of unassessed premium note capital $11,307,727, mortgages, bonds, debentures and other securities $772,753 and cash $364,382. Liabilities totalled $21,689. The net amount at risk, under 151,756 policies in force on December 31st, was $369,951,356. Income for the year totalled $988,328, of which fixed payments yielded $688,541 and assessments $166,561. Expenditures were $863,724, of which losses were $599,783, and expenses $164,467.

All Classes Mutual Companies

A summary of fire insurance mutual companies of all classes shows a list of 80 companies, with a gross amount at risk on the mutual plan of $408,176,771, premium notes net unassessed $12,165,349, surplus of general assets over liabilities $16,616,236, new business taken during 1919 $154,484,626, and premium notes taken during 1919 $5,440,448.

Compared with 1918, the results for the purely mutual companies were as follows:—

	1918.	1919.
Number of companies	71	71
Total assets	$ 11,386,416	$ 12,506,102
Total liabilities	58,519	21,689
Net amount at risk	341,798,832	369,951,356
Cost of management	149,382	164,467
Losses paid	630,814	599,783

Weather Insurance Companies

Three weather insurance companies, the Huron Weather, the Ontario Farmers and the Western Farmers', carried a net amount at risk of $28,474,329 at the end of the year. Their assets totalled $766,399 and liabilities $106,189. Total expenditures were $39,488, including losses of $14,951, and total receipts were $67,984.

Accident, Sickness Guarantee and Automobile

The Provident Assurance Co., of Montreal, doing business under an Ontario license, had $20,904,092 in force, with total assets of $371,289 and liabilities of $177,579. Premiums were $309,293 and total receipts $336,579, claims being $139,731 and total expenditures $337,060.

FAVOR PROVINCIAL UNDERWRITERS' ASSOCIATION

The Edmonton branch of the Life Underwriters' Association, at a meeting held on May 8th, approved of the proposal made by the Calgary branch to the effect that a provincial association be formed. This endorsement was subject to the consent of the Lethbridge and Medicine Hat branches being secured.

MANITOBA SEED GRAIN LOANS

Loans to farmers of the province for the purchase of seed grain this year exceeded any year since the Act came into operation, Hon. Edward Brown, provincial treasurer, announced on May 12th. The loans last year totalled $125,000, and this year the amount loaned has already exceeded $246,000, and will likely reach $300,000 before the end of the season. The sum set aside by the government for loans was $300,000, but money in excess of this amount will be supplied if needed, Mr. Brown said. Many municipalities have borrowed up to their limit, which is $60,000.

Safe Deposit Vaults

Experience—Vigilance—Strength

The logical place for keeping bonds, stocks, insurance policies, mementoes, keepsakes—in fact, any and all kinds of valuables—is in a modern, up-to-date safe deposit vault. The cost of the protection which may be secured in this way is so small that it is unnecessary for anyone to risk his valuables in an insecure place where fire, or burglary, or calamity may deprive him of them.

THE TRUSTS AND GUARANTEE COMPANY SAFE DEPOSIT VAULTS—unsurpassed in strength of construction and supplied with every necessary safeguard that skill and ingenuity can devise—offer the very best possible protection.

Inspection invited.

Exports of Canadian Products Decline

Figures For First Month of Fiscal Year Show a Falling Off of Eleven Millions — Imports on the Other Hand, Advance Forty-Four Millions

ALTHOUGH the grand total of Canadian trade for the month of April, 1920, the first month of the fiscal year, shows an increase of $32,633,172, as compared with the same month a year ago, exports showed a falling off of more than $11,000,000. Imports last month showed an increase of $44,035,405, as compared with a year ago, the chief advances being in fibres, textiles and textile products, and agricultural and vegetable products.

Under exports, wood, wood products, paper and manufactures made a big advance, while non-metallic minerals and products also increased. These advances, however, were offset to a large extent by the decline in agricultural and vegetable products, and animals and animal products. Exports of domestic miscellaneous products also showed a decrease.

The following table gives the trade of Canada by classes for the the month of April, 1920, compared with the same month a year ago, and is compiled by the Department of Customs:—

	IMPORTS ENTERED FOR HOME CONSUMPTION				EXPORT			
	Month of April				Month of April			
	1919		1920		1919		1920	
	Free	Dutiable	Free	Dutiable	Domestic	Foreign	Domestic	Foreign

MONTREAL MANUFACTURERS' ANNUAL MEETING

At the annual meeting of the Montreal branch of the association, held on May 12th, F. W. Stewart was elected chairman, B. W. Coghlin vice-chairman, and R. W. Gould secretary. The executive for 1920 is as follows: A. H. Brittain, Maritime Fish Corporation, Ltd.; E. C. Budge, Budge Carbon Paper Manufacturing Co., Ltd.; F. G. Daniels, Dominion Textile Co., Ltd.; Joseph Daoust, Daoust, Lalonde and Co., Ltd.; A. S. Falle, Waltham Watch Co., Ltd.; I. Greenberg, Greenberg-Smith Co.; Art. Harries, the Canada Paper Box Co., Ltd.; Paul E. Joubert, Lamontagne, Ltd.; John Lowe, Montreal Cottons, Ltd.; W H. Miner, Miner Rubber Co., Ltd.; J. A. Richard, Fashion-Craft Manufacturers, Ltd.; Lieut. C. P. Slater, Geo. A. Slater, Ltd.; Julien C. Smith, Canada Carbide Co., Ltd.; Eug. Tarte, "La Patrie" Pubilshing Co., Ltd.; Jos. L. Waldie, Canadian Tube and Iron Co., Ltd.; F. R. Whittall, A. R. Whittall Canadian Co., Ltd.

In his inaugural address F. W. Stewart pointed out the progress that had been made by the Montreal branch during the year. He strongly advocated the organization of a publicity and information bureau for the city. He reported that during the year there had been 190 new members and 17 resignations, bringing the total membership of the branch to 794, a net gain of 173 members to the present time. The secretary, R. W. Gould, gave a resumé of the activities of the year, particularly dealing with the legislative work of the branch.

Prominent guests at the meeting of the Montreal branch were Sir James McKechnie, head of Vickers, Ltd.; Col. W. Grant Morden and T. P. Howard, president of the Canadian Manufacturers' Association. Mr. Howard stated that a $1,000,000 emergency fund had been started on May 3rd, and was being quickly built up. In their representations to the government in favor of a tariff board they now had the support of 1,600 trade unions. The membership campaign had brought 600 new manufacturers into the association.

In a defense of great industrial mergers, both here and in England, Col. W. Grant Morden said that he and his colleagues were at present giving great attention to a plan that would be announced in due course, under which "we will give our employees not only an opportunity to participate in the success of industry, but also representation on our directorate." Touching on the shipbuilding industry, Col. Morden said the British Empire Steel Corporation was going to build ships. With the steel plants in Sydney, and their wonderful facilities in having the raw material at hand, it was obvious that with ships, there would be a complete circle in industry which would make Canada quite independent.

GROUP INSURANCE INCREASING IN POPULARITY

Companies Writing Business in Canada Report Many New Important Contracts

COMPANIES writing group insurance in Canada are finding that the demand, which has thus far been remarkably good, is not letting up by any means. The Canadian companies are now taking the field more aggressively; the Canada Life reports contracts written, up to the end of April, with the following firms:—

Anglo-Canadian Leather Co., Huntsville, Ont.; Gibbard Furniture Co. of Napanee, Ltd., Napanee, Ont.; McGregor and McIntyre, Ltd., Toronto, Ont.; Thornton Rubber Co., Ltd., Oshawa, Ont.; Brown's Copper and Brass Rolling Mills, Ltd., New Toronto, Ont.; A. E. Wry Co., Ltd., Sackville, N.B.; T. Upton Co., Ltd., Hamilton, Ont.; Burton and Baldwin Manufacturing Co., Ltd., Hamilton, Ont.; Rolph-Clark-Stone, Ltd., Toronto, Ont.; George H. Lees and Co., Ltd., Hamilton, Ont. These total about $2,000,000.

Included in the list of group policyholders of the Metropolitan Life Insurance Co. are the following important Canadian firms: Kaufman Rubber Co., Kitchener; Gray Dort Auto Co., Windsor; Regent Knitting Mills, Montreal; Williams, Green, Rome Co., Kitchener; St. Lawrence Sugar Refinery, Montreal; Murphy, Gamble Co., Ottawa.

A group insurance scheme, applicable to members of militia units, in cases where there are unit funds, has been explained by Major R. J. Davidson, of the 38th Ottawa Battalion. Surplus battalion funds have been used up for many purposes in the past, but principally to defray the expenses of periodical trips, but it has never been possible for every member to take advantage of such trips. In order to equally benefit everyone the new scheme of group insurance has been conceived, whereby every member of a battalion will receive free without further medical inspection, a life insurance policy for $500, the premiums for which are paid from the regimental fund. It is further proposed to increase the amount in accordance with the length of service.

Other Contracts

The Dunlop Tire and Rubber Goods Co., Ltd., of Toronto, is another Canadian industrial firm that has adopted a system of group insurance on behalf of its employees. About 2,000 employees are affected and each policy will be issued without cost to the worker, the management of the firm paying the full amount of the premiums. Under the policy every employee will be insured against death at any age, and permanent and total disability before the age of 60 years while in the employ of the company. The amount of the insurance is based upon the length of continuous service. Those who have served continuously for six months will be insured for $500, which amount will be increased for additional length of service. Past service will also be taken into consideration. The maximum amount of insurance for those whose age limit at the time of entering the company's service over 14 years and less than 50 years is $2,500, and $1,000 for those whose age was over 50 and less than 55, and $500 for those whose age was over 55 years.

R. Marfarlane and Co., Ltd., Montreal, planing mills, have covered every employee, $500 to each employee of less than five years' service and $1,000 to each employee with more than five years' service, increasing $100 every year with a maximum of $2,000. Rose and Laflamme, Ltd., Montreal, grocer's supplies, have covered each employee for a sum of $1,000, increasing every year $100 to $2,000.

The Howard Smith Paper Mills, Ltd., have completed arrangements to cover their employees in the Beauharnois and Crabtree Mills, for insurance from $500 to $1,500. Employees of six months' service get the benefit of the group insurance and the scheme provides for increased insurance according to the term of service. The Toronto Paper Manufacturing Co., Ltd., whose mill is situated at Cornwall, Ont., have also closed a contract along similar lines.

In the four latter cases the policies were taken with the Sun Life Assurance Co.

VANCOUVER ISLAND LIFE UNDERWRITERS

The annual meeting of the Victoria and Vancouver Island Life Underwriters' Association, held on May 15th, was favored by the visit of E. S. Miller, president of the Dominion association. Mr. Miller outlined the recent progress made in life insurance and the prospects for the future. F. M. Kilner, the local president, and other members also spoke.

CANADIAN FRATERNAL ASSOCIATION

At the twenty-ninth annual meeting of the Canadian Fraternal Association, held in Toronto, May 13th and 14th, the following officers for 1920-21 were elected: President, J. A. A. Brodeur, High Chief Ranger, C.O.F., Montreal; vice-president, Dr. C. D. Clarke, Supreme Physician, Toronto. Members of the executive committee—C. E. Duquette, Alliance Nationale, Montreal; secretary-treasurer, W. F. Montague, Hamilton, Grand Recorder, Canadian Order of Chosen Friends; counsellor, Lyman Lee, Hamilton. Montreal was chosen as the next meeting-place of the association. Twenty-one societies, with a total membership of over 400,000, were represented at the meeting.

In his presidential address, James B. McKillop, of London, speaking of the recent practice of employers granting group insurance to employees, said that it was possible that an employee receiving a policy or certificate in this way does not fully investigate or understand his position, and thinks himself fully insured, not realizing that the insurance only continues in force while he remains in the service of the employer and for a period of one month thereafter.

There were many objections and dangers connected with group insurance, he said, such as the right of the employer to cancel, the temptation to depend entirely upon this form of insurance until the insured is not in a position to take a higher fixed policy. "The question is of such importance that it behooves every officer and member of a fraternal society at least to see that no member of his society is permitted to be deceived into lapsing his membership because he is temporarily insured in a group," he added.

GOVERNMENT CURRENCY

Dominion note circulation at the end of April, 1920, amounted to $309,142,651. Gold held by the Minister of Finance at the end of the month amounted to $105,669,697, from which must be deducted $4,033,044, being the amount of reserve to be held on savings banks deposits, leaving $101,636,652 for the redemption of Dominion notes.

PRECAUTIONS TO REDUCE FIRE LOSS

Mutual Fire Companies in West are Planning Fire Prevention Campaign—Carelessness is a Frequent Cause

OUR heavy fire losses and the necessity for reducing them will be emphasized to the citizens of the west by the Western Canada Mutual Fire Insurance Association in a campaign which is now being planned. M. G. Doyle, manager of the Miniota Farmers Mutual Fire Insurance Co., Beulah, Man., is president of this association. "The report of the superintendent of insurance and fire commissioner for Manitoba for 1919," says Mr. Doyle, "gives one much to think of along lines of fire prevention.

"A large percentage of the fires in Manitoba in 1919 were from preventable causes, and something should be done to make the general public exercise greater care and reduce the enormous annual fire waste. Insurance may reimburse the owner for fire loss, but cannot replace the destroyed property, and every dollar's worth of property so destroyed is a direct national loss.

Most Can be Prevented

"Out of a total of 1,603 fires occurring in Manitoba

251	were caused from defective stoves, furnaces and chimneys, doing damage to the extent of over	$250,000
166	were caused from careless use of matches, doing damage to the extent of over	47,000
120	were caused from smoking, doing damage to the extent of over	96,000
89	were caused from hot ashes, doing damage to the extent of over	140,000
61	were caused from careless handling of gasoline and coal oil, doing damage to the extent of over	74,000
678	preventable fires. Loss over	$607,000

Some Precautions to be Taken

"It is the duty of every citizen to assist in reducing the number of these preventable fires. Attention given to the following points will materially assist to this end:—

"1. Inspect your chimneys, fireplaces, stoves, furnaces and pipes regularly, and have repairs and replacements made where and when required.

"2. Where possible, use only safety matches that strike only on the box.

"3. Keep matches out of children's reach and never allow them to carry or handle them.

"4. Watch careless smokers. On farms never allow smoking in or around outbuildings.

"5. Have a pit in your back yard, as far removed as possible from buildings or fences, in which ashes must be deposited.

"6. Do not light fires with coal oil. Keep all gasoline in tightly-closed red container outside the buildings. Do not get familiar or careless with the stuff—it is dangerous."

Mutual Insurance Men to Meet

In connection with this campaign, a meeting of the Western Canada Mutual Fire Insurance Association is to be held in Calgary, Alta., on the 27th and 28th of May, 1920. This association has as members practically all of the mutual fire insurance companies of western Canada. A general report of this meeting will appear in a later issue.

ANALYSIS OF CANADIAN STOCKS

Greenshields and Co., Montreal, have issued a seventh edition of their "Analysis of Canadian Stocks," covering the year 1919. Figures, such as the ratio of current assets to current liabilities, percentage earned on stock, and range of prices in 1919, and in the six years, 1913-18, are shown in the eleven columns of this useful pamphlet.

VANCOUVER INSURES POLICE FORCE

The board of police commissioners of Vancouver has insured the members of its police force against illness and accident by taking out a blanket policy in an insurance company. Competitive bids were secured from sixteen insurance companies, and the lowest tender was accepted. The premium paid is $5,500 per year, and the contract provides for the payment of $100 per month during the period of disablement, and of $500 to the widow of an officer. Payments of this kind made direct to the police have been costing the city about $9,000 per year. The Workmen's Compensation Board paid 55 per cent. during disability through illness, but made no provision against time lost through accidents. A similar arrangement may be made to cover the firemen of the city.

QUEBEC MUNICIPALITIES MEET

The first district convention of the Union of Quebec Municipalities was held in Plessisville, Que., on May 24th. About 250 delegates were present from all parts of the counties of Bellechasse, Levis, Dorchester, Beauce, Lotbiniere, Megantic, Drummond and Arthabaska. It was known as the convention of the central section of the province, and other regional conventions are planned later on for the Eastern Townships, the district north of Montreal, etc. Most of the delegates present were mayors, some accompanied by one or two members of their municipal councils. President Beaubien, of Outremont, spoke on the advisability of making a strong municipal union. Oscar Morin, Deputy Minister of Municipal Affairs, gave a general review of the new municipal law. The secretary, R. Prieur, gave a resumé of what has been accomplished by the union since its foundation. Several rural members took part in the debate and advocated country road construction, a resolution to this effect carrying unanimously.

INSURANCE LAWS OF 1919

The Association of Life Insurance Presidents has just distributed its volume of life insurance laws of 1919 to its members. The volume is the largest book of new laws thus far pubilshed by the association. The prefatory comment by manager George T. Wight is as follows:—

"During 1919 there were forty-five regular legislative sessions in the United States—besides Congress—and eleven regular sessions in Canada; also twenty-three special sessions in twenty states, making the unprecedented total of eighty legislative sessions whose activities were followed by the association. Thus the present volume exceeds all previous issues, both in the number of pages (848) and in the number of laws printed (176). This increase in size is in part due to the inclusion of the Federal Revenue Act and of the life insurance provisions of several codes.

"The new laws of 1919 are divided among the states and provinces as follows: Massachusetts, fifteen; North Dakota, ten; California and Minnesota, eight each; Illinois, Montana, Tennessee and Congress, seven each; Florida, Missouri, New York, Vermont and Wisconsin, six each; Connecticut, New Hampshire and South Dakota, five each; Indiana, Washington and Nova Scotia, four each; Idaho, Nebraska, Oregon, Pennsylvania and Saskatchewan, three each; Arkansas, Colorado, Delaware, Iowa, Maine, Michigan, Rhode Island, Texas, Utah and Manitoba, two each; Alabama, Alaska, Georgia, Hawaii, Kansas, Nevada, North Carolina, West Virginia, Wyoming, Canadian Parliament, British Columbia, New Brunswick, Newfoundland, Prince Edward Island and Quebec, one each.

"No laws affecting foreign life insurance companies were enacted in the States of Arizona, New Jersey, New Mexico, Ohio, Oklahoma, South Carolina or Virginia, or in the Canadian provinces of Alberta and Ontario."

IMPERIAL BANK OF CANADA

Forty-fifth Annual Meeting of the Shareholders

The forty-fifth Annual General Meeting of the Imperial Bank of Canada was held in pursuance of the terms of the Charter at the Head Office in Toronto on Wednesday, 26th May, 1920, at 12 noon.

THE REPORT

The Directors have pleasure in presenting to the Shareholders the forty-fifth Annual Report and Balance Sheet of the affairs of the Bank as on 30th April, 1920, together with Statement of Profit and Loss Account, showing the result of the operations for the year.

The balance at credit of Profit and Loss Account brought forward from last year was	$ 865,459.66
Net profits for the year, after deducting charges of management, auditors' fees and interest due depositors, and after making provision for bad and doubtful debts and for rebate on bills under discount, amounted to	1,379,318.38
Making a total at credit of Profit and Loss Account	$2,244,778.04

This amount has been appropriated as follows:

Dividends at the rate of 12% per annum......	$ 840,000.00
Special bonus of 1% for the year	70,000.00
Annual contribution to Officers' Pension and Guarantee Funds	42,500.00
Special contribution to Pension Fund	100,000.00
Contribution to Repatriation Campaign	5,000.00
Dominion Government Taxes	125,000.00
Balance of Account carried forward	1,062,278.04
	$2,244,778.04

During the year Branches of the Bank have been opened at the following points, in addition to those referred to in last year's Report:—

IN ALBERTA—Benalto, Bittern Lake, Cherhill; Edmonton: 124th Street, Norwood Boulevard; Griffin Creek, Gwynne, Lousana, Robinson's Crossing, Trochu, Westlock.

IN BRITISH COLUMBIA—Creston, Michel.

IN MANITOBA—MacGregor; Winnipeg—Portage and Colony Street.

IN ONTARIO—Toronto: Kingston Road and Balsam Avenue, Monarch Park Avenue and Danforth; Avon, Crampton, Hawkesbury, Hearst, Hilton, Mount Elgin; St.. Thomas; Ross and Wellington Streets; Schomberg, Stamford, Sioux Lookout, Verschoyle, Walkerville.

IN SASKATCHEWAN—Cando, Edgeley, Foam Lake, Handel, Lebret, Phippen, Yorkton.

The following Branches have been closed:—

IN ALBERTA—Robinson's Crossing, Rockfort.

IN BRITISH COLUMBIA—Kimberley.

IN ONTARIO—Mount Elgin.

It is with deep regret that your Directors have to record the death during the year of Mr. William Ramsay, who was one of the original founders of the Bank and a Director since its inception; also of Mr. Elias Rogers, who has been a Director since 1897 and Vice-President since 1914. The vacancy in the Vice-Presidency has been filled by the appointment of Dr. W. H. Merritt.

The vacancies on the Board have not been filled, and a By-law reducing the number of Directors to ten with power to increase the number to twelve will be submitted to you.

Mr. A. E. Phipps, who has been in the service of the Bank since 1891, and has until recently been Superintendent of Branches, has been appointed to the position of Assistant General Manager.

The Auditors appointed by you have made their examinations as required by the Bank Act, and their Report and Certificate is appended to the Balance Sheet. They offer themselves for reappointment. The Head Office and Branches have also been carefully inspected during the year in accordance with the usual custom.

The Directors again desire to testify to the satisfactory manner in which the Officers of the Bank have discharged their respective duties.

All of which is respectfully submitted.

PELEG HOWLAND,
President.

PELEG HOWLAND, President.
W. MOFFAT, General Manager.

AUDITORS' REPORT TO SHAREHOLDERS

We have compared the above Balance Sheet with the books and accounts at the Chief Office of Imperial Bank of Canada, and with the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on 30th April, 1920, we certify that in our opinion such Balance Sheet exhibits a true and correct view of the Bank's affairs according to the best of our information, the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us during the year and found to be in accord with the books of the Bank.

All information and explanations required have been given to us and all transactions of the Bank which have come under our notice have in our opinion been within the powers of the Bank.

G. T. CLARKSON, F.C.A.
R. J. DILWORTH, F.C.A.
of Clarkson, Gordon & Dilworth.

The customary motions were made and carried unanimously.

Mr. G. T. Clarkson, F.C.A., Toronto, and Mr. R. J. Dilworth, F.C.A., Toronto, were appointed Auditors of the Bank for the ensuing year.

The Scrutineers appointed at the meeting reported the following Shareholders duly elected Directors for the ensuing year: Mr. Peleg Howland, William Hamilton Merritt, M.D. (St. Catharines), Sir William Gage, Sir James Aikins, K.C. (Winnipeg), John Northway, J. F. Michie, Sir James Woods, E. Hay, Frank A. Rolph, R. S. Waldie.

At a subsequent meeting of the Directors, Mr. Peleg Howland was re-elected President, and Dr. W. H. Merritt Vice-President for the ensuing year.

PELEG HOWLAND, President.
W. MOFFAT, General Manager.

THE PRESIDENT'S ADDRESS

In rising to move the adoption of the report, the President said, in part: It is hoped and believed that we will do well during the coming year, but there was never a time in my recollection when conditions were so uncertain, and when it was so difficult to form an opinion, satisfactory at least to oneself, as to what may be in store for us. Here is the situation in Canada as it appears to me: Large Government expenditures have been sanctioned by Parliament; outlays on the acquired railroads must be made; public works, though curtailed, have not ceased. Our pulp and paper industries have expanded enormously, and are continuing their growth. There is demand for lumber at extraordinary prices, and efforts are being made to supply it. The manufacturers of nearly all kinds of goods, with the exception of those making some lines of clothing, including silks and boots and shoes, are as busy as labor, power and transportation conditions will permit. Good returns are promised from our fruits, furs, fish and minerals. Immigration has increased, the numbers being some 57,000 in 1918-19, and 117,000 in 1919-20. There is investment of United States funds in Canadian securities, industries and timber limits; wages continue high, with indications that they have not reached the limit, and there is an almost unlimited demand for housing at any cost.

THE OTHER SIDE.

Against all this we have the comparatively small residue of crop left over from last year, the long, severe winter, which has delayed seeding and prevented the proper preparation of the soil, with consequent reduced acreage and adverse chances of good crops (although recent advices from the Northwest would indicate that the excellent conditions as to moisture may go a long way to offset other drawbacks): the loss of cattle and horses in the Northwest from the severity of the winter and the shortage of feed; the poor condition of those remaining; the curtailment in the number of hogs because of the cost of production; the continued increase in the amount of our imports and the decrease in our exports (in the months of March and April the balance of trade was actually against us); the growing public debt and the increasing burden of taxation, municipal, Provincial and Dominion, Governmental restrictions and interference with the natural course of trade—for Governmental efforts to provide liberally for the weak, the needy and the helpless, while at the same time curtailing or restricting the amount of labor or effort, which should be greater, if help of this kind is to be provided. Put the favorable against the unfavorable, and judge for yourselves.

THE IMMEDIATE FUTURE.

Sooner or later we must have a reaction, but can it be, if soon, anything but temporary and of short duration, with the expenditures referred to going on, and the shortage of almost everything the world over? It is true we are doing business on credit—yes, on inflated Government credit—and mortgaging the future, and may, if we go on, exhaust that credit, with a possibility of a panic when the crisis comes, but it is difficult to see how there can be permanent reduction in prices, or a lengthy depression, until real work supplies an overplus of goods.

Our Bank Managers' annual letters are interesting and earnest, as usual, and my information as to conditions has been largely gathered from their perusal. They are, in most cases, optimistic as to the outlook in their particular districts. We have, I am happy to say, in our Managers, taken on a whole, a body of very shrewd and observant men, most of them young.

ASSISTING AGRICULTURE.

I am going to venture a word on the criticisms to which the Banks have been subjected regarding the assistance extended by them to the farming community in the newer Provinces. I believe the criticism is not justified; it certainly is not in the case of this Bank. Self-interest impels Banks to do all they can to further cultivation and production in the districts in which they have their branches, and, as far as we are concerned, we have gone in some cases beyond what prudence would warrant in assisting those we have thought deserving.

I might say, further, that we are not disposed to raise any objections to the establishment of banking institutions on some other basis than our own, as long as we are not compelled by law to take unwarranted chances in our dealing with them. If they prove a benefit to the community, they will be welcome, for on the prosperity of the people our own success depends, and there will be room for all that are entitled to success.

FOREIGN CONNECTIONS.

Up to this time, this Bank has had no branches or established individual agencies or offices of its own abroad. It has confined its efforts entirely to the Canadian Field, though its foreign connections have been of the best, and it has been able to furnish its customers, doing a foreign business, a service, I think, equal to any. These connections have been strengthened and improved during the past year, and we see no necessity for changing the policy followed so long. If, however, the situation changes, it is not our intention to be backward in meeting it.

SATISFACTORY GROWTH.

We are growing in a way that gives us much satisfaction, and have not, perhaps, the ambition to be great in the sense of being large. If we can employ our funds so as to give the public a safe depository for their savings, you a safe and satisfactory investment, help to the development and advancement of the country, and reasonably reward those who bring about these results, this institution's existence will be fully justified.

NEW HEAD OFFICE.

Turning to our Balance Sheet, you will notice a large increase in Bank Premises Account. The necessity for continuing the expenditure in this direction has not grown less, and in several cases we have been compelled to provide offices in spite of the extremely high cost of construction. We have, besides, purchased the northwest corner of King and Yonge streets, where we hope, some time in the not far distant future, to locate our Head Office. This corner is said to be the most important in the city of Toronto—we believe results will justify the heavy expenditure, and in the meantime we are receiving a reasonable return on the money invested.

The General Manager's Address

The General Manager said in part:

"General trade in practically all Branches has been active and profitable during the year, and the Bank has participated in this prosperity. The reaction from high prices has not yet occurred, and although there is undoubtedly a feeling not only in Canada, but also in the United States, that the crest of the wave has been reached, there have been few definite signs that the reaction is near. The feeling as to the future is becoming less optimistic, but the insistent home demands on our agricultural and manufacturing resources show few signs of abatement, and, as you see by our balance sheet, we have in assisting to care for the shortage incidentally been able in the past year to show results in the Bank's business of a gratifying nature—both Deposits and Circulation show substantial increases. Deposits have grown from $83,198,234, in April, 1919, to $97,784,217, as on April 30th of this year, and of the increase in this connection, $10,964,534 has been in our interest-bearing deposits, equal to approximately 18 per cent. Bearing in mind the large amount withdrawn for investment in 1919 Victory Loan, we consider this a very satisfactory showing. The total increase in deposits of the Chartered Banks in Canada for the year ended April 30th, 1920, amounted to $290,425,141, or 16 per cent., as compared with our increase of approximately 18 per cent.

GROWTH IN SAVINGS.

"I would rather not forecast the prospects for a continued growth in Savings Deposits. Last year I was rash enough to express the opinion that the Banks would find difficulty in keeping up a normal growth in this department, but with an increase of 10,964,000 for the year ending April 30th, 1920, compared with approximately $5,000,000 for the previous year, the latter period enjoying the benefits of war contracts, etc., you will readily appreciate the diffidence I now have in committing myself. We are doing everything we can to increase the deposits of the Bank, and I can assure you that this very important department of our business receives careful attention.

NOTE CIRCULATION.

"The maximum figure which our circulation reached was $14,868,970, on April 6th, 1920, or more than twice the amount of our paid-up capital, but, as pointed out on previous occasions, this expended note circulation has, on account of the necessity under the Bank Act of paying 5 per cent. interest on excess circulation, or keeping on deposit with the Central Gold Reserve an amount equal to such excess, been of less benefit to the Bank than would appear from the bald figures.

"Our total liabilities to the public have grown during the past twelve months, as you will see by the statement, to the large sum of $112,431,890, being an increase of $15,820,893 during the year.

ASSETS INCREASE.

"Turning to the other side of the balance sheet you will note a steady increase in assets, the total now being $128,274,168, as compared with $112,186,457 a year ago, an increase of $16,087,711, equal to 14 per cent. It may interest you to know that in 1880 our total assets amounted to $3,711,000; in 1890, $9,732,000; in 1900, $20,308,000; in 1910, $56,239,000. Between the later date and April 30th, 1920, an increase of $72,000,000, or 130 per cent.

"Our net profits are, we consider, satisfactory, being $131,801.63 in excess of a year ago.

STRONG RESERVE.

"We have maintained strong reserves throughout the year and when this last balance sheet was prepared, the legal tender notes, specie, deposit in the Central Gold Reserve, call loans and balances due from other banks, total 32 per cent. of our liabilities to the public, which we consider a creditable showing. Our second reserve consists of bonds, securities, etc., and when we add these to the actual cash, our reserves are shown to be 54 per cent.—also satisfactory.

PROFITS.

"The profits for the year $1,379,318.38, have been computed after a most thorough examination of the assets of the Bank by our own officials and the auditors, and after making what we believe to be full allowances for depreciation, possible loss and contingencies; but we must always remember that business is at present conducted upon inflated values, and that even with the utmost care in selection of loans, we cannot expect to escape without some losses during the period of deflation.

LOANS AND DISCOUNTS.

"In addition to direct assistance by way of advances to the Imperial and Dominion Governments we have made considerable individual advances to enable subscribers to take care of their allotments of Victory Bonds. These advances are largely responsible for the increases in call loans, which you will note have grown from $4,866,595 a year ago to $5,739,096 on date of our last balance sheet. We have also given assistance to our ordinary farming and commercial customers, advances to whom have grown from $48,544,711 a year ago to $60,452,932 to-day, a considerable portion of the increase being, as the President has already advised you, in the form of advances in connection with agriculture.

NEW BRANCHES.

"There has been considerable activity in the opening of new branches by all the Canadian Banks since the close of the war, and the fact that we have added 76—42 of the number during the past year—is proof that we have had our share in this activity; but we have only opened at points where we saw a fair prospect of reasonable returns for our expenditure, and I am happy to assure you that satisfactory results are being obtained.

THE STAFF.

"During the past twelve months the staff has been hard worked, possibly due to our enterprise in opening so many new offices, but these openings were, to some extent, due to our anxiety to absorb over 500 of our men who returned from overseas service, most of whom, we are happy to say, returned ready to re-establish themselves in civil life.

"In closing, I would only like to remind you that this is your Bank, and that you are vitally interested in its success, and I trust you will help us in the future as in the past to make it one of the most successful of Canadian institutions."

ACCIDENT PREVENTION IN NOVA SCOTIA

Employers coming under the Nova Soctia Workmen's Compensation Act have organized an Accident Prevention Association, as provided for by the Act. One year's work has now been completed, and the first annual meeting was held on March 25th. The president, C. D. Dennis, of Rhodes, Curry, Ltd., Amherst, was in the chair, and all the large industries of the province had representatives present. In his address Mr. Dennis reviewed the work of the organization since its inception in April, 1919, and outlined some of the difficulties that had been encountered. Addresses were also delivered by F. E. Lucas, Dominion Steel Corporation, chairman of the Metal Trades Section; F. W. Armstrong, vice-chairman of the Workmen's Compensation Board, and John McKeigan, chief auditor of that body. Several members present took advantage of the opportunity to ask questions regarding various phases of the application of the Compensation Act. The election of the officers and general executive committee resulted as follows: President, G. D. Macdougall, Nova Soctia Steel and Coal Co.; first vice-president, F. E. Lucas, Dominion Steel Corporation; second vice-president, J. E. McLurg, Halifax Shipyards, Ltd.; secretary-treasurer, H. R. Thompson, Canadian Manufacturers' Association.

PROBABLE COURSE OF BOND PRICES

"Statistics, based upon past experience, show that when commodity prices were at a high level interest rates on prime securities, such as municipal bonds, were giving a high return, and when commodity prices were low, interest returns were correspondingly low," say C. H. Burgess and Co., of Toronto, in discussing the outlook for interest rates. For some time past commodity prices have been increasing, until they are now at a high peak, and interest rates also have steadily advanced.

"The price reduction of 20 per cent. by one of the largest departmental stores on the continent and similar steps by other retailers are an important sign. This is probably the first move in the direction of price deflation, and from now on the general trend of commodity prices should be down. With lower commodity prices will come lower interest rates, which mean higher prices for bonds. Bonds of our well-established municipalities, purchased now, should show considerable profit to the holder during the next few years."

SOME ACTIVITY IN REAL ESTATE

"There is a little activity now showing in business property," said Richard Loney, of Richard Loney and Co., Moose Jaw, in an interview with *The Monetary Times*. "Not much, it is true, chiefly on account of the high cost of building. Prices on improved properties in the residential districts are gradually increasing. Here again the activity in vacant property is checked on account of the cost of construction.

"However, in spite of the extra high cost of material and labor, there is a considerable amount of construction in sight, among the chief items being a new station and roundhouse extensions for the Canadian Pacific Railway. These alone, it is estimated, will cost nearly a million dollars. The Robin Hood Mills are building another large elevator and making other improvements which will run close to $250,000. There are also several other projects in sight which will have a tendency to make 1920 building figures the largest since 1912."

FAVORS INSURANCE AGENTS' EXAMINATIONS

It is to the interest of the insured, the insurance company and the agent himself that the latter should be required to pass a test of fitness before a license is granted, said Andrew McBeth, manager of the Mutual Life in Regina, in addressing the Life Underwriters' Association in that city on May 8th. In reference to the companies, he said that it would eliminate the misrepresentation of policies which often happened through ignorance on the part of the agent, and that this would help the company, as every company wants to live up to its obligations, and misrepresented policies are a detriment. Referring to the public, he said, it is to the interest of the company to protect the public, and, consequently, create public confidence, and this requires knowledge of the policy. We must stop the work of some agents who try to present policies to the public with the idea that the public are to receive something for nothing. That system is past, and to-day any agent with a knowledge of his business need not stretch the truth to sell a policy, as the insurance business can stand on its own merits.

In conclusion, he dealt with the agent's viewpoint, and mentioned that there was no reason why insurance agents should not have some test. The profession, he went on, is not less inferior to that of any other profession, and there is no reason why there should not be some standard examination.

NEW TAXES IN PRINCE EDWARD ISLAND

Made Necessary by Large Increase in Expenditures, Says Premier in Budget Speech—Higher Expenditure on Education

REVENUE of $760,000 and expenditure of $740,000 for the year ending December 31st, 1920, were estimated by Hon. J. H. Bell, premier of Prince Edward Island, in his budget speech delivered on May 17th. Last year the actual expenditure was $739,000, but revenue was only $506,000. In order to provide for big shortage in revenue it was necessary to levey additional taxes. The new taxation bill, which is now before the house, will give between $250,000 and $300,000 additional revenue.. Teachers will receive $100,000 more from the government in 1921 and about fifty thousand more in 1920, as their increase in salaries will not start till July 1st. There will be large increase in expenditures for public works. The government is going to take advantage of the federal highway grant. They will borrow $250,000 by funding the auto license fees and receive $165,000 from federal government on the 60-40 basis.

This is the first budget brought down by the new Liberal government, and Mr. Bell stated that upon assuming office the first man they approached was the auditor, who informed them that the government that had just gone out had not only expended the two half-year's subsidies from Ottawa, but $137,000 additional. He also informed them that the government that had just retired had gone behind by $230,000. It was no use trying to go on without taxation and history bore witness to the fact that governments that put on taxation, invariably went to the wall. They pursued their investigations further; they went to the public works department and there they found the expenditure had been $306,000 up to September 7th. Asked how much of this had been authorized, they were told the government had not only spent what had been authorized but $110,000 more.

New Taxation Was Necessary

They, the present party, decided to put the province on a sound financial basis. This they carried out, taxing the rich. There was opposition. The leader of the opposition regarded it as a suicidal undertaking. He also had another argument against taxation, namely, that the Liberal party had promised to carry on the affairs of the province without taxation. It may have been that certain parties and certain newspapers had made such statements, but the Liberal manifesto did not say so. In any case would any reasonable man to-day say that it would be possible to carry on the affairs of this province without taxation. He claimed that the conditions discovered by the Liberal governments on assuming office justified additional taxation.

Hitherto, said the premier, the revenues of the province have been about $500,000 annually; now they would have to raise about $750,000. To raise the additional revenue, personal property would be taxed; a poll tax of $3 would be levied; the income tax would be enforced; lands would be assessed according to their actual value; and a change in the tax on foxes would be made. Mr. Bell also referred to claims of the province against the Dominion government.

Criticizing the budget speech, Hon. A. E.. Arsenault, leader of the opposition, said that the government was now introducing measures which it had formerly opposed, and that it was now proposed to levy greatly increased taxes whereas when in opposition the Liberals had been advocating economy.

The Island legislature was prorogued on May 22nd, after being in session since April 6th. One of the last acts increased the salaries of the premier, commissioner of agriculture and the commissioner of public works, from $1,500 to $2.000. The attorney-general's salary was raised from $1,200 to $2,000, and the sessional indemnity of each member from $200 to $500. The total increase will be $11,500. Only one member, a Liberal, opposed the increases. The opposition leader was offered a salary of $1,000, which he declined to accept.

LLOYDS' BANK, LIMITED

The available profit of Lloyds' Bank, Ltd., at the end of 1919, after all allowances and deductions, amounted to £2,876,302, to which was added the total brought forward from the previous year, making a total of £3,349,057. During the year the West Yorkshire Bank, Ltd., was taken over and the holdings in the National Bank of Scotland were increased to 96.66 per cent. of the issued stock of that institution. The holdings in the London and River Plate Bank, Ltd., were also increased to 98.15 of the issued shares. Investments in the two institutions now total £7,375,422. Other investments amount to £1,917,786. Total assets are now £377,113,928, and the reserve fund, £9,675,105.

ANOTHER PRIVATE BANKING BUSINESS PURCHASED

J. W. Scott and Son have sold out their private banking business to the Bank of Montreal, the transfer to take effect after the 31st of this month. Neil L. Scott, who is a member of the firm, and has been for a number of years in the office, will be the local manager. J. W. Scott is one of the oldest and best-known private bankers in the Dominion, having conducted a large private banking business in Listowel for nearly fifty years, as well as having offices in Palmerston, Clifford and Atwood, and with the late J. A. Halstead, in Mount Forest, Shelburne and Wingham. Mr. Scott has large business interests outside of banking, and, with T. L. Hamilton, who has been with him for nearly thirty-five years, will continue to look after these, with offices over the Bank of Montreal.

HIGHER TELEGRAPH RATES AUTHORIZED

Increases averaging 32 per cent. in eastern Canada and 20 per cent. in western Canada are allowed on commercial telegraph messages throughout Canada in a judgment handed down by the Railway Commission on May 21st. The companies will be allowed to subdivide the existing rate zones east of Sudbury, Ont., and extend the zones to Quebec province. Flat rates for the zones are increased from 25 cents per message to 30 cents per message, and excess words will cost two cents instead of one cent a word. Scaled increases from 10 cents to 25 cents a word are allowed on the $1 transcontinental rate, with a special provision to permit the Grand Trunk Pacific to charge $1.55 to Prince Rupert. Tariffs may be filed at once, based on the commission's rulings, and the rates will come into effect as soon as the commission ratifies the tariffs. The increased rates do not apply to press despatches or leased wires.

In 1916 the board reduced telegraph rates 17 per cent. Between 1915 and 1918 wages have increased 60 per cent. and materials 85 per cent. The increased wage resulting from the application of the McAdoo award in 1918 has so increased the burden of wages as to necessitate increased rates.

In the judgments which Chief Commissioner Carvell and Assistant Chief Commissioner McLean have written, it is pointed out that very little opposition to the increased rates developed at the sittings which the commission held in Victoria, Calgary, Edmonton, Saskatoon, Regina, Winnipeg, Fort William, Ottawa, St. John, N.B., and Halifax.. Business interests in Winnipeg definitely objected, and formal objection was made on behalf of the merchants in Vancouver, Victoria, Saskatoon, Belleville, Toronto and Charlottetown. Elsewhere it was conceded that the increases should be granted, providing the Railway Commission found that they were justified. Only a limited number of the long list of parties served with notice of the hearings made any submissions at all.

Hon. Mr. Carvell rules that the increased rates may be applied to the portion of the Great North Western Telegraph lines which were formerly the Montreal Telegraph Company in Ontario, Quebec, Nova Scotia and New Brunswick. The legality of this was called in question at the hearings.

BORROWING TO BENEFIT BY EXCHANGE

Loans Made in United States are Attractive There. But Borrower Also Obtains Price Consistent With Canadian Market

By A. B. Barker

PREJUDICE is a poor guide in business as in other relations. At the present time there are some objectors to Canadian borrowing in the United States, on the theory that, the present high rates of exchange constitute an unfair profit to the American buyer of our securities, at the expense of the Canadian seller. The fact that the Canadian seller receives full value in his own currency, does not seem to enter into this theory at all. If our currency and that of the United States had different names for the unit—the dollar of one hundred cents—the real situation would be more readily understood.

Prices Equalized by Exchange

Exchange is a commodity, and what really happens when a sale of Canadian securities is made in the United States, is that the Canadian seller receives for his securities a commodity which he in turn sells in the Canadian market, obtaining therefor a price in Canadian funds equal to the Canadian price of the security. An issue of such securities, bonds, or debentures, when intended for the American market, will necessarily be payable in New York funds, as to both principal and interest, this, of course, in order to make them salable in that market, where they must compete with the securities of other prospective borrowers. The question of loss to the Canadian seller will not come up until the interest dates, and also at the maturity of the debenture. If the exchange rates are high when the interest falls due, the amount to be paid will be increased by the premium, but this premium will be paid not to the American but to the Canadian owner of the New York funds. All the American receives is the exact amount of American currency called for by the warrant. If exchange is at a premium when the debenture falls due, the amount to be paid will similarly be increased by the premium, though the American receives no benefit therefrom. Any benefit he will obtain, will be from having purchased at a low price, when he made the investment. At that time, however, the Canadian seller realized the full price in his own currency, and has no reason to complain. Further, the expectation is that by the time the debentures mature, exchange will be normal and the obligation will be cancelled by payment of the face amount, in Canadian currency.

Situation Has Been Reversed

The situation is very similar to that in the United States, at the close of the civil war, when foreigners were able to purchase bonds of that country, at low rates owing to the premium on outside funds, in the United States market. So, also, when the free silver agitation was on, and American funds were at a discount here, the Canadian banks stipulated that the American banks should agree to honor drafts drawn by Canadian banks, on their correspondents, in specie. The opinion here was not that we were profiting by this, but that we were merely taking ordinary business precautions.

This is all that can be said to-day, but, no doubt, it makes a difference when the precautions are taken against us.

This borrowing in the United States is primarily for our own benefit. That it also is a benefit to the American lender is essential, or he naturally would not lend the money. Canada needs the funds, and the United States must lend, if the Canadian market is to be preserved to her. It is a business proposition, in which both sides will get what they are after if their calculations are correct.

MUNICIPAL TAXATION OF FEDERAL PROPERTY

Authorized by Province Where Property is Leased for Profit, But Supreme Court Holds This Legislation Ultra Vires

FEDERAL property in relation to the taxing power of a municipality was the subject of a case which was recently dealt with by the Supreme Court of Canada. In its decision handed out on March 9, the Court held even when such property was leased for profit it could not be taxed. The case was that of Montreal v. Andrew Baile and the attorney-general of Canada. The Dominion government is the owner of some land on Welling Street, Point St. Charles, Montreal, which it leases to Andrew Baile for a coal yard. The city presented a bill for taxes for 1912 and 1913 amounting to $850.61, which Baile refused to pay, on the ground that he was not liable for realty taxes, and when the case was taken by the city against him in the Recorder's Court, the federal authorities intervened. Judgment was given by the Recorder in favor of the city, condemning Baile to pay the amount. Appeal was taken to the Court of King's Bench against the judgment of the Recorder, and the judgment was reversed. It was against this reversal of judgment that the city appealed to the Supreme Court.

Province Authorized Taxation

The federal authorities base their claim that federal property cannot be taxed by a municipality, on section 125 of the British North America Act. The city does not dispute the fact that the federal government is exempted from taxes, but basing itself on an amendment by the legislature to its charter, passed in 1907, it claims that when the federal government leases the property for profit the exemption ceases. The amendment reads: "The exemption indicated by article 362 shall not apply either to persons occupying for commercial or industrial purposes, buildings or lands belonging to his Majesty, or to the federal and provincial governments, or to the board of harbor commissioners, who shall be taxed as if they were the actual owners of such immoveables, and shall be held to pay the annual and special assessments, the taxes and other municipal dues."

Article 362 is the clause in the city charter which provides for the exemption of government property. The amendment to it, quoted above, is claimed by the federal government to be *ultra vires*, and this contention the King's Bench upheld by judgment given on June 26th, 1919.

In upholding the appeal in the King's Bench, Chief Justice Lamothe, of the Supreme Court, in his judgment said:—

"I am of the opinion that clause 362 A of the city charter as it stands to-day is unconstitutional in that part which declares that a tenant shall be taxed as though he were the proprietor of the land. This is doing in an indirect manner what the law says shall not be done in a direct manner. This tax is inscribed on the proprietors' roll, and the action taken to recover the tax qualifies it as a property tax, and it is that actually. As such it cannot be upheld."

MUTUAL LIFE SEMI-CENTENNIAL

"Beginning without a dollar of capital half a century ago, a mutual company has been built up upon unshakable foundations, a company that to-day controls thirty-eight millions of assets and carries over one hundred and seventy millions of assurances in force. Allowing for the distribution of about twenty-three millions, we have a record of nearly sixty-four millions of dollars, either paid out to policyholders and beneficiaries or held for their exclusive benefit against the time of stress, which, in the course of nature, is certain to come to every household represented in our membership." This is the jubilee message from the board of directors to the policyholders of the Mutual Life of Canada, Waterloo, Ont., in a "Story of the Mutual Life Assurance Company of Canada, 1870-1920," just issued. It is attractively illustrated by photographs of past and present directors and officers.

News of Industrial Development in Canada

Dominion in Strong Position to Engage in Export Trade, Says Ontario Commissioner — Montreal Merchant Warns Manufacturers Against Dealings That Are Not Square—Quebec Division of C.M.A. to Aid Industry in the Province

DISCUSSING this week with a representative of *The Monetary Times*, the question of exchange and Anglo-Canadian trade, F. W. Field, British trade commissioner in Ontario, said:—

"From statistics recently compiled by the Department of Overseas Trade, it is seen that wholesale prices in the world's markets for goods formerly competitive, were in August, 1919, on the average 0.12 lower for the British goods than for American, thus giving a slight advantage to British interests in competiton with America. France, on the other hand, in October, possessed a price advantage over Britain approximately equal to that of Britain over America. The fluctuations in price and exchange have similarly operated to raise Japanese and Swedish prices substantially above those of the United Kingdom. The figures for Sweden are specially interesting, as prices have risen much higher than might have been anticipated from the alteration in the rate of exchange. This is doubtless due to the peculiar industrial and political position of that country during the war. Unfortunately, the latest index figure for the United Kingdom is dated April, 1919. It is, however, to be anticipated that trade since then has tended to alter this position.

"Another remarkable feature of the statistics is the position of Canada. Here the rate of exchange for currency has moved against the United Kingdom, but despite this the price advantage, and, consequently, the tendency of trade remain in favor of Canada. The reality of the position thus indicated has been illustrated by a number of commercial transactions and negotiations which have come to the notice of the department. It would appear that during, and since the war, Canada has come to occupy a much more important position in the economy of nations than hitherto, and that at the moment the Dominion is in an exceptionally strong position to engage in export trade.

"The general conclusion reached by my department after an investigation into the position of the various industries of the United Kingdom is that while the United Kingdom has not by any means recovered yet from the interruption of export trade occasioned by the war, she is at the present time in a better position than any competing country, with the possible exception of America, and there would appear to be good ground to hope that, provided production can be increased and the difficulties referred to above removed, the country will by the end of 1920 have regained its position as the premier overseas trading country of the world.

"The offices of the British trade commissioners in Canada are at Montreal, Toronto and Winnipeg and the services of the commissioners are at the disposal of the commercial community in Canada interested in imports from the United Kingdom and in trading within the British Empire generally."

Many Countries Want Trade

After a trip of eighteen months through Australia, New Zealand, Java and other Dutch East India possessions, the Federated Malay States, Straits Settlements, Burmah, Siam, Hongkong, China and Japan, C. E. Gausden, of A. G. Kidston and Co., Montreal, general export merchants, has returned with the statement that the named countries, particularly those within the Empire, desire to trade with the Dominion. Mr. Gausden severely criticized some manufacturers, claiming that their dealings were not square, and giving inexperience as the reason. As regards future business, he gave warning, particularly in this connection. He also pointed out that many Canadian manufacturers do not look for export business until the home market is insufficient for him, and then if the demand increases, and prices rise at home, after he has filled his books with export business, the domestic orders are proceeded with and the foreign dealer is left in the lurch. In conclusion, Mr. Gausden said:—

"It is no good for the government to endeavor to assist in developing Canada's export trade by arranging shipping, and the banks to assist the same object by advancing moneys, if the manufacturer does not do his part by living up to his contracts and giving his customers abroad a square deal."

To Aid Quebec Industry

An Industrial Development Committee of the Quebec Division of the Canadian Manufacturers' Association was formed at the first annual meeting on May 22, in Montreal, for the purpose of attracting industries from other countries to the province. The members of the committee will be as follows: Robert Ryan, of Three Rivers; J. H. Fortier, Paul E. Sise, J. A. Richard, Leslie Drake, Joseph Picard, George D. MacKinnon, C. J. Laframboise, Jean Rolland, W. H. Miner, W. I. Matheson and J. F. Alain.

The chairman of the division for the coming year is C. Howard Smith, Howard Smith Paper Mills, and the vice-chairman is J. H. Fortier, P. T. Legare, Ltd., Quebec City.

Miscellaneous Trade Notes

Immediate action is to be taken by the Lignite Utilization Board of Canada to construct a $250,000 briquetting plant at Bienfait, Sask. The new plant is to be finished and in operation before the end of August. It is anticipated that the fuel will be marketed at $10.50 to $11 a ton, and that it will be equal to the best American anthracite.

A Canadian branch of an American motor truck company may be located in London, Ont., according to Dr. W. J. Stevenson, who has interviewed representatives of the company who were in Petrolea. According to Dr. Stevenson the representatives seemed to be interested in the local proposition, and the men may visit London to see what conditions exist here. The representatives were looking at the Petrolea wagon factory as a possible site, but did not make any definite announcement.

The Ford Motor Co. has now completed arrangements for the location of a five-story factory in London, Ont.

Announcement has been made of the purchase of the William Buck Stove Co., Ltd., of Brantford, Ont., by the McClary Manufacturing Co., of London. Negotiations have been closed and the transaction involves the transfer of all the holdings of the Buck Co. to the London concern. The purchase will add a force of 300 men to the McClary organization, as well as a large increase in equipment, facilitating the output of both factories. The purchase will not cause the transfer of any employees of the Brantford company to London, nor will one day's operation be lost.

The "Cut-to-Fit" Building Co. is now constructing a series of factories in New Westminster, B.C., and the plant is expected to be in operation by July. Cut-to-fit houses and other buildings, such as barns, garages, implement sheds, etc., will be manufactured. Buildings and plant will be erected for the dressing of lumber, dry sheds, a saw mill, etc., all to be operated by electric power furnished by the B.C.E.R. A wharf will be constructed to accommodate ocean going steamers, for the company expects to ship its products direct by water to all parts of the world. The capacity of the plant will be ten complete houses per day, ready for erection and fitted throughout with every requirement for immediate residence.

The Pacific Roofing Co. has decided to erect a new factory adjacent to its present plant on Industrial Island, Van-

couver, B.C. This new factory is to be devoted to the manufacture of wall board, building paper and rag felt, the raw materials for which can all be secured in British Columbia, and for which there exists an almost unlimited market for the manufactured product. Including the machinery that will be installed, the new factory will involve an expenditure of $100,000.

A portion of the Royal Bank's premises at the corner of Park Avenue and Laurier St., Montreal, has been let to the American Shirt Waist Co., which is going to establish the first link in the city, of their chain of stores throughout the country.

A brick-making plant is to be established at Matheson, Ont., by the Matheson Products Co. To commence, the capacity of the plant will be 20,000 bricks, but this will be increased eventually to five times that amount.

NEW INCORPORATIONS

1870 —— OUR GOLDEN JUBILEE —— 1920

NEW BUSINESS RECORD OF THE MUTUAL

The popularity of the Mutual Life of Canada with the insuring public is being demonstrated in the amazing amount of new assurances issued. The first four months of 1920 indicated an increase of no less than 46% over the amount of insurance underwritten in the corresponding period of 1919. Insurance is in greater demand to-day than it has ever been before in the history of the world. The people are impressed with the importance of securing life insurance and naturally their thoughts turn to the Mutual of Canada. The life agent is fortunate to-day owing to the increasing demand for insurance, and especially if he represents The Mutual Life of Canada which is expanding at a rate that surprises even its most optimistic friends.

BE A MUTUALIST!

News of Municipal Finance

Per Capita Assessment and Debt of Western Municipalities High—St. Laurent Loan By-Law Passed in 1917, Declared Illegal and Void — Edmonton Utilities Make Satisfactory Showing For First Three Months of Year

SPEAKING before a meeting of war veterans on civic matters in Moose Jaw, Sask., recently, Commissioner Mackie, in referring to the assessment of debt per capita of Canadian municipalities, quoted the following figures, which are for 1919, and which, in some cases, would be larger for 1920:—

City.	Assessment per capita.	Debt per capita.
Regina, Sask.	$1,178.02	$238.39
Moose Jaw, Sask.	1,005.00	257.90
Saskatoon, Sask.	1,140.67	330.82
Victoria, B.C.	1,499.76	348.24
Edmonton, Alta.	1,532.00	402.72
Lethbridge, Alta.	836.36	254.98
Brandon, Man.	1,105.21	183.80
Charlottetown, P.E.I.	458.33	63.92
Sydney, N.B.	377.60	101.36
Moncton, N.B.	770.14	114.00
Verdun, Que.	486.26	37.45
Sherbrooke, Que.	712.44	94.22
Kingston, Ont.	586.00	64.69
Peterborough, Ont.	749.70	87.33

With reference to the above figures, Mr. Mackie said: "It has been laid down recently by a prominent writer in civic economics that the assessment in towns and cities with a population of over 20,000 should not exceed $1,000 per capita, and that the per capita debt should not exceed $200."

It can be readily seen from the above table that nearly all western cities exceed this limit. Speaking of this, Mr. Mackie went on to say: "It must be remembered that most of the cities in the west are comparatively new and the capital expenditure has been incurred, as in the case of Moose Jaw, in less than ten years. In 1910 our net debt was $1,750,000, whereas last year it was $5,092,000, an increase of 190 per cent."

Cobourg, Ont.—The tax rate this year is set at 40 mills, being the highest in the history of the city.

Campbellford, Ont.—The tax rate this year has been struck at 42 mills, an increase of 10 mills over last year.

Kingston, Ont.—Ratepayers have carried a by-law to exempt from taxes for five years, all dwellings to the value of $2,500 erected on vacant lots during 1920 and 1921.

Brantford, Ont.—Assessment will be increased from $4,000,000 to $5,000,000 this year, according to an estimate by Assessment Commissioner Ludlow. At the rate of 40 mills on the dollar, this would provide $200,000 extra revenue, and at 30 mills, $150,000.

Winnipeg, Man.—Civic utilities showed an adverse balance of $16,711 for the current year at the end of April, according to a summary submitted to the city council by the auditors. This is in comparison with an estimated surplus for the whole year of $28,084, or taking into consideration the apportionment from property sales account, a net surplus of approximately $8,000.

Lloydminster, Sask.—The financial statement of the town for the year ended December 31, 1919, shows that assets exceed liabilities by $36,819. Cash on hand and in the bank at the end of the year amounted to $2,799. General revenue statement showed a surplus of $4,867, the principal item on the credit side being tax levy of $23,823. Debentures outstanding now amount to $15,606, $15,593 of the original amount of $31,200 having been redeemed.

Alberta.—The first itinary of the government's equalization assessment board has been completed. Chairman Lamb says the purpose of the initial investigation was to secure information from typical municipal organizations, and Lethbridge, Cardston, Macleod, Blairmore and Vulcan were the points selected for a start. It was merely a purview of the situation, as Mr. Lamb puts it, and the same preliminary inquiry will be continued in other towns and villages for the next month or two. The municipal districts will be dealt with as soon as the towns have been covered and then the formal sittings of the board will be commenced. Statements from the municipalities are being secured by the equalizers, each of whom is making his own notes for future use when they meet as a board. The results of the first trip says Mr. Lamb, were entirely satisfactory and no difficulty is anticipated in getting the new work under way.

St. Laurent, Que.—The by-law which the town passed in June, 1917, authorizing a municipal loan of $264,000 was, by judgment of the Superior Court, pronounced by Mr. Justice Tellier, illegal, null and void. In declaring the by-law invalid, the Judge said: "The Court does not pronounce on the validity of the debentures which have been issued or negotiated in virtue of the said by-law, seeing that the record and proof contain nothing which would guide the Court in deciding this question." Action in nullity of the by-law was directed against the municipality by Michel Goyer, a taxpayer, who alleged insufficiency of notice of submission of the by-law to the vote of the proprietors of the town on June 13, 1917, after it had been passed by the municipal council on May 19; that several persons had voted for the measure who were not qualified to vote; and that, as a result, the by-law did not receive the necessary majority to become valid.

"The approval given to the by-law by the Lieutenant-Governor-in-Council," added the Judge, "cannot have for effect in the circumstances, the rendering of the by-law valid, nor legalize its execution by the defendant municipal corporation. The law 4 George V., chapter 50, cannot be invoked in favor of a by-law, which is null or invalid, though it can serve for the protection of the bearer or acquirer, in good faith, of municipal obligations."

Edmonton, Alta.—The summary of the estimates for general administration, according to Comptroller Mitchell, show requirements for general municipal, general debenture interest and redemption, school and library purposes, to be $3,542,395 (inclusive of discount) for the present year. This represents an increase of $738,261 over the general levy of 1919. Actual expenditures of that year were less than the levy, resulting in a surplus of $53,359. As in the previous past few years, provision has again been made for a further addition towards the reserve against uncollectible taxes of $150,000 in order to offset any possible shrinkage in the outstanding taxes receivable, which now amount to rather more than $7,000,000, this being inclusive of those taxes against lands sold to the city itself.

The principal items responsible for the increased estimates of the current year are those of departmental wages and salaries, besides higher cost of materials and supplies, the increase in the demands of the public school district, which are nearly $300,000 over last year's figures, hospitals, etc. The total levy for general administration, therefore, necessitated a rate of 45 mills for public school supporters and in the case of separate school adherents, a rate of 41.76, with one mill additional on lands only for provincial supplementary revenue tax. Last year the total general rate was 35.30 mills. The net assessment for municipal purposes this year is approximately the same as last year, or $79,191,550.

Attention is directed to the satisfactory showing of the civic utilities for the first three months of the year, there being a net surplus on the operation of these (inclusive of all capital and other charges) of $20,774, as against $50,622 last year, the reduction being of course due chiefly to higher scale of wages now in vogue and also the increased cost of all materials.

Four Tenders Received for Manitoba Issue, Highest Being 89.66—Vancouver to Float Million and Half Loan—New Westminster to Sell Bonds Locally

THERE is no material change in market conditions, although bond brokers are a little more optimistic. One prominent dealer is of the opinion that the bottom has not quite been reached, but the time is not far distant when it will, and then improvements may be looked for. "Of course, the summer period is naturally a quiet one," he said, "but if industrial concerns continue the liquidation of inventories, and savings deposits still increase, there should be plenty of funds for investment purposes in the fall."

Coming Offerings

The following is a list of debentures offering for sale, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Port Dalhousie, Ont..	$120,000	6	30-instal.	May 30
Westbourne R.M., Man.	40,000	6	30-instal.	May 31
Gilbert Plains R.M., Man.	38,000	6	30-instal.	June 7
Alberta School Districts	116,500	7	Various	June 1
Vermilion, Alta. ..	26,000	6½ & 7	20-instal.	June 14
Sarnia, Ont.	100,000	5½	20-years	....
Lawrence R.M., Man	50,000	6	20-years	June 22
Melfort, Sask.	58,700	6½	10 & 20-inst.	June 7
Pipestone, Man.	93,000	5½	20-years & 30-instal.	June 25

Trafalgar Township, Ont.—Tenders will be received until May 31st, 1920, for the purchase of $79,000 6 per cent. 20-year debentures. This is the same issue for which tenders were called last fall, but which was postponed on account of the Victory Loan. The amount has been reduced.

Melfort, Sask.—The town will receive tenders until June 7th, 1920, for the purchase of the following 6½ per cent. debentures: For sewers, $36,000, 20-instalment; for electric light, $22,000, 10-instalment; for waterworks, $700, 20-instalment. This item was inadvertently inserted in these columns last week under Milford, Ont.

Pipestone, Man.—Tenders will be received until June 25th, 1920, for the purchase of $80,000 5½ per cent., 30-instalment road debentures. Principal and interest guaranteed by the province. Tenders will also be received on the same date for $13,000 5½ per cent., 20-year telephone debentures. Principal at the end of twenty years, guaranteed by the province.—G. F. Birney, Reston P.O., Man.

Debenture Notes

Belleville, Ont.—A by-law to raise $100,000 by debentures for public school purposes, has been passed by the council.

Galt, Ont.—On June 19th next, ratepayers will vote on the raising of $30,000 for improvements.

Toronto, Ont.—The city council has approved a supplementary grant of $1,000,000 toward the school board's program.

Elm Creek, Man.—Ratepayers have passed a by-law authorizing the raising of $45,000 by debenture issue for school purposes.

Ottawa, Ont.—The Ontario legislature has given third reading to the bill authorizing the city to spend $2,750,000 on the Ottawa Civic Hospital.

Sherbrooke, Que.—The city is considering the issuing of $150,000 bonds for an extension of credit to the Eastern Townships Agricultural Association.

Vancouver, B.C.—Nine by-laws authorizing the expenditure of $1,470,612, or the actual borrowing of $1,425,000, are to be submitted to the ratepayers on June 19th.

Lachine, Que.—Five money by-laws totalling $246,000, for waterworks and sewers, sidewalks, public bath, floating debt and housing, have been passed by the council.

Hamilton, Ont.—The Board of Control at the request of the Board of Education, has passed a recommendation to the city council that debentures be issued amounting to $190,000 for school building purposes.

New Westminster, B.C.—It has been decided by the finance committee that the Technical High School debentures will be offered for sale locally at par, and in accordance with this proposal the printing of these bonds has been ordered. It was decided to have them issued in $500 denominations. The issue is for $25,000, bearing interest at 6 per cent. per annum, the maturity of the bond being twenty years.

Manitoba.—The Department of Education officials has ratified the issue of $750,000 school district debentures. Of this amount $500,000 will be sold by the Winnipeg School Board to defray the charges of the large building program for this year. The city of Brandon is represented in the issue by $150,000, and Portage la Prairie by $32,000. The sum of $20,000 will be sold to construct a consolidated school at Greenridge, and another $10,000 for the similar school at Crandall. The remainder of the total is being sold by several school districts for the construction of the usual one-room country school house.

Moose Jaw, Sask.—The city will make a considerable saving in the issuing of the thirty-three year debentures for the Britannia Park extensions and the comfort station. The city commissioner was authorized to instruct the sinking fund trustees, with the consent of the Local Government Board, to sell the Victory Bonds, amounting to $58,000, and to hand over the proceeds of the sale to the city of Moose Jaw, the city to hand over to the sinking fund trustees debentures to the amount of $13,000 issued November 1st, 1919, under authority of By-law 944, and debentures to the amount of $40,000 issued on the same date under authority of By-law 947. Both issues mature on November 1st, 1949. By this means the city will secure $58,000 of the moneys required for the capital expenditures on the comfort station and the water extensions to Britannia Park for 4½ per cent. instead of 7½ per cent.

Prince Edward Island.—The province is considering the issuance of debentures for highway purposes. The amount is $250,000, but the interest rate and maturity have not been decided upon yet, although 5½ per cent. 30-year bonds have been suggested. In speaking of the maturity A. E. Arsenault stated that his principal objection to the long-term bonds was that the work for which the money was being borrowed would not last out the term. The roads to be built were not to be permanent, and would not last out the life of the debentures. In that case money would have to be borrowed before these debentures were due, to do the work for which these debentures were issued.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from April 26th, 1920, to May 12th, 1920:—

Schools—10-years, 8 per cent. instalment—Antelope Valley, $3,650; Roseleaf, $1,200. 10-years, 8 per cent., annuity—Sunny Brae, $1,000; South Loverna, $4,500; South Dean, $2,500; Sunkist, $4,250; Quinton, $13,500; Arbor Hill, $600; Beaver Bank, $4,900 Conquest, $33,000; Wheatwyn, $5,000; Truax, $4,500; Beverill, $1,250; Birson, $2,800; Molewood, $4,200; Parkbeg Village, $1,400; Rose Leaf, $1,200; Manchester, $300; Bianfait, $30,000. 10-years, 8 per cent., annuity—Dressler, $2,000; Wiley, $1,000; Lunnville, $1,000; Lunby, $2,000. Abbey, $16,000, 7 per cent., 20-years, annuity; Marlin, $2,500, 7½ per cent., 20-years, annuity,

Nature's Gift to Canada

Forests and water-power are Nature's gift to Canada—gifts that cannot be duplicated the world over.

6,000,000 cords of pulpwood and 53,000 horse-power of electrical energy are the Abitibi Company's share of Nature's bounty.

To more than double annual paper output from 70,000 to 155,000 tons and water power development from 25,000 to 53,000 horse-power, we have bought $4,000,000 of the Abitibi Company's securities.

From our long experience in financing lumber and pulp and paper enterprises, we unhesitatingly recommend these Bonds as a most attractive investment.

Write now for advance prospectus of the issue.

Bond Sales

Brantford, Ont.—Messrs. W. L. McKinnon and Co. have purchased $100,000 5½ per cent. bonds due 1924 to 1939.

Manitoba.—The following tenders were received on the $2,769,000 5-year 6 per cent. bonds of the province, and are all in New York funds:—

Wood, Gundy and Co., A. E. Ames and Co., Dominion Securities Corp., Toronto, and Illinois Trust and Savings Bank, Chicago, 89.66 for $2,000,000, with an option for two weeks on the balance, or 89.39 for the whole block.

Æmilius Jarvis and Co., Toronto; Halsey Stuart and Co., Chicago; Wm. A. Ross and Co., Winnipeg, 89.57 for $1,769,000, with an option on the balance of $1,000,000.

National City Co., and Harris, Forbes and Co., 88.88 for the whole block.

W. A. Mackenzie and Co., Continental and Commercial Trust Co., Chicago; E. H. Rollins and Son, Boston; W. R. Compton and Co., New York and Chicago, 88.65.

It is understood that only $1,000,000 of the issue was awarded to the first syndicate at 89.66, New York funds, the price stipulated for $2,000,000. In Canadian funds the price would be about 102.16.

Saskatchewan.—Debentures sold by the Local Government Board from April 26th to May 12th, 1920, are as follows:—

Schools—Eyebrow Town, $20,000, Hawarden, $28,000, Quinton, $13,500, Weyburn, $80,000; Harris, Read and Co., Regina. Durham, $1,200; Regina P.S. Board. Queensville, $800; J. R.. Trumpour, Alameda. A. J. Pattison and Co., Toronto, have extended their wire connection by the installation of one direct to Wall Street, and bringing them in direct touch with the New York Stock Exchange house of Jenks, Gwynne and Co. This latter concern is already established in Montreal, where they are represented by a resident partner, W. C. Colwell. A. J. Pattison and Co. now have direct wires to both New York and Montreal. Besides being members of the Toronto Stock Exchange, this firm has membership on the Montreal Stock Exchange.

STEEL MERGER UNDER NOVA SCOTIA LAWS

Company Will Work Under Provincial Charter—Incorporation Fee of Seventy-Five Thousand Dollars

THE British Empire Steel Corporation has obtained a Nova Scotia charter. It will still hold the letters patent obtained some time ago from the Dominion government, in which a nominal capital of $100,000 was all that was specified. A capital of $500,000,000 is authorized by the Nova Scotia charter. The government of Nova Scotia has amended the Companies Act to permit of the issue of shares either in the denomination of $100 each or £1 each, and providing that these shares should be exchangeable at the rate of twenty £1 shares for $100. This makes it possible for a Canadian company to have its shares listed in the usual $100 denomination on the Canadian or American stock exchanges, and in £1 shares on the London Stock Exchange, and enables them to be exchanged at any time in case Canadian or American holders wish to make delivery on the London market or holders in England wish to make delivery in Canadian or American markets.

It is understood that this amendment has been made in the Nova Scotia Act in order to give additional inducement to the British Empire Steel Corporation, Limited, to incorporate in the province. The prime minister and members of the government of Nova Scotia urged from the inception of the British Empire Steel Corporation that in view of the fact that the great bulk of their properties were in that province, and the fact that both the Dominion Steel Corporation and the Nova Scotia Steel and Coal Company and their subsidiaries are incorporated under the laws of Nova Scotia, the new consolidation should be a Nova Scotia company.

The head office of the company will be in Sydney. In connection with the securing of a provincial charter, Premier Murray of Nova Scotia said to the "Halifax Chronicle":—

"It will be pleasing news to the people of Nova Scotia that the British Empire Steel Corporation has taken out its incorporation in this province. Some time ago it was intimated that the incorporation of this great industrial concern would be taken out at Ottawa, but during the last few days the directors decided that incorporation in Nova Scotia was good enough for them, and under the Provincial Joint Stock Companies Act they would have all the legal status necessary to carry on their business affairs. The Dominion Steel Corporation was incorporated in Nova Scotia under the Provincial Joint Stock Companies Act, and the Nova Scotia Steel and Coal Company was incorporated under a special Act of the legislature. There was some regret expressed by many that Nova Scotia would lose these two companies, for their securities from time to time largely contributed by way of succession duties to the revenues of the province. Upon representations of the government it was felt by the corporation that their status would be just as strong under provincial as federal legislation. The incorporation in this province will preserve not only the old revenue, but should have a tendency to largely increase it by reason of the much larger capitalization.

"The fee paid for incorporation was $75,000. This is the largest fee ever paid in Canada for the incorporation of a company, and our province can boast of having a company incorporated under its laws with the largest capitalization in Canada. Public opinion throughout Canada seems to be practically unanimous in the view that the merger of the various companies proposed, is a step in the right direction. Of course, there can be no merger until the terms are approved at meetings of the shareholders of the various incorporations, but this is confidently expected to take place."

The provincial treasurer of British Columbia, Hon. John Hart, was a visitor in Toronto this week, and also in other eastern centres. It is understood that he is arranging for a loan of about three or four million dollars.

Grand Trunk May Float Twelve Million Loan in New York —Ames-Holden Rubber Bond Offering—Fire Company Will Issue Preferred Stock

ACTIONS of leading bond issues during the week ended May 26th on the Canadian exchanges were not of a notable character, trading being light, and most issues holding steady. Quebec Railway was weaker.

Announcement is made in New York that the Grand Trunk Railway of Canada five-year notes for $12,500,000 fall due July 1st next. It is understood the company is negotiating with New York bankers for a loan with which to refund this issue.

The Ames-Holden Rubber Boot Co., Ltd., is offering $1,000,000 7 per cent. 20-year first mortgage sinking fund gold bonds at par and interest, carrying a bonus of 25 per cent. common stock. The bonds are in denominations of $100, $500 and $1,000, are payable in gold at the Bank of Nova Scotia, Montreal, Toronto and New York, and are redeemable as a whole or in part July 1st, 1922, or any interest date thereafter on three months' notice at 105 and accrued interest. Being a subsidiary of the Ames-Holden-McCready, Ltd., the bonds of the company are guaranteed by the parent concern.

A special general meeting of shareholders of the Ames-Holden Tire Co., Ltd., has been called for June 7th at noon at the company's head office in Montreal. The meeting will be asked to consider a by-law passed by the directors at a recent meeting, providing for the creation and issue of $800,000 of 8 per cent. cumulative preferred stock, and to consider an agreement between the company and T. H. Rieder, providing for the placing of the preferred shares and the issue of 2,000 common shares as fully paid in remuneration for services rendered and to be rendered in connection therewith. The preferred shares are now being offered by T. H. Rieder at par with bonus of 25 per cent. common stock.

Directors of the Bank of Hamilton have decided to issue $1,000,000 new capital stock, which, when taken up, will bring the total up to $5,000,000.

The new shares will be allotted at $150 per share to the shareholders in proportion of one new share for every four shares held. The present rate of dividend, which is $12 per share, will make the new stock yield 8 per cent. per annum.

Financing of Riordon Merger

In connection with the Riordon-Kipawa merger, which is announced on another page of this issue, the directors, in planning the financing of the new concern, provide for the assumption by the new company of all the liabilities of the old in each instance. The new company, namely, the Riordon Corporation, Ltd., will issue and deliver to the Riordon Pulp and Paper Co. the following securities: $1,500,000 of 8 per cent. cumulative preference stock, $9,000,000 of 7 per cent. cumulative preference stock, carrying full voting rights and convertible into common stock, $12,000,000 of common stock, and such additional amount of common stock as may be approved of by the directors to be used for the benefit of the new company.

Mr. C. Riordon, the president of the Riordon Pulp and Paper Co., in his letter to shareholders explaining the proposed transaction, says:—

"The basis of sale, you will note, is the issue of 8 per cent. cumulative preference stock of the new company to the amount of the outstanding 7 per cent. preference stock of your company, and the issue of 1½ shares of 7 per cent. cumulative convertible preference stock of the new company and two shares of common stock of the new company for every share of common stock of your company now outstanding.

"The securities to be so received will be retained by your company, which will continue doing business, its operations being practically restricted to those of a holding company. The dividends to be received on the securities so held will be amply sufficient to provide for the maintenance of present dividends on the outstanding preference and common stock of your company, and the present shareholders may look forward with confidence to further returns conditional upon the successful operations of the new company. The consideration to be received by your company, as above stated, includes the securities issued for its interest in Kipawa Co., Ltd., and the other holders of common stock of the last-mentioned company will receive shares of common stock of the new company in return for the surrender of their present holdings on the basis of 1½ shares of common stock of the new company for one share of common stock of Kipawa Co., Ltd. In this manner the new company would be absolutely controlled by your company, and its present policy will have an enlarged field of operation."

Respecting the exchange of stock on the part of the shareholders of the Kipawa Co., Ltd., Mr. Riordon says:—

"The plan provides for the issue and delivery to your company of $6,000,000 par value 7 per cent. convertible preference stock and 12,000,000 par value common stock of the new company, being the consideration or purchase price of the entire properties, assets and undertaking of your company.

"Upon the completion of the sale 6,000,000 of preference stock of the new company will be delivered to the Riordon Pulp and Paper Co., Ltd., in exchange for the surrender of a like amount of preference stock of your company now held by it, and the $12,000,000 of common stock of the new company so received will be distributed to the holders of the $8,000,000 common stock of your company in proportion to their respective holdings on the basis of 1½ shares of common stock of the new company for every share of common stock of your company."

Dividends of the Howard Smith Paper Co. will now be at the rate of 8 per cent., according to the announcement of the directors on May 26th. The company will also issue 6,000 shares of new common stock, 5,000 of which is to be allotted to present shareholders at the rate of one share of new stock to every five held. The remaining 1,000 shares are to be kept for the company's employees who are not officers, and will add to the relatively large holdings of the company's securities among its employees. Preferred capitalization of the company at present is $1,500,000, and the common, $2,500,000.

PAPER STOCKS FEATURE MONTREAL EXCHANGE

THE week ended May 26, witnessed a rally on the New York market, after many issues had established new low prices for the year. The advances, however, were not of a character to suggest substantial recoveries, in fact, further reductions in prices are expected before the trade and credit situations are adjusted. Call money for the greater part of the week was easy at 6 per cent.

Outside of the paper and textile issues, the actions of Montreal stocks were not worthy of comment. Trading was not heavy, but the strength which attended some issues on comparatively small turnovers, was notable. Howard Smith was a feature, advancing from 102 to 126½. Following the new stock announcement, however, the price fell away 3½ points, the plans evidently having been discounted previously. Riordon responded readily to the reorganization announcement, with an advance of 7 points, such plans being considered very favorable, especially to common shareholders. Brompton rose 6 points to 106, in anticipation of new capitalization plans, which are expected to be announced shortly. In textiles, Canadian cottons was strong, gaining 7¼ points, evidently in response to the good showing presented in the last annual report, and the probability of a higher dividend. Some favorable announcements are expected at the annual meeting of Dominion Textile Co. at the end of this month, and to this is attributed the recent strength in that issue.

In Toronto the tone was generally better, and the volume of business transacted was slightly heavier than in the previous week. Brazilian was the most active issue with sales of 1,485, while Steel of Canada and Dominion Steel were next in line with sales of 770 and 765, respectively. Prices in most cases held steady, with some stocks advancing. Bank issues were stronger, Hamilton responding to the new stock announcement with an advance of 3½ points, while Merchants also gained 3 points.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

WANTED.—By large Insurance Company, Casualty man to take charge of Western business. Write fully, giving experience and salary expected. Box 311, *Monetary Times*, Toronto.

Investments and the Market

Riordan's and Kipawa Companies to Unite - New Brunswick Telephone Operating Expenses Heavy—Lyall Construction Company Had Trying Year but Looks to Future with Confidence

London Street Railway.—The employees and officials of the company have reached a tentative agreement by which the men will receive an advance of 8 cents an hour, providing a maximum wage of 52 cents an hour. The city of London will enact a by-law authorizing a straight 5-cent cash fare, with six tickets for 25 cents good only in limited hours. The present fares are seven unlimited or nine limited tickets for 25 cents.

Consumers' Gas Co.—The company has sent out notices to its customers that all accounts for gas issued after June 15 next, will be at the rate of $1.20 per thousand cubic feet, instead of at the usual rate of $1.10. Increased cost of gas coal, gas oil, taxation and labor are the reasons, says Mr. Arthur Hewitt, general manager.

City Auditor S. C. Scott, Toronto, and the acting finance commissioner, A. E. Black, have begun an investigation of the books of the company, with a view to determining whether the claim of an increase of $753,000 in cost of production is correct and rate increases accordingly justifiable. Their investigation will continue the audit from September 23 last, when the last report was made.

Peterson Lake Cobalt Mining Co., Ltd.—The annual statement of the company for the year ended April 30, 1920, shows that receipts for the year amounted to $92,086, divided between $39,918 from ore receipts, $50,000 from ore on dump, $1,019 from exchange and $1,148 from rents at mine. The general disbursement amounted to $39,407, and the head office expenses to $4,379, leaving a balance for the year of $48,299. The total surplus is now $127,886.

Mr. W. A. Lamport, the president, in his report to the shareholders, says that valuable and considerable progress has been made since the new board of directors took charge last year. "The hard work of the past year," he added, "ought to yield results in the near future. Our property is in good physical condition, our position financially much improved, and with the results in hand which we are now anticipating we think we are justified in saying that our expression of optimism for the future prospects of the company is not unwarranted."

Porto Rico Telephone Co.—Net income of the company for the year ended December 31, 1919, amounted to $83,313, as against $74,883 for 1918, an increase of $8,430. Gross earnings from all sources increased $29,669 to $344,321. Regular semi-annual dividends of 4 per cent. on the preferred stock totalling $23,200 were paid during 1919, and the board declared and paid quarterly dividends of 1 per cent. on the common shares, aggregating $24,000, as well as an additional dividend of 1 per cent. which was declared on March 16th and paid on April 1st, 1920.

The sum of $203,191 having been expended in the erection of exchange buildings at Mayaguez and Fajardo, in the extension of the metallic circuit lines and in general improvements to the system, the company will be entitled to issue new bonds to the extent of 75 per cent. of the amount, or the sum of $152,300, which will be used for the payment of the liabilities created in the manner indicated. The company on September 1st last redeemed $8,500 worth of bonds, the amount now held in the sinking fund being $16,500.

North Crown Porcupine Mines, Ltd.—The first organization meeting of the company was held in Toronto last week, and the following directors were elected: Sir John Carson, president and managing director; William I. Gear, James G. Ross, C.M.G., James Cooper, A. G. Gardner, Zida Gallagher, J. R. L. Starr, J. B. Bartram and Percy Galt. The capital of the new company has been placed at $3,000,000, the Porcupine-Crown Mines, Ltd., paying $20,000 cash and the Thompson-Krist Mining Co., Ltd., paying $10,000 cash into the treasury of the new company.

For their properties and cash payment as stipulate above, the Porcupine-Crown Mines, Ltd., receives two million shares of the stock of the new company, and the Thompson-Krist Mining Co., Ltd., the balance of one million shares. The combined properties, which are included in the amalgamation will give the new company a total area of 160 acres. Transfer of the properties took place on May 15. The executive office of the company will be in the city of Montreal.

New Brunswick Telephone Co.—Gross earnings of the company for 1919 amounted to $740,808, an increase of $91,201 over the previous year. Operating expenses, however, offset this good showing, advancing $148,694 to $615,566, leaving the net earnings at $125,252. The profit and loss account shows a credit balance of $7,223. Liquid assets amount to $139,744, while reserve for depreciation totals $762,294.

Mention is made in the annual report of the company's application which was made last December for increased revenue to the amount of $264,000. Since that time, however, the cost of all material and labor has greatly increased, necessitating a still further increase in rates. The Public Utilities Commission of New Brunswick is now considering the increasing of the company's revenue to the extent of $330,000. In order to maintain the dividend payment during the year, the amount set aside for depreciation was reduced to $2\frac{4}{5}$ per cent., whereas under normal conditions the amount should have been 8 per cent.

Grand Trunk Railway.—The annual report of the company just made public, shows gross revenue of £14,125,553, as compared with £12,655,225 in 1918. Net revenue amounted to £1,659,860, as against £1,857,152 in 1918. To net revenue was added sums received from the International Bridge Co., interest on Vermont Railway bonds, and interest on securities of controlled companies, bringing the total net revenue receipts up to £2,232,112, as compared with £2,269,833 in 1918. Operating expenses, including taxes, amounted to £12,405,705, or 87.83 per cent. of gross receipts, as compared with £10,762,969, or 85.04 per cent. in 1918, an increase of £1,642,736.

Total expenditure of £12,645,152 was made up as follows: Maintenance of way, £1,947,593; maintenance of equipment, £3,398,184; traffic expenses, £205,749; conducting transportation, £6,311,076; general expenses, £462,444; taxes. £239,447; miscellaneous, £80,659. Total charges to capital account for 1919 were £149,063, including charges for new works, new rolling stock, machinery, new rails and the acquisition of the Lachine, Jacques Cartier and Maisonneuve Railway. Total bonds and debenture stock of £35,660,615 called for payment of £1,504,178 in annual interest.

Lyall and Sons Construction Co.—For the fiscal year ended March 31, 1920, earnings, after providing for the usual charges of rent, insurance, taxes and general expense, etc., amounted to $377,734, as compared with $1,314,582 in the previous year. Net earnings available on the common stock were only $148,164, compared with $1,163,274 in 1919. Of this amount common dividends took up $140,000. After sinking fund there was a deficit on the year of $45,336, as compared with a surplus in 1919 of $114,236. The 1920 report shows, also, that a number of charges included in last year's report were abolished. Profit and loss balance was thus reduced to $356,665, as compared with $402,001 in 1919.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a **Dividend of Three Per Cent.** upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after **Tuesday, the First Day of June** next, to Shareholders of record of 30th April, 1920.

By Order of the Board.
FREDERICK WILLIAMS-TAYLOR, General Manager.
Montreal, 20th April, 1920. 131

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 133

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 1st June, 1920. The Transfer Books of the Bank will be closed from the 17th May to 31st May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.
Toronto, 23rd April, 1920. 132

BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED

(Incorporated under the Laws of the Dominion of Canada)

To the Holders of the 7% Prior Lien "A" Bonds:

Notice is hereby given that the Coupon Number 10 in respect of the interest due and payable on the 1st of June, 1920, on the 7% Prior Lien "A" Bonds of the Company will be paid on and after the 1st June, 1920, at the Bank of Scotland, 30 Bishopsgate, London, England, and as their Agents, at the Canadian Bank of Commerce, 23 King St West, Toronto, and at The Agency of the Canadian Bank of Commerce, 16 Exchange Place, New York.

For THE BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED.
R. H. MERRY,
Secretary.
Dated this 28th day of May, 1920. 147

BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED

(Incorporated under the Laws of the Dominion of Canada)

5½% FIRST MORTGAGE 50-YEAR BONDS

Notice is hereby given that, in accordance with the reorganization scheme approved at the meeting of the holders of the above bonds, held on the 19th December, 1918, 1% will be paid at the Canadian Bank of Commerce, 23 King St. West, Toronto, on or after 1st June, 1920, in full discharge of the half-year's interest, due 1st June, 1920, against surrender of Coupon No. 17.

Coupons of the face value of £0:10:0 will accordingly entitle holders to receive 97c. in Toronto, and coupons of the face value of £2:10:0 will entitle holders to receive $4.86⅔.

For THE BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED.
R. H. MERRY,
Secretary.
Toronto, 28th May, 1920. 148

DIVIDEND

IMPERIAL OIL, LIMITED

Notice is hereby given that a Dividend of seventy-five cents per share in Canadian funds has been declared by the Directors of Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any Share Warrant of the Company within three days after the Coupon serial Number Three of such Share Warrant has been presented and delivered to The Royal Bank of Canada, Toronto, Ontario, or at the office of Imperial Oil, Limited, Toronto, Ontario, such presentation and delivery to be made on or after the 31st day of May, 1920.

Payment to Shareholders of Record and fully paid up at the close of business on the twenty-fifth day of May, 1920 (and whose shares are represented by Share Certificates) will be made on or after the 31st day of May, 1920.

Shares subscribed for in accordance with the Company's circular of January 12th, 1920, will rank for the above dividend pro rata in the proportion which the amount paid up on such shares from time to time bears to the full price at which such shares were issued, viz., seventy-five dollars per share, but no dividend will be actually paid by the Company to subscribers until their shares shall have been fully paid for and Share Certificates issued therefor.

The books of the Company for the transfer of shares will be closed from the close of business on the 25th day of May, 1920, to the close of business on the 31st day of May, 1920.

BY ORDER OF THE BOARD,
144

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 133

Notice is hereby given that a **Dividend of two and one-half per cent.** (being at the rate of ten per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the quarter-year to the thirtieth day of June, 1920, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the **second day of July, 1920,** to Shareholders of record at the close of business on the sixteenth day of June, 1920.

By Order of the Board.
EDWARD SAUNDERS,
Managing Director.
Toronto, 19th May, 1920. 146

IRON MINE
FOR SALE

COUNTY OF RENFREW
Near Perth
For full particulars, report of assay, etc., apply
THE TORONTO GENERAL TRUSTS
CORPORATION
COR. BAY and MELINDA STS. - TORONTO

The directors report as presented by the president, William Lyall, explains that the period was one of trying conditions being a period of reconstruction and reorganization. The company's claim against the United States government, carried as accounts receivable, was settled satisfactorily. The automobile engine with which the company experimented was tested by experts whose reports did not offer sufficient encouragement to undertake its manufacture. The company has been fortunate in securing several large contracts in addition to those already in hand and directors look to the future with confidence. The balance sheet shows a decrease in assets during the year, the total at March 31 last, being $5,689,211, as compared with $6,731,904 in the previous year. Securities show an increase from $1,089,819 to $1,675,351. Cash, however, fell from $174,781 to $57,317. With the settlement of the U.S. government dispute, accounts receivable were lowered, being $971,889 in the latest report, against $2,533,415 in 1919.

Riordon Pulp and Paper Co.—On June 19th next, the Riordon Co. and the Kipawa Fibre Co. will hold special general meetings for the purpose of considering a proposal for the sale of the assets of both concerns to a new company, which it is proposed to incorporate under the name of the Riordon Corporation, Ltd. The Riordon Co. has held a controlling interest in the Kipawa Co. since its inception, and it is thought that the best interest of both would be conserved, as showing substantial economies in management and operation, and allowing of the raising of funds required for future development, if a new company were formed which would have behind it the proved properties of the Riordon Pulp and Paper Co., Ltd., backed by the history of many years of successful operations and the very valuable properties of the Kipawa Co., comprising one of the most modern and well-equipped bleached sulphite mills and plants in existence, coupled with very valuable water powers and timber limit resources. All the funds required for the acquisition of the properties of the Kipawa Co. and the construction of the first unit of its mill were supplied by the Riordon Pulp and Paper Co., Ltd., which company holds the majority of common stock and all of the issued preference stock of the subsidiary company as representing its investment.

The present capitalization of the Riordon Pulp and Paper Co., Ltd., is as follows: First mortgage 6 per cent. 40-year gold bonds outstanding, $1,901,100; general mortgage 6 per cent. 10-year gold bonds outstanding, $4,000,000; 7 per cent. cumulative preference stock issued, $1,500,000; common stock issued, $6,000,000.

The present capitalization of Kipawa Co., Ltd., is as follows: First mortgage 6 per cent. 10-year gold bonds outstanding, $390,000; 7 per cent. cumulative preference stock issued, $6,000,000; common stock issued, $8,000,000; in addition, the Kipawa Co. is indebted to the Riordon Pulp and Paper Co., Ltd., for various substantial amounts, representing advances made in connection with the construction of its mill and the acquisition of its properties.

RECENT FIRES

Dwyer Bros.' Bakery at Milford Loss Heaviest this Week—Furniture Factory at Harriston was Burnt—Eureka Pure Bred Stock Farm Building at Duncan, B.C., Destroyed

MAY 24th brought its quota of fires again this year, and, as the reports below show, the losses in some cases were substantial. A larger number of fires than usual is also due in part to the warm, dry weather prevailing. Forest fires caused much damage in New Brunswick, especially near the Quebec boundary, during the past week, and the village of Theriault was nearly wiped out. The villages of St. Camille, St. Fabien, Panet and Daaquan, near the city of Quebec, were also threatened.

Amherst, N.S.—May 19—Home of Mrs. F. C. Rattray was damaged to the extent of $1,000. Caused by a defective flue.

Belleville, Ont.—May 16—Barn and contents of Wm. R. Hull were destroyed. Caused by lighted lantern.

Binscarth, Man.—May 20—A fire broke out in the Waller Building and completely destroyed it. A neighboring building, owned by N. Brendle, was also destroyed.

Brighton, Ont.—May 22—The paintshop and storage building of Butler Bros.' garage and boat works and twelve automobiles were completely destroyed. Dr. Clarke's residence, garage, automobile and some furniture and clothing; M. Spencer's implement shop, Cheer and Tweedle's coal office, F. Jacque's harness shop and Booth's shoe shop were also completely destroyed. The loss is estimated at $50,000, partly covered by insurance.

Duncan, B.C.—May 19—Home of C. T. Corfield at Cowichan Bay and the Eureka Pure Bred Stock Farm building were burned. Estimated loss, $100,000.

Guelph, Ont.—May 22—A fire broke out in the Wayper Hotel, in Puslinch, near the lake, and destroyed the building and the barn beside it. Boys playing with matches is said to have been the cause.

Hamilton, Ont.—May 21—Two barns were destroyed by fire. Estimated loss, about $100.

Harriston, Ont.—May 20—A furniture factory under the management of Zingler Bros. was destroyed as the result of an electric storm. Estimated loss, $75,000, partly covered by insurance.

La Patrie, Que.—May 21—Garage and contents totally destroyed. Total loss, $3,500, with no insurance.

Latchford, Ont.—May 23—Several unoccupied frame houses were destroyed by fire.

Lauzon, Que.—May 21—House, barn and some stock were destroyed to the extent of $10,000, partly covered by insurance.

Lethbridge, Alta.—May 18—Auditorium at the ball park was destroyed.

London, Ont.—May 24—Fire broke out in the fruit store belonging to S. Badalato at 356 Richmond Street and caused between $2,000 and $3,000 damage.

Milford, N.B.—May 20—Large bakery was burned, also nearby dwellings. The loss is estimated at $100,000 over the insurance.

Montreal, Que.—Mile End Furniture and Repairing Co. was damaged. Estimated loss, $3,800. Insurance, about $2,000.

May 20—Champlain School was badly burned. Exact damage is not yet known, but the building was valued at $90,000. Patricia Beacom, aged five, of 93 Anderson Street, was fatally burned while playing with matches.

May 21—St. Henri Station of the Montreal Tramways Co. was damaged. Estimated loss, $45,000, partly covered by insurance. Eighty old cars also destroyed.

Newmarket, Ont.—Municipal waterworks and electric light plant damaged. Estimated loss, $10,000.

Prince Rupert, B.C.—May 19—The Wallace Cannery freighter, "P. & W.", was burned near Claxton with a total loss of $150,000.

Quebec, Que.—May 19—Store occupied by P. E. Blais was damaged. The total damage has not been fully estimated, but the property was covered by insurance.

Regina, Sask.—Considerable damage was done to the G.T.P. depot. Caused by boys lighting fire crackers around the depot.

St. John, N.B.—May 18—The Anglican Trinity Church at Hammond River Station was destroyed. Fire believed to have been started by the C.N.R. train.

St. Thomas, Ont.—The home of W. McInnes was damaged to the extent of $2,000, but is covered by insurance.

Three Rivers, Que.—May 20—Annette, the five-year-old daughter of Mr. Henri St. Ours, was burned while playing with a toy ship in which she put burning paper, and died a few hours after.

Walkerton, Ont.—May 23—The roller rink and R. E. Truax and Co.'s stables were destroyed; also several residences damaged. Fire believed to have been caused by a cigar butt.

Should the Board of Commerce Be Retained?

Publicity More Effective than Penalties—Review of the Organization and Work of the Board — Parliament's Power to Create Independent Body—Function was to Administer Combines Investigation Act—Why the Provincial Attorneys-General Objected — Board Might be Effectively Reorganized

By W. T. JACKMAN, M.A.

AT the time the legislation was passed in the summer of 1919, making provision for the constitution of a board of commerce, and, in fact, for some years before that, the necessity of some governmental agency to regulate certain affairs connected with the industrial life of this country had been felt by those who were fully aware of the methods that were being pursued in various lines of business. The futility of the Combines Investigation Act of 1910, as a protection to the public had been apparent for many years; and the great industrial development through combinations of all kinds during the years 1909 to 1912 had been accompanied by many evils.

It was stated by those who put the Combines Act of 1910 upon the statute books, that effective publicity is one of the most potent forces for the elimination of objectionable practices; and it was anticipated that the means provided in the act for securing such publicity would go far toward removing the evil excrescences of the body commercial. In this, however, there was great disappointment. Those who were expected to take advantage of the terms of the act to initiate proceedings in the case of any combination supposed to be unduly enhancing prices or unreasonably restraining trade found that the machinery provided, though ostensibly simple, was not such as could be employed successfully; and after the only great case tried under the act had been decided there was no further invoking of the statute. It is evident that the government of that day was acting with the firm purpose of restraining combinations from injurious exploitation of the public, so that many of the features of the United States system which were antagonistic to the public welfare might be avoided in Canada.

Why the Board Was Instituted

But the legislation of 1910, which left the initiative against any combination to be taken by a few private citizens, could not be given effect readily. The public has an abhorrence of the law in general; they have learned that in cases which seemed to be absolutely clear in regard to the justice of the claim the outcome has been too often disappointing. Moreover, in cases in which there should be an investigation of the affairs of an industrial combination, from which the public is to benefit, the initiative should be taken and the expense borne by the government, representing the public, or by some body to which the government has delegated authority. For some years the people waited for their representatives to take action along these lines and establish the appropriate authority to guard their interests.

Then, too, a few of the commercial classes were desirous of having some regulative body organized which would put an end to some of the uncommercial practices and raise the standard of business morality. It was felt that there ought to be in Canada an organization which would do for business here what had been done in the United States by the Bureau of Corporations and its successor, the Federal Trade Commission—a system which would repeat for industry the good work which had been done by the Board of Railway Commissioners of Canada for the field of transportation. With these objects in view the Board of Commerce was constituted.

Its Powers

A few words are necessary in regard to the legislation under which the board acts. By the statutory authority the board is "empowered and directed to restrain and prohibit the formation and the operations of combines," and the expression "combine" refers to those combinations dealing in articles of commerce which have, in the opinion of the board or its representative, "operated, or are likely to operate, to the detriment of . . . . the public, consumers, producers or others." Combines, then, include a great variety of business organizations, not only those which are material, like trusts, mergers and monopolies, no matter how these may be effected, but also contracts, agreements or arrangements which have or are designed to have the effect of preventing or limiting production in the economic sense, or of lessening or preventing competition, or of restraining or injuring commerce.

According to a member of the board, who was responsible for the drawing of the act, "The key-note of this act is that a combine is not necessarily an evil thing." In other words, a combination or an agreement of certain persons to do a particular thing, even though the combination incidentally injures some individuals or firms, is not necessarily a bad thing, if the result is to the advantage of the rest of the people. Price-fixing agreements or other species of arrangements are not necessarily offensive. As a result of this legislation, the legality of such things depends upon whether they are or are not in the interest of the public. Of course, this is nothing new, for there was a distinct recognition of this point of view in the Combines Investigation Act of 1910. But the legislation of 1919 specifically states that the consumers are not alone to be protected; the combination which acts as a detriment to any class, whether consumers, producers or others, comes within the scope of the board, provided the combination is one with relation to an article of commerce. It is seen, therefore, that the board was intended to regulate the relations of all classes engaged in the production and distribution of articles which enter into trade, except combinations of workmen for their own protection. What combinations are lawful for the welfare of the public and what are unlawful is a question which is left to the sole determination of the board.

Objections from the Provinces

A radical departure has been made by this legislation, in the fact that now no prosecution for an offence against section 498 of the Criminal Code can be commenced except upon the written authority of the board. It was this, more than anything else, which stirred up antipathy to the board on the part of the attorneys-general departments of the provincial governments. To take away from these departments what had been hitherto acknowledged as their prerogative and to place them in a position in which they could not initiate any action against a criminal combination, was a very decided transfer of authority. The act states that the attorney-general of a province may not now proceed against any combine under the criminal law without written permission from the board. The reasons for this change were given by the framer of the act. at a meeting of an association of business men in Ottawa last August, when he asserted that the Board of Commerce would stand between the public and the accused person and say, "There has been established in Canada a board which the Parliament . . . . and the people behind them, at any rate, imagine will in time become quite expert, much more expert upon business matters than the ordinary criminal courts of the country can ever become, and there has been interposed, as a protection between persons accused of this offence, so peculiarly hard and so expensive to try, and the criminal dock, the preliminary investigation of the matter by this body." The argument was that, because criminal cases were formerly tried before separate judges, and these judges had no opportunity of getting together in conference and learning from one another, each case would be decided on its own merits, by judges who had had no experience in similar cases, with the result that even in identical or comparable cases the decisions differed widely. But when, under the present legislation, all cases come before one body, which lays down certain rules to bind it, in the course of time there will be evolved a court skilled in commercial law and commercial morality, which will be of great advantage to business.

How Action is Taken

To set the machinery in motion is a simple thing. Any British subject resident in Canada and of full age who thinks that a combine exists or is being formed may go before one of the commissioners (except the chief commissioner) and make out a *prima facie* case. When he has placed certain data before the commissioner and proved certain facts, if the commissioner is satisfied that there is reasonable ground for believing that a combine exists, or is being formed, he may order an inquiry and trial. If he is not satisfied, he may refuse to order an investigation, in which case the papers and documents bearing on the case must be placed before the chief commissioner and the latter may order an investigation, despite the commissioners' refusal, if the facts disclosed in the papers seem to warrant it.

If, after hearing the case, the board is satisfied that a combine exists, or is being formed, it may order the parties thereto to desist from the practices proved against them; and if they refuse to obey the order they are liable after ten days to a penalty not exceeding one thousand dollars and costs or to two years imprisonment. These, of course, are the maximum penalties—the fine might be a cent a day and the term of imprisonment might be a single day. It would seem as if the maximum fine or period of imprisonment were largely a threat for the purpose of deterring evil-doers from committing a breach of the law; but it is evident that it was not meant to be put into effect. In fact, a high legal and judicial authority does not hesitate to declare that he believes this maximum penalty is so great as to be unenforceable. If the board after investigation of case thinks criminal action should be taken, it may send to the attorney-general of that province certified copies of the record and the facts, with a recommendation that prosecution be instituted.

Independent of Any Minister

The powers conferred upon the Board of Commerce are very broad, but we need not state them here. Usually an act reads, "This act shall be administered by the minister of ———"; but there is no such stipulation here, for neither the Combines and Fair Prices Act nor the Board of Commerce Act reads that way. Both are administered by the Board of Commerce as an absolutely independent body. So far as the exercise of its powers is concerned, it is entirely independent, and, in the words of the framer of the act, "Nothing else would have possibly sufficed. If the members of such a board as this cannot be independent, they had better not exist." It requires only a careful study of these acts to see how far-reaching is the authority which has been delegated to this court. Of course, provision is made for appealing under certain conditions from the decision of the board to the Supreme Court of Canada on questions of law or of jurisdiction, but even here the granting of leave to appeal to that court is in the discretion of the board. Then, too, the Governor-in-Council may vary or rescind any order, decision or regulation of the board. Subject to these two provisions, every order of the board shall be final and "no order, decision or proceeding of the board shall be questioned or reviewed, restrained or removed by prohibition, injunction, certiorari, or any other process or proceeding in any court" (Sec. 41). Note again, that "Any rule, regulation, order or decision of the board shall, when published . . . for three weeks in the "Canada Gazette," and while the same remains in force, have the like effect as if enacted in this act, and all courts shall take judicial notice thereof" (sec. 39).

It would seem, from the foregoing, that the legislation under which the board operates was intended to make this body independent even of Parliament and to give it more extensive authority than any similar body in any other country. What wonder, then, that appeal has been made to the Supreme Court to test the constitutionality of the legislation under which the board acts, to see whether it transcends the provisions of the British North America Act. It would seem to be a strange procedure that Parliament should create a body which is now "absolutely independent" of Parliament. There are also good reasons to doubt whether the Dominion Parliament has legislative jurisdiction to enact some of the provisions of these acts; for under the British North America Act it would appear that some of the matters in dispute come rather under the provincial sphere.

Misconception of Board's Purpose

From such a grant of power to the board what has been the outcome in the way of results? Has the board justified its existence? At the time the board was organized great hopes were entertained by the public that through its activities there would be the cessation of profiteering and a material reduction in the prices of the necessaries of life. In justice to the board, it should be said that the legislation under which it was established makes no mention of any such possibility. The board was authorized to administer the Combines and Fair Prices Act, which is described as "An Act concerning the Investigation and Restraint of Combines, Monopolies, Trusts, and Mergers and the withholding and enhancement of the price of commodities." Nothing here stated or implied gives any indication that there should be a reduction of the prices of commodities for ordinary consumption. The commissioners themselves have interpreted their function as the control of profits, not the determination of reasonable prices. Despite this fact, however, the public had been led to infer that there would be a substantial lowering of the cost of living; and now that the cost of living has advanced there is general dissatisfaction on the part of the consumers. This increase in prices should not be laid to the charge of the board as an indication of its failure.

Government Encouraged Exports

Those who are familiar with trade conditions and the activities of the Dominion government with regard to these conditions, have been fully aware that there have been governmental agencies in Ottawa, supported by the people, which have been doing their utmost to encourage exportation from this country in order to get the highest prices for Canadian products in the world's markets. Even embargoes placed by the government upon the exportation of certain commodities, and supposed by the people to be effective for keeping these commodities at home in order to reduce or keep down the prices of them to domestic consumers, have been largely paper embargoes, for at the same time licenses have been freely granted for exporting these goods. The fact is that every effort has been made to encourage the export trade, with the ostensible purpose of changing an adverse to a favorable balance of trade and thus helping to correct our international exchange situation. With high prices prevailing abroad, it was inevitable that business men should seek the foreign market and send their goods where the highest profits were to be secured. It is clear, therefore, that the governmental policy has helped to perpetuate high prices; and any body that attempts to bring down prices will soon find itself working at cross purposes with the government.

Profits Not a Factor in Prices

Much the same thing must be said regarding the control of profits by the board. To endeavor to control prices by trying to control profits is futile, for there is no direct connection between these two, except in unusual circumstances where a dealer or an association of dealers uses a strategic position, economic or social, to unduly enhance prices with the consequent increase of profits. Profits are not determined by the same forces as those which fix prices, except in the case of a more or less complete monopoly. Profits arise from the character of the management and from ability to take advantage of market conditions. If the conditions in the foreign market offer a profitable field in which to make sales, the business judgment of the commercial man will lead him to ship as largely as possible to that market in order to augment his profits from legitimate enterprise; and any attempt by the Board of Commerce to limit his profits is fore-doomed to failure. Restriction of his profits upon domestic sales will be all the greater inducement for him to export to the limit in order to make up for the curtailment of his profits on the home trade. And let it be noted here again that the government not only sanctions but endeavors to stimulate exports to the greatest extent.

In nearly every instance in which the board has undertaken to limit profits this possibility of exportation has been in foreground. We have only to mention the cases of sugar, newsprint paper, flour, mill feeds, shoes, meats, clothing and milk to show how important a factor the export trade is in the adjustment of the domestic prices and profits.

Selling Below the Export Price

If, then, the home prices of these and other necessaries of life are determined by conditions in the international markets over which the Board of Commerce can have no control, one is tempted to ask what the board can do about it. There is a sphere of activity even in these cases for this governmental body, and it was well exemplified in the settlement of the sugar situation in Montreal, the first case which the board handled. Through the influence of the chairman of the board, the sugar refiners were induced to get together and take care of the domestic requirements at a price which was well below the export price. The same effects of mediation were seen in the determination of the price of milk for the city of Toronto last September, when the producers were induced to accept for their milk less than their organization had fixed as their selling price for the winter. It requires service of a high order to bring harmony out of discordant interests as in these cases; and it is no wonder that the Minister of Trade and Commerce, Sir George Foster, at an important gathering in Ottawa, when the board was being organized, said, "The board itself will be a success in proportion based on its personnel. No matter how good the theory in that Act is, ... the result will depend absolutely upon that personnel." The truth of this assertion will be universally accepted. Certain it is that there has been nothing but praise and respect for the chairman of the board.

Partial Regulation is Unfair

To those who are acquainted with the labours of the board it is manifest that most of the work done that has come to the attention of the public is in connection with the distributors of the necessaries of life—fixing the profits of the dealers in clothing, sugar, meat, etc. As a consequence, several very important questions arise. In the first place, why should the personal services of many mechanical and a few professional workers, which are just as truly "necessaries of life" as are articles of food or clothing, be allowed to proceed without any attempt to restrain them from excessive charges? In the second place, there is the landlord class who are permitted to go on unhampered, as at present, in making unreasonable and sometimes even extortionate, demands upon those who must have the "necessity" of shelter. In the third place, apparently, nothing has been done to curb the greed of some manufacturers who are making extravagant profits on such "necessities" as woollens, cottons, flour, etc.

It does not seem consistent with justice that some necessities should be singled out for regulation or control and others, which are equally important, should be left without regulation. Equity demands that similar treatment should be meted out to all in the same class. If the present conditions were allowed to continue for some time, those who are engaged in the regulated industries would tend to leave these and go into the unregulated, and, consequently, those who are employed in the distribution of foodstuffs and clothing would transfer their interests to other lines, with the effect of discouraging men from entering into the production and distribution of food supplies.

The Hamilton Grocers Case

While speaking of the relation of the board to the distributors, it will be appropriate to refer to the recent investigation and decision of that tribunal in regard to the Hamilton grocers' combine as a type of what may be expected in similar instances. I am not going to enter into the relative merits of the two sides of the case, but shall refer to certain things which may have a bearing upon the decision rendered regarding some points of the case.

In the report which was issued on sugar in 1917 by Mr. O'Connor, who was then Acting Commissioner of the Cost of Living, we find his opinion stated thus: "I believe that in most cases the interposition of the wholesale grocer or jobber tends towards economy in distribution." What was true of sugar, we should infer naturally, would be true of other things; so that, at that time, he was convinced that the wholesaler was necessary to the most economical distribution. Leaving aside entirely the question of the reason for this faith, which is very inconclusive, and which is nullified by the opposite practice in many instances, we may refer to another statement which he made after his appointment to the board, when, alluding to the results of his earlier work, he said: "I can say broadly, as I have stated before, that I found little wrong with their profits, and I became convinced that what trouble did exist was further back." Again in his decision regarding the York Trading Co., he speaks of the wholesaler in the following terms: "I am very clearly of opinion that he performs for the community a very valuable service, so valuable indeed, that 'if he did not exist it would be necessary for us to invent him.'"

In considering all the pronouncements of the commissioner from various sources and at different times it becomes clear that he is strongly sympathetic with the cause of the wholesale grocers, and the now famous letter of the latter association to the Prime Minister urging his appointment as chairman of the board is public property. As a final illustration of this attitude, we recall that recently the Canadian Canners and the Dominion Canners were required to pay over to the wholesale grocers the amount of a loyalty rebate, which, according to the Federal Trade Commission, would probably be illegal in the United States.

Leave Business to Regular Channels

Closely akin to what we have been describing, there is one respect of the legislation which requires mention. I refer to section 17 (2) of the Combines and Fair Prices Act, in which it is stated, "........ nor shall any manufacturer, wholesaler or jobber, because anything herein contained, be under obligation to sell to other than such classes of persons as are accustomed to purchase from manufacturers, wholesalers or jobbers, respectively, nor shall any person be under obligation to sell otherwise than in accordance with the ordinary course of business." The evident intent of this provision is to keep trade going through the regular channels of wholesale and retail establishments, and to prevent the development of co-operative associations, consumers' clubs and similar organizations, which have been a means of benefit to consumer members wherever they were able to buy from the manufacturers or wholesalers. This provision, which, as Judge Robson has said, "removes the last chance the consumer had to do anything for himself in reducing the cost of living," might seem to have been approved by parliament unwittingly, but the framer of the Act seems to have inserted it of set purpose, for he says, in the decision regarding the York Trading Company, that this, in his opinion, is a wise policy. In other words, this opinion has been incorporated by parliament into legislation as a declaration of that body's trade policy for the whole commercial mechanism; and is to be the determining element in the decision as to the avenues along which trade may be pursued.

This provision, then, hedges about the consumers of the country; it tells them what is the lawful course through which the distribution of necessities may take place, and gives them no choice but to follow in the way laid down as legitimate. It is more than passing strange that parliament should not have allowed the consumers of the country the utmost opportunity to work for their own welfare by buying their necessities in the way which they think most economical, rather than forcing them to pay tribute all along that line which others consider to be for the best interests of the country. Would it not be wise to allow the people to choose, rather than having the choice imposed upon them from above?

Board Should be Reorganized

I have given enough in the foregoing account of some of the board's work to indicate that there is need for a thorough revision of its entire policy, and of the legislative authority under which it operates. Although the constructive results of its efforts have been meagre and much hostility has been aroused against it, the board, if reorganized in personnel, purpose and methods, might be of great service to the country. There is much important work that awaits a board which is properly qualified and constituted; and I may be permitted, in closing, to suggest some lines of activity which should be undertaken.

Publicity is one of the greatest educative and corrective agencies that can be employed to mold business life into the best form and character. There are many of the business practices of the present which could not stand the light of public scrutiny, and if they were shown in their essential nature those who commit such acts would be compelled to desist from them or lose their standing among their business associates. Much more can be accomplished in this way than by the threatening arm and the uncertain course of the law. The dragging of doubtful or shady practices and of unfair profits into the light of day, so that the public, as a whole, may know what is going on, would be a much more potent deterrent to the unscrupulous or the profiteering commercial man than many of the penalties imposed upon corporations through the secrecy of the law courts.

How Publicity May be Obtained

To give this information to the people, not in vindictiveness against the sinner, but in an impartial and scientific way—not for the sake of ostentation in getting even with some public malefactor—would require the work of carefully trained experts (economists, accountants, lawyers, etc.), who were eager only for the presentation of the truth. These should be able to examine the books of firms, to dig out the facts from the records, to know the economic conditions under which a particular business is carried on, and the economic principles which are the fundamental groundwork of all business. After investigation of its affairs they should be able to discern the evils and the good connected with any business, and to suggest the appropriate remedies for correcting the former. The investigators should be thoroughly familiar with financial matters so as to be able to follow clues and get to the bottom of the financial management and methods. The present idea that the board can send out questionaires to the firms, "and when the answers come in, you can hand your list to a clerk, if you like, and he can put his finger on the names of those who need to be tried," indicates a complete lack of knowledge of the great variety of ways in which facts may be distorted, falsified and concealed.

The organization of an industry; the interrelations of the corporations in one industry with those in other industries, either through community of stock holdings, community of directors, or by other means, the financial control of industries and corporations; the practices and profits of, as well as the necessity for, middlemen;—these and a great many more facts should be given to the public. Democratic government is based upon an intelligent electorate and educated citizenship, and it is impossible for the elector to vote properly unless he knows the facts by which to form an intelligent opinion of men and issues. How can one be a patriotic citizen of the country without knowledge of the country's industrial and commercial life? Here is work for a Board of Commerce to elicit the fine results from an improved business morale and enlightened conscience through the stimulating influence of judicious publicity.

TO ENLARGE NATIONAL RAILWAY SYSTEM

Announcement was made from Montreal on May 21st that the Committee of Management for the co-ordination of the Grand Trunk Railway with the Canadian National System had been appointed, consisting of C. A. Hayes and S. J. Rutherford, representing the government, and Frank Scott and W. D. Robb, representing the Grand Trunk.

The four gentlemen above named appointed Howard G. Kelley, president of the Grand Trunk, as the fifth member of the committee and chairman.

All members of the new committee are well-known railway men. Howard G. Kelley has for some years past been president of the Grand Trunk System; C. A. Hayes is at present vice-president of the Canadian National Railways, in charge of traffic; S. J. Hungerford is assistant to the vice-president of the Canadian National Railways; W. D. Robb is vice-president of the Grand Trunk, in charge of transportation, construction and maintenance; Frank Scott is vice-president and treasurer of the Grand Trunk.

A first Swiss Watch and Jewellery Fair and Branch Industries will take place in Geneva from the 11th to the 25th of July, 1920, to permit foreign buyers to acquaint themselves with the evolution which has taken place in these Swiss industries, and with the novelties which they have been able to create these last few years.

THE COURSE OF COMMODITY PRICES

REPORTS of general reductions in the wholesale and retail prices of goods indicate what may be expected in the near future, rather than a real depression at the present time. While the stock markets and some other business indices have, during the past few months, been foreshadowing a business recession, the present movement does not appear to be genuine. In fact, the price reductions so widely advertised in the United States and in Canada by retail dealers seems rather to be a huge selling campaign, aimed at keeping up the public demand for commodities, rather than an effect of public apathy in buying. Wholesale and retail houses are now convinced that the inflated prices of the present will not last long, are exercising the utmost caution in buying, and are no doubt making every effort to dispose of such high-priced stocks as they have on hand. This very action on their part is significant of what may be expected in the future.

The movement has none the less been a puzzle. Financial authorities which have been preaching caution for many months past have not seized upon it to any extent in justification of their arguments. The following extracts, selected from comment which has come to hand during the past week, gives a fair idea of current views as to the present situation:—

"The country is in the throes of a price-cutting movement which seems destined to relieve the credit strain and to increase the supply of accommodation for essential enterprises. This is a development of great importance, but the process must be undertaken with great caution, as deflation is more dangerous than inflation, since falling prices injure the people as producers and merchants, while rising prices injure them as consumers only. Readjustment was inevitable, however, as the advance in commodity prices had reached a point where it worked great hardship to the people, and the whole nation resented it. Under the leadership of the Federal Reserve Board a nation-wide movement has been undertaken to reduce the volume of speculative loans, especially those where the proceeds can be traced as being used to carry stocks of provisions and foodstuffs for higher prices. The commercial banks really began this campaign on their own account long ago, with the idea of enlarging the supply of funds available for legitimate borrowers. The movement has gained great headway, since some of the large department stores announced horizontal reductions of 20 per cent. in the price of all merchandise, except certain specially-priced goods."—National City Bank of Chicago, June 1st.

"General business seems to be slowing up to some extent, though some observers insist that the manifestations are merely seasonal. Some lines and some sections of the country show increased business and general optimism. Most of the uncertainty encountered in this country and Canada is to be found in the east and the middle west. The Canadian northwest is showing unusual activity and bustle in the newly-opened sections. The decreased activity in shipbuilding on the Pacific coast is reflected in some uncertainty at Seattle."—American Exchange National Bank, New York, June 1st.

"The outstanding features of May have been the sharp fall in Liberty bonds and the wave of commodity selling at cut prices that has swept over the country from coast to coast with incredible swiftness. Both occurrences had been foreseen by those who give thought to such matters; both had essentially a common origin. We refer to the banking, or, more exactly, to the credit situation. It had been evident for some time that it was impossible to continue the pace at which we had been driving of recent years without danger of serious trouble. Private and corporate spending knew no bounds."—Spencer, Trask and Co., New York, May 27th.

"As manufacturers have all along complained of the inability to deliver requirements, the rehabilitation of merchandise stocks, depleted by forced sales, will create an additional demand, and, therefore, will tend to cause a rise in prices. In other words, 'the distributors are bulling the market against themselves.'"—J. I. Straus, of R. H. Macy and Co., New York department store, speaking at a meeting of the Economic Club, New York, May 27th.

"The credit strain . . . is gradually but effectively reducing speculation in commodities. Nevertheless, the legitimate business of the country must go forward, and our banking system, designed to meet just such strained conditions, must carry its share of the load. This is a period requiring the utmost care, discrimination and judgment in the conduct of business enterprises. Both bankers and business men agree that the many disturbing factors in the trade and financial situation demand unusual caution in making commitments. It is equally clear and equally important that no hysteria be injected into the situation. What is needed is cool, deliberate judgment and a determination to solve each problem as it appears, neither magnifying nor belittling its gravity. We have enormous resources and markets compared with other nations; we are in a strong financial position, with reserves to use if the emergency requires; and our efforts should be concentrated to bring about in an orderly manner a recession from the present abnormal business costs when, and only when, the underlying trade factors will permit."—First National Bank of Boston, May 15th.

"We do not agree with the views of commentators who look upon a panic or a long period of depression as being imminent. There is all the difference in the world between a panic, a crisis and a depression. Any one of these may occur independently. Panic, strictly speaking, is a state of the mind. It is purely psychological, and, such being the case, the loose employment of the word is to be deplored. Fear is highly contagious, and, as the cry of 'fire' when there is no fire may result in panic, so the ungrounded fears of perturbed people may be communicated to others and cause much trouble."—"Financial World" Investors' Service (New York), May 28th.

THE STATUS OF THE COMMERCE BOARD

REFERENCE to the Supreme Court of Canada has failed to define the exact authority of the Commerce Board. In its judgment issued on June 1, three of the justices upheld an order which the board had proposed to serve on retail clothiers in Ottawa limiting the profit which any retailer might take on men's suits and overcoats to 15 per cent., while the other three refused to uphold it. The general questions referred to the board were: (1) Whether the Board of Commerce has power to limit the profit which can be taken on a specific commodity in a specified town; and (2) whether the board has power to file its order in the Superior Court of the province affected and utilize the machinery of that court for the enforcement of the order.

The jurisdiction of the board, therefore, remains unchanged, although it has not as yet been announced whether the order in question will be enforced. The question will, it is understood, be carried to the Privy Council. In commenting upon the decision, the commissioners of the board said:—

"The effect of the decision was that the board's jurisdiction remains unimpaired. The jurisdiction having been impugned, the board submitted to the Supreme Court of Canada a stated case consisting of two questions, as to which the court, consisting of six judges, differed equally; in the result the questions remain unanswered. The legal effect is that the Supreme Court of Canada is unable to say that the Board of Commerce of Canada has not all the jurisdiction which the Parliament of Canada purported to convey to the board. The board is unable to say whether an appeal will be asserted to the Privy Council either by the government or by the interests concerned. So far as the board is concerned, it will not assert any appeal. As to the board's intentions, it will proceed to carry on precisely as by the legislation committed to it for administration it is directed to carry on. The board has nothing further to say."

The enthusiasm with which the appointment of the Commerce Board was welcomed one year ago has given place to disappointment and criticism. Possibly the commissioners have demonstrated what a commerce board should not do. In any case, some administrative body for the control of industrial enterprise is made necessary by modern economic conditions, and the subject is one which can be handled with effect by the Dominion rather than by the provinces. Such a body may be developed, possibly after years of experimenting, from the Board of Commerce. In a review of the work of the board, W. T. Jackman, who has been associated with it in some of its investigations, points out some changes which would make it more effective.

THE HUDSON BAY ROUTE

CANADA is adequately supplied with railways at the present time; in fact, we have more lines than we can provide traffic for, or rather some of the lines pass through territory which does not furnish them with sufficient traffic. Meanwhile, the main lines in the east are congested during some seasons. The completion and operation of the Hudson Bay Railway would relieve this congestion in the east, and would assist rather than injure the other roads passing through sparsely-populated sections of the west. Grading is completed on the entire route of the Hudson Bay road from Le Pas to Port Nelson, and only ninety-two miles of track remains to be laid at an estimated cost of $1,750,000. A total of $4,000,000 will be required to complete the railway, including bridges, trestles, culverts, telegraph lines, section-houses, water stations, etc. The government has already spent $13,500,000 on the railway and $6,000,000 on the harbor improvements at Port Nelson. If any construction work at all is to be done on railways by the Dominion government, would it not seem advisable to complete and operate this road, which will otherwise depreciate rapidly and soon wipe out the investment already made?

Urgent representations to this effect have been made by the west. The Winnipeg Board of Trade has made a careful study of the question. "The early completion of the Hudson Bay Railway is a matter of paramount importance to the wealth of western Canada," says a report of the Research Bureau of the board, "and holds such wonderful possibilities for the future development of the three western provinces that every effort should be made to have it completed as soon as possible. The Board of Trade Research Department, in an investigation of the project, has collected a vast amount of data, and the further the subject is investigated the better it looks. A book might be written on the future possibilties of this northern country, which possesses such wonderful natural resources, which are so dependent on the railway for the ultimate future development."

The report points out that Canada has in Port Nelson an ocean port practically in the middle of the country, presenting a new trade route to European markets several hundred miles shorter than any at present operating. Outside of the through traffic, which could be depended upon on this account, the road would also serve the new mineral belt in the northern part of the province; there are also possibilities in agriculture, fishing and water-power. In short, the prospects for profitable operation are distinctly better than they were in the case of some of the western roads already completed and operated.

Sir Herbert Ames will resign his seat in the House of Commons in order to devote his entire attention to his new position of financial director of the League of Nations. It is to be hoped that the League will be a greater success than the thrift campaign recently headed by Sir Herbert in Canada.

* * * * *

A decided slump in the theatrical business in London, England, is reported. The financing of enterprises of this kind has been an outstanding feature in investment circles in Canada during the past year, and many investors may fail to experience the rosy future which has been prophesied for these ventures.

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

Helping the Operator

We suggest that subscribers practise the following :—

1. Always consult our latest directory, because numbers are frequently changed.
2. In a moderate tone, speak slowly and distinctly directly into the mouthpiece with your lips not more than an inch away.
3. Answer promptly when your bell rings. It saves "Central" ringing again ; saves the calling party's time, and speeds up business generally.
4. When you answer give your name or the name of your firm instead of the old-fashioned "Hello," thus allowing the conversation to begin without waste of time.

Co-operation with the operator, as above, cannot but help your service.

The Bell Telephone Co. of Canada

PERSONAL NOTES

Mr. H. C. Taylor, formerly car service agent of the Canadian Pacific Railway at Toronto, has been appointed superintendent of car service, succeeding Mr. R. A. Sewell, who has been transferred.

Mr. W. R. Wilson, general manager of the Crow's Nest Pass Coal Company, has been elected to the presidency, to fill the vacancy caused by the death of Mr. Elias Rogers a few weeks ago.

Dr. F. R. Bennetto, chairman of the Light and Heat Commission of Guelph, Ont., has resigned, His disfavor of the manner in which the extra Hydro power was allotted, is given as his reason.

Mr. R. D. Little, secretary of the Sterling Bank of Canada and editor of the bank's monthly paper, "The Teller," resigned recently to enter the service of the Guaranty Trust Company, New York.

Mr. M. E. Manning, who has been recently appointed manager of the Toronto agency of the Excelsior Life Insurance Company, brings to his new position over ten years successful experience in agency work. As a former secretary and executive committee member of the Toronto Life Underwriters' Association he is well and favorably known to local insurance men. The Excelsior Life has been making rapid progress during the past few years. Its statestatement for 1919 Showed $10,013,810 of insurance issued and revived, bringing the total in force to $33,735,247. Assets at the end of 1919 totalled $5,514,144. Other important changes in the Excelsior Life were made last January, when T. A. Dark, F.A.S., formerly secretary and actuary was appointed assistant manager and actuary, and Charles P. Muckles, A.A.S., formerly treasurer, was appointed secretary-treasurer.

Capt. J. Sharing has joined the investment house of Nesbitt, Thomson and Company, Limited, and will look after the firm's interests in the city of Quebec. Since his return from overseas he has been A.D.C. to Brig.-Gen. J. P. Landry.

Mr. Henri G. Gonthier has just been appointed manager of publicity for the Bank of Hochelaga, with headquarters in Montreal. He was for some time secretary to Sir Hormisdas Laporte, chairman of the War Purchasing Commission.

Mr. Frank McLaughlin has recently been elected to the directorate of the Chartered Trust and Executor Company, Toronto. Mr. McLaughlin has been identified with the company for some years as superintendent of the real estate department.

Mr. Eugene G. Audet, who has been with the La Banque Nationale for the past thirty years, acting for some time in the capacity of manager at the Chicoutimi branch, and later as inspector and manager of the Quebec branch, has been appointed assistant general manager. The appointment of an assistant general manager is a new one, the position having been created owing to the increase of the business of the bank, which has now over 300 offices in the province of Quebec, a branch in Ottawa and an office in Paris, France.

Mr. A. Pauley, who for the past eight years has been in the service of the General Accident Assurance Company of Canada, has been appointed chief claims inspector of the company, succeeding Mr. W. A. Barrington, who, as noted in these columns last week, has become assistant general manager. Mr. Pauley prior to becoming associated with the General Accident Company, was inspector for the North American Accident Company, at the Toronto office.

Mr. C. J. Brittain has been appointed vice-president and sales manager of the Canadian Fairbanks-Morse Co., Ltd., at Montreal. Mr. Brittain has been a resident of the west for the past ten years, having been transferred from Toronto in 1910, where he was in charge of the company's business at that point for several years, to take over the Winnipeg branch. In 1913, all branches in the prairie provinces were placed under his jurisdiction. In 1918, he was made a director of the company. He will be succeeded at Winnipeg by Mr. Kenneth Forbes, who for the past several years has managed the St. John, N.B., branch.

OBITUARIES.

Mr. John W. Peck, president of the John W. Peck Company, clothing manufacturers, Montreal, died last week after suffering from heart disease for a few days.

Mr. E. H. Beasley, managing director of the British Columbia Union Steamship Company, and a prominent business man of Vancouver, was instantly killed on May 24th, when the aeroplane in which he was flying, crashed to the ground.

Mr. William N. Warburton, for a number of years manager of the London and Lake Erie Railway, but who retired in 1918, died in London, Ont., on May 27th, after a lengthy illness cooasioned by an attack of influenza two years ago.

Mr. J. R. Macdonald, for the past two years joint manager of the Mount Royal Assurance Company, Montreal, and who has been connected with that company for the past twelve years, died recently. Mr. Macdonald, who was born in Glasgow, Scotland, in 1859, received his fire insurance experience while in the service of various British companies, before his connection with the Mount Royal.

Mr. Matthew C. Hinshaw, manager for Canada of the Atlas Assurance Company, Limited, died in Montreal last week after a brief illness at the age of 68 years. Mr. Hinshaw was during his whole business career engaged in insurance and for the past thirty-six years was associated with the Atlas Assurance Company, Limited, first as inspector and later as manager of that company's branch in Glasgow, Scotland. In 1891 Mr. Hinshaw was transferred to Montreal as the Canadian manager of the Atlas Assurance Company and the National Assurance Company of Ireland. The latter company having at a later date been disposed of, Mr. Hinshaw's efforts were devoted to the development of the business of the Atlas Assurance Company and its allied companies, the Manchester Assurance Company and the Essex and Suffolk Equitable Insurance Society, Limited.

Mr. G. G. S. Lindsey, K.C., who has played a prominent part in the literary and scientific activities of the Dominion for a number of years, died at his home in Toronto on May 27th. He was born in Toronto on March 19th, 1860, and was educated at Upper Canada College, the University of Toronto and Osgoode Hall. He graduated in arts in 1882, and was called to the Ontario Bar in 1886. Although not an engineer, Mr. Lindsey was thoroughly versed in mining affairs, and for many years was the Canadian representative of the Central Mining Corporation of England. For this and other corporations he was sent to China and spent a year and a half in Pekin. He was president and managing director of the Crow's Nest Pass Coal Company for several years. In 1914 the Canadian Mining Institute elected him its president.

THE STERLING BANK

Dominion Fire Prevention Association

Constitution Adopted at Annual Meeting Held in May—Drafting and Adoption of Standard Building By-laws Urged—Protection Against Lightning Losses—Co-operation With Dominion Fire College

IMPROVEMENT in the fire losses in Canada was favorably commented on at the annual meeting of the Dominion Fire Prevention Association held in Ottawa, May 12th and 13th. Representatives of most of the organizations which comprise the membership attended. Ten resolutions altogether were passed, including the following:—That the executive committee prepare model building and fire prevention by-laws and regulations, for distribution to municipalities; recommending to the provinces the desirability of enacting legislation prescribing the installation of lightning rods; recommending the establishment of a fire college for the Dominion, with which the association would co-operate; endorsing the work of the executive committee in advising municipalities regarding the provision of adequate water supplies; endorsing the plan for encouraging the installation of fire protective devices; endorsing the educational propaganda; commending the periodical examination, by local fire departments free of charge to the owner of chemical extinguishers; that the government prohibit the manufacture, sale and use of "strike anywhere matches."

"The problem of fire waste is one that is staring us in the face all the time," said W. H. Shapley, the president. Last year some improvement was shown, though the association, of course, could not take all the credit. "While good work has been done," he continued, "it seems difficult to arouse our citizens to realize their responsibility. Experts say that 50 per cent. of the fires that destroy millions of valuable property every year and throw great numbers of men and women out of employment, could be prevented. With our colossal financial burdens resting on us at the present time why are we so thoughtless as to allow this without doing our utmost to prevent it? Some people are still of the opinion that the loss is carried by the insurance companies, but, of course, every one who gives the matter the least thought knows that every dollar's worth of material that is burnt up is a total loss to the Dominion and a tax upon every citizen."

Work of the Year

The secretary, G. D. Finlayson, gave a comprehensive review of the work accomplished. He referred to the reduction in fire losses in 1919, as compared with 1918, and in the first three months of the present year as compared with the first quarter of last. The installation of sprinkler equipment has occupied the attention of the association, and information was obtained from manufacturers during the year as to the possibilities of further installations. During the year 98 properties were equipped with automatic sprinklers and 175 extensions have been made to existing systems. New installations have been retarded somewhat because of the greatly increased costs, and the element of exchange as well, but the committee found that the demand in Canada was not sufficient to warrant the manufacture of the equipment here.

Efforts were made during the year to familiarize the public as to the new amendment to the Criminal Code, and the necessity for strict observance of fire prevention by-laws. The new law has not by any means been a dead letter, said Mr. Finlayson, as convictions in several municipalities prove. The law is more effective as a deterrent, however. Another question, he said, was that of applications for insurance, and the difficulties in connection with requiring applications had not been entirely removed.

A constitution for the association, prepared by the executive committee, was presented and adopted. The membership is to include, in addition to the organizations originally planned, the Engineering Institute of Canada and the Dominion of Canada Building and Construction Industries. The objects of the Association are defined as follows:—(a) To co-operate with the Dominion, provincial and municipal governments of Canada in attempting to eliminate needless waste by fire. (b) To co-ordinate through a central bureau of information the efforts of all organizations and individuals actively engaged in fire prevention work. (c) To investigate improved methods of fire protection and to establish reasonable physical standards of fire safety. (d) To direct public attention to the urgent need for greater carefulness in respect to fire dangers, and to promote legislation for adequately safeguarding life and property from fire.

Officers Elected

The following officers for the ensuing year were elected: Honorary president, Sir Henry Drayton; president, W. H. Shapley; vice-president, J. P. Anglin; secretary, G. D. Finlayson; executive committee, E. M. Trowern, Tom Moore, T. W. Learie, J. N. Mackendrick, J. W. Graham, P. J. Jobin, and W. M. Seller; legislation committee, James White, E. M. Trowern and W. E. Long; educational committee, John Stiles, A. S. Crighton, and R. J. Wickham; committee on building construction, J. P. Anglin, James White, and Geo. F. Price; committee on public fire prevention, J. W. Graham, Geo. F. Lewis and P. J. Jobin; committee on private fire prevention, J. B. Laidlaw, Jas. McEwen, and Tom Moore; representatives on fire college committee, Prof. A. McPhail, and Jos. Tremblay.

FOREST FIRES RAGE IN EASTERN CANADA

Wide Areas Burnt in New Brunswick, Nova Scotia, Quebec and Ontario—Property as Well as Timber Destroyed—Fires Not Yet Extinguished

THE past two weeks have witnessed serious destruction in the eastern provinces of Canada as a result of forest fires. The continued dry weather has largely been responsible, and up to the present time many of the fires are still raging. New Brunswick, Nova Scotia, Quebec and Ontario have all suffered loss of timber and property, the first mentioned province having suffered the most severely.

Seventy-five separate forest, brush and slash fires were reported to the department of lands and mines of New Brunswick, up to May 26. About that date, however, fires were reported in the green woods of the heavily timbered crown lands for the first time this spring. Soon they were raging in practically every large timber area, the worst being on the Taxis River, a tributary of the Miramichi, on the Restigouche River, about 25 miles from Kedgewick, where the $150,000 fire occurred last year, and near Rollingdam, Charlotte County.

One Village Wiped Out

On May 29, the village of St. Quentin, with a population of about 2,000, in Restigouche County, was wiped out, the monetary loss being about $750,000. St. Quentin was a centre for the pulp and paper industry, and the fire started in the mill yard of J. E. Michaud, from burning embers from the forests. Among the property destroyed were 65 dwellings, three mills, two hotels, the C.N.R. station, the provincial bank and many business properties.

Although the larger fires were soon got under control, new ones continued to break out. Sunbury, Westmoreland, Victoria and Northumberland counties suffered severely. At L'Etang, Charlotte County, $25,000 of damage was done on May 29 when four dwellings, a store, a sardine factory and

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

several barns were burnt. The northern district around Campbelltown also suffered severely, and about 200 square miles of standing timber along the international boundary have been destroyed.

Nova Scotia Also Suffered

Small forest fires were reported in various parts of Nova Scotia early last week, and on May 28 more serious ones were found in Cumberland County, near River Hebert, in Hants County, near Maitland and Maple Grove, and near Lunenburg. Londonderry Mines was partly destroyed on May 30, four churches, a school house, hall and 12 dwellings being among the property burnt. Hardwood Hill suffered a loss of about $250,000, among the property destroyed being the Anglican, Presbyterian, and Roman Catholic churches, Glebe House, St. Bridget's Hall, a school building, and some dwellings. Preston and Dartmouth, opposite the city of Halifax, were threatened, and serious damage in New Waterford was prevented only with great difficulty. A lumber camp, near Kilkenny Lake, owned by A. W. Fownes, was destroyed on May 31st, with $3,000 loss.

Quebec and Ontario

The worst property damage reported in Quebec province, as a result of forest fires, was in the village of St. Joachim, where the Cote Mill and eight houses were destroyed. Many forest fires were reported in the southern counties, however, and also from the territory along the National transcontinental.

Ontario has also suffered slightly. North Bay reported a fire at mileage 45 on the T. and N. O., on May 28. Several parts of Timiskaming were suffering, according to a despatch from Cobalt on May 31, particularly near Timmins, Kelso, Bourkes, Boston Creek and Elk Lake. A saw mill and lumber supply owned by S. McChesney, at Hill View, were destroyed. The timbered areas north of Peterboro, near Buckhorn, Eagle Lake, Bottle Lake and Stoney Creek Camps, also has been damaged.

BANK BRANCH NOTES

Bank of Commerce Appoints Two New Inspectors—Bank of Montreal Opens Several New Branches

The following is a list of branches of Canadian banks which have been opened recently:—

Winnipeg, Man.	Canadian Bank of Commerce
Listowel, Ont.	Bank of Montreal
Calgary, Alta.	Bank of Montreal
Vancouver (Granville & Nelson Streets)	Bank of Montreal

Two new inspectors have been appointed for the Bank of Commerce. They are Allan McKenzie, formerly manager of the branch at Peace River, Alta., and C. G. Lewis, formerly manager of the branch at Warner, Sask.

C. J. Knox, recently manager of the Wellandport, Ont., branch of the Sterling Bank, has been appointed manager at Courtwright, Ont.

F. Walton, who before the war was manager at Kelwood, Ont., branch of the Sterling Bank, has been appointed manager of the Keswick, Ont., branch.

H. C. Samis, who for the past year has been inspector of the Union Bank in Regina, will leave for Vancouver, where he has been appointed manager of the main office in that city.

L. E. Tate, who has been manager of the Molson's Bank in St. Thomas, is retiring, and Mr. Harry Lake will succeed him.

W. A. Graham, manager of the Lacombe, Alta., branch of the Union Bank, was arrested on May 17th, and is now in Edmonton to answer charges of embezzling the bank's funds to the extent of between $25,000 and $30,000. An investigation of the books of the branch had been carried out, and the defalcations had, it is supposed, extended during a period of several years.

MAY BANK CLEARINGS

The following are the bank clearings for the month of May, 1920, compared with the corresponding month last year:—

	May, 1920.	May, 1919.		Changes.

Record Current Loans Features Bank Statement

Savings Deposits Increase Slightly, But Demand Deposits Show Falling Off —Circulation Still Moves Upward — Call Loans Abroad Increase, But Decrease in Canada—More Funds Advanced to Provinces and Municipalities

	April, 1919.	March, 1920.	April, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 571,412,857	$ 657,412,028	$ 652,918,760	+14.1	— .76
Deposits after notice	1,070,985,080	1,197,719,570	1,209,573,990	+12.9	+ 1.0
Current loans in Canada	1,107,986,523	1,322,267,030	1,347,238,230	+21.6	+ 1.8
Current loans elsewhere	125,328,561	183,642,658	185,085,021	+48.0	+ 1.0
Loans to municipalities	47,911,199	62,992,675	72,281,019	+53.1	+16.1
Call loans in Canada	86,091,844	128,233,310	125,644,859	+45.3	+ 2.3
Call loans elsewhere	155,553,666	205,202,133	206,229,451	+33.5	+ .48
Circulation	223,763,426	231,220,770	243,226,193	+ 8.9	+ 5.15

THE above are the principal changes shown by the statement of the chartered banks of Canada for the month of April, compared with the preceding month and with the month of April, 1919. Circulation, it will be observed, made a substantial gain during the month. All the principal accounts have increased during the year. No change in the authorized or subscribed capital of the banks is recorded during the month, but the following additions were made to paid-up capital and reserve:—

	Capital paid-up.	Reserve.
Sterling Bank of Canada	$ 1,175	$ 50,000
Banque Nationale	......	100,000
Merchants Bank of Canada	11,140	1,400,000
Union Bank of Canada	1,380	......
	$13,695	$1,550,000

Total liabilities of the banks, including capital and reserves, at the end of April were $2,811,434,155, compared with $2,789,254,730 at the end of March, indicating that on the whole the month was one of expansion in banking. Outside of the increase in circulation and the small increase in savings deposits, the only liabilities to show appreciable increases were balances due to the provincial governments, deposits outside of Canada, balances due to banks in the United Kingdom, acceptances under letters of credit and miscellaneous liabilities.

The course of current and savings deposits for the past thirteen months was as follows:—

	Deposits payable on demand.	Deposits payable after notice.
1919—April	$571,412,857	$1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990

The course of the deposits account during the past six years is shown in the following table:—

April.	On demand.	After notice.	Total.
1915	$347,325,937	$ 686,075,124	$1,033,401,061
1916	402,060,955	748,359,957	1,150,420,912
1917	471,312,285	874,948,724	1,346,261,009
1918	558,509,221	933,644,668	1,492,153,889
1919	571,412,857	1,070,985,080	1,642,397,937
1920	652,918,760	1,209,573,990	1,862,492,750

A comparison of the assets statements with those as at March 31st, shows that reductions in the amount of Dominion notes held were more than offset by increases in the holdings of coin and notes. The changes for the month were as follows:—

Gold and sub-coin in Canada	+	$3,196,995
Gold and sub-coin elsewhere	+	160,676
Total	+	$3,357,671
Dominion notes in Canada	—	2,342,720
Dominion notes elsewhere	—	1,368
Total	—	$2,344,088

Balances due from banks elsewhere than in Canada and the United Kingdom were reduced during the month from $58,526,306 to $54,250,752, indicating that remittances to Canada are being made as promptly as possible; on the other hand, balances due to banks abroad, elsewhere than in the United Kingdom, also show a small reduction, so there is evidently no great tendency to allow banking funds to accumulate in this country.

Banks' holdings of Dominion and provincial government securities, and of municipal securities, etc., both were reduced during the month. Loans to the provinces increased, however, from $13,585,217 to $18,768,268, and loans to municipalities from $62,992,675 to $72,281,019. Current loans in Canada have shown a steady increase during the past year, but call loans in Canada reached their maximum in January, as the following table shows:—

Loans.	Current in Canada.	Call in Canada.
1919—April	$1,107,986,523	$ 86,091,844
May	1,071,447,686	89,187,032
June	1,043,712,932	95,852,728
July	1,014,387,206	93,587,497
August	1,011,785,424	95,899,836
September	1,058,572,202	96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,423	121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859

The following comparison of call loans abroad for a four-year period shows the April figure to be a record one:—

	1917.	1918.	1919.	1920.
	$	$	$	$
January	155,747,476	132,687,066	140,819,656	170,206,805
February	162,344,556	160,239,494	155,983,681	184,469,882
March	161,616,735	167,296,701	160,116,443	205,202,133

Thornton Davidson and Co., Montreal, announce the installation of a new direct wire service to New York through E. M. Hamlin and Co., Boston, members of the New York, Boston, Philadelphia and Chicago Stock Exchanges. The firm of E. M. Hamlin and Co. have seven direct wires to New York, so that the Montreal firm will have the service of eight direct wires, including its present wire connection with W. H. Goadby and Co., New York. The growing interest in Boston in Canadian securities is understood to be in part behind the local firm's connection through its new wire service.

My Will!

You did not forget to insure your house or your motor last year, but did you make your Will and thus provide for a proper administration of your affairs in case of your death?

See us at once and make good the omission of 1919. Make your Will now.

The Imperial Canadian Trust Co.

Executor, Administrator, Assignee, Trustee, Etc.

HEAD OFFICE: WINNIPEG, CAN.
BRANCHES: SASKATOON, REGINA, EDMONTON, CALGARY, VANCOUVER AND VICTORIA 4

What is the Difference Between Administrator and Executor?

If a man leaves no will, his estate must be divided in accordance with the law. The Probate Court appoints an individual to settle the estate. The appointee is called the Administrator.

When a man does make a will, he names a Trust Company or an individual to carry out its provisions. The one so named is called an Executor.

The naming of a Trust Company as Executor insures a businesslike, systematic settlement of the estate.

Of the deoosit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

TAXABLE AND TAX FREE BONDS

Tax exempt war bonds, at present selling prices, yield a better return than taxable ones, to any investor whose income exceeds a few thousand dollars. Even the investor with an income of $4,000 would do better to buy 1922's and 1923's, than to buy the taxable bonds due in 1924 and 1934 and pay income tax on them. A detailed schedule showing just what yield from taxable securities is equivalent to the yield on tax exempt war bonds, has been issued by W. L. McKinnon and Co., Toronto. As the income increases so does the income tax rate, and so also must the return from taxable investments increase to be equal to what would be obtained from securities free of taxes. The lowest yielding war bonds are the tax-exempt 5½ per cent. Victory bonds, due 1937, which now sell at 101 and interest, yielding 5.41 per cent. In the case of a income of $10,000, a return of 6.12 per cent. would be necessary, in the case of the $2,000 of income paying the highest tax rate, to equal this. The corresponding figures for the last $2,000 of income of $20,000, $50,000 and $100,000, respectively, are 6.50 per cent., 8.02 per cent. and 13.13 per cent., illustrating the increasing desirability of the tax-free bonds in proportion as the income grows.

Figures for the disbursements for the present year, under the Manitoba Rural Credits Act, total $767,510 up to and including May 17th. This amount has been paid by the government department in 1,449 cheques. The loans during the past few weeks, it was stated, have not been so heavy as during the month of April, but it is expected that the amount loaned will have reached a total of $1,000,000 before midsummer.

SALE OF COMPANY TO CREDITORS

Where Made to Cut off Some of Creditors, Such a Sale to Other Creditors is Held Illegal by Manitoba Court of King's Bench

IN the case of Penny vs. Fulljames decided by Mathers, C. J. K. B., for Manitoba, on January 8th, 1920, it was held that the sale of an insolvent concern to certain of its creditors for good and valuable consideration cannot be impeached provided that such sale is not made for the purpose of defeating the other creditors or any of them.

The case arose through an execution for sale of a café on a judgment for $2,500, which was issued on January 28th, 1919, the sheriff seizing on April 9th. The Kensington Café Co., Ltd., was incorporated in 1916 by three persons, Nesti, Fulljames and Restivo; Nesti being made president and Fulljames secretary-treasurer. The company began business and was successful for a time, but in 1918 business fell off with the result that supplies from wholesale houses could only be obtained on the guarantees of Nesti and Fulljames. After the armistice business steadily improved till the time of the sale now attacked. On January 23rd, 1919, Penny, the plaintiff, recovered a judgment against the Kensington Café Co., for $2,500, and an execution was issued on this judgment on January 28th. But on January 18th a meeting of the company was held, by which the company was sold to Nesti and Fulljames; all assets and liabilities, except that re Penny, being assumed by Nesti and Fulljames. No change was made in the name of the café nor in its operation, and not until January 23rd was the name of the bank account changed.

Held Void Under Old Statute

This sale, it was claimed, was fraudulent and void under a statute passed in 1570 (13 Eliz., c. 5, sec. 2), by which every gift, grant, alienation or conveyance of goods or chattels made with intent to delay, hinder or defraud "creditors and others of their just and lawful actions, suits, debts, accounts and damages," is as against the person delayed, hindered or defrauded "utterly void frustrate and of none effect."

His Lordship in declaring this sale of the company a fraudulent sale, says in part:—

"They merely took over the business as a going concern and procured all the creditors with the exception of Penny and the landlord, to accept them in lieu of the company. It seems to me it is a fair inference that the dominant motive of Nesti and Fulljames was to secure a benefit to themselves by cutting out the plaintiff. Does a sale thought for good consideration made with such an intent constitute a fraud within the statute of Elizabeth?

"It is very clear that the company could not make such a sale to the defendants and retain any interest in the purchase for itself. Reserving such benefit would constitute a fraud as against a creditor who had been hindered or delayed by the transaction.

Defendants Controlled Business

"Is the position any different if the benefit is conferred upon the directors by whom the company is owned and controlled? Here the defendants owned and controlled the company and could do what they liked with its property and assets. They caused the company to sell all its assets of any value to themselves, without any other consideration than the assumption by them of some of the liabilities of the company, the greater part of which was owing to themselves, or for which they were personally liable. Business was improving and might soon again become prosperous, so they decided to take it in their own hands before the company would be burdened with the judgment against it by Penny.

Company Must Have Known Intent

"The fraudulent intent was that of Nesti and Fulljames but is through them to be attributed to the company. The company was no doubt a distinct entity, but it was so owned and controlled by the defendants that their knowledge and intention with respect to its property must be attributed to it.

"The sale to the defendants was void under the Statute of Elizabeth."

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Returns of the Montreal City and District Savings Bank and of La Caisse d'Economie de Notre Dame de Quebec for the month of April, 1920, show very little change as compared with the previous month. Dominion government demand deposits showed a slight reduction, while other notice deposits increased nearly $200,000. Holdings of public and Canadian municipal securities were somewhat reduced, while loans on securities advanced about $369,000. Total assets of the former institution now amount to $46,840,423, as compared with $46,499,586 in March, while in the latter case the figure is $13,687,877, as against $13,459,947. The following is the summarized statement:—

	CAPITAL		LIABILITIES

PRAIRIE MANUFACTURERS MEET IN WINNIPEG

Transportation, Trade Development and Industrial Relations are Features of Year's Work—Want Accident Prevention Association Under Compensation Act

LABOR questions occupied a large part of the time of the annual meeting of the prairie division of the Canadian Manufacturers' Association, held in Winnipeg on May 26. A comprehensive review of the part played by the C.M.A. in the national and international labor conferences of the past year and the work accomplished in labor legislation was given by D. J. Dyson, chairman, in his address from the chair. "Probably few of the members of the division realize the great amount of work done and expense incurred by the association in attending labor conferences and placing the views of manufacturers and employers generally before such gatherings," he said. "The necessity for the association taking an active part in such deliberations is no doubt well realized by all."

When the Dominion government appointed a royal commission, commonly known as the Mathers' commission, to consider and make suggestions for the securing of permanent improvement in relations between employers and employees, this division was one of the few organizations in Canada which placed some constructive ideas before the commission, and a special committee of the division drafted a report which was approved at a general meeting of members and endorsed by employers. This division was ably represented at the conference later held at Ottawa by W. J. Bulman, T. R. Deacon, E. Parnell, W. A. Lawson, J. L. Costello and Wm. Martin, of Winnipeg; J. E. Davies, Medicine Hat, and J. Burns, Calgary. This was probably the strongest delegation that was ever sent by the division to participate in any conference or convention called by the C.M.A.

Transportation Suggestions

W. R. Ingram, chairman of the transportation committee, submitted a very able report dealing with switching charges, telegraph rates, cartage service, regulation of boat lines, demurrage charges, and general railway conditions, and advocated that the following recommendations be made to Ottawa: (1) That a valuation of our railroads be made with a view of basing freight charges on such valuation rather than making them conform to United States rates. (2) That consideration of the statement by Sir Henry Drayton regarding the investment of the government in the Canadian Northern, Grand Trunk Pacific and Grand Trunk railways should be given, and that the property be reduced to its actual value, which could be used as a basis on which proper rates should be figured to pay interest on the value so fixed. No definite action was taken by the meeting.

The luxury taxes as affecting manufacturers and their products, were discussed, and a special committee was appointed to draft representations to be sent to Ottawa. A gain in membership was reported by J. M. Thompson, chairman of the membership committee. E. Parnell, chairman of the special committee to develop trade with Australia, introduced a resolution for submission to the annual convention at Vancouver with this end in view, which received the unanimous support of the meeting. In the absence of T. R. Deacon a report from the special committee of which he was chairman, dealing with soldiers' civil re-establishment and urging the parliamentary committee of re-establishment at present studying this problem to recommend legislation to the present session of the House of Commons which will give those returned soldiers and sailors who have not yet been re-established in civil life an opportunity to regain their pre-war status as regards earning power, was endorsed by the meeting.

J. O. Thorn, chairman of the special committee regarding accident prevention, submitted a report recommending an amendment to the Workmen's Compensation Act similar to that provided in the Ontario act which provides that employers may form themselves into an association for accident prevention and make rules for that purpose. The meeting held that this was desirable and steps will be taken to deal with such legislation.

Officers Elected

D. J. Dyson, who has acted as chairman for a portion of the past year, was unanimously elected chairman for the coming year. L. R. Barrett was elected vice-chairman and the following executive officers were elected for the ensuing year:

Executive Council—W. G. Fraser, E. Parnell, W. R. Ingram, T. R. Deacon, W. J. Fulton, F. W. Drewry, W. J. Bulman, J. O. Thorn.

Executive Committee—A. Davidson, N. W. Warren, C. F. Creighton, H. Echlin, E. F. Hutchings, H. Bell, W. T. Kennedy, W. A. Lawson, J. R. Hitchings, L. R. Baker, W. R. Milton, Major Rogers, A. B. Stovel, J. W. Ackland, G. Malcolmson, J. H. Parkhill, M. F. Christie, D. Dingwall, E. B. Reynolds, W. J. Welton, C. E. Lewis, Wm. Martin, R. A. Rogers, E. G. Parkers, T. Fernie, A. G. Hall, F. Shea, G. Stewart, G. H. Campbell, J. M. Horn, L. A. Willson.

Transportation Committee—W. R. Ingram, chairman, L. C. Stephens, J. Cameron, N. J. Breen, D. A. Clark, E. G. Parker, Wm. McKay, C. F. Roland, J. Minhinnick, P. Shea, A. Dobbs, A. E. Donavona, D. Dingle, D. Bowman, J. L. Costello.

Membership Committee—J. M. Thompson, chairman, C. E. Harvey, J. L. Costello, B. F. Windrum, A. Davidson, W. H. Brett, J. L. Paul, I. A. Turnbull, W. A. Church, H. Hutchings, C. F. Roland, P. G. Grout, A. L. Welton, G. W. Murray, W. T. Kennedy, T. Moore.

Insurance Committee—H. B. Lyall, chairman, C. C. Wardrope, J. Horn, W. Wood, D. N. Finnie, G. W. Veysey, J. S. Henderson, P. J. Smith, D. A. Harp, H. L. Wilson, Major Ackland, Wm. Martin.

INSURANCE INSTITUTE OF TORONTO

"Unusual vigor has characterized the Insurance Institute of Toronto from its inception twenty-one years ago," said H. W. Crossin, president, at the annual meeting held on May 28. "It was one of the very few institutes in the world which 'carried on' without interruption during the period of the European war. In the year just closed we established several new records, and the future is full of promise for the further extension of the benefits and influence of the organization." Mr. Crossin reviewed the various meetings held during the year. The membership is now 497, compared with 483 last year, and the finances of the institute also show an improvement. Particular attention was directed during the year to the educational courses in fire and casualty insurance, which have not in the past attracted many students. The courses are now being revised. Thirty candidates presented themselves for the examinations in the life branch, at Toronto and Winnipeg, and the list of those who were successful was read by the secretary and will be printed in the proceedings.

The following officers were unanimously elected for 1920-21:—

Honorary president, H. W. Crossin, Armstrong, Dewitt and Crossin; president, J. B. McKechnie, Manufactures Life Insurance Co.; vice-president, A. H. Rodgers, Norwich Union Fire Insurance; secretary and treasurer, C. Elvins, Imperial Life Assurance Co.; librarian, R. Leopold Jones, Canadian Fire Underwriters' Association.

Council:—Past presidents; J. R. Stewart, Aetna Fire Ins. Co.; P. C. Keys, British America Assur. Co.; W. A. P. Wood, Canada Life Assur. Co.; V. R. Smith, Confederation Life Assoc.; C. H. Fuller, Continental Life Ins. Co.; C. A. Withers, Dominion of Canada Guar. and Acc. Co.; C. P. Muckle, Excelsior Life Ins. Co.; T. H. Hall, General Accident, Fire and Life Assoc.; G. C. Moore, Imperial Life Assur. Co.; J. G. Parker, Imperial Life Assur. Co.; D. E. Kilgour, North American Life Assur. Co.; W. E. Fudger, Ocean Accident and Guarantee Corp.; C. S. Wainwright, Western Assur. Co.

DUNLOP CORD TIRES

IF YOU had the time to note the tire equipment on automobiles these days, you would believe, as we do, that

1920 IS A DUNLOP YEAR

¶ The ascendancy that shows on our sales record, naturally tallies with the "road" record.

¶ You may not know where rubber comes from, but after a purchase you'll soon know that it goes into **Dunlop Tires.**

¶ Try **"Traction"** or **"Ribbed."** The verdict on these two exceedingly popular tires is

1. That the Quality Never Varies.
2. That the Mileage Keeps Adding Up.
3. That the General Serviceability is Matchless.

CASUALTY ACTUARIAL AND STATISTICAL SOCIETY

Foundations Laid For Voluntary Social Insurance, Says President—Technicalities in Fixing Workmen's Compensation Rates

THE fourteenth semi-annual meeting of the Casualty Actuarial and Statistical Society was held in New York on May 28th. The feature of this meeting was the address of President Benedict D. Flynn, of the Travelers Indemnity Company, on "The Effect of the War Upon the Development of Social Insurance in this Country." "It is not claimed that present conditions are an index of a permanent condition," he said. "It has been shown, I believe, that the need for compulsory social insurance has been lessened and the voluntary means has been greatly developed in the past few years. Whether or not conditions will continue so that the foundation for the solution of the social insurance problem in this country by voluntary means will be laid, is an increasing question.

"We know that the recent past has been a period of inflation. There is a period of deflation and readjustment to come—in fact, it has already begun. How the financial and economic condition of the wage earning class will change during this period of deflation no one can tell. Most students are of the opinion, I believe, that the permanent status of the wage-earning class in this country after readjustment will be a vast improvement over that of pre-war days. It is the personal opinion of the writer that the development of the voluntary means of providing insurance for the workman resulting from the changed conditions of the past few years will have a permanent effect upon the social insurance movement in this country, and will postpone the day when social insurance of a compulsory character will be considered as necessary by the wage-earning class, the employer, or the public in general."

R. A. McManus, of the Travelers, read a paper on "Analysis of Health Claims by Disease." The recent revision of compensation rates called out two papers, one by G. F. Michelbacher, secretary of the National Council on Workmen's Compensation Insurance, on "The Technique of Rate Making as Illustrated by the 1920 National Revision of Workmen's Compensation Rates," and by A. H. Mowbray, actuary of the same organization, on "Actuarial Problems of the 1920 National Council Compensation Rate Revision and Solutions Developed." Mr. Mowbray also presented a mathematical paper entitled, "Notes on Poison's Exponental and Corlier's Curves." Richard Fondiller, superintendent of the bureau of records and accounts of the Equitable Life, presented the legal notes on casualty insurance decisions, which constitute one of the regular features of the society's meetings.

New Members Elected

R. D. Murphy, associate actuary of the Equitable Life Assurance Society, was elected a fellow of the society, and Miss Margaret Burt, pension expert in the office of George B. Buck, consulting actuary, was admitted as an associate without examination. The new syllabus for the 1920 examinations was adopted. There are two parts for associates and two parts for fellows. More advanced mathematics was put into the fellowship examination. The society took appropriate action on the deaths of three of its members which have occurred since the last meeting: John T. Stone, president of the Maryland Casualty Company; Gordon Case, consulting actuary, and C. A. Baxter, deputy insurance commissioner of Michigan.

At the afternoon session there was an informal discussion of the papers read at the last meeting and also a discussion of accident and health insurance, burglary insurance and improvement in insurance accounting. H. E. Freer, United States representative of the Northern Pool for Aircraft Insurance, an invited guest, gave an interesting talk on the development of aircraft insurance abroad. Incidentally, he said, that rates are lower there than in this country.

ONE FIRE UNDERWRITING BOARD IN B.C.

Movement to Organize Associations Has Spread to Casualty Lines—New Automobile Rates to be Effective Soon

(Special to *The Monetary Times.*)

Vancouver, May 28th, 1920.

THE British Columbia Mainland Board of Fire Underwriters held their last meeting on Vancouver Island, in Victoria, this week prior to the dissolution of the organization and the establishment of the British Columbia Fire Underwriters' Association. Before Vancouver became the financial centre of British Columbia the fire underwriters established their board at Victoria; owing to the rapid growth of the mainland of the province, however, it was found necessary to establish a fire board and stamping office in Vancouver, thus there were two boards in the province: One on the mainland and one on Vancouver Island. For many years Vancouver insurance men have believed there should be but one board, and that at Vancouver, while Victoria insurance men believed that as they were established first their board should continue. Arrangements, however, have now been made for one board at Vancouver and a stamping office at Victoria for Vancouver Island, as well as a staff of surveyors.

State Insurance in Australia

Mr. Wall, a prominent insurance man of Australia, was entertained at luncheon this week by the insurance men of Vancouver. At the conclusion of the luncheon Mr. Wall delivered a lengthy speech reviewing state insurance in Australasia as at present established. The information conveyed to the insurance men present was most valuable and timely as it gave the actual experience of insurance companies in the various states of Australasia in connection with government insurance; a menace which has threatened British Columbia for some years. The government in Victoria conducts a fire and accident insurance business. In Queensland they have a government fire and accident insurance bureau. In New Zealand the government conducts a fire, life and accident insurance business while in Tasmania they have passed a bill establishing state insurance.

Underwriters' Association Movement

Owing, perhaps, to the good work done by the recently formed stamping office of the British Columbia Automobile Underwriters' Association, agents of companies conducting other lines of insurance in the province are talking about a community of interests. It is an open secret that the plate glass companies are losing money in the province and the agents themselves out of fairness to the companies believe that arrangements could be made to put a stop to this state of affairs. It is said that companies selling scow insurance are figuring along the same line.

It is probable that the new tariff for automobile insurance will go into effect the first week in June. The rating committee of the British Columbia Automobile Underwriters' Association have completed their revision of the tariff and their recommendations will be submitted to the annual meeting of the association which takes place the first week in June. As the new rates must be passed upon by the company representatives in meeting assembled before being fixed, they cannot now be disclosed, but it is generally understood that the basic system of rating by merit for liability instead of horse power will be adopted, as it has been in eastern Canada. It is also understood that wherever the western rates do not correspond to the eastern rates.

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended May 28th, 1920:—

McKinley Darragh Mine, 82,204; Nipissing Mine, 527,087; Mining Corporation of Canada, 129,657; total, 738,948. The total since January is 8,550,600 pounds, or 4,275.3 tons.

PRICES MOVEMENT CONTINUED UPWARD IN APRIL

Seasonal Decreases in Some Commodities Offset by Advances in Other Lines—Index Number Registers New High Record

PRICE movements in April, 1920, continued upward, seasonal decreases in some foods, particularly eggs, being offset by increases in other lines, sugar and potatoes being prominent among foods, and flax products, hides, coke and petroleum products among materials.

The index number for the month rose to 353.1, as compared with 349.0 for March, 279.6 for April, 1919, and 136.7 for April, 1914. The chief increases for the month were in fruits and vegetables, miscellaneous foods, flax products, hides, fuel and light, and miscellaneous building materials, but there were appreciable advances in grain and fodder, animals and meats, cottons, iron and steel, house furnishings and chemicals.

Index numbers of wholesale prices by groups of commodities for April, as compiled by the Department of Labor, are as follows:—

(DEPARTMENT OF LABOUR FIGURES)	No. of Commod- ities	INDEX NUMBERS

CANADA'S FAVORABLE TRADE BALANCE DECLINING

Margin Between Exports and Imports Being Rapidly Lessened —Figures For Twelve Months Ended April 30

THE margin between Canada's exports and imports is rapidly being lessened. For the year ended April, 1918, the favorable trade balance was $636,065,918. In 1919 this amount was reduced to $368,109,664, and in 1920, a still further decline was recorded, the figure being $166,-704,900. Imports are climbing very rapidly, while exports show comparatively small advances. Compared with 1918, which year was a banner one in Canadian trade, imports show an increase of $153,240,548, while exports show a reduction of $316,120,470.

Exports of Canadian produce to the United Kingdom are steadily decreasing, while on the other hand imports from that country have almost doubled during the past year. Our trade with the United States shows an adverse balance of $355,917,110. This is slightly less than in 1918, however. Trade with British colonies and foreign countries reveals encouraging results.

The following table compiled by the Dominion Bureau of Statistics, gives the trade of Canada by countries:—

	Twelve Months ending April		
	1918 $	1919 $	1920 $
IMPORTS FOR CONSUMPTION			
Dutiable Goods	542,126,006	517,493,680	722,920,222
Free Goods	413,185,021	377,786,258	385,631,353
Total imports (mdse.)	955,311,027	895,279,938	1,108,551,575
Duty collected	161,550,207	155,339,985	193,704,174
EXPORTS			
Canadian	1,546,043,991	1,209,771,313	1,228,359,325
Foreign	45,332,954	54,118,289	46,897,150
Total exports (mdse.)	1,591,376,945	1,263,889,602	1,275,256,475
IMPORTS BY COUNTRIES			
United Kingdom	79,898,919	72,882,887	140,789,822
Australia	2,327,661	4,925,562	1,340,824
British East Indies	17,052,258	14,872,529	16,997,288
British Guiana	6,516,044	6,803,669	7,413,045
British South Africa	740,391	1,117,720	703,418

News of Industrial Development in Canada

Large Timber Deal Being Consummated in Ottawa River Valley—British Goods Again Finding Market in Canada—No Canadian Pulp For Europe For at Least Three Years, is Opinion of British Paper Controller—Effort to Promote Trade With West African Coast

WITH complete details still lacking, announcement was made this week of the consolidation of Ottawa Valley timber interests, which promises to be an outstanding event in the development of the pulp and paper industry this year. Reports from Montreal confirm the recent rumors that the W. C. Edwards Co., and the Gilmour and Hughson Co., of Ottawa, through the efforts of I. W. Killam, of Montreal, would amalgamate. It is understood that the two above-mentioned companies will be combined with the properties of the Kipawa Co., Ltd., and the Ticonderoga Pulp and Paper Co., under the ownership of the Riordon Pulp and Paper Company, under the name of the Gatineau Co., Ltd. A pulp and paper mill, according to present plans, will be erected either at Cascades or Chelsea, Quebec, for the primary purpose of manufacturing pulp. The scheme of developing the Gatineau Valley, is in keeping with the operations of three other pulp mills operated by the Riordon Company, which are located at Hawkesbury, Kipawa, and Merritton, Ont.

The W. C. Edwards and the Gilmour and Hughson properties are among the largest in Ottawa River Valley and comprise several sawmills at Ottawa and Rockland, and most extensive timber holdings, approximately 8,000 square miles of limits, mostly located on the Gatineau River, with an undeveloped water power of 50,000 h.p. at Chelsea, Que., and a smaller undeveloped water power on the Nation River. With the new combination will also be included the large timber limits and 50,000 h.p. of undeveloped water power originally belonging to the Bronson Co. on the Quinze River.

The combined companies will control approximately 12,000 square miles of timber, containing 25,000,000 cords of pulpwood, 1,200,000,000 feet of standing pine, 150,000 horsepower from water sources. Estimated pulp and paper capacity will reach an output of 150,000 tons a year, and pine output will be 125,000,000 feet.

British Products in Canada

British trade is gradually regaining its position in Canada, according to views presented at a meeting of the Canadian Association of British Manufacturers in Toronto on May 31. "By the end of the year the United Kingdom will have regained its position as the first trading nation in the world," said F. W. Field, British Trade Commissioner in Ontario. After referring to the progress made by the Toronto and Montreal branches of the Canadian Association of British Manufacturers, Mr. Field spoke of the close cooperation between the association and the trade commissioners in Canada. In these days when sentiment is strongly in favor of trading within the British Empire and there are good business reasons for the development of empire trade, the association, he said, has scope for important work and its membership will undoubtedly increase rapidly.

"There are about 1,200 United Kingdom firms represented in Ontario," said Mr. Field. "The opportunity for United Kingdom trade in this market is good in a number of lines, despite the competition of foreign companies. Given aggressive treatment by the British manufacturer this market will undoubtedly yield a substantial volume of business, as it has done in the past."

President G. A. Marshall declared that the object of the gathering was to bring together in closer fellowship those who are carrying on Britain's trade overseas. "The principal reason for this meeting," said the president, "is to decide whether we will have the head office in Toronto or Montreal. We in Toronto are of the opinion that this city should be the central point for its meeting because of its geographical location. We believe that the opening up of other branches in Ontario and the far west would develop more rapidly were the headquarters for the Dominion organization located in Toronto."

No Relief for White Paper Shortage

After spending three months in Canada investigating the wood pulp situation, Ralph Hall Caine, British paper controller, arrived back in London, England, last week. As far as England is concerned, he dispelled all hope of relief for the white paper shortage. It is his opinion that there is not the slightest chance of Europe getting any pulpwood from Canada for at least three years. When interviewed on the other side Mr. Caine said:

"The provinces of Quebec, Ontario and New Brunswick refuse to allow the export of pulpwood to the United States or anywhere else, holding that if anyone wants it, let them erect their factories in the provinces named and make the pulp on the spot. As a result the United States may adopt retaliatory measures. I found the officials of the three provincial governments named adamant in their refusal to allow pulpwood to be exported, while the Ottawa government seems unable to interfere.

"Unless some solution is found, it is likely to make international complications, but I believe the bridge over the difficulty can and will be found. What is wanted is British capital to develop the pulp industry of Canada, otherwise big interests of the United States, which require the paper worst, may possibly jump in and do so. One thing is certain, the talk of retaliatory measures will not help matters.

Trade With West African Coast

Through the medium of the new steamship route, which is to be inaugurated this month by the Elder, Dempster Co., W. Fennell, representative of the English shipping house of Crombie, Steedman and Co., with a view of promoting trade between Canada and the west coast of Africa, has opened offices in the Windsor Hotel, Montreal, where he will receive those who are interested.

Mr. Fennell has come via New York, where he made many inquiries and found that many merchants and manufacturers were interested in the projected route; in fact, it appears that in the United States there is a great tendency on the part of shippers for various reasons to use the port of Montreal. At the same time those who are behind this latest steamship service are anxious that it shall be essentially a service that will be substantially maintained for and within the British Empire; hence every effort is being made to encourage Canadian trade. Up to the present moment the West African trade has been in the hands of Great Britain and of Germany, but the Mother Country is so full up with orders that it cannot fill all the orders coming in, while Germany is naturally unable to resume her pre-war trade; thus there is an exceptional opportunity for Canada to plant her foot in that territory. Mr. Fennell has not visited West Africa personally, but he has all the information that comes from being associated with a business house that is linked up with the trade.

Miscellaneous Notes of Industry

The Norton Co., of Worcester, Mass., U.S.A., announces the establishment of the Norton Co. of Canada, Ltd., at Hamilton, Ont., for the manufacture of grinding wheels for the Canadian market. Mr. Robert C. Douglas will be the Canadian manager.

Work on the $200,000 factory of the Langslow-Fowler Furniture Co., Cobourg, Ont., has been commenced.

82-88 King Street East, Toronto

A branch of the Dominion Oxygen Co., Ltd., Toronto, Ont., is to be opened at London, Ont., to look after the western Ontario business of the company. The company produces oxygen for medical and commercial purposes, a large amount being used for oxy-acetylene welding.

The Leitch-McLean Elevator Co., Winnipeg, Man., has purchased seventeen elevators from the Imperial Elevator Co., and one from Hallet and Co.

Commencing July 1, a new company will operate in the former Silversmith Bldg., New Hamburg, Ont. The new company will manufacture tractors, and has signed an agreement to take over the property.

The Beatrice Creamery Co., of Detroit, will locate a plant in Sarnia, Ont., and elaborate creamery preparations are planned for this city. The Beatrice Co. has 67 creameries in the United States, and is capitalized at $4,000,000.

Controlling interest in the Brantford Emery Wheel Co., Brantford, Ont., has been secured by the Waltham Grinding Wheel Co., Waltham, Mass., and the former company, which has been in operation for ten years, is absorbed by the big United States concern. The latter has a large Canadian trade at present, and it is expected that the production of the local plant will be greatly increased.

Announcement is made from New York that the North American Pulp and Paper Co.'s and their subsidiary, Saguency Pulp and Paper Co., are negotiating a contract with English paper manufacturers for delivery in Great Britain of 50,000 tons of mechanical pulp annually. It is expected the contract will run for ten years commencing January 1 next. Negotiations have been practically closed on a cost plus basis with the exception of a few minor details.

NEW INCORPORATIONS

Canadian Fish Products, Ltd., $15,000,000—Dominion Cottons, Ltd., $5,000,000—Holt, Ltd., $5,000,000—Canadian Radio Corporation, Ltd., $5,000,000

The following is a list of companies recently incorporated under Dominion and provincial charter, with the head office and the authorized capital:—

1870 —— OUR GOLDEN JUBILEE —— 1920.

NEW BUSINESS RECORD OF THE MUTUAL

The popularity of the Mutual Life of Canada with the insuring public is being demonstrated in the amazing amount of new assurances issued. The first four months of 1920 indicated an increase of no less than 46% over the amount of insurance underwritten in the corresponding period of 1919. Insurance is in greater demand to-day than it has ever been before in the history of the world. The people are impressed with the importance of securing life insurance and naturally their thoughts turn to the Mutual of Canada. The life agent is fortunate to-day owing to the increasing demand for insurance, and especially if he represents The Mutual Life of Canada which is expanding at a rate that surprises even its most optimistic friends.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

Montreal Charter Commission Studying New Mode of City Government—Chairman Expresses His Opinion That Local Government Should Be as Independent as Possible —Owen Sound Now incorporated as a City—Prince Albert Tax Rate and Assessment

THE Montreal Charter Commission, which was formed for the purpose of formulating a new mode of government for the city, is now entering upon the most important part of its task, and it is expected that shortly a decision will be given on the following points:—

"1. Shall we have one governing body? Or two bodies—one legislative and the other administrative? 2. How large a body? Elected for how long—all at one time or overlapping terms? 3. Is present ward arrangement satisfactory? 4. Is mayor to be elected or appointed? His powers and salary? 5. Shall we recommend a city manager? 6. Qualification for representatives? 7. Qualification for voters? 8. Any special vote for proprietors? 9. Proportional representation? 10. Initiative, referendum and recall? 11. Compulsory vote? 12. Municipal home rule? 13. Civil service board? 14. Municipal policy regarding franchises? 15. Control of finances—sinking fund? 16. Relationship of Montreal to surrounding municipalities?"

Views on City Government

Sir Hormidas Laporte, chairman of the commission, recently expressed some interesting views on Montreal's city government. The present city charter is almost destitute of what may be called general administrative powers, with the inevitable result that frequent visits have to be made to the legislature for authority to meet the new situations that are always arising in a growing city. For the first time in some twenty years of Montreal history, for example, the present Administrative Commission has been clothed with the necessary powers to levy a realty tax in accordance with the estimated expenditure of the city. It is not known whether this power to vary the realty tax from time to time will be a permanent law or not.

While Sir Hormidas Laporte has declined to discuss in detail such points as are mentioned above, he has summarized his views on one essential point by saying that in his opinion Montreal should have such a measure of local government that would abolish the annual trips to the legislature. "In a word," he said, "our charter should provide all the necessary powers for financing and administering the city's affairs without having to go to the legislature. Taxes on real estate should be movable by which the rate of taxation should be fixed by the city comptroller, and when that is done the taxpayers, knowing the city council has such powers, will take more interest in municipal elections and in the choice of candidates.

"We see this is done in other cities. Take Atlantic City as an example. It has a charter that is contained in but 75 pages, and their administrators go to Trenton but once in five or ten years, and as in Toronto, they have to submit bylaws to the taxpayers, concerning finances, taxes, and expropriations. In Montreal we should have power to increase or to decrease taxes, and submit the proposal to the people for approval."

In concluding his remarks he also called attention to the fact that the city's borrowing power should not be increased without the consent of the taxpayers.

Mimico, Ont.—Total assessment for this year amounts to $2,149,392, an increase of $413,079 over that of last year.

Sydney Mines, N.S.—According to figures submitted to the town council recently, total assessment is placed at $2,900,000.

Newmarket, Ont.—The total assessment of the town for 1920 is $2,100,000. This is an increase of $500,000 as compared with last year.

Brantford, Ont.—According to a report issued by Assessment Commissioner Ludlow, the value of city property rose from $7,000,000 in 1916, to $25,197,000 last year.

Owen Sound, Ont.—After 63 years as a town, Owen Sound has now become a city. The population is 12,218, an increase of 450 over that of 1919. Assessment this year is $7,132,942, as against $7,022,883 last year. During the past year there were advances of $87,200 in taxable real estate, and $66,535 in income.

Prince Albert, Sask.—The rate of taxation for the city for 1920 is 42 mills for public school supporters, and 41 mills for separate school supporters, the separate school rate being lower than the public school rate probably for the first time in the history of the city. It will be necessary to raise the following amounts: $156,171 for general municipal purposes; $25,451 for debenture indebtedness; $10,064 for provincial treasury; $7,799 for emergency fund; Protestant schools, $82,618; Protestant high schools, $28,830; separate schools, $9,912.

Gross assessment for 1920 amounts to $8,859,578, and is made up as follows: Land, $5,614,100; improvements, $2,499,650; business, $642,788; income, $103,040. Net assessment totals $7,799,138.

Montreal, Que.—The assessable valuation of property is $856,213,006, according to the report of the Board of Assessors up to the end of 1919, of which religious and school properties to the value of $224,748,471, are exempt from taxation. The increase in valuation is $2,209,615 over 1918. The population of the city, not including any of the surrounding municipalities, is returned as 706,600. The taxable valuation on material and buildings owned by big companies of Montreal show the C.P.R. as $18,457,730, and the Grand Trunk as $10,519,900."

Vancouver, B.C.—The annual statement of the city for the year ended December 31st, 1919, shows a revenue surplus of $941,836. Total assets at the end of the year amounted to $53,381,074, of which capital assets were $45,836,149. The capital surplus was $10,021,755, including increase of valuation of real assets as per report of assessment commissioner. Cash in the Bank of Montreal totalled $244,672, while the treasurer's cash balance amounted to $100,949. Property valuation as at December 31st. subject to court revision, was: Improvements, $73,669,025; lands, $134,069,920; total, $207,738,945.

Sinking fund account showed a surplus of $367,268, assets being $8,238,152, and including, City of Vancouver debentures, $3,353,224; Vancouver debentures (special), $304,923; Dominion government bonds, $2,553,619; cash on hand and in bank, $282,035. The amount of debentures and stock outstanding at the end of the year was $35.299.011.

NEW FIRM OF FINANCIAL ADVISERS

Riddell, Goode and Co. is the name of a new firm starting in business in Winnipeg, with office at 417 McIntyre Building, to advise on reconstructing and rebuilding various businesses throughout western Canada. R. W. Riddell has had many years' experience in various lines of business throughout western Canada, and is very highly regarded by the leading bankers and other business men in Winnipeg. G. E. Goode has been connected with the Canadian Mortgage Association almost since its inception in Winnipeg, as valuator of farm lands and city properties. He has also had considerable experience in financial matters.

BOND DEALERS

ROYAL BANK BUILDING, TORONTO

You can eat better on 15%, *but*—you can sleep better on 6 or 7%

Securities yielding over 7 or 8% often do so at the sacrifice of safety to the principle involved. The Bonds of Canadian Provinces and Municipalities are always considered a conservative investment, giving the investor absolute security with a fair yield.

Bonds of this type can be purchased to-day at very attractive prices. The following are a few of the securities we recommend.

Amount	Security	Due	Year	Y'd'g
£ 2,800	**Province of Alberta 4% Bonds**	1 Nov.	1922	7%
£ 3,600	**Grand Trunk Pacific Branch Lines 4% Bonds (Guaranteed by Prov. of Sask.) 4½% Deb. Stock**	22 Jan.	1939	6.15%
£ 1,302	**Pacific Great Eastern Rly. (Guaranteed by Prov. of B.C.) 4½% Deb. Stock**	15 July	1942	6.15%
£ 1,000	**City of Winnipeg Ry. 4% Reg. Stock**	1 Mar.	1960	6.25%
£ 500	**City of Port Arthur 5% Bonds**		1932	6.75%
$20,000	**City of Lethbridge 4½% Bonds**	1 July	1939	6.75%

Manitoba Disposes of Another Million at 89.66—New York Financial Houses Interested in Canadian Irrigation Bonds—Edmonton Ratepayers Turn Down Money By-Laws Totalling $1,500,000 for the Second Time

THERE was little of special interest in the Canadian market during the past week, and it appears that the near future does not promise very much. There are a few municipal offerings, but these are mostly western, Ontario issues being notably scarce. It can be readily seen from the following table, that the bank is the best friend of municipalities just at present, and will continue so for some months at least:—

	1917.	1918.	1919.	1920.
January . ..	$24,487,272	$40,015,466	$32,640,198	$46,147,388
February ...	26,121,324	43,535,628	36,830,183	52,690,790
March	29,877,911	50,652,061	41,993,305	62,992,675
April	35,931,996	55,685,350	47,911,199	72,281,019
May	39,700,191	57,728,226	50,356,227	....
June	42,757,673	58,000,424	52,349,353	....
July	43,989,207	56,589,173	54,455,738	....
August	43,940,176	56,662,931	57,536,867	....
September ..	42,721,563	47,977,472	57,033,309	....
October	41,204,781	46,275,106	56,116,897	....
November ..	36,459,598	40,865,358	52,703,363	....
December ...	36,353,039	30,684,052	42,635,290	....

Local Selling

The disposal of bonds to local citizens is apparently becoming popular. Regina, which disposed of some $114,000 debentures a short time ago, intends to sell another small block in a like manner. Hamilton will also try to dispose of its debentures in the same way.

A notable case in this method of selling is in Halifax, N.S. It is understood that the $482,490 6 per cent. 10-year bonds have been disposed of either locally or through local brokers. The city is now endeavoring to market the $500,000 5½ per cent. 33-year issue in the same manner. It will be remembered that about a month ago the city tried to dispose of the two issues of bonds through the usual channels, but owing to the condition of the Canadian money market, was unable to do so except at a very high rate of interest, and in consequence turned its attentions elsewhere. Notwithstanding the fact that brokers were given a higher commission than usual, the city was able to effect a disposal at a very much more favorable rate than previously expected.

The long-term 5½'s are now offered at a price of 92.85 and interest, yielding 6 per cent. and the brokers' commission is 1½ per cent. The maximum tender previously was 83.51.

Provincial Loans

The province of Manitoba disposed of another $1,000,000 6 per cent. 5-year bond issue this week at the same price as the first million—viz., 89.66, United States funds, leaving just $769,000 to be provided for. It is understood that temporary arrangements will be made for this amount. Speaking of the issue, Hon. Edward Brown, provincial treasurer, said: "The bids indicate clearly that market conditions have greatly hardened since the last sale of bonds by the government in April." He stated that the exchange earnings in this loan would go to the undertaking for which the loan is made. "It was a wrong impression," he said, "that the government intended to benefit by the earnings of the exchange in all the loans made. The bond issue in April cost the government approximately 5.40 per cent. interest."

Tenders on the province of British Columbia $2,000,000 5-year 6 per cent. bonds close to-day, June 4. The province usually enjoys high credit, the last loan having been made at 5½ per cent., but, like Manitoba, will have to take the best the market can offer, which is not very much just now.

Coming Offerings

The following is a list of debentures offered for sale of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Gilbert Plains R.M., Man.	$ 38,000	6	30-instal.	June 7
Melfort, Sask.	58,700	6½	10 & 20-inst.	June 7
Vermilion, Alta. ..	26,000	6½ & 7	20-instal.	June 14
Charlottenburg Tp., Ont.	60,000	5½	20-instal.	June 14
Shawinigan Falls, Que.	185,000	5½	serial	June 16
Bowmanville, Ont. ..	13,015	6	20 & 30-inst.	June 18
Shaunavon, Sask. ..	15,500	7	....	June 21
Lawrence R.M., Man	50,000	6	20-years	June 22
Pipestone, Man.	93,000	5½	20-years & 30-instal.	June 25
Assiniboia, Sask. ..	13,500	7	20-instal.	....

Assinboia, Sask.—Offers are being asked for the purchase of $13,500 7 per cent. 20-instalment debentures. Town clerk.

Charlottenburg Tp., Ont.—Tenders will be received until June 14, 1920, for the purchase of $60,000 5½ per cent. 20-instalment debentures. (See announcement elsewhere in this issue.)

Shaunavon, Sask.—Tenders will be received until June 21, 1920, for the purchase of $15,500 7 per cent. fire-fighting debentures, which are repayable on the annuity basis. F. G. Horsey, town clerk.

Bowmanville, Ont.—Tenders will be received until June 18, 1920, for the purchase of $3,978.60 6 per cent. 30-instalment water sewerage debentures, and $9,037.63 6 per cent. 20-instalment sidewalk debentures. Bank of Montreal, Bowmanville.

Hamilton, Ont.—City Treasurer Davis will receive until June 20, 1920, applications from local citizens for 6 per cent. debentures in denominations of $100. The price is par and interest. Just $10,000 will be disposed of at present, although the city hopes to be able to dispose of $218,300 in the same manner.

Shawinigan Falls, Que.—Tenders will be received until June 16, 1920, for the purchase of $185,000 5½ per cent. debentures. These debentures are of the denomination of $100, $500 and $1,000 each, redeemable by series, which a certain number will come due at each year during five years and will be reimbursed at their maturity; and the balance of all other debentures will be payable in five years. A. J. Meunier, secretary-treasurer.

Debenture Notes

Sturgeon Creek, Man.—A by-law providing for the issue of $55,000 debentures for twenty years for school purposes has been defeated.

Outremont, Que.—About $500,000 will be spent on public works this year, according to figures just submitted to the council by the city engineer and manager.

Glenboro, Man.—A by-law authorizing the raising of $25,000 for the building of a bridge over the Souris River, near Triesbank, has been defeated by ratepayers.

Regina, Sask.—The council has passed local improvement by-laws totalling $44,300, for works constructed last year, and debentures for these authorizations will be placed on the local market.

BANK OF TORONTO BUILDING
TORONTO

St. Lambert, Que.—A by-law authorizing a loan of $500,000, has been adopted by the council. The money will be used for a fire station, public hall, water works and water mains and sidewalks and pavements.

Winnipeg, Man.—A by-law authorizing the sale of $1,500,000 debentures for the city hydro-electric department is being considered. The money is needed for the purpose covering an overdraft of $1,400,000 in the bank.

Prince Albert, Sask.—The city is seeking authority from the Local Government Board to spend $75,000 for water works improvement. A sinking fund of $204,000, which can be utilized for necessary improvements of this nature, is maintained by the city.

Cornwall, Ont.—The town has refused all tenders submitted on the $40,000 6 per cent. 20-instalment debentures. None of the bids were published, but it is understood that the highest was on a 6.75 per cent. basis. It is understood that the municipal authorities will try to dispose of the bonds locally.

Edmonton, Alta.—For a second time within two months ratepayers have turned down money by-laws totalling an expenditure of $1,500,000 to provide for power-house additions, additions to the telephone system, a concrete grand stand at the exhibition grounds and other public works. The votes were decisively against in all cases.

Sherbrooke, Que.—On June 19, 1920, ratepayers will be asked to vote on various money by-laws totalling $566,000. In the event of the passage of these by-laws, debentures will be issued and the proceeds used for various local improvements, the most important items being sewers and sidewalks. La Banque Nationale demand notes also take $87,000 of the total.

Lethbridge, Alta.—Investigation of the Lethbridge Northern Irrigation project by two New York financial houses of high standing, will be undertaken in the immediate future with a view to the purchase of the bonds of the irrigation district, L. M. Roberts, of Calgary, stated in conversation with the "Morning Alberta." Mr. Roberts, who some time ago obtained an open option for the purchase of the bonds, has just returned from New York City. He anticipates that the inquiry into the irrigation undertaking by engineers sent out by the financial houses will take place in June. The terms of his option are not such as to interfere with the right of the irrigation district to make any other arrangements for the sale of the bonds.

Bond Sales

Cainsville, Ont.—Messrs. K. V. Bunnell and Co., and I. W. Champion and Co., of Brantford, Ont., have secured the $45,000 6 per cent. debentures. The price paid is not known.

Trafalgar Tp., Ont.—Messrs. A. E. Ames and Co., have been awarded the $79,663.67 6 per cent. 20-year debentures at 97.09. Tenders received were as follows:—

A. E. Ames and Co.	97.09
Brent, Noxon and Co.	97.00
Wood, Gundy and Co.	96.43
W. L. McKinnon and Co.	96.09
R. C. Matthews and Co.	95.60

EAGLE, STAR AND BRITISH DOMINIONS INSURANCE

In its report for the year 1919, the Eagle, Star and British Dominions Insurance Co., Ltd., shows assets totalling $93,260,081, an increase of almost $10,000,000 for the year. Of these assets, $68,822,643 are in the life department; the balance includes investments at cost, $9,397,505; mortgages and loans, $2,162,014; cash, $3,071,837; and calls in respect of new stock issue, $5,412,863. When this issue is completed the paid-up capital will be $5,092,776, and the reserve, including the premium on the new stock, will be $9,720,000.

Good progress was made in Canada during the year, under the management of J. H. Riddel, and the company now has an effective agency organization in this country.

CROPS GENERALLY HAVE SURVIVED WEATHER

Wind Does Considerable Damage in West—Recent Rains, However, Help Growth

DETAILED crop report for the week ending May 22nd, and covering seeding operations on lines adjoining the Canadian National Railways in the three western provinces, was received at the head office of the company on May 29th. The report showed wheat seeding as completed in the central district, and approximately 75 per cent. completed in the prairie and western districts. Coarse grain seeding was completed in eight places in the central district and was begun almost everywhere. Thirty-four agents reported wheat several inches above the ground. There has been some damage from wind, but in general the weather is reported cool and fine. Conditions on the whole are given as favorable with bright prospects in several places.

Saskatchewan Reports

High winds during the third week in May affected practically the whole of Saskatchewan, causing from "slight" to "incalculable" damage to early crops, according to a report issued by the Provincial Department of Agriculture on May 26th. Cadillac characterizes them as the "worst wind storm in the history of the district," and reports possibly 20 per cent damage. Sceptre reports that "four days of high winds have caused incalculable damage to crops," and adds, "to-day finishes what the first three days left." A five per cent. loss by wind is estimated at Oxbow and Weyburn. Other points report more or less drifting. Wheat seeding is practically completed in the province, according to the report, and a large percentage of the crop is already above ground. Several points in the southern part report rain needed, although the moisture situation generally appears to be satisfactory. There has been no damage from grasshoppers or other insects to date.

According to a summary of reports issued on May 26th by the commercial agent of the G.T.P. at Regina, practically no damage has been caused to crops by the heavy winds of the last few days in the territory served throughout the southern part of the province by the Grand Trunk Pacific Railway. Wheat seeding is reported completed in all districts, and 50 per cent. of oats and barley is now finished.

A heavy windstorm on May 28th again injured crops in northern Saskatchewan.

The Moose Jaw district on May 26th received one and a half inches of rain, being the heaviest May rainfall for several years. Seeding of what little wheat was left to be done, and the coarser grains will be held up for a day or two, but this is compensated by the moisture which, in some places, was beginning to be needed. The high winds of the last week had dried the ground until the situation was not very promising.

Conditions in Alberta

Rain fell in most parts of southern Alberta last week-end, and improved the outlook considerably. About 10 per cent. of the crop area in the wind belt will have to be resown on account of the high winds in the latter half of May.

From statistics compiled by the special correspondents of the Calgary "Herald," in the large majority of wheat-growing districts of Alberta it is estimated that the acreage in this grain this year will be approximately 15 per cent. less than in 1919. On the other hand, there will be a much larger percentage of oats and barley sown owing to the late spring. These figures were collected about May 10th, since which seeding has been general in several parts of the south country. At the time of estimating the acreage this had not proceeded very extensively, with the exception of a few isolated districts. These are Compeer, where 40 per cent. of the seeding has been completed; at Granum, 25 per cent. has been seeded; at Anstead, 40 per cent., and Manyberries, 35 per cent. The greater majority of the districts show from 5 per cent. to 10 per cent.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

CORPORATION SECURITIES MARKET

New Brunswick Power Co. Preferred Issue—National Trust Increasing Paid-up Capital—Dominion Chocolate Offering

THE market for industrial bonds was not particularly strong or active during the past week, although it could not be said that it was weak. In outstanding issues prices held steady with Wayogamack gaining fractionally on comparatively heavy sales.

An offering of $400,000 8 per cent. cumulative sinking fund preferred shares is being made by Campbell, Thompson and Co. for the Dominion Chocolate Co., Ltd., Toronto, successors to the Hooton Chocolate Co., Ltd. The new company will have $500,000 preference stock and $1,000,000 common stock issued.

The stock is being offered at par, with a bonus of 30 per cent., of common stock. Earnings after payment at the preferred dividends shall be set aside as a sinking fund for the purpose of redemption and cancellation of the preferred shares at $110 per share and accumulated dividends.

The National Trust Co., Ltd., at a meeting on June 2, decided to increase the paid-up capital of the company from $1,500,000 to $2,000,000 by the issue of 5,000 new shares, at present authorized, but unissued, of the par value of $100 each at the price of $175 per share, to be offered to shareholders in proportion of one to three held on June 19.

Bank Stocks

In speaking of the issue of Bank of Hamilton stock, announcement of which was made in these columns last week, the general manager makes the following comment:—

"In accordance with our policy of offering such issues first to our shareholders on attractive terms, these 10,000 new shares of $100 each will be allotted at $150 per share to shareholders of record at the close of business on the 30th day of June, 1920, in the proportion of one new share for every four shares then held. It may be mentioned that the Bank Act gives power to issue this new stock at 205, but it is offered to our shareholders at $150, and at the present rate of dividend (12 per cent. per annum) will yield 8 per cent. per annum.

"A formal notice of the number of shares allotted and when payment is to be made, together with a power of attorney to accept the new stock, will be sent to each shareholder on June 30th, 1920. The Bank Act does not permit of the allotment of fractions of shares, and holders of less than four shares will not be entitled to any allotment, but the shares resulting from the unallotted fractions will be subsequently sold, and the premium realized over the issue price will later be distributed to the respective schareholders from whose shares the fractions arose."

The new issue of 34,000 shares of Royal Bank of Canada stock at $150 per share is payable in ten instalments of $15 per share, beginning July 2, 1920, and extending to April 11, 1921. Rights expire September 30, after which the unallotted shares will be offered for public subscription.

New Brunswick Power Issue

The Eastern Securities Co., Ltd., is now offering 7 per cent., cumulative first preferred stock of the New Brunswick Power Co., at 95 and accrued dividends, yielding 7.37 per cent. The stock is redeemable as a whole or in part at $115 and accumulated dividends.

Capitalization of the company includes first mortgage 5 per cent., bonds, due 1937, amount authorized $5,000,000 and issued $1.750,000; first preferred 7 per cent., cumulative stock, authorized $3,500,000 and issued $1,000; second preferred stock, 7 per cent., non-cumulative, authorized $1,500,000 and issued $350,000; common stock, of no par value, 20,000 shares.

PAPER STOCKS AGAIN DOMINATE CANADIAN MARKET

Practically All Speculative Interest Centred on Those Issues —Some Big Advances Recorded

THE upward movement in the New York market which was started last week, was temporarily halted this week, and at the close on June 2nd, price tendencies were mainly downward, although some losses were partly retrieved when call money eased off from 10 to 6 per cent. No decided changes were revealed in the credit situation, which is still tender, and it is expected that the stock market will continue to reflect the caution engendered during recent weeks.

To a certain extent the Canadian market followed New York, with the exception of paper stocks which followed a course of their own, practically all the speculative interest in the market being centred on those particular issues. Such actions, in view of the recent developments in the pulp and paper field, are considered quite natural. All companies are enlarging their producing capacity, and earnings which are now exceedingly large, will still be further increased.

In Montreal Abitibi was the leader with sales of 23,245, on a gain of 11¼ points. Brompton followed with a turnover of 17,916 shares, and a gain of 13½ points. Wayagamack and Spanish River were also active, the number of shares changing hands being 8,595 and 9,786, respectively, with considerable gains in each case. Riordon was the feature in strength, advancing 26 points on sales of 6,881.

In the Toronto market Brazilian was an active issue, sales amounting to 4,425, which is the largest turnover recorded on the Toronto exchange for some time. Its activities were also accompanied by much strength, the high for the week being 48¾ and the low 43½. The close was made at 45. Such actions are attributed to the statement by the president that dividends will be discussed at a forthcoming meeting. It is understood that an interested bank strongly urges disbursement. Riordon was notable for its strength, closing with a net gain of 19 points. This strength was not attended by much activity, however, the number of shares changing hands being 90.

FOUR MILLION FOR MANITOBA RURAL CREDITS

Provincial Treasurer Arranges for Loans and Deposits—One Hundred and Fifty New Industries Secured for Winnipeg During Year

(Special to *The Monetary Times.*)

Winnipeg, June 3, 1920.

Growing conditions in Manitoba and throughout the west are quite satisfactory. A good deal of blowing has taken place in some localities from high winds, but there have been good rains throughout Manitoba and damage from this source has abated. Strong efforts are being made to combat the grasshopper plague in southern Manitoba and with good success. On the whole, crop conditions at this date are bright.

Rural Credits Financing

The Rural Credits scheme, under the direction of the provincial government, is making good progress. Up to date, $985,000 has been loaned to farmers, which includes $140,000 advanced by two of the banks who are carrying on under the old arrangement. The provincial government is perfecting arrangements to accept deposits. Hon. Edward Brown, provincial treasurer, has this week obtained one million dollars for the Rural Credits societies at 5 per cent., and can get three million dollars more for the same purpose on the same terms in Canadian funds. This money has been obtained through the sale of short-term treasury bills. The provincial treasurer has also sold this week a million dollars worth of bonds to Wood, Gundy, and associates.

Board of Trade Annual Meeting

The securing of settlers to take up and cultivate the large areas of vacant lands in the western provinces will be one of the undertakings of the board of trade for the coming year, according to the statement made by W. H. Carter, in presenting the president's address at the annual meeting of the board of trade on June 1. W. E. Milner, secretary, in submitting his report, stated that 150 new businesses had been established in Winnipeg during the past year. The work of the Publicity and Convention Bureau had been most comprehensive. A press clipping bureau is used by the bureau, with the result that all adverse criticism of Winnipeg is answered.

SASKATCHEWAN INSTITUTE OF CHARTERED ACCOUNTANTS

An address on the new Bankruptcy Act, by Donald Maclean, M.L.A., was the feature of the annual convention of the Saskatchewan Institute of Chartered Accountants held on May 27 in Saskatoon. He traced the evolution of insolvency laws from ancient Roman times to the present day and showed the importance of maintaining the rights of the debtor, the creditor and the state. He also dealt fully with the practical administration of the new Act.

The following officers were elected: President, B. R. Masecar; vice-president, W. E. Hodge; secretary-treasurer, Thomas Lax; councillors, F. J. Pilkington, G. C. Rooke, C. E. Walker, D. Mowat and J. Neilson; auditor, R. E. Davis; librarian, C. E. Walker; representatives at the Dominion council, G. C. Rooke (one year), and B. R. Masecar (two years).

At a meeting held on May 27, the Greater Winnipeg Water District Board decided to ask permission from the Manitoba Workmen's Compensation Board to carry its own insurance this year. The 1920 payroll is estimated at $89,364, and the assessments would be $3,686. The board anticipated that money would be saved by assuming the risk itself.

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended May 28, 1920, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
May 28	0	5	0	0	4	0	0	0	0	9	..
May 21	3	3	0	1	3	0	0	0	0	10	18
May 14	3	3	4	0	0	0	2	0	0	12	14
May 7 ...	0	6	0	0	1	2	0	1	0	10	9

To ascertain whether it is possible for the city to insure all its own property against fire, the finance committee of the Winnipeg council has started an investigation. Notifications from fire insurance companies that rates on several classes of city property would be increased have inspired the plan.

Shareholders Benefit by New Issue of Bank of Hamilton Capital Stock

The recent announcement by the Bank of Hamilton of an issue of $1,000,000 of new stock, making them the fifth Bank this year to announce an increase in capital, is a very good indication of the expanding business of the country and the recognized opportunity for the profitable use of more banking capital.

In the case of the Bank of Hamilton, it is to be borne in mind that this is essentially a Canadian Bank, with no branches outside the country. The shareholders are almost entirely Canadians, and it is operated by Canadians for Canadians.

Their published statements have shown steady growth, which has been particularly rapid in the last few years, and are good evidence that there is plenty of opportunity for banking development in our own country.

It is interesting to note the change in the practice of the Banks making their issues of new stock at prices particularly attractive to their own shareholders. The issues of new stock by the Bank of Hamilton last year and this year at a premium of 50% are the most attractive propositions its shareholders have had offered to them since the issue of September, 1890—thirty years ago—all the intervening issues having been offered at higher premiums. The premiums on the allotments of new stock in the past were as follows:—

September	1898	62%
January	1900	66%
October	1900	66%
June	1903	85%
June	1905	100%
April	1910	100%
February	1919	50%
*June	1920	50%

---

*The present new issue.

In answer to the question, "Why should the shareholders get these plums and have stock offered to them at prices far below the price at which the stock is selling in the open market?" The country wants more banking capital, and the only way to get it is to make the investment attractive and give the shareholders who have succeeded in building up the business an opportunity to benefit in a plain and unmistakable manner when new issues are being made.—Adv.

Investments and the Market

Dominion Textile Position Improved, Although Profits Were Lower — Operations of Dominion Steel Restricted By Trade Conditions — Net Earnings of Canadian Converters Increase — Maple Leaf Company Handicapped Under Wheat Board—Three Street Railways Face Increased Expenses

Hamilton Street Railway.—The employees of the company have agreed to the award of the Board of Arbitration, which provides a scale as follows: 38 cents for the first six months; 40 cents for the second six months; 45 cents for the second year; and 52 cents for the third year. The new scale represents increases from 6 to 9 cents an hour, and a reduction in working hours from 60 to 55 per week.

Ottawa Electric Railway Co.—A general increase of 10 cents an hour to motormen and conductors, and an increase of 20 per cent. to all other employees, with time and a-half for overtime and time and a quarter for Sundays and legal holidays, is included in the award of the Board of Conciliation which investigated the wage and agreement dispute between the company and its employees. The award, which is unanimous, has been filed with the Department of Labor.

London Street Railway.—As soon as the city council passes a by-law authorizing the fare increase to cover additional expenses, a new scale of pay for motormen and conductors, providing for an increase of 8 cents an hour, will be enforced and will be given retroactively. The old scale is: First year, 39 cents; second year, 42 cents; after second year, maximum of 44 cents. It is expected that there will be some opposition in regard to the increase in car fares, but higher wages are contingent upon higher fares.

Canadian Pacific Railway.—Gross earnings of the company for April, 1920, created a new high record for that month at $15,929,416, although the net with the exception of last year, is smaller than for any year back for the past ten years. Although gross earnings for the four months show an increase over the same period last year of $9,541,443, the average shows a decrease of $562,870, owing to the poor showing made during the first two months of the year. In detail the gross and net earnings, operating expenses, etc., for the four months are as follows:—

	1920.	1919.	Increase.
Gross	$59,117,025	$49,575,582	$ 9,541,433
Expenses	53,517,599	43,413,285	10,104,314
Net	5,599,426	6,162,296	*562,870

---

*Decrease.

Maple Leaf Milling Co.—Profits of the company for the year 1919 amounted to $917,409, a reduction of about $11,000. Inventory, which stood at $4,749,459 in 1918, was reduced to $2,687,813. After allowing for payment of $163,729 interest on bank advances and $190,050 dividends on preferred, there was available for dividends on common $563,640, or 22.5 per cent., as against 23.84 in the previous year and 29.30 in 1918. The distribution on common was only $300,000, as against $600,000 in the previous year. This has permitted the increase in the balance carried forward to $1,853,675, as against $1,568,545 in the previous year. Other important changes in the statement are:—

	1920.	1919
Bank interest	$ 163,729	$ 158,069
Dividend on preferred	190,060	175,000
Premium on sale of preferred stock	21,500	......
Current assets	7,616,291	7,775,937
Bankers' advances	3,432,500	4,676,487
Accounts payable	931,025	744,585
Investments	3,943,275	2,545,776

In moving the adoption of the report at the annual meeting, Mr. Hedley Shaw, vice-president, said that the company had been practically under the control of the Wheat Board, which had been reappointed last autumn. The company had been especially handicapped in this way during the past fifteen months. Whether the Wheat Board would continue, he did not know. Representations were being made at Ottawa, and many business men, especially bankers, were opposed to the continuance of the board. If the United States abolishes control in the coming season, it would be very unwise for Canada to continue control, he said.

Sir Douglas Cameron, Winnipeg, president, in closing the meeting, said that under all the circumstances, the financial statement was a good one, notwithstanding the difficulty of carrying on business under government control. "We should get back to supply and demand. It is better for business and the country," he said.

Pacific Burt Co., Ltd.—For the year ended March 31st last, profits amounted to $139,216, as compared with $83,743 in the previous year, an increase of about 75 per cent. Appropriations included unchanged payments in dividends amounting to $45,500 on preferred, and $13,000 on common, the former at 7 per cent. and the latter at 2 per cent. There was transferred to realty and plant reserve $28,130, as compared with $16,025, while $15,798 was reserved for Federal taxes, as compared with $5,037. An item of $12,552 was written off patents. After these appropriations, the sum of $53,889 was carried forward, as against $29,654 in the previous year.

Current assets show little change at $371,727, as compared with $360,327, as against current liabilities of $250,502 this year, and $269,767 last year. Total assets have risen to $1,719,142 from $1,674,422.

In his report the president said: "New records have been established during the year, both in respect of volume and of net profits. This has been accomplished notwithstanding the world scarcity of paper, from which we have suffered as large users of that material."

Canadian Converters, Ltd.—The annual financial statement of the company for the year ended March 31st, 1920, shows net earnings amounting to $329,822, as compared with $257,324 in 1918-19, and $217,889 in 1917-18. After all round increases in all allowances for depreciation, for taxes, etc., and after bond interest, the balance left for dividends on the capital of the company of $1,733,500, amounted to $221,995, as compared with $176,384 the preceding year, and $145,449 in 1917-18. This is equivalent to 12.8, against 10.2 per cent. the preceding year, and 8.4 per cent. in 1917-18. Out of this a dividend at the rate of 5 per cent. was paid for the first two quarters of the year, and at the rate of 6 per cent. for the last two quarters, leaving a surplus of $126,653 to be carried forward and added to the previous surplus of $443,879, bringing the present surplus up to $570,532.

The balance sheet shows that the net working capital increased from $795,522 last year to $799,552 this year. Current assets increased by about $250,000 to $1,228,092, the increase being due to the increase of inventories of around $213,000 to $820,949, and one of $30,000 in accounts receivable. As the investments in Victory bonds, etc., amounting to $224,939, are not included by the company in its current assets, the showing as regards working capital is not as good as it should appear, seeing that the investments, amounting to $224,939 mentioned, compares with only $76,947 in the preceding year. The inclusion of this item would have made the increase in the working capital a further $60,000 higher.

DIVIDENDS AND NOTICES

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 84

Notice is hereby given that a quarterly dividend of two per cent. for the three months ending the thirtieth day of June, 1920, being at the rate of eight per cent. per annum, has been declared on the Common Stock of the Company.

The above dividend is payable on and after the first day of July, 1920, to Shareholders of record at the close of business on the twelfth day of June, 1920.

By Order of the Board.
W. H. NESBITT,
Secretary.
Toronto, May 28th, 1920. 153

CANADIAN CAR AND FOUNDRY COMPANY, LIMITED

Notice is hereby given that a dividend of one and three-quarter per cent. (1¾%) on the Paid-up Preference Stock of the Company for the quarter ending June 30th, 1920, has been declared payable on the 10th day of July, 1920, to Shareholders of record at the close of business on the 26th day of June, 1920.

By Order of the Board.
A. C. BOURNE,
Secretary.
Montreal, May 27th, 1920. 151

DOMINION TEXTILE COMPANY, LIMITED

The Transfer Books will be closed from the 15th to the 30th June, both days inclusive.

By Order of the Board.
D. M. CAMERON,
General Manager.
Hamilton, May, 1920. 149

DEBENTURES FOR SALE

TOWN OF VERMILION

DEBENTURES FOR SALE

Sealed tenders, marked, "Tenders for Debentures," will be received by the undersigned up to 6 p.m. on Monday, June 14th, 1920:—

$20,000.00—6½%, 20-years, repayable in twenty equal annual instalments of principal and interest.

Purpose—(A) Fire Hall, $9,000.00.
(B) Fire Protection, $11,000.00.

$6,000.00—7%, 20-years, repayable as above.

Purpose—Electric Light and Power Extension.

The highest or any tender not necessarily accepted.

H. P. LONG,
Secretary-Treasurer,
Vermilion, Alberta.

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned, and marked on the outside, "Tenders for Debentures," will be received up to noon on Tuesday, the 22nd day of June, A.D. 1920, for the purchase of Fifty thousand dollars ($50,000.00) twenty (20) year six per cent. debentures of the Rural Municipality of Lawrence, issued under "The Municipal Act" and amendments thereto. The highest or any tender not necessarily accepted.

For further information, address

D. H. PAYNE, Esq.,
Secretary-Treasurer,
Rural Municipality of Lawrence,
Freedale, Manitoba.
143

TOWNSHIP OF CHARLOTTENBURGH

Sealed tenders will be received up to June 14th (noon) for $60,000.00 Township of Charlottenburgh Debentures in $1,000.00 denominations, with coupons attached, in twenty equal annual instalments, 5½% interest.

GEORGE A. WATSON,
Clerk,
Williamstown, Ontario.

Dominion Textile Co., Ltd.—An improved financial position is shown in the annual statement of the company for the year ended March 31, 1920, although profits for the year were more than 50 per cent. below those of 1918, amounting to $1,701,244, in comparison with $3,434,752. Including interest on investments, total net profits of the enterprise amounted to $1,845,375. Deducting from this the bond interest, rentals and preferred dividends, the amount left for common dividends was $1,103,961, equal to 22.1 per cent. From this the dividend of $400,000 was paid, leaving a surplus of $703,961, which added to the previous balance, brings the present surplus up to $4,053,044.

The changes shown in the balance sheet are due chiefly to the purchase of the Mount Royal Spinning mill, and the increasing capacity to meet demand with the necessarily larger supplies of raw material to keep the mills running. Commercial loans show an increase of $3,828,363 at $4,160,420, and inventories of raw cotton have advanced from $1,807,754 a year ago to $4,497,094. Liquid assets increased from $7,899,040 a year ago, to $11,921,782 this year. Liquid liabilities, however, advanced in still greater proportion, leaving the working capital of the company at $6,002,415, as compared with $6,779,463 in the preceding year. Other comparisons of the balance sheet are:—

	1919-20.	1918-19.
Plant	$15,046,460	$12,402,625
Cash (including bills received)	319,555	710,825
Accounts received	4,247,511	3,409,469
Investments	1,821,326	825,087
Total assets	26,968,243	20,301,665
Accounts payable	633,756	494,813
Total liabilities	22,915,199	16,952,592

At the meeting of the board of directors, after the shareholders' meeting, on May 31, it was announced that the company had increased its dividend from 8 per cent. per annum to 10 per cent., the first quarterly payment of 2½ per cent. being payable July 2 to shareholders of record June 15.

Dominion Steel Corporation.—Lower profits are shown in the annual statement of the company for the year ended March 31, 1920. Income, including interest on investments and surplus funds, after deducting all manufacturing, selling and administration expenses, but before charging provision for sinking funds, depreciation and interest, amounted to $5,532,529, being down from $8,768,054 in the previous year and $11,930,112 in 1918. After deducting depreciation, sinking fund renewals, etc., totalling $1,266,856, against $1,304,323, and interest on bonds and debentures $1,004,060, against $1,013,263, net income available for dividends was $3,261,613, against $6,450,468 in 1919 and $8,581,661 in 1918. After the usual preferred dividends, net profits available on the common stock amounted to $2,281,613, as compared with $5,470,468 in 1919 and $7,601,661 in 1918. On the old basis of common capitalization, earnings were equivalent to 7.10 per cent. on the $32,097,700 common stock, as compared with 17.04 per cent. in 1919 and 23.68 per cent. in 1918. In the year the common stock was increased approximately $5,000,000 to $37,100,000, and on this basis 1920 net profits were equivalent to 6.15 per cent. earned. After deduction of common dividends surplus amounted to $251,984, as against $3,705,095 in 1919 and $6,157,264 in 1918, and after adding in previous surplus, balance at credit of profit and loss account was $8,211,236, as against $7,959,252 in 1919. After reserve adjustments and $13,754,157 in 1918.

The balance sheet shows that total assets at the end of the period under review, amounted to $102,645,205, as compared with $95,910,612 at the end of the preceding year. Inventories showed little change at $9,490,369, against $9,314,602, while accounts receivable were up at $6,737,807, against $5,039,479. Cash was lower at $1,674,668, against $3,603,542. On the liabilities side common stock increased from $32,097,700, a year ago, to $37,100,000 in the current statement.

RECENT FIRES

Cotes Mills in Village of St. Joachim, Que., and Lumber Yards in Ottawa are Largest Property Losses Reported this Week

Cornwall, Ont.—May 27—Barn destroyed by fire, caused by lantern exploding. Estimated loss, $3,000, partly covered by insurance.

Edmonton, Alta.—May 26—Residence on 90th Street completely destroyed. No insurance on furniture.

Haileybury, Ont.—May 26—Frame house damaged. Estimated loss, $300.

Halifax, N.S.—May 30—Londonderry Mines destroyed, also four churches, a schoolhouse, a hall and twelve dwellings. Caused by fire at village of Maitland.

Kingston, Ont.—May 29—Garage and seventeen cars destroyed by fire. Supposed to have been caused by spontaneous combustion.

L'Etang, N.B.—May 30—Fire destroyed four dwellings, one store and a sardine factory. Loss, $25,000.

Leamington, Ont.—May 16—House on the farm of Ernest Williams was destroyed and the fire spread to a house exactly opposite belonging to Sam French. Lighted cigarette or tobacco left in the house is supposed to have been the cause.

Moncton, N.B.—May 26—Record Foundry and Machine Co. destroyed. Estimated loss, $75,000; covered by insurance. Bank of Nova Scotia building destroyed. Loss, estimated between $30,000 and $40,000.

Orillia, Ont. — May 31—Princess Theatre destroyed. Total estimated loss, $5,000; partly covered by insurance.

Ottawa, Ont.—May 30—Lumber yards destroyed. Estimated loss, about $100,000; fully covered by insurance.

June 1—Two buildings, one warehouse and two barns burnt. Fire caused by lightning. Two fatalities.

Port Arthur, Ont.—May 16—John Peterson, a Finnish lumberman, was burned to death when a house caught fire, nine miles from Port Arthur. He entered the house drunk during the evening and it is believed that he knocked over an oil lamp.

St. Joachim, Que.—May 27—The Cotes Mills, as well as five houses, were destroyed. Loss, $200,000.

St. John, N.B.—May 30—A large fire at the village of St. Quentin destroyed sixty-eight dwellings, three mills, two hotels, C.N.R. station and Provincial Bank.

Sherbrooke, Que.—May 24—Garage and car destroyed by fire.

Sydney, N.S.—May 31—Lumber camp destroyed near Kilkenney Lake.

Toronto, Ont.—May 29—Four houses were damaged on Sackville Street.

Toronto, Ont.—May 21—Building at 615 Yonge Street was damaged. Damage to the contents, $100,000, and $5,000 to the building. Loss partly covered by insurance.

May 22—Marlboro Hotel damaged. Estimated loss, $2,000.

May 24—A fire broke out in the fourth floor of the "Truth" Building, 73-81 Adelaide Street West, and caused damage to the extent of $15,250. Damage to the building is estimated at $250; to the Lion Silk Manufacturing Co., $12,000, and to the Wilson Publishing Co., $3,000.

May 26—Several thousand dollars damage was done by fire and water to the first four floors of the J. J. Foy Building, 32-34 Front Street West. The cause of the fire is unknown.

Windsor, Ont.—May 23—Damage to the extent of $5,000 was done to the paint and wallpaper stock of T. W. Brooks and Sons. Deficient wiring is believed to have been the cause.

May 24—Home of ex-Mayor Charles R. Tuson was damaged. Fire believed to have been started from skyrockets.

Winnipeg, Man.—May 23—E. H. Houghton's Packard car damaged by fire caused by back-fire. Loss, $369, with insurance of $1,480 in Dominion of Canada Guarantee and Accident.

Canadian Manufacturers' Association Convention

Two Hundred Delegates from Eastern Canada Stop at Various Points En Route to Vancouver—National Scope of Association Emphasized by President Howard—Tendency Towards Group Government Deprecated —Attitude on Tariff Reaffirmed—J. S. McKinnon Elected President

(Special to *The Monetary Times.*)

Victoria, B.C., June 10th, 1920.

THREE hundred and fifty delegates were present at the 1920 annual meeting of the Canadian Manufacturers' Association, held in Vancouver on June 7th, 8th and 9th, and in this city on June 10th. Resolutions were passed, urging the Dominion government to appoint a permanent tariff board, acting in an advisory capacity to the government. It was also decided to petition Ottawa to use its influence towards securing empire customs preferences for empire products, and favoring a new Franco-Canadian customs tariff as soon as conditions warrant. Another resolution asks that an amendment be made to the business profits tax, providing that debit balances to profit and loss account be deducted from net earnings for the period, and that the remainder only be taxable. Action was taken to urge the Dominion government to give careful consideration to the luxury taxes, with a view to their amendment, as they are working detriment to business in Canada. Another matter dealt with was scientific research, which was advocated in a resolution to petition the government, and it was also decided to oppose the metric system being introduced into Canada.

J. S. McKinnon, of Toronto, was elected president for the year 1920-21; W. S. Fisher, of St. John, was elected first vice-president; John R. Shaw, of Woodstock, Ont., second vice-president, and Thomas Roden, of Toronto, treasurer.*

In his address as retiring president of the British Columbia Manufacturers' Association, the annual meeting of which was also held this week, J. J. Falconer held out little hope for an amalgamation of that organization with the Canadian Manufacturers' Association.

Western cities, from Winnipeg to Vancouver, had an excellent opportunity during the past week to display their industrial possibilities to representatives of manufacturing, and at the same time to convey to them a western point of view in a western environment, when the two hundred eastern delegates to the convention toured the west in a special train.

In Winnipeg, on May 31st, a welcome was extended by Sir James Aikins, Lieutenant-Governor, and by Mayor C. F. Gray. D. J. Dyson, president of the prairies' branch of the association, commented upon the wonderful industrial development of Canada in recent years. The increase in 1917, he said, was 100 per cent. over 1915. The increase for Manitoba was the same; for Saskatchewan, 180 per cent., and for Alberta, 134. He hoped that one result of the convention in Vancouver would be a solution of some of the problems that confronted the manufacturing industry in the Dominion, and would develop a policy that would counteract the activities of political theorists and extremists. Canada should be placed in a position to do something more than simply export raw products. If their country, he said, was to be successful, they must increase their manufactured products, and they must particularly do that because of the competition from across the line. It was estimated, he pointed out, that in 1917 the United States had a production of manufactured products totalling 53 billion dollars, which represented a per capita production of $500. Canada produced three billion, which represented $325 per capita. That showed what they had yet to do, and, as the slogan of Britain in the war was "Carry on," so should it be the slogan of the people of Canada until they had developed their manufacturing industries to the extent the marvellous resources of the country gave them opportunity and encouragement.

Winnipeg's importance was emphasized by Mayor Gray. It was, he said, not only the centre of Canada, but the centre of gravity of the British Empire, spoke of the great water-power resources of the Winnipeg district and what had been done to develop them, and informed the visitors that Winnipeg had the cheapest power, bar none, on the continent. He pointed to the opportunities the city now offered, with its plentiful supply of soft water and the pulp wood and sulphide resources of the north country. After reminding the delegates from the east of the markets they had on the grain-producing prairies, he called attention to the oil and asphalt of the west, and warned them and the people of Canada of the danger of these resources being secured by interests other than those concerned in the welfare of the British Empire. "We are asleep," he said, "to the great oil resources of our northern hinterland," mentioning that he had just come from a tour of inspection of the Athabasca district in Alberta, and he urged steps being taken to see that these resources were conserved and developed for the benefit of Canada and the British Empire.

Association is National in Viewpoint

T. P. Howard, president of the C.M.A., said that in the association there had never been any division into east and west. There were a national organization, with branches from the Atlantic to the Pacific, and in Winnipeg they had three hundred members. As long as the association was in existence they would stand for a united Canada. Furthermore, their objects were for a square and honest deal for everybody. "We realize," he said, "that manufacturing alone will not build up any country. You have got to develop the natural resources of the country. You have got to develop your mines, your lumbering, your farming, whatever there is to be developed in the country." Commenting on the visit of the association west, Mr. Howard said they did not come to teach the western people. They wanted to learn what they could and bring back with them information that would help them in doing what was best for the people of Canada. Mr. Howard said he was not going to speak upon the question of the tariff. That would be dealt with in the report that would be presented to the convention in Vancouver. They had, however, he might tell them, asked for a scientific tariff board to be appointed to examine into the whole question. They hoped that board would be appointed, and that it would help in smoothing away any ill-feeling that existed.

---

*A complete list of officers elected will be found on page 12.

Western Cities Visited

A few hours were spent in Brandon on the morning of June 1st, and in the afternoon the train arrived in Regina. In both cities the delegates were entertained by motor trips. and again in Moose Jaw, where they arrived late in the evening. They left for Medicine Hat the same night. The morning of June 2nd was spent in that city, and late in the afternoon Lethbridge was reached. In Calgary, on the following day, they attended the meetings of the Alberta Industrial Development Congress, and accompanied the congress delegates to Edmonton for their meetings on Friday and Saturday. By this time the number of manufacturers had increased to about 300. After the Saturday session the delegates proceeded to Vancouver, where the manufacturers' convention opened on June 7th.

Premier Oliver, on behalf of the province, and Mayor Gale, on behalf of the city of Vancouver, welcomed the delegates. The premier described the great resources of the province, its pulpwood, mines, agricultural lands and waterpower. Robert Dollar, head of the great Pacific steamship company, outlined possibilities in the Orient. A billion people lived just across the Pacific, he said, and their purchasing power was increasing rapidly. Fifteen cotton mills had been built in China in the past two years. China was the second greatest cotton consumer on earth, and Japan was doing a big business there, too. His ships were actually taking raw cotton to Japan and bringing manufactured cotton back to Canada. Captain Dollar expressed his pleasure at the interest Canada was taking in foreign trade, but declared this interest still far from enough. No country could become great without foreign trade. Of the cargoes his steamers brought to Vancouver, 2 per cent. was billed to eastern Canada, 16 per cent. ostensibly stayed in Vancouver, but a large share of this really found its way south of the line. The remaining 82 per cent. went direct to the United States. He had traced a great deal of this, and found that much of it, after being manufactured in industrial cities in the Middle West, found its way across the boundary to Canadian consumers. This was not as it should be. Canadian manufacturers should go to the source of supply to get the goods and manufacture them.

More trade with Japan, because of Japan's geographical proximity with Canada, because of her demand for our goods, was urged upon the Canadian manufacturers by A. E. Bryan, Canadian Trade Commissioner to Japan. Canada had at her western door, he declared, a nation of 78,000,000 people who must be supplied with goods. During the war Japan became flooded with surplus money, and the Japanese, in his prosperity, became a good spender, importing expensive goods, such as automobiles and structural materials. Advantage in trading with Japan was that she had been paying cash for all goods purchased. United States was exporting goods to Japan to the extent of 35 per cent. of Japan's total imports, while Canada's exports to Japan amounted to only one-quarter of 1 per cent. of Japan's imports.

Industrial Relations

The report of the Industrial Relations Committee, which was the first report of this section of the association, dealt chiefly with the work of the National Industrial Conference, held in Ottawa last September. The report also contained a detailed account of the proceedings of the International Labor Conference at Washington, and referred to outstanding subjects brought up at the conference which did not materialize because of extraordinary and unreasonable character. "Your committee believes that, in so far as such councils awaken the interests of employees and make them feel that the prosperity of the individual plant adds to their own welfare, they are to be commended," said the committee in dealing with Industrial Councils.

President's Address

President Howard in his address spoke in part as follows:—

"It is my privilege as your president, to welcome you to this annual general meeting, which marks the conclusion of the forthy-ninth year of this association's history. It is significant to see here assembled such a number of representatives from great industries in all parts of Canada and your presence indicates profound and widespread interest in the work of this association in its relation to the country's industrial progress.

"We are specially interested in the industrial growth of Canada. For a period of fifty years, this can best be illustrated by a comparison of the value of goods manufactured at the beginning and end of that period. The census estimate of the value of the output of Canadian factories for 1870 was $221,000,000. For 1917, the past year for which figures are available, it was $3,000,000,000, an increase of about 1,400 per cent. A comparison of the census figures for 1900 and 1917 shows an astonishing development in manufacturing since the beginning of this century.

	1900.	1917.	Increase.
Manufacturing establishments	14,650	34,392	135%
Capital	446,916,487	2,786,649,727	523%
Value of products	481,053,375	3,015,577,940	525%

War Trade Mostly Retained

"Immediately following the armistice, Canada was confronted by the problem of transferring the activities of her citizens from a war to a peace basis. The prospect of the loss or partial loss of this export trade at a time when employment was urgently needed, caused great misgivings. We have held the greater part of our export trade, and instead of unemployment we are now experiencing an actual shortage of labor. I believe that these dangers were avoided by the courage and resourcefulness of the Canadian people, who looked the situation fairly in the face, and took the most practical means of dealing with it.

"The Dominion government appointed the Canadian mission in London, and later extended credits to certain European countries for manufactured and agricultural products. Scores of manufacturing firms immediately sent their travellers to Europe and were successful in securing a great volume of business. Manufacturers, taking a great chance, not only began immediately to change their factories back to a peace basis, but also cast about with the greatest possible energy to develop foreign markets and manufacture new lines of goods, Farmers' organizations also sent their representatives abroad and were successful in selling their products. The result was that the industry of the country scarcely hesitated in spite of the critical conditions existing all over the world. Our export trade, during the year ending March 31st, 1920, amounted to $1,286,658,709 as contrasted with $1,268,765,285 for the year ending March 31st, 1919.

"The people of Canada owe a triple debt to the Canadian army. First, for its war record; second, for the manner in which it has resumed the occupation of peace. There are bound to be some exceptions among 500,000 men, but I think I am safe in saying that over 95 per cent. of the Canadian army have resumed peaceful occupations successfully. We owe a third debt to the army because the great majority of ex-soldiers were opposed to any revolutionary methods of redressing grievances in this country and have stood firmly on the side of law and order. It is gratifying to see that the government has spent up to the end of 1919 the sum of $40,000,000 in the work of re-establishing soldiers, and that, through the government employment agencies up to the end of last year, over 106,000 soldiers had been placed in positions.

Labor Events of the Year

"In the Canadian labor field during the last year there have been three outstanding events. First, the investigation of the Royal Commission on Industrial Relations, which toured Canada in the spring of 1919, and reported to the government last summer; second, the National Industrial Conference which was held in Ottawa last September; and third the first International Labor Conference authorized by the Peace Treaty, which was held in Washington last November. Members of this association gave evidence at the twenty-eight sittings held by the Royal Commission on Industrial Relations from Victoria, B.C., to Sydney, N.S. Representatives from the chief lines of industry in this association, were present at the National Industrial Conference, along with representatives from railways, lumbering, mining, fishing, banking, and other employers. A past president of this association represented the employers of Canada at the International Labor Conference in Washington. The outstanding feature in labor matters during the year has been the gradual elimination of the revolutionary element by moderate labor men. The political and social ideas put forward with considerable vehemence by a minority have been tried partially, and have failed utterly in the estimation of wage-earners themselves.

Difficulties of Group Government

"The separation of elected representatives of the people into groups, which has been in existence in Europe for some years, shows signs of being introduced on this continent, where up till the present time the two party system of government has operated. If a parliament is made up of a group of farmers, another group representing labor, another group representing retail and wholesale trade, another group representing transportation, etc., it may be difficult to carry on government without considerable intrigue and friction. Under the old system of government, with all its faults, the members of a party were held together by a common belief in one principle or policy. Under the group system of government each group, according to experience, pursues very persistently these objects which are of peculiar interest to the group. There is also a constant shifting of alliances among the groups.

High Prices are Universal

"The high cost of living, which oppresses us all, is not a local condition in Canada—it is world wide, the inevitable result of a great war—and is caused partly by scarcity of materials and the immense demand of Europe for everything we produce. Another cause is the great inflation of currency which is largely a credit expansion necessitated by government borrowing. A further cause is extravagant living. It has been stated, in some quarters, that manufacturers favor high prices. This is not true for a very good reason. Manufacturers are the heaviest buyers. During a period of high prices materials are scarce, dear, and difficult to secure. Wages are enormously increased owing to the increased cost of living. This adds to the risk of manufacturing operations. Moreover, when prices are unduly high, the purchasing power of the public is decreased, which results in a decrease in the manufacturers' output.

National Debt and Taxation

"The net debt of Canada, after deducting inactive and non-productive assets, is $2,273,305,436, a great sum it is true, but not serious if balanced against the industry of our people, and our national wealth which was estimated in December, 1919, by the Dominion Statistician at sixteen billion dollars.

"Taxation is not a popular subject, certainly not with manufacturers, who are the heaviest taxpayers. Manufacturers pay the bulk of customs tariff duties. They pay business taxes, excise taxes on materials, stamp taxes, taxes on insurance, taxes on goods sold to them, income taxes, corporation taxes, and, in addition, the ordinary taxes paid by the consumer; but we must face the fact that Canada has been through a great war which has cost enormous sums of money, and our increased taxes are for the purpose of helping to pay the cost of the war. The government must have revenue, and it is much better to struggle, with the difficult problem of securing it by current taxation than to adopt the easier and more dangerous method of unnecessary borrowing. Sir Henry Drayton, minister of finance, is to be commended for defining in his budget speech the policy that Canada must stop borrowing, and must pay as she goes. The best way to secure relief is to increase production.

"Since the conclusion of the war there has been a very general increase in the protective tariffs of nearly all the industrial countries of the world, because these countries, particularly those that were engaged in the war, were anxious to provide employment for their own population. The tariff of the United States has not been altered. In Canada the 7½ per cent. war tariff has been entirely removed. The position of this association in regard to the Canadian customs tariff was clearly defined at the last annual meeting, where a resolution was passed advocating a revision of the tariff and the establishment of a permanent tariff board of experts who would act in an advisory capacity to the government. I do not see any reason why this resolution should not be reaffirmed at this meeting. The objects of the fiscal system of Canada should be to diminish, as far as possible, the buying of goods from other countries, which can be produced here; to facilitate the importation of raw materials which cannot be produced at home; to export our own materials in the shape of finished products; and to make Canada as self-contained as possible by developing and encouraging activities which will give occupation to our citizens. The association last year also went strongly on record in favor of tariff preferences among the various countries constituting the British Empire. The war strengthened the ties which bind the Empire together, and we believe these ties would be further strengthened by the extension of Imperial preferential tariffs.

"Since our last annual meeting the Dominion government has added to its railway systems, by the purchase of the Grand Trunk Railway. The people of Canada will not be so much concerned with alleged principles underlying ownership of railways as they will be with results. They want service at the lowest cost, consistent with quality of service. The success of the government's experience cannot be estimated at the present time, and it will succeed or fail according to the quality and cost of the service supplied, and to the extent to which government management is divorced from political interference. From the last report of the Minister of Marine, it would appear that the new Canadian merchant marine has made a good beginning.

Extension of Public Ownership

"During the year, there has been some extension of the principle which is commonly known as public ownership. Again here we should not yield to the temptation or argue over abstract principles. The application of the principle of public ownership is, after all, entirely a matter of degree. There must always be public ownership in the sense that the government must control certain services, and this has been admitted for centuries. No one, for example, would advocate placing the army or the navy under private ownership and management. The post office should be under government management, As in similar cases, the real question is 'Where shall the line be drawn?' If government ownership and control is carried to the extreme lengths which are advocated by some people it logically means that private property will disappear and, to some extent, that personal freedom will disappear, and that the entire population will become civil servants on the national pay roll, to be promoted, transferred, pensioned or dismissed according to the pleasure of the government in power. One naturally wonders in contemplating this tremendous scheme, who would make the appointments, who would decide the type of work that would be done by each individual, who would fix his pay and decide his hours of labor, and what would be the incentive of the individual to put forth his best efforts?

"The value of the occupied farm lands of Canada averages about $52 per acre, as against $40 before the war, an increase of thirty per cent. The annual value of field products, according to the last census statistics, was about one and one-half billions. There are 730,000 farms under cultivation in Canada. Our high year in immigration was 1913, when, in round numbers, about half a million people came to Canada. Immigration fell off naturally during the war, but there are abundant signs that the tide is once more turning towards Canada. Last year, the immigration was about one-quarter of that of 1913, but this spring every boat entering a Canadian port is loaded with settlers. It is most desirable that we should have increased immigration. We need more people to increase our food production; to increase the home market, and to help us pay our taxes. But we want immigrants of a desirable type, for whom occupations are available in Canada and who will assimilate with the population of this country, and also we want people who have British ideas, and are content to live under the British form of government.

"It is interesting to note that the association really becomes of age this year. Although it was founded in 1872, from that year until 1899 it was provincial in character until it was reorganized on a national basis in 1988. The membership of the association has grown from 300 in 1899 to 4,061 at present."

Workmen's Compensation

In discussing the report of the legislation committee on June 8, R. L. McIntyre, of Toronto, urged that employers should not be content to put their injured workmen in the care of a compensation committee and neglect to display personal interest in them. We should give attention to our workers, he said. We should provide first aid services and trained nurses in order that every possible attention may be given to those who are injured in following their employment. Not only would skilled attention be given to minor injuries, but these accidents should be followed by visits to the homes of workingmen by nurses. Thos. Roden, advocated uniform legislation for all provinces in regard to workmen's compensation. He also urged the association to place on its legislation committee only those members who had had plenty of experience, pointing out that while manufacturers were not out to oppose reasonable legislation they would have to oppose anything savoring of class domination.

Reports of the membership committee, the transportation committee and the commercial intelligence committee were also laid before the association.

A clause in the report of the legislation committee, suggesting that manufacturers' should be represented in the legislatures and in parliament, was struck out, on the ground that a group system of government would not be desirable. S. R. Parsons stated in this connection that real democracy would never be attained by group parliamentary representation. Class domination, he said, was to be deplored, but if farmers and laborers generally turned themselves into groups then manufacturers would have to do likewise to protect themselves. Such a thing, however, did not make for a proper development of the country along lines warranted to bring the most good to the greatest number and for that reason should be shunned.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt station for the week ended June 1th: Hudson Bay, 60,034; Nipissing Mines, 529,672; Mining Corporation of Canada, 240,215; total, 829,921. The total since January is 9,380,521 pounds, or 4,690.2 tons.

BUSINESS IS SLACKENING IN WEST

Good Crop Outlook, However, Maintains Healthy Undertone—Manitoba's Financial Operations Increasing in Extent

(Special to *The Monetary Times.*)

Winnipeg, June 10, 1920.

IDEAL crop conditions prevail in Western Canada this week. There have been some splendid rains and very favorable growing weather around parts of the West. Good reports are received and the crop is quite as far advanced as at the same time in previous years. Strong efforts are being made to combat the grasshopper plague. The provincial government, municipal council and citizens of infected areas are working hard to check it. The C.P.R. is also assisting in saving its right-of-way poison to kill the grasshoppers.

Collections through wholesale houses are somewhat slow. Larger amounts than usual are being carried over till the fall. The season, however, is favorable from the crop point of view and large houses are taking a chance. Some few retailers are holding back in orders, but this is not the rule, as buying is quite free and goods are going forward in large volume.

Henry Detchon, manager, Credit Men's Trust Association, who has just returned from Ottawa, states that the new bankruptcy act for Canada will come into force at the close of the present month. The chief feature of the new act is that it provides for involuntary bankruptcy and also for the complete discharge of an honest debtor. Mr. Detchon states that this is the most important legislation that Canada has had for many years and that it will bring about a great change in the commercial world.

Higher rates for mortgage money in the west seems inevitable, as in many cases on renewal mortgages, the rate is being raised from 6 to 7½ per cent. As an intance, the mortgages on one of the best buildings on Portage Ave. comes due at the end of the present month, and it seems probable that the best rate that the mortgagers can arrange will be 7½ per cent. This is the highest rate that has been asked for similar security in the history of the city.

Deposits are now being received under the Provincial Savings Act of Manitoba and depositers will receive 4 per cent. interest guaranteed by province of Manitoba. A meeting was held this week between the Manitoba Farm Loans' Association and the representatives of the board of trustees, under the Provincial Savings Act, to arrange a co-operative plan whereby depositors under the former association could transfer their accounts under the new system. Lachlan McNeill, chairman of the Farm Lands' Association Board, expresses confidence in the new movement and looks to it to aid in financing the Farm Lands' Association in addition to providing funds for the rural credit societies.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13⅛ pm	13⅜ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.4525	$4.44	....
Cable transfers	4.44	4.4475	....

New York quotations of exchange on European countries as at June 10th, 1920, supplied by the National City Co., Ltd., are as follows: Cable, London, 393, cheque, London. 392¼; cable, Paris, 7.72, cheque, Paris, 7.71; cable, Italy, 5.82, cheque, Italy, 5.81; cheque, Belgium, 8.06; cheque, Swiss, 18.10; cheque, Spain, 16.40; cheque, Holland, 36.35; cheque. Denmark, 16.92; cheque, Norway, 17.82.

NATIONAL EXPENDITURE MUST BE RESTRICTED

THE stand taken by Sir Henry Drayton on financial policy has distinctly strengthened the position of the Unionist government at Ottawa, a position which has of late been none too solid because of the repeated attacks from various quarters. The multiplicity and variety of accusations is perhaps the best evidence that the government has pursued a sound policy. Sir Henry Drayton has announced that there will be no more popular war loans, and has taken action to make current revenue equal the expenditure. In order that there may be a balance on the right side, therefore, it is essential that ordinary expenditure be not increased, and, in fact, reduced if possible, so that some balance may remain from year to year for the reduction of the national debt. The government has outlived threats in the past, and those now emanating from the Ontario branch of the Great War Veterans' Association do not by any means express a general feeling.

The head of the Ontario organization is urging its members to agitate for a general election. "Parliament," he says, "has confessed inability to redeem former pledges and restore to returned soldiers and dependents in a substantial measure the economic advantages they would now enjoy but for war service. Parliament has shown reluctance to offset such failure by general measures for the improvement of living conditions throughout the country whereby returned soldiers might more easily regain a secure foothold in the national life. Parliament now requires that those who served in the war shall share in the payment of the major portion of the war debt, despite the fact that war-accumulated wealth remains practically unmolested. Parliament, as at present constituted, apparently cannot cope with distressing living conditions, which affect not only the returned soldiers, but the public generally."

In presuming that the present or any other government would be able to remedy in Canada the world-wide condition of disorder, the head of the Ontario association pays a compliment to the powers of government which is not in accord with the accusations of inaction so frequently directed against it. And reductions or exemptions in the present scale of taxation, or additional burdens on the national finances, would offset the efforts being made to place the Dominion in the best possible position.

THE MARKET FOR CANADIAN PULP AND PAPER

THE output of United States pulp and paper plants is now well below the demands for consumption in that country, and the Canadian supply is relied upon to a very substantial extent. This has been effectively brought home to this country by the negotiations now under way. Canadian newspapers take the view that all Canadian requirements should first be supplied, and on May 29th representatives of twenty-seven papers waited upon Sir Henry Drayton to point out their position. A number of dailies have been forced out of business during the past year, and it is maintained that the paper situation is threatening the existence of others. The relations between the governments of the United States and of Canada on the point are thoroughly amicable, but it is nevertheless a situation which must be handled delicately because of the immense political influence of the press on both sides of the line.

The President of the United States has been authorized to appoint a commission to treat with Canada with reference to the embargo placed by the Dominion on pulpwood. The Foreign Affairs Committee of Congress, in presenting the resolution, reported as follows:—

"Your committee has made an exhaustive investigation of the shortage of pulpwood in the United States, and finds it is largely due to those embargoes which were laid upwards of ten years ago, and that, with the exception of one or two mills on the Pacific coast, there has not been a paper mill constructed in the United States since those embargoes were laid, and no additions built to present mills. The spruce, pine and hemlock, which alone can be used for the making of print paper, have been rapidly reduced in quantity and quality, until there is none available for the eastern mills, except in small portions of Maine, New Hampshire, Vermont, Minnesota and Michigan. In these states the supply is rapidly diminishing and becoming more inaccessible.

"The reports of our Consuls, together with the newspaper clippings printed in the hearings, will show conclusively that it has been the policy of the Dominion of Canada, for upward of ten years, to force American papermakers to move into Canada in order to secure an adequate supply of pulpwood. This a number of them have already done.

"The embargoes are limited to the Crown lands, but the testimony shows that quite recently during the last year strong efforts have been made to prohibit American manufacturers from buying pulpwood from the owners of land in fee. The testimony also conclusively shows that we must have pulpwood from the Crown lands of these three Dominion provinces (Ontario, Quebec and New Brunswick), otherwise our paper mills will eventually be compelled to close down or move into the Dominion of Canada. Canada must have coal, sulphur, kaolin and dyes from the United Stats or suffer a similar misfortune.

"It is true that the Dominion of Canada or the provinces have a legal right to lay these embargoes, but, on the other hand, we have the same legal right to lay embargoes on the products of the United States; and if we adopt the same policy as Canada, the paper mills in both countries would have to cease operation.

"Your committee feels confident that the appointment of the committee to confer with the Dominion and provincial governments, as provided in the resolution on this matter, which is of much grave importance to the people of the United States, would bring about an amicable adjustment of the matters in dispute."

RURAL AND URBAN LABOR

LABOR placed its viewpoint before the farmers when Tom Moore, president of the Dominion Trades and Labor Congress of Canada, addressed the Canadian Society of Technical Agriculturists at their meeting in Ottawa on June 7. But Mr. Moore, with his usual caution, avoided the issues on which the farmers and labor stand in opposition. The Canadian farmer is landlord and capitalist, as well as workman, and the rising value of farm property and the increasing use of expensive equipment have been in recent years driving him more and more into closer alliance with property owners in all lines of productive enterprise. On the tariff, which is his principal point of issue with the manufacturers, he is equally at odds with the city workman, for the profits of manufacture and the wages of city labor are alike dependent upon the protection of the tariff wall.

Mr. Moore emphasized the function of the farmer as a manual worker, and in comparing him to labor in the city, found many interests in common. The eight-hour day he considered applicable to farming, but the Canadian farmer is placing his products on the markets in competition with the world, and cannot therefore shift higher production costs on the shoulder of the Canadian consumer. Whether he pays farm help for an eight-hour day, or calculates the value of his own labor on the same basis, and increased costs must be deducted from his own farming profits and must result in still further reducing the already narrow margin which is realized from farming enterprise. The average earnings of a farmer are $1,600 per annum, and although this exceeds in purchasing power the average earnings of the city worker, it must be remembered that modern farm work calls for a high standard of skill and experience. The farmer is overpaid neither in his capacity as a worker nor as a capitalist; his position cannot be improved, however, by any arbitrary division of his products, but rather by securing a reduction in the cost of his labor and equipment.

Most of the industrial unrest in the cities, Mr. Moore stated, would be removed if the workers owned their own instruments of production, and he maintained that employers as well as farmers were also dictated to by financial institutions which control large quantities of capital available for investment. He did not point out, however, that this capital is limited in supply, and in bargaining for the highest return naturally fails to satisfy the wants of prospective borrowers. The farmer in borrowing admits the inadequacy of his own resources and cannot expect to receive preferential treatment in competiton with the varied demands of industry.

THE FUTILE EMBARGO

IN "Investment Items" for May 31, the Royal Securities Corporation appropriately asks for some official pronouncement regarding the restrictions which have been imposed on the importation of securities from abroad. "It is now some months," says the article, "since the government, acting in conjunction with certain Canadian interests, announced that an agreement had been arrived at by which no Canadian money was to be sent out of the country for the purchase of Canadian securities held abroad. The effect of this agreement, as pointed out in 'Investment Items' at the time, was regrettable in many ways. British holders of Canadian securities, purchased in good faith in times gone by, were deprived of the power to sell these securities back to Canadians at the prices now prevalent in Canada. The value of these obligations on the British market was much depressed. Worse still, the confidence of British investors in the good faith of Canada, and the confidence of Canadian business men in the financial wisdom of their own government, were alike seriously impaired.

"Not a word has been said about this agreement for several weeks. The Canadian business and financial world should be immediately notified in regard to the present status of this 'embargo.' If, as we surmise, the embargo was found to be as useless and unnecessary as it was considered by Canadian business men from the beginning, why should not the government admit its error and forthwith release the few who still feel themselves bound by its terms? Since the government and those associated with it made public announcement of their agreement and even requested the collaboration of the Canadian public in carrying it out, it is surely the duty of the government to make equally public announcement of its cancellation."

Judging by the new wage scales demanded by street railway employees in several cities, this class of transportation will soon be a luxury.

* * * * *

The enormous taxes to be levied upon racetracks by the federal and provincial governments look as if the object was not to raise revenue, but rather to extend the principle of prohibition still farther afield.

* * * * *

The Manitoba government announces that it will open premises to receive deposits, equipped in the style of the best branch banks. The banks are watching to see if Manitoba can pay four per cent. on deposits, loan at six per cent., and pay all expenses on the margin of two per cent.

* * * * *

A great English statesman pointed out seventy years ago that banks and other great financial institutions always were an object of radical hostility. His statement is equally true to-day, and in so far as the state has assumed financial operations, it has also attracted the ill-will of the radicals.

* * * * *

Wheat at $5 per bushel has been predicted for this year by L. W. Hill, chairman of the board of directors of the Great Northern Railway. Shortage of labor is one of the factors restricting farm production, and it will not be remedied until prices of farm products are sufficiently high to enable the farmer to compete with the short hours, high wages and other attractions offered in the cities.

International Trade

In the transaction of foreign business, knowledge and experience count for much. The experience gained by this Bank at its own offices in such centres of international trade as the following:

London, Eng.	Mexico City
New York	San Francisco

is available for extension of Canadian trade abroad. In addition it maintains a Foreign Department specially equipped to handle all foreign exchange transactions.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. J. S. McKinnon was elected president of the Canadian Manufacturers' Association, at their annual meeting held in Vancouver and Victoria this week. Mr. McKinnon has been active in the work of the association for ten years past, and was 1st vice-president for the year just closed. In 1909-10 he was chairman of the Toronto branch, and in 1911-12 chairman of the technical education committee, in which subject he has taken a special interest. Mr. McKinnon is president of S. F. McKinnon and Company, wholesale merchants, of Toronto.

J. S. McKinnon,
President, C. M. A., 1920-21

Other officers of the association elected were: 1st vice-president, W. S. Fisher, St. John, N. B.; 2nd vice-president, John R. Shaw, Woodstock, Ont.; treasurer, Thomas Roden, Toronto. The executive also includes: Thomas Cantley, New Glasgow, N.S.; J. B. Sherrard, Montreal; E. G. Henderson, Windsor, Ont.; Robert Hobson, Hamilton, Ont.; P. W. Ellis, Toronto; C. A. Birge, Hamilton, Ont.; H. Cockshutt, Brantford, Ont.; J. F. Ellis, Toronto, and Nathaniel Curry, Montreal.

W. S. Fisher,
1st Vice-President, C. M. A., 1920-21

Special committees were constituted as follows:—

Tariff Committee—G. W. Watts, Toronto; Hon. E. J. Davis, Newmarket; C. H. Smith, Montreal; H. S. Champ, Hamilton; J. B. Thompson, Vancouver; E. D. Smith, Winona.

Insurance Committee—Arthur Hewitt, Toronto; H. W. Fleury, Aurora; W. H. Shapley, Toronto; R. T. Kelly, Hamilton; Norman Yarrow, Victoria; Angus McLean, Bathurst.

Legislation Committee—C. J. McFarlane and J. G. Hossack, Toronto; G. C. Coppley, Hamilton; W. A. MacKinnon, St. Catharines; T. R. Deacon, Winnipeg; A. O. Dawson.

Membership Committee—P. E. Joubert, Montreal; G. H. Douglas, Hamilton; G. C. Robson, Edmonton; W. S. Laidlaw, Toronto; G. A. Dobbie, Galt; H. Telfer, Toronto.

Publishing Committee—J. F. M. Stewart, Toronto; J. M. Taylor, Guelph; J. F. MacKay, Toronto; F. P. McGann, Toronto; R. H. Mackay, New Glasgow; A. B. Stovel, Winnipeg.

Commercial Intelligence Committee—Frank Whitton, Hamilton; George Henderson, Montreal; Thos. Cantley, New Glasgow; C. G. McGhie, St. Catharines; I. H. Weldon, Toronto; E. H. Gurney, Toronto.

Transportation Committee—B. S. Harris, Toronto; E. P. D. Graham, Toronto; W. R. Breyfogel, Peterboro'; W. R. Dunn, Hamilton; W. R. Ingram, Winnipeg; H. I. Thomas, Ottawa.

Education Committee—B. W. Coughlin, Montreal; E. Tarte, Montreal; Joseph Picard, Quebec; W. J. Bulman, Winnipeg; H. S. Robertson, Stratford; George Brigden, Toronto.

Industrial Relations Committee—C. H. Carlisle, Toronto; M. R. L. Meldrum, Niagara Falls; S. J. Williams, Kitchener; J. D. Palmer, Fredericton; J. R. Duncan, Vancouver; E. P. Jones, Montreal.

Mr. Alexander H. Ireland, superintendent of branches of the Canadian Bank of Commerce, was, on June 1, presented with a silver tea service, on the occasion of his retirement from that position. Mr. Ireland joined the bank in 1870, and since his appointment to the office of inspector at the head office in 1888, has been teacher and instructor of the Bank of Commerce in the matter of establishing credits.

OBITUARIES.

Mr. Leslie O. Horner, for the past ten years manager of the supply section of the Canadian General Electric Company, Toronto, and former circulation manager of the Toronto "Globe," died on June 7.

Mr. Richard Marpole, executive agent for the Canadian Pacific Railway Company, at Vancouver, B.C., died at Hotel Vancouver on June 8. Mr. Marpole has been associated with the C.P.R. since 1881.

Hon. Valetine Winkler, minister of agriculture for Manitoba, died at his home at Morden, Man., on June 7. Mr. Winkler was born at Neaustadt, Ont., on March 18, 1864, leaving that place for Manitoba fifteen years later. He was first elected to the Manitoba legislature in 1892, and was re-elected in the years 1896, 1899, 1903, 1907, 1910, 1914 and 1915, being sworn in as a member of the Norris Cabinet as minister of agriculture and immigration on May 15th, 1915.

Mr. Verschoyle Cronyn, a pioneer in western Ontario legal and financial circles, died in London, Ont., recently. He was born in Ontario in 1832, being the son of Rev. Benjamin Cronyn of Galway, Ireland, who afterwards became first bishop of Huron. He became a barrister in London many years later, and in 1864 joined with Wm. Hume Blake also of Galway, Ireland, who had secured a valuable financial connection in Toronto, and as a result the Huron and Erie Mortgage Corp., was formed, Huron being at that time the northern and Erie the southern part of Ontario.

Hon. James Dunsmuir, formerly premier, and at one time Lieutenant-Governor of British Columbia, died at Cowichan Lake, B.C., on June 6. He was born at Fort Vancouver, Wash., in 1851, and was educated at Nanaimo, B.C., and Dundas, Ont., later taking a course at a military school in Blackburg, Va. He was closely connected with many important mining and railroad developments in British Columbia, and was a director of the Canadian Pacific Railway Company, to which company he sold the Esquimalt and Nanaimo Railway, with 1,500,000 acres of land. He was elected to the legislature of British Columbia as conservative representative of East Yale in 1898, and was called upon in 1900 to form an administration. He acted as premier until 1902, and became Lieutenant-Governor of the province in 1906.

THE STERLING BANK

Delegations Protest Taxation of Luxuries

Finance Minister Besieged with Bequests for Modification, But Is Satisfied With General Reception of Budget Speech—Budget Resolutions Now in Committee and House to Finish by July 1—Civil Service Bonus Is Substantial

(Special to *The Monetary Times.*)

Ottawa, June 9, 1920.

THE budget all this week has been under fire in committee of the House of Commons, and it will likely be at least another week before it is finally passed. Good progress with other business is also being made so that adjournment by Dominion Day is now in sight. The budget debate wound up in spectacular fashion, with an all night debate, the final vote being taken at six in the morning. The government's majority was 26—a vote satisfactory to the ministry and to the Opposition. The cabinet was well satisfied that it pulled through without the loss of more than three followers. The Opposition took heart from its consideration of the gradual reduction of the government's majority since it took office. The first year after Union government was returned it had a majority of 75. The following budget it had 60. Last year it had 45 and this year 26. Liberals confidently predict that next year it will have reached the vanishing point.

Details May be Modified

During the past two weeks Sir Henry Drayton has done nothing but listen to a procession of deputations, who have been filing in and out of his room in the east block. He has smoked his pipe through it all, smiled imperturbably, promised consideration, but committed himself to nothing. Sir Henry is well satisfied with the reception which has been given the general principles of his budget, but realizes that many of the details will have to be modified. He points out that he is breaking new ground and that errors are inevitable. It can be stated on the best of authority that there will be considerable modification of the tax in committee—if they are not made by the time this is in print. The tax on sporting goods is likely to be lightened. The line of taxation on boots will probably be raised from $9 to $12. The piano and musical instrument industry, which was hard hit, may get consideration and see a reduction in the tax from twenty to ten per cent. The fur industry may also see a modification in the tax.

From the government side the two chief speeches of the debate, apart from Sir Henry's were those of Hon. Arthur Meighen and Hon. N. W. Rowell, the two most vigorous and aggressive members of the ministry. The speech of Mr. Meighen was a masterpiece in its way. It was a careful, well-reasoned appeal for moderate protection as the permanent fiscal policy for Canada. It will be used, as it was intended, as campaign literature.

Expenditure Voucher's Lost

Mr. Rowell's speech was more of a general defence of the government. One point he definitely cleared up for the good of the government and the country. There have been charges made during the session, repeated on a number of occasions and in his closing speech reiterated by Hon. Mackenzie King that the auditor-general's report showed that there was $12,000,000 missing for which there was no explanation or accounting. Mr. Rowell gave the explanation and, it must be admitted, a thoroughly satisfactory one. The item in the auditor-general's report is headed: "Expenditure by the chief paymaster-general on account payment overseas forces, vouchers not received." Mr. Rowell explained that the vouchers were not received owing to the fact that early in the war two vessels with vouchers were submarined and lost; it was decided to send no more vouchers to Canada. An agreement was reached that these vouchers were to be handled overseas, Brigadier-General J. C. Ross, of Montreal, who was paymaster-general of the overseas forces at the time, and himself a well-known accountant, handling them. He said that every cent of this money, most of which was pay for the troops, was accounted for and not a dollar wasted. The vouchers had now been received in Canada, no less than a thousand boxes of them.

Control of Wheat Marketing

With the American government having dissolved the Wheat Control Board, there is much speculation what will happen to the Canadian Wheat Board, of which Mr. James Stewart is chairman. There is good reason to believe that there is considerable difference of opinion among the cabinet and the farmers of the west. The cabinet are not certain whether the European nations will not continue for another year buying as nations, and if they do, it is felt that an organized national agency is necessary to handle the grain and to prevent undue speculation. Hon. T. A. Crerar is opposed to a continuation of wheat control, but on the other hand, the Saskatchewan Grain Growers who want ultimately to nationalize the wheat selling business as a definite policy, want the board left in office. They hope that with another year's control they can establish the board as a permanency.

The West Indies Conference has been in session all week, but so far without any announcements, the meetings being held *in camera*. However, it is known that progress is being made and within a week announcement of a policy of preferential tariff can be looked for.

Civil Servants' 1920 Bonus

Details of the bonus to civil servants were given in a return tabled in the House of Commons on June 7. Civil Service employees of 18 years or over, and supporting dependents, receiving less than $1,200 a year, get a bonus of $35 per month through the present fiscal year. In the same class the bonus decreases $2 a month for every extra $20 of salary. Bonus of $20 a month applies to all salaries between $2,040 and $6,000 per annum. Civil servants 21 years or over and not supporting dependents receive a bonus of $21 per month if their salaries are less than $960 a year. For every extra $20 per month in salary the bonus drops $2.50. Servants in the same class between 18 and 21 years old and getting less than $960 yearly receive a bonus of $12.50 per month. Civil servants working full time for part of the year over one month receive bonus for the period of their service. Those working less than full time the year round are not entitled to bonus. Among these are rural postmasters and their employees, who get no bonus.

An important ruling dealing with the collection of the luxury tax was issued on June 2 by the Department of Customs and Inland Revenue. The ruling provides as follows: "Retail merchants and other vendors of articles subject to the luxury tax who sell to the purchaser for consumption or use are advised that upon the occasion of each sale of a taxable article the following requirements must be fulfilled, viz.: (1) An invoice or sale slip, showing the price at which the article is sold, exclusive of tax, and, as a separate item, the amount of luxury tax thereon, shall at the time of sale be delivered by the vendor to the purchaser. (2) The vendor shall at the time of sale collect from the purchaser the amount of the luxury tax shown on the sale slip. No merchant is authorized to advertise or announce that he is paying the tax for the purchaser, as in point of fact he is required to collect the tax from the customer."

CROP PROSPECTS NOW GREATLY IMPROVED

Western Fields Green with Growing Crops—Normal Weather All that is Necessary for Good Yield

"NEVER in my experience have I seen crop prospects brighter than they are now," said Grant Hall, vice-president of the C.P.R., in an interview with the Regina "Leader" on June 2nd. Mr. Hall was returning to Winnipeg from an inspection of the company's lines. "Of course," he added, "it is early yet; nevertheless, we are making one of the best starts towards a big yield that I have ever seen at this stage. The grain is making a fine stand, and it is a pleasure to ride through hundreds of miles of bright green fields. Conditions are equally good in Alberta, through which we have just travelled."

Canadian National Report

The detailed crop report by agents of Canadian National Railways for the week ending May 29th, and covering the areas served by the publicly-owned lines between the Great Lakes and the Rocky Mountains, received at the headquarters of the company, June 4th, is decidedly optimistic in tone. Two hundred and fifty-six agents reported by wire in this summary. There are a few points where damage is reported to have resulted from high winds, but the effect would seem to be unimportant, having regard to the total area seeded. The great majority of the agents throughout the territory covered by the C.N.R. show conditions most promising, with all indications pointing to a good crop if normal weather conditions prevail. The wheat is well above the ground and the seeding of coarse grains is progressing well.

Ontario Suffering Drouth

The Ontario Department of Agriculture issued the following summary of crop conditions on June 1:—

"Good growth has been made in field and orchard during the week although rain was greatly desired as reports came in, so as to give the newer seeding a start. Some fall wheat is being plowed up or drilled in with other spring grain, but as a rule the fields are well up to the average for promise. Clover is not in as good condition, generally speaking as is desirable, as the late spring greatly checked its growth. Pastures also have been eaten rather closer than usual for the time of year, as many livestock had to be turned on the grass before it was ready, owing to the scarcity of fodders. Orchards have been generous in bloom, and the prospects for yields are on the whole better than ordinary, although some growers are anxious as to the set of fruit as bees are scarce this year, owing to winter losses."

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first four weeks of May:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.	
May 7	$3,520,000	$2,856,000	+$	664,000
May 14	3,676,000	2,959,000	+	716,000
May 21	3,633,000	2,957,000	+	676,000
May 28	5,432,000	4,505,000	+	927,000

Canadian National Railways.

May 7	$1,896,301	$1,664,673	+$	231,628
May 14	2,073,563	1,848,336	+	225,227
May 21	1,946,107	1,891,532	+	54,575
May 28	2,389,889	2,498,746	—	108,857

Grand Trunk Railway.

May 7	$1,256,007	$1,130,352	+$	125,655
May 14	1,664,627	1,614,162	+	50,465
May 21	1,704,935	1,669,112	+	35,823
May 28	2,444,111	2,433,260	+	10,851

BANK BRANCH NOTES

Six New Branches Announced This Week—Bank of Commerce New Building in Winnipeg Now Open

The following is a list of branches of Canadian banks which have been opened recently:—

Sherbrooke, Que. (King and Wellington)	Royal Bank of Canada
Sherbrooke, Que. (Drummond St.)	Royal Bank of Canada
Aurora, Ont.	Sterling Bank of Canada
Sheet Harbor, N.S.	Bank of Nova Scotia
Connaught Station, Ont.	Imperial Bank of Canada

Cameron H. Duncan, formerly assistant manager for the Union Bank of Canada at Calgary, has been appointed manager at Lacombe, Alta.

C. A. Gigot, of the Union Bank, has left Calgary for Butte, Man., where he will manage the branch there.

The Canadian Bank of Commerce has let a contract for the erection of a new office building in Port Colborne, Ont., at an estimated cost of $50,000.

The new bank building which the Canadian Bank of Commerce has erected on Portage Ave., Winnipeg, was formally opened to the public on Monday, June 7th.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended June 10th, 1920, compared with the corresponding week last year:—

	Week eding June 10, '20.	Week ending June 12, '19.		Changes.
Montreal	$157,479,283	$143,358,339	+	$14,120,944
Toronto	130,174,577	100,023,504	+	30,151,073
Winnipeg	50,878,431	39,648,613	+	11,229,818
Vancouver	18,602,977	11,470,024	+	7,132,953
Ottawa	11,979,900	11,136,730	+	843,170
Calgary	8,358,568	....		....
Hamilton	8,669,464	6,293,025	+	2,376,439
Quebec	9,033,106	5,493,270	+	3,539,836
Edmonton	6,347,789	3,377,380	+	2,470,409
Halifax	7,736,280	5,830,595	+	1,905,685
London	4,844,291	3,471,162	+	1,373,129
Regina	4,789,927	4,021,243	+	768,684
St. John	4,275,870	2,889,669	+	1,386,201
Saskatoon	2,496,215	2,031,849	+	464,366
Moose Jaw	1,900,812	1,549,220	+	351,592
Brantford	1,787,699	1,107,745	+	679,954
Brandon	921,882	693,538	+	228,344
Fort William	1,061,242	851,038	+	210,204
Lethbridge	881,567	696,399	+	185,168
Medicine Hat	453,128	458,634	—	5,506
New Westminster.	846,525	593,894	+	252,631
Peterboro	1,205,727	831,766	+	373,961
Sherbrooke	1,399,516	1,011,850	+	387,666
Kitchener	1,876,504	1,160,893	+	715,611
Windsor	3,794,209	1,884,215	+	1,909,994
Prince Albert	536,216	374,569	+	161,647
Total	$442,331,905	$350,759,164	+	$83,214,173

Lethbridge bank clearings for the week ended June 2nd, 1920, which were not reported in these columns last week, were $724,174, as compared with $695,150 in the previous year, an increase of $29,024.

The following bank clearings for the month of May were omitted from our list last week:—

	1920.	1919.		Change.
Edmonton	$26,861,996	$18,078,429	+	$8,783,567
Moose Jaw	6,770,000	6,186,385	+	583,615
Medicine Hat	2,071,857	2,101,864	—	30,007

These figures bring the total clearings for May to $1,681,376,584, as compared with $1,413,979,781, an increase of $267,396,803.

DIVIDEND No. 96

Notice is hereby given that a Dividend of Two and one-half per cent. has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending the 30th day of June, 1920, being at the rate of

Ten Per Cent. Per Annum

and that the same will be payable on and after Friday, the 2nd day of July, 1920, and that a Bonus of One per cent. has been declared upon the said Capital Stock, payable at the same time as the said Dividend.

The Transfer Books of the Corporation will be closed from Saturday, the 19th day of June, to Wednesday, the 30th day of June, both days inclusive.

By Order of the Board of Directors.

A. D. LANGMUIR,
General Manager.

Toronto, June 1st, 1920.

ACTUARIAL SOCIETY OF AMERICA MEETING

Lapse Rates, Bond Valuations, State and National Insurance Are Among Subjects Discussed—William A. Hutcheson is New President

At the annual meeting of the Actuarial Society of America, held in New York, May 20-21, Wm. A. Hutcheson, actuary of the Mutual Life of New York, was elected president to succeed Henry Moir, who has filled that office for two years. The papers presented at the meeting were up to the usual standard.

Arthur Hunter and Dr. Oscar H. Rodgers, of the New York Life, discussed "The Influence of Occupation Upon Mortality." In this paper the application of the numerical rating system to occupations was explained, the chief part of the paper being a long list of occupations with the rating given by the New York Life to each. In determining the proper rating the authors stated that the chief source was the experience of the New York Life. In addition they took account of (1) the Medico Actuarial Investigation; (2) the published reports of the experience of other companies; (3) census statistics; (4) reports of beneficial orders, labor unions and fraternal societies; (5) reports by Federal and State officials in connection with the hazards of various occupations; (6) publications of the United States Bureau of Labor and United States Public Health Service.

Lapse Ratios

The lapse question was treated by Alexander T. Maclean, of the Massachusetts Mutual, in a paper entitled, "Comparative Rates of Withdrawal." The lapse rate has for many years been one of the serious questions of life insurance, since new business is of little value if it does not persist for a reasonable time. In his paper, Mr. Maclean gave a study of the experience of the Massachusetts Mutual, grouping the figures of withdrawals in a number of ways to give as full information as possible. The rate of withdrawal was given for each group of 5 entry ages by policy years, each of the first 5 years being taken separately and then years 6 to 10 and 11 to 15 as well as the total rate. Figures based on policies and also on amounts of insurance were given.

The experiences by different kinds of policies, ordinary life, limited payment life, endowment and term, were also taken out and separated according to years of issue 1903 to 1907 and 1908 to 1917, and also for the whole period of 1903-1917. The general results were instructive as confirming what has been generally believed, namely, that the lapse rate is much less on later issues than on the issues of the earlier period; second, that, in general, high premium policies showed a lower lapse rate than low premium policies, endowments showing the lowest of all and term policies showing the highest. An investigation of joint life policies was made separately and it was found that these showed a high lapse rate.

Tables were furnished showing the withdrawal rates by "habitat." The northeastern states show the lowest rates and the southwestern the highest.

Problems of Small Pension Funds

The modifications made in actuarial methods when dealing with pension fund problems, in the case of funds having only a small membership, were discussed by Joseph B. Maclean. The steps taken in such calculations are usually made to depend, in the case of large and well managed funds, on the past experience of the particular fund in question, as regards such elements as the rates of mortality, withdrawal, sickness and disability as well as the expected progression of salaries. They also depend in large part on the assumption of sufficient numbers to secure an average experience. In small funds there are therefore difficulties both as to obtaining satisfactory guidance as to the experience of the past upon which to base calculations, and also as to the degree of reliance which may be put upon any estimates for the future, however calculated, on account of insufficient basis for average.

The author used two typical cases as illustrating the special nature of the difficulties encountered, and described the methods used in these cases. He pointed out that in many cases it would, no doubt, be much more satisfactory for all concerned if the benefits desired were to be obtained where possible through the medium of an insurance company, thus eliminating the fluctuation due to small numbers.

Valuing Bond Holdings

A paper to which the actuaries listened with interest was one by J. Burnett Gibb, on "A Method of Valuing Bonds of a Life Insurance Company." The subject of bond depreciation during the past few years has become one of importance to many companies. The author made reference to the "amortization" and "market value" methods of valuing the bond holdings of a life insurance company. He expressed the opinion that in many cases where amortization is allowed under the rules of the insurance commissioners there has been depreciation to such an extent as apparently to indicate a lessening of security; on the other hand, the experience of the last few years has shown that actual market values may be quite unsatisfactory, since a life company is in position to hold such securities until maturity, if so desired. Neither of these methods, therefore, presents an ideal method of valuation.

Depreciation in bond holdings may be due to either (1) temporary money market conditions, (2) actual lessening of security. The first of these factors is not taken into account in the new method proposed. The second one is measured by calculating a so-called "basic rate" which represents the rate realized on bonds of unquestionable security. The method suggested is then to take as the value of any particular bond the amortized value, *less* the difference between, on the one hand, the value of the bond at the current basic rate, less the market value, and on the other hand, the value at the original basic rate at date of purchase, less the amortized value. It will be noticed that this reduces to the market value increased by the difference between the value on the basis of the original basic rate and the value on the basis of the current basic rate. Taking as an example the valuation of 10 railroad bonds, the author finds that as of 1915 there was only a slight difference of results in the various methods, the bond market in that year being normal, while in 1919 the new method gives a total result greater than the market value and slightly less than the amortized value, thus reflecting the presumed lessening of security.

Function of Insurance

In an address on "State and National Enterprise," Henry Moir said: "Insurance holds a unique place in our social system. It is an educational influence which has grown out of the inherent wants of the people. The thought of protection is often dormant and has to be quickened by active solicitation, such as would never have existed under bureaucratic management. This educational character would be destroyed if compulsion were applied and if people were insured irrespective of their own wishes. Indeed, it must never be forgotten that compelling influences, even though they lead towards results of general physical comfort, nevertheless have a reactionary influence on the mental and moral sense of the people."

Evidence to the effect that this country's natural resources have been wasted with the utmost prodigality comes to hand almost daily. According to a startling statement made by John McMillan, of the Cassiar Cannery, on the Skeena River in British Columbia, the catch of salmon on the Fraser River has decreased from an annual product of about 1,000,000 cases, worth from $4,000,000 to $8,000,000, to less than 40,000 cases, worth only a few hundred thousand dollars. The unlimited purse seine fishing now being permitted will, he considers, result in the total destruction of the salmon fisheries along the British Columbia coast.

WANT WESTERNER ON NATIONAL RAILWAY BOARD

Boards of Trade of Western Canada Urge Increased Use of Aid for Highways—Roads an Important Part of Industrial Development

DELEGATES from boards of trade throughout Western Canada met in Calgary on May 18th to 20th to discuss railway and water transportation, the ownership of lands, the development of industry, and other subjects of common interest. Resolutions were passed on May 18th urging that there should be a good representation of Western interests on the board of directors of the Canadian National Railways and that freight rates westward should be based on the same mileage rates as those eastward, and full advantage taken of reduced cost of operating lines through easy grades to the coast. A resolution urging the establishment of Western executive offices for the railway was withdrawn. W. E. Milner, of Winnipeg, set forth the desirability of Western representation on the board of directors, arguing that much of the construction would be done in the West in the next ten years and that a large part of the revenue from the national railways came from the West. J. J. Shallcross, of Victoria, believed that the great problem of the near future would be the devising of cheap means of placing the wheat grown on the prairies on the markets of the world. S. R. Moore, of Swift Current, questioned the wisdom of the first resolution, saying it would tend to create a cleavage between East and West.

Want Special Freight Rates on Coal

With a view to assisting the industries of the East in their fuel problems, and at the same time build up the mining industry in Alberta, the following resolution was passed on May 19th: "That every effort possible be made to increase the area of use of Western Canada's coal, and that this conference favors the investigation of freight rates on coal from Western Canada to the manufacturing centres of Ontario, with a view to making Canada independent of any other country in its fuel supply. And also that the Canadian Pacific and the Canadian National Railways, including the Grand Trunk Pacific and the Grand Trunk, be asked to give special freight rates for the summer haulage of coal from Western Canada. And further, that the coal operators be requested, if they have not already done so, to make special summer prices for the sale of this fuel."

William Pearce, of Calgary, addressed the delegates on the coal resources of Western Canada, explaining what a great heritage had been given in that respect. The speaker briefly dealt with the coal situation as it exists, declaring that the United States wanted a reciprocity on pulp, and the threat had been made that should it not be granted, the coal supply from the United States would be stopped. The speaker then went on to show that the development of the vast coal areas of Western Canada was all that was necessary to make Canada independent as regards her fuel supply.

Endorse Colonization Association

Following an interesting and instructive address by Brig.-Gen. H. F. McDonald on "Colonization," and the part the boards of trade of the West could do to promote this enterprise, the conference unanimously adopted the following resolution: "Resolved, That we heartily endorse the aims and objects of the Western Canadian Colonization Association, and that we call upon all boards of trade in Western Canada to co-operate with this movement to the fullest of their power."

Mr. Graham, of Saskatoon, urged that the natural resources of the prairie provinces should be transferred to those provinces by the Dominion government, and after considerable discussion the following resolution was adopted: "Whereas, the government of Canada has recently announced that it is, and has been, the policy since the government was formed to transfer to the western provinces their natural resources, that this conference recommend that this transfer be now made."

Good Roads Movement

Urging upon the delegates the necessity of better highways throughout the western provinces, if an effort was to be made to keep in line with the people in the states immediately to the south, James W. Davidson, president of the Calgary Good Roads Association, gave an enlightening address an national highways. He appealed to the conference to assist in making the western provinces more attractive for tourists, emphasizing particularly the urgent demand for a highway across the Rockies.

A resolution asking that immediate consideration be given the question of commercial and political union with the British West Indies, to the extent of requesting members of the various West India Island governments to send delegates to Ottawa to consider the subject, was adopted by the delegates to the boards of trade congress, and forwarded to Premier Borden.

Without a dissentient vote the conference called upon the Dominion minister of railways to take immediate steps to remedy dangerous conditions of travel on the Edmonton, Dunvegan and British Columbia Railway "through the purchase, if necessary, at its present value, of the Edmonton, Dunvegan and British Columbia Railway, and the extension of the road to the western boundary of the Province of Alberta."

It was decided to emphatically and insistently urge the federal government to appoint a commission to inquire into the "serious conditions developing in British Columbia and other parts of Western Canada through Orientals and certain classes of aliens obtaining control of the land in many districts, and to devise a remedy." According to H. B. Morley, president of the Penticton board of trade, and other delegates from the coast province, Oriental immigration threatened to result in the course of a few years in the ousting of white settlers from the best portions of the province.

Trunk Highway to Coast

The delegates also went on record as favoring government action for the completion of a trunk highway from Port Arthur to the coast, and expressing a wish that this system should be connected with Eastern Canada by a road from Sudbury to Port Arthur. They urged the federal government to make arrangements with the steamship lines to connect the Canadian National system with Europe and the Atlantic coast of Canada via the Panama Canal, and with the Orient, and declared that "the development of Canada's resources will be greatly assisted by the operation of a Canadian mercantile marine, which is deserving of every encouragement."

Newsprint Supply

Resolutions calling on the Dominion government to secure for the western provinces a regular and adequate supply of newsprint at prices in keeping with those prevailing in the eastern provinces and the United States, and asking that the duty on livestock entering Canada be suspended for twelve months, to permit of the building up of herds; urging that unsettled portions of the prairie provinces be thrown open under grazing leases to British citizens and other English-speaking settlers who have declared their intention to become naturalized; endorsing the appointment of a federal government purchasing commission, and expressing strong disapproval "of railway corporations claiming exclusive rights to construct railway lines in any portion of the Canadian west unless adequate service is being provided," were carried during the closing session of the conference.

The Vancouver branch of the Royal Trust Co. has moved from 732 Dunsmuir Street to the new premises in the Bank of Montreal Building (Bank of British North America branch) on Hastings Street. These premises were vacated by the British Columbia Trust Corporation, which has moved to the Credit Foncier Building, 850 Hastings Street West.

Labor in Russia is now organized in the form of an army, and as such is in a condition far removed from the freedom originally intended. Lzvestia, the official organ of the Soviet party, said on March 21: "In the period of transition in the organization of labor compulsion plays a very important part. The statement that free labor, namely, freely employed labor, produces more than labor under compulsion, is correct only when applied to feudalistic and bourgeois orders of society."

MAY FIRE LOSSES OVER TWO MILLION

Seven Fires with Loss of Hundred Thousand—103 Residences, Eight Business Blocks and Seven Stores Destroyed—Thirteen Fatalities

WHILE there were no conflagrations in May comparable to the destruction of the London, Ont., collegiate and of the Winnipeg car barns in April, there were no less than seven fires in which the loss is estimated at $100,000 or over. *The Monetary Times'* estimate of the loss for the month is $2,001,819, which is well below the figure for April, but more than the loss of $1,785,130 estimated for May, 1919. The total for the five months of the year is $11,557,944, or about one-half of the total for the twelve months of 1919. The May loss is made up as follows:—

Fires exceeding $10,000	$1,453,250
Small fires reported	68,569
Estimate of unreported fires	500,000
	$2,001,819

The Monetary Times' record for the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February ..	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May	1,163,110	3,570,014	1,785,130	2,001,819
June	1,184,627	3,080,982	3,337,530	....
July	1,101,734	3,369,684	1,118,377	....
August	1,230,183	3,110,445	1,374,495	....
September ..	1,301,700	917,286	1,940,272	....
October	704,605	5,119,145	1,023,288	....
November ...	959,049	1,059,580	2,339,870	....
December ...	5,144,100	1,733,917	2,047,496	....
Totals	$20,086,085	$31,815,844	$23,207,647	$11,557,944

The folowing is a list of the fires in which the loss was $10,000 or over:—

Brantford, Ont., May 6th, Buck Stove Co., $75,000.

Edmonton, Alta., May 1st, Alberta Motor Boat Co., $25,000.

Halifax, N.S., May 8th, seven large huts, $30,000.

Digby, N.S., May 15th, garage and thirty-eight cars, $100,000.

Ottawa, Ont., May 18th, A. J. Alexander's fur store, $53,000.

Winnipeg, Man., May 12th, Strathcona Hotel, $20,000.

Brighton, Ont., May 22nd, several buildings destroyed, $50,000.

Duncan, B.C., May 19th, Eureka Pure Bred Stock and residence, $100,000.

Harriston, Ont., May 20th, Zingler Bros.' factory, $75,000.

Milford, N.B., May 20th, bakery burnt, $100,000.

Montreal, Que., May 20th, St. Henri Station, $45,000.

Newmarket, Ont., municipal waterworks and electric light, $10,000.

Prince Rupert, B.C., May 19th, Wallace Cannery freighter, $150,000.

L'Etange, N.B., May 30th, four dwellings, store and sardine factory, $25,000.

Moncton, N.B., May 26th, Record Foundry and Machine Co., $75,000.

Moncton, N.B., May 26th, Bank of Nova Scotia building, $40,000.

Ottawa, Ont., May 30th, lumber yards, $100,000.

St. Joachim, Que., May 27th, Cote Mills, $200,000.

Toronto, Ont., May 21st, building, $105,000.

The following structures were destroyed or damaged last month: Residences 103, business blocks 8, stores 7, factories 7, hospital 1, hotels 3, school 1, stations 3, church 1, rink 1, repair shops 6, huts 7, sawmills 2, planning mill 1, camps 2, garages 9, barns 19, cars 51.

Among the causes reported were: Explosions 2, sparks from furnace 1, rubbish heap 1, leaking gas 1, matches 2, dry weather 3, sparks from passing locomotive 2, defective wiring 1, lighted lantern 2, storms 2, fire crackers 2, cigar butt 2.

Deaths from Fire

Thirteen fatalities occurred as the result of fire, the following being the circumstances:—

Toronto, Ont., May 10th, playing with matches.
Three Rivers, Que., May 20th, playing with fire.
Montreal, Que., May 21st, playing with matches.
Ottawa, Ont., May 13th, two women burnt to death.
Clyde, Alta., May 4th, child burnt to death.
Nelson, B.C., May 26th, burnt to death when house was on fire.
Port Arthur, Ont., May 28th, playing with matches.
Campbellton, N.B., May 29th, clothing caught fire.
Alvinston, Ont., May 27th, clothing caught fire.
Port Arthur, Ont., May 17th, burnt to death.
Ottawa, Ont., May 30th, two people struck by lightning.

NEW BASIS OF PRODUCTION COSTS

THE vastly increased costs of producing goods are pointed out in the Merchants Bank letter of May 21st, showing that high prices are in the main unavoidable. The article says:—

"The orators who are happy only when they denounce profiteers are responsible for much anger, misunderstanding and confusion. Even the Board of Commerce admits that 'business is, in the main, sound and honest' and that 'despite high prices undoubtedly prevailing profiteering, so-called — that is, the taking of unjust profits — is not, in the board's opinion, as common nor nearly as common as may have been charged or claimed.' But how seldom are these sentences quoted and how seldom are the real causes of high prices explained. Wages in many industries have been nearly doubled. Wages represent 70 per cent. of the cost of production. The prices of all food products have increased tremendously, not through profiteering among farmers, but through a world scarcity which was the inevitable result of the great war, the withdrawal of millions of men from productive pursuits, disorganization of transportation, social and political revolution and the reaction from the long agony in Europe.

"Added, again, to great and general wage increases are the heavy losses from industrial conflict. The losses to labor in Canada by strikes during 1919 aggregated at least $9,000,000 or $10,000,000, and to employers a far greater amount. In the United States the loss to labor through industrial conflict in 1919 is put at $723,478,000, and to capital at $1,226,357,000. The loss in production of coal is estimated at 40,000,000 tons, and of steel at $300,000,000. In Great Britain 34,000,000 working days were lost by strikes and the hours of work were reduced by 6½ hours a week for 6,000,000 workers. It is not suggested that wage increases were excessive or that there was no justification of the destructive contests in which so many workers engaged. In many cases no doubt there was justification. In some there was not. But it is not intended to pronounce, or even to suggest, judgment one way or the other. It is enough to argue from the facts that food scarcity decreases production and higher wages must raise prices of much that we eat and wear, and must involve higher charges for housing, transportation, and all other necessary services.

"There is profiteering and no judgment too severe can be pronounced upon manufacturers, landlords or traders who traffic deliberately in the necessaries of the people, but we should remember the judgment of the Board of Commerce that 'Business is, in the main, sound and honest,' and that the causes of our 'present discontents' are largely natural and inevitable. Farmers, manufacturers, traders and capitalists may offer against many of the attacks to which they are subjected the defence of the darkey who was reprimanded by his master: 'Marse Andrew, I has enuff to answer fer wid the scusations what is jest, widout having to be 'sponsible for dem what ain't so.' If the actual facts of the situation in which we find ourselves are understood and admitted, there will be less angry denunciation by press and platform and a soberer and sounder temper in the country."

Bond Sales Again Reach Substantial Proportions

May Figure Nearly Thirty-Four Millions—United States Takes Bulk of This Amount — Provincial Borrowings Particularly Heavy — Prices Shows No Improvement

CANADIAN bond sales again reached substantial proportions in May According to *The Monetary Times* record, the total was $33,853,302, as compared with $26,930,434 in April, and $9,568,101 in May a year ago. The classification of last month's figures is as follows:

Provincial	$12,300,000
Railroad	15,000,000
Corporation	5,000,000
Municipal	1,553,302
	$33,853,302

Of the above amount approximately $24,500,000 was secured in the United States, the bulk of the provincial loans being floated there, while the whole of the $15,000,000 trust notes of the Canadian National Railways was placed there, indicating that there is still a ready demand for high-class Canadian securities in that market.

Short-Term Provincial Loans

Provincial borrowings were heavy, amounting to $12,300,000, bringing the total for the year up to nearly $50,000,000. A notable feature of provincial financing this year is that only two of the many loans floated were for a maturity of more than ten years, the others being for five years or less. It would seem that the Canadian borrower in the American market would prefer to issue a long-term bond, in order to give exchange rates a longer period in which to become normal. This ,however, has been proved to be impracticable, and as Canadian provinces have practically been compelled to borrow across the line, the short-term issue was the only alternative.

Municipal Borrowings

Municipal bond sales were fewer last month, the total being $1,553,302, as compared with $4,855,434 in April, and $1,268,101 in May, 1919. Prices were also lower. Classified by the provinces, the total is as follows:

Ontario	$ 820,012
Nova Scotia	482,490
Saskatchewan	175,800
British Columbia	75,000
	$1,553,302

Issue	Amount	Rate %	Term (Years)	Purchaser	Price Paid

NEW MANITOBA RURAL CREDIT SOCIETIES

Eight new rural credit societies have been formed in Manitoba, according to an announcement by C. Gifford, administrator. This brings into operation sixty-six societies, fifty-three of which are actually loaning. The societies have been formed in the following municipalities: Duck Mountain, Whitemouth, Binscarth, Kelwood, Pembina, Minto, MacGregor and Swan River. Duck Mountain society was issued a cheque for $25,000, covering nineteen individual loans.

The total loans to date issue under the Rural Credits Act are $840,000. Business will be conducted by the other seven societies as soon as they meet their respective municipal councils.

Banking in Relation to Reconstruction*

Tightening of Credit Is a Widespread Movement Among Banks, in Anticipation of Declining Prices—Buying Will Slacken as Prices Fall—Canadian Banks' Interests Are Not Sectional—War Proved Wisdom of Policy of Self-Supporting Nations

By H. B. MACKENZIE
Assistant General Manager, Bank of Montreal

IN SPEAKING of banking and reconstruction, it is not my intention to cover the foreign field, but merely to make a few observations on the present situation in Canada with regard to these matters, and some comments upon the outlook.

The end of the war has left a number of European countries in an impoverished or bankrupt position, while others, not quite so badly off, are still faced with very grave difficulties. In Canada we are happily more fortunate and the return to normal conditions will be accomplished more easily, provided the problems that arise in that connection are met by all classes of the community in the spirit of mutual goodwill. There is no reason whatever to feel dejected over our national outlook at present, but there is plenty of reason for being soberly thoughtful.

I am not going to burden you with statistics, but I would like to draw your attention to some outstanding figures in the government statements of our chartered banks. Comparing the figures of June, 1914, with those of March, 1920, the following increases appear: Note circulation, from $99,000,000 to $225,000,000; deposits by the public, from $1,018,000,000 to $1,885,000,000; current loans in Canada, from $838,000,000 to $1,322,000,000; total assets, from $1,575,000,000 to $3,061,000,000.

These figures are, of course, a reflection of the great stimulus given to business by the borrowed money spent here by our own and the British and foreign governments during the war, but from the national standpoint, any gain they represent is more than offset by the increase in the public debt. The country as a whole is naturally not so well off as it was before the war. We hear a great deal nowadays about inflation, and there has certainly been a great inflation of debt, but when it comes to the question of currency, there is a difference to be noted. The term "inflation of the currency" has sometimes in the past been applied to the vicious practice adopted by embarrassed governments of paying their way in their own discredited and irredeemable notes.

No Change in Currency

In these cases the notes were forced upon an unwilling public, but there has been nothing of that kind in Canada. Bank notes and the legal tender notes of the government have simply been issued in response to the general requirements of an increased volume of business in a period of rapidly rising prices and wages. People are merely doing as they have always done—that is, carrying the amount of currency required for their current needs. The currency has not been pushed out and there is no bar to its redemption, and it has suffered no loss of value through distrust of its soundness. It is right, therefore, to keep in mind that, while the amount of bank and government notes in circulation has largely increased, there has been no inflation of our currency in any discreditable sense.

The bankers in Canada have been complimented, and I think fairly, upon the way they have handled the successive problems which arose during the war, but prehaps the times upon which we now seem to be entering may prove a more severe test of their prudence and ability. When prices are steadily rising there is little risk in making loans; business people are all prospering; failures are few, and the goods that the merchant buys with the bank's advances, and from the sale of which he expects to repay, grow in value as they lie on his shelves. While these conditions last, losses are seldom serious.

Restriction of Credit

Bankers in the United States and Canada have now, however, adopted a uniform policy of putting a stop to the further expansion of credits and confining advances to the actual requirements of the business of the borrower. Those desirous of still further extending their business on borrowed money now meet with no encouragement. This policy is believed to be not only in the best interest of the borrower and lender, but also necessary from a national standpoint as a first step in the return to more stable business conditions. Every one concerned is probably aware of it by now and it has been, in the main, accepted by borrowers with good grace. It may be that this policy of restriction is the cause of some recent breaks in prices and discount sales; it may be that they were coming anyway; at all events they happened to coincide. Whether we have now reached the peak of high prices or not is uncertain, but if we are not at the peak, we must surely be close to it, and then we shall have to face the more trying experience of coming down on the other side.

It is expected in some quarters that until production overtakes demand there can be no permanent fall in prices, but perhaps this view does not sufficiently recognize the difference between "demand" and what economists call "effective demand"; that is, both ability and willingness to buy. There has not been, in the memory of man, such lavish waste of money as in the last few years, and those who have been making and spending more money than ever before, and who have no vision, would, perhaps, like to see it go on, but effective demand may be seriously curtailed through diminished purchasing power. We are still in the afterglow of this unsubstantial prosperity, but surely the cessation of all that abnormal expenditure will, before long, be felt in our economic life, and reflected in a curtailment of the purchasing power of our people.

Buying Will Be Cautious

Then as to the willingness to buy—during the war years people who wanted six months to buy anything found they had to pay more for it, and ever since that idea took firm hold, merchants and the public have continued to buy freely, but when the conviction becomes general that the tide has turned the tendency will be to buy sparingly—a perfectly natural reaction which will operate to depress prices just as free buying operated to raise them. Possibly this conviction will lead also to the practice of that economy in personal expenditure so much advised and so little followed in the years just behind us.

Under existing circumstances bankers have properly become more than usually cautious, because as to the great bulk of the resources they administer they are merely trustees and bound to remember that they are advancing money placed by other people in their care. They are naturally not always able to see eye-to-eye with would-be borrowers, and I am far from claiming that their judgment is always and of necessity right. Experience, however, has taught them certain guiding lines, for instance—that their advances should in the main be made to business people for the legitimate purposes of their business and with a source of repayment in sight from liquid assets. There are, of course, other classes of legitimate loans, and exceptional transactions justified on their individual merits, but a prudent banker has a strong leaning toward liquid assets. In speaking of business people, I include, of course, the farmers whose legitimate requirements for pur-

GROWTH OF THE MERCHANTS BANK OF CANADA IN LAST DECADE

(During the period of the war an embargo against the opening of new branches was in force)

The policy of the Merchants Bank has not been that of amalgamating with other Banks, nor of acquiring business in foreign countries. The gains, therefore, as shown by the above Chart represent the actual growth of the Bank's business in Canada during the period covered.

1828
L'UNION

poses of production are recognized as sound banking business, and the farmers are in fact the principal borrowers at the small branches in the prairie provinces.

No Discrimination Among Borrowers

Let me just add that bankers have an equal interest in all sections of the country, and in all classes of the community. Their interests and their services extend to all sections and to all classes alike, and if I may make a local reference, I am satisfied a fair investigation would show that these prairie provinces are as well served by the Canadian banks as any similar district in any part of the world.

We are living in a rather unsubstantial state of things just now, and we all want to get back to earth with the least possible disturbance. It will certainly smooth our path back to normal conditions if there can be developed in the minds of all Canadians a strong sense of national unity, a clear idea that whatever their racial, or vocational, or class affiliations may be, they owe a common and a higher allegiance, a paramount allegiance, to the Dominion of Canada.

Against the development of this idea of national unity will be found the class-minded man and the class-minded group, who find it difficult to think and plan except along the line of what seems to be their immediate and personal advantage, whose first inquiry on any question is always, "What is there in it for us?" Please do not misunderstand me; I am not suggesting that the guiding principle of our business and public life should be self-sacrifice. However much might be said for the principle, I am afraid humanity is not yet sufficiently altruistic to make that practicable, and it is human nature that we have to deal with. Self-interest will probably continue to be the mainspring of human endeavor, but an enlightened self-interest is after all not such a bad thing, for if each citizen knew what was really best for himself individually, and always did it, many of our troubles would disappear as if by magic. It is blind self-interest that is the danger, and the remedy is the spread of the actual truth on business and political questions, and the finding of some effective means to quicken the public sense, not only of the mutual advantages, but also of the mutual responsibilities of community life.

Influence of Public Opinion

The labor disputes of recent years have, however, shown that public opinion is becoming a very powerful factor; the strike that has the sympathy of the general public is already half-won; the strike which lacks it, is always sure to fail; and the general spread of knowledge is all the time making it more difficult to mislead the people in any country where the standard of education is so high as it is here. All this means progress toward a better state of things. The great bogey of the world to-day is Bolshevism, and it thrives best among the ignorant. All kinds of means are suggested to defeat it, but perhaps the surest of all is to awaken in the public mind an idea of citizenship, alongside of which Bolshevism simply cannot live.

In the spreading of correct information on controversial subjects, the Canadian clubs can perhaps perform useful service as a sort of forum in which both sides of any question of really national importance can get a fair hearing. There, if anywhere, the idea of national unity should flourish, and I have no doubt it does for the audiences at the Canadian clubs represent a high type of Canadian citizenship—I may say that the committee of the Canadian club of Montreal, of which I happen to be president this year, recently had this matter under discussion.

Too Many in Cities

There is a widespread feeling that our national development has become a little one-sided of late, and we shall do well if we can contrive a more balanced growth; town and country keeping step in a steadily advancing prosperity, mutually helpful and also mutually dependent. The balance, however, is a little out at the moment. Both in this country and in the United States there has been, for some years, a steady drift from the land to the cities, which it seems desirable to check, but very difficult so long as higher wages and shorter hours in the cities continue. I do not pretend to say what is the remedy. There has never been a time when the attractions of life on the farm seemed greater to those who do not live there—rural telephones, rural letter deliveries, better machinery, better roads, motor cars—all these things might be expected to make farm life more agreeable than it was twenty years ago. As a matter of fact, however, the drift to the cities continues. The encouragement of desirable immigrants of the agricultural class will, of course, help the situation, and give us, for the time being, more people to till the soil, which is our greatest need at the moment, but if there is an underlying cause for the drift to the cities, immigration will only bring temporary relief.

Recognition of Union

The abnormal conditions under which we are now living did not arise in a day and they will not be cured in a day, and the period of readjustment may prove to be a real test of our patriotism, but whatever difference may arise within our borders, it is most unlikely that Canadians will yield ascendancy to any action of the country or to any class. It is foreign to the spirit of our people that any citizen, or any group of citizens should be submissive and dumb under a sense of injustice, and the right of individuals having common interests to form themselves into unions and associations for the more effective promotion and protection of these intersts is no longer seriously questioned. It is proper and in the line of progress that different sections of the country and different classes of the community should press for their honest rights by constitutional and orderly methods; but between that and taking short cuts to what we may conceive to be our rights, lies all the difference between organized society and barbarism. There is not the slightest doubt that Canada will continue to stand for an organized society, and will continue to uphold the authority of our Dominion and provincial parliaments and of our courts of law, and if there should come amongst us some of another way to thinking, we can only say to them: "Friends, you are out of place here, but the world is wide."

In the development of our natural resources, it is very important to proceed only upon absolutely reliable information in order that discredit may not fall on the name of the Dominion, through losses made by investors in unsound enterprises.

Advantage of Rounded Development

To those engaged in what are called our natural industries it sometimes appears that governments are overkind to other enterprises calculated to make the country self-supporting in a wider range of the necessaries of life and in some instances they may be right, but I think the war has helped us all to realize that a policy, which cannot perhaps be made to square exactly with pure economic theory, may yet be prudent from a national standpoint if due regard is paid to present world conditions. When the war broke out it was certainly fortunate that Canada was not only able to send food to Great Britain, but had also hundreds of factories and thousands of machinists and other operatives capable of being turned at once upon the work of making war materials. All the world is not even yet the friend of the British Empire and the widely separated parts of the empire cannot safely specialize at present on a few lines of industry for which they are peculiarly adapted and depend on getting their other requirements from outside. There is an economic standpoint which seems to take little or no account of the possibility of war, but after what we have just been through, we would not like to feel too largely dependent for the necessaries of life upon the good-will of even the most friendly of foreign nations. In a matter of this kind there are, of course, reasonable limits to be observed, and it is the business of statesmanship to find them and to adjust them from time to time as circumstances may warrant, but always and solely in the national interest.

The war has left us with a national debt of quite formidable proportions, the interest on which, and the payment of pensions, will be a heavy charge upon the Dominion, and to provide for these and the gradual repayment of principal, it is most important that our national production in all lines should be maintained at the maximum consistent with reasonable expectations of demand, and that as a people we should cease extravagance and turn to thrift. We do pay lip service to these ideas, but there is often an atmosphere of convention and artificiality about it that is not inspiring.

JOHN G. BORTHWICK, Manager far Canada

The Merchants Bank
of Canada

Proceedings of the Fifty-Seventh Annual Meeting of Shareholders on June 2nd, 1920.

The Fifty-seventh Annual Meeting of the Shareholders of the Merchants Bank of Canada was held Wednesday, June 2nd, in the Board Room at the Bank's Head Office at Montreal. The meeting was called to order at 12 o'clock, noon.

On motion of Mr. John Patterson, the President, Sir H. Montagu Allan, was asked to take the chair.

Mr. J. M. Kilbourn was appointed Secretary of the meeting and read the notice calling the meeting.

The minutes of the last Annual Meeting were taken as read.

THE ANNUAL REPORT.

The President, Sir H. Montagu Allan, then presented the Annual Report, as follows:—

I beg to submit, on behalf of the Directors, the Fifty-seventh Annual Statement of the Merchants Bank of Canada as at the close of business on the evening of the 30th April, 1920, together with a statement of the Profits covering the relative period.

Despite the fact that operating costs have continued their upward course, the net profits resulting from the year's business were $1,686,156.15, being an increase over last year of $302,586.75.

The financial position of the Bank, as reflected in detail in the Balance Sheet before you, will, I hope, meet with your full approbation.

In the Directors' Report of a year ago, I mentioned that an issue of $1,400,000 of new stock was being made, and that, owing to the date of allotment, this step would fall for comment more appropriately at the next Annual Meeting. I am now pleased to advise you that the issue was promptly taken up and long since paid for in full by the shareholders. The Paid-up Capital of the Bank, therefore, stands to-day at $8,400,000, while the $700,000 premium received from the new issue and $700,000 transferred from Profit and Loss Account have been added to the Reserve, thus maintaining that Fund upon an equal basis with the Paid-up Capital.

You have already been advised that, in line with the growth of the Bank, and with a view of keeping pace fairly and reasonably with the legitimate requirements of our ever-growing clientele, a further issue of $2,100,000 of new stock, upon the same favorable terms to the shareholders, is now under way. This new issue will appropriately be referred to again a year hence.

It may be of interest to mention that the Bank's shareholders now number 2,622, as against 2,406 in 1919, and 2,340 in 1918.

At the commencement of the Bank's fiscal year presently under review, the Directors felt warranted in placing the Dividend on a regular 12% basis, and also, later, in distributing a bonus of 1%, making in all 13% received by the shareholders during the twelve-month period. No doubt their action in this respect will have your full approval.

During the year we opened 65 Branches, with a number of sub-agencies as feeders, and I may say that results have amply justified our action, as evidenced by the fact that we have only closed 2 Branches during the period.

In December last our office in London, England, was opened for business and already gratifying progress has been made in the building up of a London connection, while the facilities afforded our clientele on this side have greatly enhanced the value of the services we are enabled to extend to them. It had been apparent for some time that the growth and incrasing importance of the institution called for the completion of our organization by the establishment of an office in the Capital of the Empire.

During the year we conceived it to be advisable and expedient, in keeping with modern and approved practice, to liquify to some extent the inactive asset represented by Bank Premises' Account, which, as you are aware, must, with the growth of the Bank, be an ever-expanding one. We accordingly turned over certain of our premises to a subsidiary company called the Merchants' Realty Corporation, who in turn issued Bonds against the respective properties to the amount of $4,000,000, the proceeds of the sale of which have been appropriately applied. These Bonds are of a serial nature, and will be thus automatically amortized as they fall in for payment, control of the property being held by the Bank through the ownership of all the stock of the Company, this being shown upon our books at a nominal figure.

Since the last Meeting, death has removed from our midst Mr. E. F. Hebden, formerly General Manager of the Bank and, for a period, Managing Director. His service in the institution was lifelong, and in his demise the financial community lost a distinctive and distinguished personality, the Bank an able and experienced administrator. His death is regarded with deep regret by all.

The vacancy upon the Board has been filled by the appointment of Mr. E. W. Kneeland, of Winnipeg, a business man of wide experience and influence in the West.

In view of the continued growth of the Bank's business, the Directors are of opinion it would be desirable to enlarge the numerical strength of the Board by adding one more to their number, and an amendment to this effect of the relative by-law will be submitted for your approval. The name of Mr. Gordon M. McGregor, of Windsor, Vice-President of the Ford Motor Company of Canada, will accordingly be included in the list, which will be submitted to you in due course. He is a man of high standing in the commercial community, and we are sure of your agreement with the Directors that he will prove an acquisition to the Board.

You may be interested to learn that I made a trip last autumn through Ontario and the West—accompanied by some of the Directors and the General Manager. We met all the senior officers, and I have pleasure in saying that I found the trip both inspiring and beneficial to a degree.

We have undoubtedly an efficient staff and you will, I am sure, join with the Directors in extending to its members, one and all, a word of cordial appreciation for their capable and loyal services, to which the measure of progress the Bank has enjoyed is in no small extent attributable.

All the various offices of the Bank have been inspected during the past twelve months.

The Auditors' Certificate is appended.

All of which is respectfully submitted.

H. MONTAGU ALLAN,
President.

THE FINANCIAL STATEMENT

Statement of the Result of the Business of the Bank for the Year Ended 30th April, 1920.

The Net Profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$1,686,156.15
Premium on New Stock		700,000.00

H. MONTAGU ALLAN,
President.

D. C. MACAROW,
General Manager.

REPORT OF THE AUDITORS TO THE SHAREHOLDERS OF THE MERCHANTS BANK OF CANADA.

In accordance with the provisions of Sub-Sections 19 and 20 of Section 56 of the Bank Act, we report to the shareholders as follows:—

We have examined the above Balance Sheet with the Books of Account and other records at the Chief Office of the Bank and with the signed returns from the Branches and Agencies, and have checked the cash and verified the securities of the Bank at the Chief Office against the entries in regard thereto in the books of the Bank at 30th April, 1920, and at a different time during the year and found them to agree with such entries. We also attended at some of the Branches during the year and checked the cash and verified the securities held at the dates of our attendances and found them to agree with the entries in regard thereto in the books of the Bank.

We have obtained all the information and explanations we have required. In our opinion, the transactions of the Bank which have come under our notice have been within the powers of the Bank, and the above Balance Sheet it properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of our information, and the explanations given to us, and as shown by the books of the Bank.

VIVIAN HARCOURT, }
GORDON TANSLEY, } Auditors.

(of the firm of Deloitte, Plender, Griffiths & Co.)

Montreal, 25th May, 1920.

PRESIDENT'S ADDRESS.

In moving the adoption of the report, Sir Montagu Allan said: "After my formal address I wish to add just a few words, and I apologize to Mr. Macarow for doing so, because it is somewhat of a personal matter, but I think on this occasion it should be referred to.

"I wish to say that the day before yesterday I and the members of the board were notified by a member of the staff of the bank that a very important affair was to take place in the board room here yesterday afternoon. We attended, and were agreeably surprised to find that the business in hand was a presentation to our General Manager, Mr. D. C. Macarow.

"I have not secured his permission to mention this matter, but take the opportunity of doing so, because it was a decidedly unique event, of which neither he nor I nor the directors had any previous knowledge.

"It turned out to be a spontaneous gift from all the members of the bank's staff, from Vancouver to Halifax, a magnificent silver tea service, one of the most beautiful things I have ever seen, with other objets d'art.

"The presentation was the occasion of several very happy addresses from members of the staff, with an address which they presented Mr. Macarow, along with their gift, and led to a particularly illuminating reply from the General Manager, which, needless to say, brought down the house.

"It is with particular pleasure that I inform the shareholders of this event, because it is of interest to you all to know that the General Manager and the staff are in such close accord, and have such friendly personal relations. We of the board have every confidence in Mr. Macarow, and, from what we saw in the west last year, there was no doubt of the friendly feelings of the staff everywhere towards him. As an evidence of the friendly and confident relations that exist between Mr. Macarow and the staff all over Canada, I think yesterday's function was one of the most agreeable and unique I have been privileged to witness for a long time, and I congratulate Mr. Macarow on the regard he has won from the bank staff throughout the whole Dominion." (Applause).

The president then made the formal resolution for the adoption of the annual report, seconded by Mr. K. W. Blackwell.

THE GENERAL MANAGER'S ADDRESS.

The General Manager, Mr. D. C. Macarow, in rising to make his address, was received with much applause from the shareholders. He said:—

"In the first place I must say that the personal onslaught made upon myself by the president is as unexpected as it is kindly. I was deeply touched by the presentation so spontaneously made to myself by the staff throughout the country. I view the presentation with mixed feelings, appreciation of the kindly intent it showed, and doubt as to my own merits. However, I accepted it in the spirit in which it was given, and it will always be one of my most prized possessions.

"The President's address forms a comprehensive epitome of all the important phases of the Bank's present position, and has appropriately dealt with or touched upon the several outstanding developments which have taken place during the past fiscal year.

"I shall, therefore, but add a brief word of amplification as to some features of the statement which it occurs to me may be enlarged upon without unnecessary repetition.

"Another Victory Loan last autumn was again heavily subscribed to by the Bank's clientele throughout the country, their total subscriptions reaching the large sum of $41,770,000, practically all of which (conversions being negligible in amount) was a direct charge against our deposits. Yet the resultant heavy withdrawal was not only overtaken, but deposit totals show an increase, in addition, over last year, of $24,900,000. This must be considered a satisfactory achievement, I think.

"Commercial Discounts have, in natural course, advanced also, and the total now stands at $113,198,000, being an increase during the year of $17,324,000. These figures indicate that the Bank is continuing to carry its full share of the load in a period when the support and encouragement of the productive capacity and energies of the country is a matter of paramount importance. If stable conditions are to be reasonably maintained, it is essential that the vital channels of commerce and industry be kept open and, I venture to assert, in functioning as the above figures reflect, the Bank is playing its part to that end.

"At last year's Annual Meeting I made reference to our Asset column as representing dollar for dollar of actual value, and I make the same assertion to-day with equal emphasis.

"The record of growth this year leads me to feel that a few figures showing our progress, taking the last five years as a basis of comparison, may be of some interest to you. The totals and percentages are as follows, based on the year-end figures as at 30th April, 1915, and 30th April this present year:—

	1915	1920	Gain
Total Deposits	$64,869,000	$163,080.000	151%
Current Loans and Discounts	47,401.000	113,198,000	138%
Total Assets	86,190.000	197,387,000	129%

a satisfactory and evenly balanced measure of development, you will, I am sure, agree.

"If I may be permitted to add a word as to general conditions I will be brief, for the subject has been dealt with from platform, pulpit and press so exhaustively that I cannot say much without wearisome reiteration. I fear it must be admitted, however, that the progress of this country, and indeed of the world at large, toward normal peace conditions has not been what we looked forward to a year ago. Unsettlement continues, labor and other difficulties abound, and the dominant need of the time. Production, is palpably inert and backward. So long as production lags, so long will high prices and general inflation continue. Costs are mounting to ever higher levels and the process of deflation with the necessary changes in ideas, in habits and in outlook to something more approaching those of normal conditions can hardly be said yet to be in real evidence, though sporadic and somewhat spectacular cutting of prices in certain seasonal lines of manufactured goods may perhaps be accepted as a psychological sign showing that the trend at least, is in the right direction.

"The demand for borrowed capital continues to be more or less importunate, and it is in the conservation of credit and the equitable rationing of it that Banks can play and, indeed, are playing a sound constructive role. Legitimate productive enterprises are being fostered and encouraged fairly, while at the same time a firmly restraining hand is held upon unproductive, non-essential and speculative undertakings. This policy of selective curtailment, so to put it, operating as it does at the very root of existing evils, and applied with due judgment, discrimination and consistency, cannot but prove a beneficial corrective and an importantly contributing factor towards restoring, with a minimum of dislocation and disturbance, healthy and normal conditions in the body politic.

"I might here venture to say that it is a matter of gratification to see our mercantile marine growing apace and to know that the Government will have, it is understood, some 45 merchant vessels in commission by the end of July next. I mentioned last year, and I reaffirm the opinion then expressed, that there is nothing of greater national importance than the establishment of our own lines of ocean transport, and what has been and is being accomplished in this direction, both by the Government and by private enterprise, augurs well for the future safety and stability of the country's trade and commerce.

"After what looked like in some respects an ominous start the crop situation throughout the country now seems to justify the belief that good yields will be secured his year. Predictions, however, are futile, and we can only nurse the hope that actual results will fairly measure up to present optimistic estimates. Certainly, on the theory of averages alone, we are entitled to look for some redress in the crop situation this year. Much depends upon it, more especially in view of the disappointing results of the last two years, and if nature is benevolent in the coming harvest, this country will benefit to an unmeasured extent, and we shall be reasonably in a position to view the period of deflation, upon the threshold of which we stand, with feelings of confidence as to our immediate future—as to our ultimate future there need be no misgiving, for it must be borne in mind that Canada is a young and virile country of almost limitless possibilities and immense natural resources awaiting development, that its manhood is strong, enterprising, thoughtful and sane.

"While we have our readjustment difficulties to deal with, our progress through the transition period will be orderly and well-conducted if there is a fair measure of mutual appreciation of surrounding difficulties and reasonable co-operation and good will all along the line in surmounting them. In a word, if the wise and reasonable policy so briefly and clearly condensed in the three simple words 'give and take' continues to operate with cordial uninterruption we shall move with steady and assured step to the great destiny which lies before us through wide-open avenues of peace, progress and prosperity.

"Before closing, I would like to add my tribute of appreciation to the staff of the Bank for their devotion and efficiency. I cannot do so better than by saying that the President's apt and graceful remarks thereanent have my unqualified and unrestricted endorsement. It is true, indeed, that the progress of the Bank is in no small measure due to the co-operative efforts of a loyal, capable and contented staff. That, I know, we have."

Before putting the motion for the adoption of the Report, the Chairman invited questions or discussion. There being none, he put the motion, which was unanimously adopted.

It was moved by Mr. A. Haig Sims, seconded by Mr. David Kinghorn, that Messrs. Vivian Harcourt and Gordon Tansley, of Deloitte, Plender, Griffiths & Co., be re-appointed Auditors of the Bank, to hold office until the next Annual Meeting.

On motion of Messrs. K. W. Blackwell and Farquhar Robertson, it was proposed: "That By-law 111, enacted by the Shareholders of the Bank, be and is hereby amended by substituting the word 'fifteen' for the word 'fourteen' in the first line thereof." This was unanimously adopted.

On motion of Messrs. A. Haig Sims and David Kinghorn, Messrs. John Patterson and Arthur Browning were, by unanimous vote, appointed Scrutineers, and instructed to cast one ballot for the election of the following persons as directors:—Sir H. Montagu Allan, Mr. K. W. Blackwell, Mr. Thomas Long, Sir Frederick Orr Lewis, Bart., Hon. C. C. Ballantyne, Mr. A. J. Dawes, Mr. F. Howard Wilson, Mr. Farquhar Robertson, Mr. Geo. L. Cains, Mr. Alfred B. Evans, Mr. T. Ahearn, Lt.-Col. Jas. R. Moodie, Hon. Lorne C. Webster, Mr. E. W. Kneeland, Mr. Gordon M. McGregor.

The ballot having been cast, the Directors as named were declared to be elected:—

Mr. A. Haig Sims—"Before this meeting concludes I wish to move a hearty vote of thanks and appreciation to the President and Directors for their services during the past year, which have made it possible to present the splendid report we have heard to-day. With this I would like to couple the thanks of the Shareholders to the General Manager and all members of the staff throughout the country for their efficient and loyal services to the Bank, which have contributed in no small degree to enabling the Directors to carry on their work for the advancement of the Bank."

This was seconded by Mr. A. A. MacDougall, and carried with applause, after which a brief address of thanks was made by the President for himself and the Directors, and by the General Manager for himself and the Staff.

This concluded the business of the meeting, which then adjourned.

At a subsequent special meeting of the Directors, Sir H. Montagu Allan was re-elected President, and Mr. K. W. Blackwell, Vice-President.

Investments and the Market

Good Showing Made By Tucketts Tobacco Company in 1919—Notwithstanding Handicap Dome Mines Had Satisfactory Year—Revenue Asked for New Brunswick Telephone Company Reduced By Public Utilities Commission—Brazilian Earnings Continue High

London Street Railway.—The London city council has voted against increased car fares in the city, and, in consequence, the new scale of wages for employees of the company will not be enforced. As a result of this the employees have gone on strike, the street car service ending at midnight on June 7.

Nova Scotia Steel and Coal Co.—Shareholders of the Nova Scotia Steel and Coal Co. have been called to meet at New Glasgow, N.S., on June 25, to pass upon the proposal favored by the directors of the company for a merger with the Dominion Steel Corporation and other concerns being formed into the British Empire Steel Corporation.

Porto Rico Railway Co., Ltd.—For the month of April, 1920, gross earnings of the company amounted to $114,116, against $94,515, an increase of 20.73 per cent. Net earnings showed an increase of 43.54 per cent., at $49,632. For the four months ended April 30, gross amounted to $431,066, as compared with $375,552 last year, a gain of 14.78 per cent., while net gained 32.25 per cent., at $171,847.

Central Vermont Railway Co.—The report for the year ended December 31, 1919, shows deficit, after charges, of $80,304, as compared with deficit of $144,382 in the preceding year. As the actual earnings of the road amounted to a deficit of $871,205 and the federal compensation was $828,625, the loss to the government amounted to $1,699,830, as compared with a government loss of $1,512,504 in 1916.

Peterson Lake Mining Co.—At the annual meeting of the company on May 31, the report which was reviewed in these columns last week, was adopted by the shareholders. President W. A. Lamport stated that at the present time they were engaged in taking out some high-grade ore, an estimate of which was 50,000 ounces, and that shipments would be made shortly. In regard to their slimes, he stated that the Dominion Reduction Co. was engaged in putting in additional plants, and he expected that a start would be made in the treatment of same about the end of July. This will ensure a steady income for the company, it is expected, until the end of the season.

Minneapolis, St. Paul and Sault Ste. Marie Rly.—The annual report of the company for 1919, shows a surplus after charges and taxes amounting to $5,338,415. This was the equivalent of $14.12 a share earned on the $37,810,200 capital stock. In the preceding year $8.49 a share was earned on the same stock. The corporate income account of the company showed that there was a decrease in interest, taxes, rentals and the like from $7,316,218 to $5,894,656, and more than a 50 per cent. decrease in lap-over items charged by the Railroad Administration. The company showed a profit and loss surplus at the close of the year of $21,593,335, as compared with $20,488,015 in the preceding year.

Carriage Factories, Ltd.—Preferred shareholders are endeavoring to secure a meeting in the near future to consider the reorganization of the company, more efficient factory operation and larger representation on the board of directors. The shareholders point out that they want a stock dividend declared and payable as soon as possible for the funding of all arrears. The 7 per cent. dividend on the preferred stock has not been paid since January, 1915, and is therefore accumulated since that time, and arrears now amount to about 35 per cent. The company is capitalized at $1,200,000 preferred stock, $1,200,000 common stock and $500,000 of 6 per cent. bonds, of which $35,000 have been redeemed.

Mining Corporation of Canada.—At the annual meeting of the company on June 5, it was announced that the corporation was associated with W. B. Thompson and Co., of New York, in the option on the Flin Flon Mine in northwestern Manitoba. This great copper property is now being explored by the sinking of shafts and doing a number of drifts on the vein, with a view to confirming the diamond drill results, which indicated 20,000,000 to 30,000,000 tons of copper ore in sight, within a moderate depth, without in any way limiting the other possibilities. The option runs until next March, but the development work may justify decisive action before that time. It is estmated that a total capital outlay in connection with the project of $8,000,000 to $10,000,000 would be necessary to bring it to a completed stage.

Brazilian Traction, Light and Power Co.—The company's statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services, operated by the subsidiaries controlled by the company, for the month of April and the four months from January 1, is as follows, and shows considerable improvement as compared with last year:—

	1920. Milreis.	1919. Milreis.	Increase. Milreis.
Total gross earnings	10,245,000	9,208,000	1,037,000
Operating expenses	4,650,000	4,112,000	538,000
Net earnings	5,595,000	5,096,000	499,000
Aggregate gross earnings from January 1	39,181,000	35,032,000	4,149,000
Aggregate net earnings from January 1	20,999,000	18,256,000	2,743,000

(Continued on page 54)

Alberta-British Columbia Industrial Congress

Large and Successful Gathering Held in Cities of Alberta and British Columbia — Manufacturers Shown Resources of West — J. S. Dennis Describes Great Openings for Additional Population—Irrigation Possibilities in the West

COMMENCING in Calgary on June 3rd, several hundred delegates in attendance at the Alberta-British Columbia Industrial Congress visited that city and Edmonton, Lethbridge, Medicine Hat, Vancouver and Victoria. This is the second event of the kind, the Alberta congress of last year having been this year extended to include the coast province. The meetings were timed to fit in as far as possible with the tour of the western provinces being made by the delegates to the Canadian Manufacturers' convention at the coast.

M. A. Brown, mayor of Medicine Hat and president of the congress, opened it at Calgary. Premier Stewart of Alberta welcomed the delegates and referred to the large scale upon which the event was being conducted. Hon. G. P. Smith, minister of education, said that the province was anxious to encourage well balanced business conditions. If manufacturers could convince the country that they were doing all they could to bring prices back to normal, it would be less difficult to induce labor to accept more moderate wages. He desired to emphasize the fact that he did not believe profiteering was confined to any particular class. He believed the cities had developed too rapidly, perhaps, for the rural districts. Mr. Smith also took opportunity to deny stories of huge losses of cattle in Alberta during the winter. These losses would not exceed eight per cent., and this would be overcome in one season. Alberta's mineral wealth had now reached such a degree of development that last year the coal production led all other provinces, and in wool Alberta was second and close to first place.

T. A. Hornibrook, president of the board of trade, called attention to the fact that Calgary is the centre of the second largest irrigation system in the world. Brig.-General MacDonald, general manager of the Industrial Development Association, declared he was sure the work of the organization was sound and that it was appreciated by the country generally. He thanked the visitors for their contributions and activities in behalf of the association.

Room for Colonization

Col. J. S. Dennis, who was introduced as the greatest authority on irrigation on the continent, spoke with the authority of 48 years in western Canada in the service of the Dominion government, the Hudson's Bay Co., and the Canadian Pacific Railway. Capital and labor, he considered, to be a part of the success of colonization and development. The payment of the national debt could not be made except by colonization and industrial development. Thirty million acres of selected good agricultural land were to-day lying idle within fifteen miles of established railway lines in the four western provinces. The oil deposits and by-products alone in the west would more than take care of any surplus of settlers.

F. H. Peters, Dominion commissioner of irrigation, introduced his remarks by asserting that irrigation will double the population of a given section as compared with so-called dry farming. Irrigation is a specialized line of agriculture. The speaker pointed out that as the great bulk of agriculture must be of the dry farming method, it could not be said that he was decrying the wider field of dry farming endeavor in boosting irrigation.

R. B. Bennett pointed out that Alberta had in abundance the two greatest industrial resources, coal iron and iron. There are, he said, six vital factors necessary for the development of the west. These are a plentiful supply of natural resources, energy, an abundant and cheap supply of capital, labor, markets and transportation facilities.

New Association Described

At the evening meeting in Calgary M. A. Brown described the work of the Western Canada Colonization Association, towards which several easterners had subscribed $10,000 each, and some commercial organizations as much as $50,000 each. Ten western men started the fund, and showed their faith in the movement by contributing $10,000 each before the east was consulted. But it illustrated the unanimity of the spirit that has developed in the effort to secure settlers for the 25,000,000 acres of good farming land now vacant within a radius of 15 miles of the railroads in the four western provinces, and to establish in these provinces industrial plants to afford a factory population and a home market for the product of the farms.

President Brown pointed out a departure in the colonization scheme that caused much interest. Settlers are not to be brought into the country as of old and left to shift for themselves, but a department is organizing for keeping check on each family. If one fails to succeed on a dry farm they will be moved to an irrigated farm, and encouraged further, even to being taken into home commercial life if they prove unable to make good on the farm. In other words, the spirit of co-operation is to be carried to the last degree, and each settler made to feel that an interest is being taken in his affairs. Especially does this scheme embrace the idea of helping to make each settler a good Canadian by systematic education. In the past many good settlers were dumped at great expense and effort into the west and left with no one to encourage them, only to drift across the line to enrich the United States soil.

President T. P. Howard, of the Canadian Manufacturers' Association, dwelt at some length upon the desire of eastern manufacturers to co-operate in the best possible spirit with the west for the upbuilding of the Dominion. He saw in the movement as much benefit to the east as to the west in the great enterprise, of which the industrial congress is the germ, for, as he said, we are all Canadians, hoping and helping to make a great nation secure.

June 4th and 5th were spent in Edmonton, where Premier Stewart and Mayor Clarke extended a welcome. Dr. Tory, president of the University of Alberta, discussed the prospects for immigration to Canada and concluded that this country, because of its proximity to Great Britain, its area, climate and resources, would attract large numbers. The railways already built were a great asset to the west, he said, and would cost double as much if they were to be laid down now.

H. B. Mackenzie, assistant general manager of the Bank of Montreal, spoke on banking in relation to reconstruction. His address is given in detail elsewhere in this issue.

Eighty million dollars of British capital probably will be brought to Canada as a result of the visit of inspection which Count de Toper, of London, England, and Nice, France, is making to Winnipeg and the West, the Manitoba Free Press says. "There is no doubt that the resources are here, and if after this trip through the West I am satisfied that circumstances warrant, I shall go back to England and satisfy my friends that they will be justified in investing between fifteen and sixteen million pounds in this country," he declared.

DIVIDENDS AND NOTICES

EST. 1884

Dividend Notice

NOTICE is hereby given that a quarterly dividend of **two and one-half per cent.** (2½%). for three months ending June 30th, 1920 (being at the rate of **ten per cent. per annum**), has been declared upon the Capital Stock of this Institution, and the same will be payable at the offices of the Company, Toronto, on and after Friday, the 2nd day of July, 1920.

The Transfer Books will be closed from the 16th to the 30th of June, both days inclusive.

FIRE INSURANCE AGENCY FOR BRITISH COLUMBIA wanted by well-established Vancouver agents. Box 307, *The Monetary Times*, Toronto.

I HAVE SPECIALIZED on automobile insurance for the past three years in California, where I now hold responsible position with one of the largest automobile underwriters. Previous experience of eight years in general insurance in Canada, covering Head Office, General and Local Agency. Through broad experience I can qualify for responsible position in your automobile insurance department, such as manager, underwriter, appraiser, dealers' financing. I am a Canadian, twenty-seven, and returning to Canada to enter the automobile insurance business, preferably Head Office work, and can afford personal interview in Montreal or Toronto latter part of June. Address Box 313, *Monetary Times*, Toronto.

F. W. Burton, manager of the Caraquet and Gulf Shore Railway, has announced that arrangements are being made to transfer the road to the government as part of the Canadian National Railway System.

Credit Foncier Franco-Canadien have invited tenders for the erection of their proposed new building on Smith Street, Winnipeg. The plans call for a three-story brick and stone building, with safety deposit vaults below. The present offices are in the Royal Bank Building on Main Street.

DEBENTURES FOR SALE

TOWNSHIP OF CHARLOTTENBURGH

Sealed tenders will be received up to June 14th (noon) for $60,000.00 Township of Charlottenburgh Debentures in $1,000.00 denominations, with coupons attached, in twenty equal annual instalments, 5½% interest.

GEORGE A. WATSON,
Clerk,
Williamstown, Ontario.
152

RURAL MUNICIPALITY OF SWAN RIVER

Tenders will be received by the undersigned for the purchase of Fifty-eight Thousand ($58,000.00) Dollars of Debentures of the Rural Municipality of Swan River, being the second and final issue on authorized Debenture issue of $108,000.00 under the Good Roads Act. The Debentures bear interest at six per cent. per annum, are payable in thirty years from the date of the Debentures in equal annual amounts, made up of the aggregate sum due each year on account of Principal and Interest, and are guaranteed by the Province of Manitoba.

Tenders must be marked, "Tenders for Debentures," and received by the undersignd not later than Noon on Tuesday, the 6th day of July, A.D. 1920.

The highest or any tender not necessarily accepted.

JOSEPH ARMSTRONG,
Clerk of the Rural Municipality of Swan River.
Box 153, Swan River, Manitoba, Canada.
Swan River, Man., June 4th, 1920. 160

$3,000,000 PROVINCE OF ONTARIO 10-YEAR 6 PER CENT. GOLD BONDS

Sealed tenders, endorsed, "Tenders for Province of Ontario Bonds," addressed to the undersigned, will be received for the purchase of $3,000,000 (Three Million Dollars) ten-year gold bonds of the above Province, dated 15th June, 1920, due 15th June, 1930, bearing interest at the rate of six per centum per annum, payable half-yearly on the 15th June and 15th December. Principal and interest payable in gold coin at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, at the option of the holder.

Bonds to be in denominations of $1,000 each, with coupons attached, and may be registered as to principal only.

Payment for bonds to be made at the office of the Treasurer of Ontario at the Parliament Buildings, Toronto, on or before the 15th June, 1920, less the amount of the deposit. Interim debentures will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Hon. P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 o'clock noon on Monday, the 14th day of June, 1920.

Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $30,000, to be applied in the case of the successful tenderer in payment for bonds.

The highest or any bid not necessarily accepted.

P. SMITH,
Treasurer of Ontario.

BENEFIT ASSOCIATIONS IN QUEBEC PROVINCE

Extra-Provincial Associations Had $48,513,283, and Provincial Associations Had $16,178,211 of Business in Force in Province at End of 1919

RESULTS of operations of mutual benefit associations in Quebec Province during the year 1919 have just been reported by the provincial government. A summary of the figures for the various classes is as follows:

Extra-Provincial Mutual Benefit Associations

Assets—	
Assessments not yet received at head office	$ 1,741,429
Real estate and loans on real estate	3,533,437
Bonds, stocks and debentures	78,356,659
Cash in banks and on hand	4,512,370
All other	3,611,375
Total	$91,755,270
Liabilities—	
Unsettled claims	$ 4,335,900
All other	359,169
Total	$ 4,695,069
Income—	
Assessments, dues and fees	$33,470,882
Interest and rents	4,041,403
All others	1,036,200
Total	$38,548,484
Expenditure—	
Benefits paid	$27,928,730
Salaries, commission, organization	2,153,671
Supreme lodge convention	158,834
All others	2,841,467
Total	$33,082,702
Death and funeral benefits in force everywhere—	
Number	1,575,389
Amount	$1,574,522,117
In force in province—	
Number	74,399
Amount	$48,513,283
Claims paid in province	1,150,885
Income in province	1,389,432

Provincial Mutual Benefit Associations

Assets—	
Assessments not received at head office	$ 1,701
Real estate and loans on real estate	811,352
Bonds, debentures, stocks, etc.	706,798

WANT NATIONAL HIGHWAY ACROSS DOMINION

Good Roads Convention Urges More Federal and Provincial Aid for Highways — Roads an Important Part of Industrial Development—Officers Elected for 1920-21

ABOUT 200 government officials, road engineers and guests attended the seventh annual convention of the Canadian Good Roads Association held in Winnipeg, June 1 to 3. "The objects of the convention are three-fold," said S. L. Squire, president of the association, and honorary president of the Ontario Good Roads Association. "The convention plans to educate the people of the Dominion on the question of good roads, to illustrate the necessity for co-operation and coordination, and to eradicate the existing jealousy between municipal and provincial bodies in regard to the construction of highways in Canada." Sir James Aikens, Lieutenant-governor of Manitoba, in welcoming the delegates, urged concentration on the question of a national highway across the Dominion.

Attention to Tourist Traffic

The value of good roads as a factor in the development of the country and as an inducement to tourist traffic was one of the topics discussed on June 2. Hon. F. C. Biggs, minister of public works, Ontario, declared that the best way to increase production was to keep the boys on the farms. He said they had come to realize in the eastern province that they must have improved roads for bringing the boys to the consolidated schools and continuation schools they were providing, so that the children on the farms would not have to travel to towns to obtain the education required to fit them for their life work. Herbert Cuthbert, executive secretary of the Pacific Northwest Tourist Association, Seattle, asserted that $1,000,000 would be spent in Canada each year by tourists from the United States if the Dominion possessed a national highway.

The association passed resolutions favouring the construction of a national highway, endorsing the federal aid for construction of highways, and suggesting that federal aid be granted without the necessity of submitting plans and advertising contracts.

Officers Elected

The following officers were elected for the ensuing year: President, A. E. Foreman, chief of the engineering department of public works, British Columbia; first vice-president, Dr. E. M. Desaulniers, M.L.A., Montreal; second vice-president, Hon. S. J. Latta, minister of highways, Saskatchewan. Advisory committee—U. H. Dandurand, Montreal; W. A. McLean, Toronto; B. Michaud, Quebec; J. A. Duchastel de Montrouge, Outremont, Que.; S. L. Squire, Toronto; A. F. Macallum, Toronto.

Directors—J. R. Douglas, president Montreal Auto Club of Canada; L. J. Tarte, Montreal; Hon. E. C. Carrel, Quebec; Mayor Gale, Vancouver, president of the Good Roads League of British Columbia; S. R. Henderson, president of the Good Roads Association, Manitoba; Captain Lucius Allen, president Good Roads Association, Ontario; G. Fred Pearson, president Good Roads Association, Nova Scotia; W. Findlay, Toronto; C. R. Wheelock, honorary president Ontario Good Roads Association; Russell T. Kelley, Toronto; H. S. Carpenter, department of highways, Saskatchewan; A. M. Rankin, M.L.A., Ontario; T. P. Regan, president New Brunswick Auto Association; H. H. Shaw, president Prince Edward Island Good Roads Association; L. C. Charlesworth, deputy minister of public works, Alberta, and the presidents of the provincial motor leagues and auto associations.

News of Industrial Development in Canada

Big New Brunswick Timber Deal Now Being Put Through—Newfoundland Paper Plant to Cater to Britain and the United States—Million Dollar Fishing Plant For Cape Breton Backed By American Capital

SHAREHOLDERS of the New Brunswick Railway Company last week decided to give an option to the Fraser Companies, Limited, on their timber limits, thus taking the first step toward the completion of the big New Brunswick timber deal, already outlined. The actual extent of the limits to be transferred will be 1,580,000 acres. Although no official announcement has been made, it is understood that the price will be between $12,000,000 and $15,000,000. The option which is being given is not for a very long period, although it will take a considerable length of time to finance a deal of such proportions.

Acquisition of the New Brunswick Railway lands will put the Fraser Companies in a position to go ahead with their pulp and paper mills project on the Tobique River, and may lead to their getting the Grand Falls power rights; it is neccessary to provide raw material for the Dominion Pulp Company's mill on the Miramichi, which is to be taken over on June 15, as well as for the pulp mill at Edmunston, the capacity of which is about to be increased, and it means much in their lumber business in providing saw logs for their mills on the Tobique and Miramichi Rivers.

Newfoundland Paper Plant

It is reported from St. Johns, Newfounland, that engineers and surveyors will soon begin work preparatory to the erection at St. George's of a pulp and paper mill and a sawmill. There also will be erected two veneer mills to manufacture the abundant growth of birch wood in the district, and a factory for the making of boxes and barrels.

The company is composed of British and American capitalists who own and control about 1,450 miles of timberland in St. George's territory and also about 950 miles of timber land at Grand Lake, where they also intend to erect in the near future a pulp and sawmill and freight the products to the docks at St. George's by rail. The company intends to export the pulp and paper to England and the United States. Lumber, barrels, boxes, etc., will be sold to the local market as well as exported. The sawmill is to be erected near the railway and the waterside in St. George's Harbor, where a large pier will be built to a depth of water enabling ocean-going ships to load in safety.

Application has been made to the Ontario Government by the Pulp and Paper Company at Fort Frances and International Falls, Ont., of which E. W. Backus is president, for a lease of valuable timber limits along the English River, just to the north of Kenora, according to Mayor George Toole of Kenora. "If they secure the timber limits," said Mr. Toole, "they promise to erect a pulp mill and also a paper mill in Kenora." The Backus interests also are applying for the power rights of White Dog Falls on the Winnipeg River, into which the English River flows, about thirty miles from Kenora.

The Beaver Board Company, Limited, Thorold, Ont., have taken over the Foley-Rieger and the Davy pulp mills there. The pulp supply from these two mills will be used in the manufacture of beaver board.

Cape Breton Fishing Industry

A million-dollar fishing plant will be established at St. Peters, C.B., by the East Coast Fish Company, of Rockland, Me., as the result of the signing of the Fisheries Treaty recently between the United States and Canada, giving American fishermen the right to carry on operations in Canadian waters, as well as to locate headquarters on the Canadian shores.

The site for the plant has already been chosen, the property including about four acres located for the construction of wharves for the docking of trawlers and other fishing boats. The proposed plant will be spread over an area of several acres and will be composed of a canning and freezing factory; one for curing and drying fish; an ice-storage building; as well as buildings for the manufacture of oil, fertilizer and other by-products. Six trawlers are to have St. Peters as their headquarters and will fish from that port, bringing the whole of their catch to the fish plant for preparation.

New Industries for Canadian Cities

A new company known as the Western Match Company has secured a building in Winnipeg, Man., and will commence the manufacture of matches for the Western market.

The Eastern Ontario Milk Produce Company will erect a powdered milk manufacturing plant at Gananoque, Ont., at a cost of $85,000. A free site has been granted by the town.

Agreements have been signed with the council of Ingersoll, Ont., by two industrial firms, which intend locating there in the near future. They are "Folding Paper Boxes, Limited," and the "Dominion Cone Company, Limited," which industries are under the one management. Their total investment will be in the neighborhood of $55,000, and they ask a loan of $25,000.

Lewis E. Meyers & Co., of Valparaiso, Ind., are contemplating the location of a branch in Ontario. This company manufactures a furniture specialty. Negotiations have been entered into with Western Ontario municipalities.

The Pan-American Rubber Company, of Watertown, Wis., which is establishing a branch of its business in Canada, has decided to locate in Gananoque, and has purchased the W. J. Gibson building and property on Mill Street for that purpose.

The building at Galt, Ont., which was formerly used by the Riverside Silk Company, will be utilized by the Yale Shoe Company, and on July 1 next will open for the manufacture of shoes.

A new plant is being established at Port Arthur, Ont., in the former McRae Manufacturing Company's building, by T. A. Peterson, of Duluth, Minn., and Mr. Swanson, of Port Arthur. In addition to the special lines of manufacture, the plant will produce all kinds of structural iron.

W. A. Hayes, of Minneapolis, has been in Winnipeg, Man., making arrangements for the opening of an assembling plant in that city for Hayes shock absorbers. This is the first company to commence work of any kind in connection with this line in Winnipeg. Mr. Hayes has made complete arrangements, and Hayes shock absorbers for Western Canada will now be distributed from Winnipeg. Mr. Hayes states that within the next year he expects that Hayes shock absorbers will be manufactured as well as assembled in Winnipeg. The Hayes people are represented in each of the Western Provinces, Dudley & Andrews being distributors for Manitoba, while Saskatchewan is represented by Hugh J. Robinson.

The Motor Castings Company, Limited, has purchased a lot at the corner of Windsor Avenue and Hanna Street, Windsor, Ont., on which they will erect a large factory for the manufacture of all types of cast parts for motor cars.

Ottawa Valley Timber Development

That the various forest industries of eastern Canada, and particularly of the Ottawa River Valley are on the threshold of a new epoch in their development, is the opinion of Carl Riordon, vice-president and managing director of the Riordon Co., Ltd. This view was expressed by Mr. Riordon when referring to the recent merger of the Riordon Pulp and Paper Co., Kipawa Co., Ltd., W. C. Edwards and Co., Ltd., Gilmour and Hughson Co., Ltd., and the Ticonderoga Pulp and Paper Co., the principal

resources of which companies lie in the Ottawa Valley and district.

"Hitherto the vast resources of timber had been operated by many single companies under separate management and principally for the production of white pine timber," he continued, "with a consequent loss in both variety and quantity of production. From being exploiters solely of white pine timber to the exclusion of other manufactures, the wood-using industries will expand along more intensive lines, utilizing white spruce, of which the new company will have the largest single holding in the world, for the production of pulp and paper and of spruce lumber.

"At the same time white pine, of which the company's holdings are estimated at over 1,200,000,000 feet, will be manufactured as intensively as possible at the company's sawmills at Ottawa, Gatineau Point, Rockland and Calumet. In addition to these the other soft woods such as hemlock, cedar and jack pine will be manufactured and distributed to produce the utmost of their value and the hardwoods of the combined holdings will be fully developed, not only in timber, but probably also in chemical manufactures.

"It is our hope and intention through our large holdings, the diversified nature of our plants and the possibility of utilizing by-products as between our mills to derive the utmost value from our resources. In other words, at this time, when United States supplies of pulp and other woods are obviously running low, making it eminently expedient for Canada to attain the maximum of raw materials and at the minimum of cost, we aim to get the greatest value obtainable from every thousand feet of timber and every unit of water-power which we own, through unified control of vast holdings and the application of scientific management and methods of manufacture and marketing."

Mr. Riordon thought the new company's holdings of pulpwood to be the largest, in its holdings of white pine at least, second largest in the world. He placed the present yearly output of the company's plants at 91,000 tons per annum of bleached, and 8,000 tons per annum of easy bleaching sulphite pulp, 11,000 tons of soda pulp, 18,000 tons of high-grade book paper, and 125,000,000 feet of lumber.

He definitely stated his opinion that present price levels for pulp and paper, instanced in the fact that bleached pulp was selling readily at $180 per ton on contract and as high as $240 for spot, compared with $60 before the war, would be maintained for a long time to come. He based his judgment on the fact that, on the one hand, production costs both in Scandinavia and the United States were rising, Canadian costs at the present time being materially lower than in either of these countries, due to abundant supplies both of wood and power, and that on the other hand, consumption of pulp and paper products on this continent was indicating progressive increase with no sign of falling off, a combination of circumstances that places the Canadian pulp and paper industry in an obviously strong strategic position.

NEW INCORPORATIONS

Spruce Mills, $1,000,000 — Petrol Oil and Gas Company, Ltd., $1,000,000 — Canadian Motor and Machine Company, $500,000

THE following is a list of companies recently incorporated under Dominion and Provincial charter, with the head office and the authorized capital:

DOMINION TRUST COMPANY LIQUIDATION

To enable the affairs of the Dominion Trust Co. to be settled at the earliest possible date, application has been made to parliament by the liquidator, J. C. Gwynn, for an Act to set at rest certain doubts which have arisen as to whether the terms of its Act of Incorporation were fully complied with before it commenced business. Provision is also to be made for the payment of such claims as have already been allowed by the court.

1870 —— OUR GOLDEN JUBILEE —— 1920

NEW BUSINESS RECORD OF THE MUTUAL

The popularity of the Mutual Life of Canada with the insuring public is being demonstrated in the amazing amount of new assurances issued. The first four months of 1920 indicated an increase of no less than 46% over the amount of insurance underwritten in the corresponding period of 1919. Insurance is in greater demand to-day than it has ever been before in the history of the world. The people are impressed with the importance of securing life insurance and naturally their thoughts turn to the Mutual of Canada. The life agent is fortunate to-day owing to the increasing demand for insurance, and especially if he represents The Mutual Life of Canada which is expanding at a rate that surprises even its most optimistic friends.

BE A MUTUALIST!

NEWS OF MUNICIPAL FINANCE

Small Advance in Halifax Net Debt Last Year—Edmonton to Consult Bankers in Regard to Financial Assistance this Year

ASSESSMENTS of practically every city and town in Canada show an increase this year. The depreciated value of the dollar has been illustrated by the rapid rise in realty valuations, and municipalities, being generally hard pressed for revenue, have taken advantage of the opportunity to raise assessments rather than to make too great a jump in the tax rate. The following are a few representative 1920 assessments, showing the increases as compared with 1919:

	1920	Increase over 1919	Inc., %
Ottawa. Ont.	$120,463,606	$6,071,345	5
London, Ont.	44,121,915	2,553,551	5
Belleville, Ont.	8,358,620	1,738,615	12
Walkerville, Ont.	8,724,418	1,034,937	12.5
St. Thomas, Ont.	3,002,525	573,578	19
Leamington, Ont.	2,841,527	490,743	17
Wingham, Ont.	1,042,865	120,865	11.5
Halifax, N.S.	38,385,750	1,054,940	3

Simcoe, Ont.—The council has passed a by-law providing for a tax rate of 28 mills.

Perth County, Ont.—The county council has set a tax rate of 8.25 mills on the equalized assessment of last year of $32,531,850.

Welland County, Ont.—A ten-mill tax rate has been struck by the county council, being an increase of one mill over last year. Expenditures for the year are estimated at $233,681.

Edmonton, Alta.—As a result of the defeat of the money by-laws totalling $1,500,000, last week, the council will be obliged to interview the city's bankers regarding what provision will be made as to financial assistance. In the meantime a special committee has been formed to report to the council on what policy should be adopted.

Winnipeg, Man.—Taxes collected for the year of 1919-20, ending April 30 last, according to figures from the city tax offices, amount to $8,161,595, showing an increase of $1,247,872 over the previous year. Municipal and school taxes were responsible for over $5,000,000, while business taxes brought in $381,040. The balance is made up of other collections and tax sales.

Norfolk County, Ont.—The county levy for general purposes will be 7 mills, and for county highway construction 3½ mills plus a debenture issue of $50,000. Up till January the county has spent on county road construction and equipment $200,475, of which $92,312 has been provided by the government and $108,163 by the county. There has been raised in excess of this $14,036 by the county.

Vancouver, B.C.—City Comptroller Pilkington shows in a report to the finance committee that for the first four months of the current year the civic expenditures were just $239,251 larger than the receipts in that period. The total receipts for the first four months were given as $1,087,007, while the expenditures amounted to $1,337,258. The balance sheet also showed that only $2,898,055 remained from the estimated aggregates with which to continue all civic activities for the remaining eight months of the year.

Halifax, N.S.—The annual report of City Auditor Foster shows that the gross debt at the first of the year was $6,528,606, and net debt of $4,164,661, with assets of $5,764,253, as compared with the net debt of the previous year of $4,016,222, and assets of $5,378,165. It is pointed out that the present year's borrowings will increase the indebtedness considerably, while the total value of assets will advance largely.

The assessable property of the city is shown at $38,385,750 for the 1918-19 period, as against $37,330,810 for the 1917-18 period. Taxation rate last year was $2.54 per $100.

Herbert Scarlett, who has been connected with the firm of Bryant, Isard & Co., Toronto, brokers, has entered into partnership with Fleming & Marvin, of Toronto.

CLAIM UNDER AUTOMOBILE INSURANCE POLICY

Company Entitled to Repair Damages Where Most Convenient, and Assured Has No Right to Claim New Car

IN an action on an accident policy on an automobile, in the case of Sare vs. United States Fidelity and Guarantee Company, the Supreme Court of Nova Scotia held that the owner of an automobile cannot succeed in an action on a policy of insurance where his car has been damaged if the insurance company has already made an offer to repair the damages in accordance with the insurance contract, and such offer has been refused by him.

The company in consideration of the premium paid, agreed to indemnify Sare against loss or damage to his Cadillac automobile due to any accident occurring during the period of the policy and caused by collision with any object, either moving or stationary. Under the terms of the policy the company was given the right to replace or repair the damaged property or pay for it in money.

Subsequent to the accident in respect of which damages were claimed, the car was examined by an agent of the company, who was of opinion that the car could be satisfactorily repaired in Montreal, and on behalf of the company elected to repair the car there. Sare refused to deliver the car for this purpose, but expressed willingness to have it sent to the factory of the makers at Detroit.

The trial judge held that the position taken by the company was the sound one and that the company, having exercised its option, Sare was bound to deliver the car if he desired to avail himself of his rights under the contract, and if upon the return of the car he was advised that the contract had not been complied with, he would then have his legal remedy.

In the appeal two justices upheld the trial judge, and the court being equally divided the appeal was dismissed. In dissent it was held that although the car could be repaired, yet the owner would not be replaced in the same position as he was prior to the accident, for a repaired car is prima facie not of equal value with a new car, and hence Sare should receive either repairs and reimbursement for depreciation, or an absolutely new car in accordance with the intent of the policy.

POST OFFICE SAVINGS BANK

Withdrawals from the Post Office Savings Banks during March, 1920, exceed deposits by $529,707. Taking into account the interest accrued on depositors' accounts and added on March 31, 1920, the balance at the credit of depositors at the end of the month was $31,605,594, as compared with $31,238,912 at the end of the previous month. The following is the summary:

Dr.	MARCH		Cr.
	$ cts		$ cts.
Balance in hands of the Minister of Finance on 29th Feb., 1920..	31,238,912.00	Withdrawals during the month	1,212,686.07
Deposits in the Post Office Savings Bank during month.......	682.979.46

overnment and Municipal Bond Market

Province of Ontario Asks for Bids on $3,000,000 Issue Payable in Canada Only —British Columbia Makes Loan on 5 7/8 Per Cent. Basis — Manitoba Disposes of $1,000,000 Rural Credits Treasury Bills—Moose Jaw Wants to Sell Bonds Locally

LTHOUGH the bond market developed a little more interest during the past week, there is no hope just yet r a general improvement in the situation. Two Ontario unicipalities made loans on about a 6⅜ per cent. basis, the lding on both issues being fairly keen.

British Columbia paid more than 5⅞ per cent. for its ,000,000 loan, which is considerably more than formerly, e previous issue, which was made in January, being on a ½ per cent. basis. It is understood that the whole issue s been disposed of in the United States to yield investors ¼ per cent.

The province of Ontario is calling for tenders up till ne 15 for $3,000,000. A feature of the issue, which is ewed favorably by some dealers, is that the bonds are payle in Canada only. Ontario's securities are considered ry attractive and although the province will not receive price as good as if the bonds were payable in the United ates, it is expected that the province will benefit in the ng run. Some dealers have frequently advocated the policy making Canadian bonds payable in Canada only, even ough exchange rates enable substantial profits now. Such policy will be beneficial to the country, eventually, it is ntended.

Coming Offerings

The following is a list of debentures for which tenders e invited, of which mention has been made in this or evious issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
ermilion, Alta. ...	$ 26,000	6½ & 7	20-instal.	June 14
narlottenburg Tp., Ont.	60,000	5½	20-instal.	June 14
rovince of Ontario	3,000,000	6	10-years	June 15
ounty of Renfrew, Ont.	250,000	5 & 5½	20-instal.	June 15
hawinigan Falls, Que.	185,000	5½	serial	June 16
owmanville, Ont. ..	13,015	6	20 & 30-inst.	June 18
naunavon, Sask. ..	15,500	7	....	June 21
awrence R.M., Man.	50,000	6	20-years	June 22
ipestone, Man.	93,000	5½	20-years & 30-instal.	June 25
ssiniboia, Sask. ..	13,500	7	20-instal.	....
wan River, Man. ..	58,000	6	30-instal.	July 6

Peterborough, Ont.—The council has decided to invite enders for $260,000 bridge debentures and $240,000 school ebentures.

Swan River, Man.—Tenders will be received until July , 1920, for the purchase of $58,000 6 per cent. 30-instalment oad debentures, guaranteed by the province. (See adversement elsewhere in this issue.)

Ontario.—The province is calling for tenders until June 5, 1920, for the purchase of $3,000,000 6 per cent. 10-year onds. Principal and interest are payable in Toronto and lontreal only. (See advertisement elsewhere in this issue.)

County of Renfrew, Ont.—Tenders will be received until une 15 next for the purchase of the following debentures: 100,000 5½ per cent. 20-instalment, for roads; $150,000 5 er cent. 20-instalment, for roads. R. J. Roney, Pembroke, nt.

Debentures Notes

St. John, N.B.—A bond issue of $137,000 has been uthorized by the council, for city road paving.

Ontario County, Ont.—All tenders were turned down on he $10,000 6 per cent. 10-instalment debentures.

Niagara Falls, Ont.—The council has decided to submit a by-law to raise $28,000 for parks and playgrounds.

Perth County, Ont.—The county council has passed a by-law providing for the raising of $92,721 for county purposes.

York Township, Ont.—The council has authorized the treasurer to raise by way of debenture issue the sum of $140,000 for school purposes.

Montreal, Que.—The city is desirous of floaitng a loan of $3,000,000 for twenty or thirty years at the rate of 5 per cent., for housing purposes.

Prince Albert, Sask.—Authority has been given by the Local Government Board to borrow from the city's sinking fund $65,000 for improvements to the city's waterworks. The amount asked for was $77,700.

York Township, Ont.—A by-law was passed by the township council providing for the issue of debentures to the amount of $14,585 for the purpose of enabling the Board of Public School Trustees of School Section No. 7 to install a septic tank system, build two additional temporary rooms, etc.

Belleville, Ont.—The city is considering the selling of bonds to the amount of $260,000 for school and paving purposes. The original amount was $380,000, but on the advice of the city's bankers, was reduced, when an effort was made to secure a special loan pending the issue of debentures. It is understood that the Standard Paving Co., would take $160,000 of the bonds on a basis of 98 for the new work contemplated, and the council is considering this.

Moose Jaw, Sask.—The city is endeavouring to secure the approval of the Local Government Board to issue $98,000 school debentures locally. In floating the Victory loans the government pointed out that by internal financing the money is kept within the country, and the school board believes that the same argument applies to its venture. The debentures, which are for a period of ten years and carry interest at the rate of 7 per cent., are considered attractive securities for local investors.

Edmonton, Alta.—Mayor Clarke has left for Vancouver with the main purpose of bringing back the balance of the consolidated tax arrear bonds still unsold by the National Bond Corporation. According to the mayor, the city has only received $1,241,000 of the $3,000,000 issue sold to the National Bond Corporation. It is stated that the company has been unable to carry out the deal so far, owing to prospective purchasers of the securities falling down. Bonds which have not been taken up are deposited at the Merchants Bank, Vancouver, where they were left by the mayor and City Treasurer Barnhouse. The finance commissioner points out that the city is not seriously affected by the fact that a portion of the sale has not been completed. What has been paid in will enable the city to take care of the payments which fall due in July.

Bond Sales

Manitoba.—The Hon. Edward Brown has disposed of $1,000,000 treasury bills, which are repayable October 1 next. The money which will be used in connection with the rural credit societies, cost the province 5 per cent.

Smith's Falls, Ont.—Tenders on the $35,129 6 per cent. 20-instalment debentures, which were opened on June 4, were all turned down. The debentures have been disposed of, however, $25,000 going to W. L. McKinnon and Co. by private sale, and $10,129 to local investors.

Sarnia, Ont.—Messrs. Brent, Noxon and Co. have been awarded the $100,000 5½ per cent. 20-year debentures, at

42 King St. West - - TORONTO, Ontario

93.11, which is on a basis of about 6⅜ per cent. Other bids were:—

Dominion Securities Corporation	92.389
C. H. Burgess and Co.	92.03
United Financial Corporation, Ltd.	91.87
A. E. Ames and Co.	91.68
Wood, Gundy and Co.	91.63
National City Co.	91.14
R. C. Matthews and Co.	90.60

British Columbia.—A syndicate comprising Messrs. Wood, Gundy and Co., Dominion Securities Corporation and A. E. Ames and Co., of Toronto, and Halsey, Stuart and Co., Chicago, have been awarded the $2,000,000 6 per cent. bonds, dated June 4, 1920, and due June 4, 1925. The price paid was 88.14 and interest, New York funds. Considering the present rate of exchange, the province is paying about 5⅞ for its money. Another syndicate, headed by the Canada Bond Corporation, bid 86.95 for $1,000,000 only.

Galt, Ont.—Two issues of bonds, one being $105,091 instalment, maturing between 1921 and 1940, and bearing interest at 5½ per cent., and the other $93,247 straight term, bearing interest at 5, 5½ and 6 per cent., and maturing in 15, 20 and 40 years, have been awarded to Messrs. Brent, Noxon and Co., at an average price of 89.228. At this price the yield is stated to be about 6.35 per cent., although it is not possible to arrive at an accurate basis, owing to the mixed character of the series. Other bids on the issues were:—

C. H. Burgess and Co. and A. Jarvis and Co.	88.96
A. E. Ames and Co.	88.79
Wood, Gundy and Co.	88.596
Harris, Forbes and Co.	88.45
Dominion Securities Corporation	88.187
United Financial Corporation, Ltd.	88.04
R. C, Matthews and Co.	85.424

Wood, Gundy and Co. bid 84.11 on the straight-term issue, and asked for an option on the instalment bonds for 92.58, the average price being as stated above.

A YEAR OF PROGRESS FOR MERCHANTS BANK

A remarkable year of progress is revealed in the annual report of the Merchants Bank of Canada, for the year ended April 30th, 1920, which is given in detail on another page of this issue. Assets of the bank at the end of the year showed an increase of 18.40 per cent., advancing from $166,725,404 to $197,387,855. Of this growth $24,900,000 is accounted for by the expansion in deposits, which largely represent the savings of the clients of the bank, and which are now over $163,000,000. Quick assets at the end of April were over $72,500,000, and were at the ratio of 40.81 per cent., to the total liabilities to the public, which amounted to slightly under $180,000,000. Current loans and loans to municipalities advanced considerably, the figure being $116,786,405, as compared with $95,874,426 in the previous year. Net profits for the year, after payment of charges, etc., were $1,686,156, as against $1,383,569 in the 1918-19 period.

The general manager, D. C. Macarow, in his address to shareholders at the annual meeting, held on June 2nd, dealt with the present economic position of the Dominion, and referred to the necessity for caution. The president, Sir Montagu Allan, expressed his pleasure at the good results shown.

Herbert Hollingsworth, who for the past ten years has been associated with the Ralph Manley Agency in Moose Jaw, Sask., has severed his connection as vice-president and treasurer of that firm, and is opening a rental and insurance agency at 107 Walter Scott Building, Moose Jaw .

PAPER ISSUES LEAD IN BROADER MARKET

Trading in Canadian Stocks More Evenly Distributed—Some Notable Gains Made

FOR the week ended June 9th, the New York stock market presented no features of especial interest, the usual financial considerations being overshadowed by the greater interest manifested in the course of political events at Chicago. There were no new developments pointing to the course of the money market in the future. The "Wall Street Journal," however, is of the opinion that within the next two or three months the credit and loan situation and foreign exchange will show decided improvement.

Interest on the Canadian exchanges again centred chiefly around the paper stocks, although those issues did not dominate as in the previous week, the tendency being to a broader market. "Merger" stocks were again prominent, showing activity and strength.

Brompton the Leader

In Montreal Brompton was the leader with sales of 21,945 on a gain of 23 points. Developments are understood to be in progress regarding the company's stock and dividends. Outside of the paper stocks Atlantic Sugar was a feature, the turnover for the week amounting to 16,920 shares on a gain of 29½ points. Canada Steamship was strong, while the steel issues also showed gains. Other active issues in the paper section were: Spanish River, Abitibi and Laurentide, which stocks were also accompanied by considerable strength.

Brazilian was the most active issue in Toronto, although the gain for the week was only fractional. It is understood that when dividend payments are resumed about midsummer, the rate will only be around 4 or 5 per cent., and not 6 per cent., as previously anticipated. The actions of that stock in the past few days reflected the disappointment. Canada Steamships and Steel of Canada were strong, activity accompanying the former. Spanish River furnished trading of 825 shares with a gain of 5¾ points, while Riordon also displayed considerable activity and strength. Bank stocks were strong, Dominion and Merchants being the most outstanding issues.

CALEDONIAN INSURANCE COMPANY

After emerging satisfactorily from the high pressure of the war period, the Caledonian Insurance Company in 1919, made a new record which surpassed any previous showing made by the company by a very large degree. Extracts from the one hundred and fifteenth annual report show that total funds at the end of 1919 amounted to $25,128,855, as compared with $23,066,193 in 1918, an increase of $2,062,662, which compares with the increase in the previous year of $1,370,458.

Net fire premiums for the year amounted to $3,527,755, showing an increase of $425,060 for 1919, following an increase of $366,940 for the previous year over 1917. The loss ratio to premiums was 45.30 per cent., compared with 48.96 in 1918. The expense ratio was a little higher, however, at 36.60 per cent. Surplus on the year's trading carried to profit and loss account amounted to $558,540 as compared with $419,957 in the preceding period.

The company's reputation in this country was well sustained by John G. Borthwick, manager for Canada, the amount of fire business in force at the end of the year amounting to $67,104,623. Net fire premiums for the year were $434,478. The Caledonian-American Insurance Company, which is associated with the Caledonian Insurance Company, and the policies of which are guaranteed by the latter, is now licensed to do business in Canada.

The Standard Trusts Co. has just declared its regular semi-annual dividend at the rate of 9 per cent. per annum.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

CORPORATION SECURITIES MARKET

Four Million Riordon Preferred Shares Disposed of—Dominion Chocolate Stock Offered—Other Issues

IN new issues, the week was featured by the disposal of $4,000,000 8 per cent., cumulative first preferred shares of the Riordon Co., Ltd., by the Royal Securities Corporation. According to the underwriters, the whole issue was over-subscribed privately. The amount of first preferred shares authorized is $30,000,000, of which $5,500,000 is to be issued, including the above $4,000,000. Second preferred 7 per cent., shares to the amount of $10,000,000 will also ze issued, being the total amount of authorization. There will be authorized $30,000,000 twenty-year 7 per cent., mortgage sinking fund bonds, of which $11,901,000 will be presently issued, which amount will include bonds to be held by trustee to provide for ultimate retirement of the outstanding debt of the Riordon Pulp and Paper Co. Ltd.

The review of the controlling powers, etc., of the new Riordon consolidation, which has already been covered in *The Monetary Times*, shows that timber holdings of the new company amount to 10,590 square miles in the watersheds of the Ottawa and Gatineau rivers and tributaries, which are said to contain over 25,000,000 cords of pulpwood and over 1,200,000,000 feet of pine. The present annual output is given as 128,000 tons of sulphite pulp, soda pulp and book paper, and 125,000,000 feet of lumber.

The stock was sold at 98½ to yield about 8.12 per cent. A bonus of 40 per cent., common was also given.

Dominion Chocolate Issue

Public offering is now being made of the $400,000 8 per cent., cumulative, sinking fund preferred shares of the Dominion Chocolate Co., Ltd., Toronto by a syndicate comprising Campbell, Thompson and Co., T. S. G. Pepler and Co., John Stark and Co., and Watt and Watt. The offering is being made at par, carrying a bonus of 30 per cent., of common stock.

The Dominion Chocolate Co., Ltd., has purchased the Hooton Chocolate Co., Ltd., of Toronto, which was established in Canada some years ago by the Hooton Cocoa Co. of Newark, N.J., a firm long identified in the chocolate and candy trade. The plant is located at 60-76 Duchess Street, Toronto.

The company's charter provides that, commencing 1st January, 1922, 5 per cent. of the net earnings after payment of the preferred dividends shall be set aside as a sinking fund for the purpose of redemption and cancellation of the preferred shares at $110 per share and accumulated dividends.

Miscellaneous Stock Issues

The H. D. McKenzie and Co., Ltd., distributors of the "Inverness" and other coals, are offering through the Standard Bond Corp., Ltd., Halifax, N.S., the balance of $375,000 8 per cent., cumulative preferred stock at par, carrying a bonus of 30 per cent., common stock. A previous offering was made on March 15 of this year.

An issue of $132,000 8 per cent., preferred cumulative stock of the Galt Brass Co., Ltd., Galt, Ont., has been privately over-subscribed prior to the date of public offering. The underwriters were Balfour, White and Co., Montreal.

Messrs. McDougall and Cowans, Montreal brokers, are offering for public subscription $1,400,000 8 per cent., cumulative redeemable preferred stock of the Dominion Engineering Works, Ltd., redeemable in whole or part at $110 on any dividend date, preferred as to assets and cumulative as to dividends after January 1, 1921. The offering is being made at $98 per share, with a bonus of 25 per cent. in common stock. Payments of the shares are to be made at the rate of 25 per cent., on application, 25 per cent., on July 31, and the remainder on December 31.

On June 7 last, shareholders of the Ames-Holden Tire Co., ratified the proposed issue of $800,000 8 per cent., cumulative preferred stock issues, particulars of which have already been given in these columns.

The Exchange Securities, Ltd., are offering $150,000 guaranteed 8 per cent., cumulative redeemable preferred stock of the Interprovincial Clay Products, Ltd., at $100 per share, carrying a bonus of 25 per cent., common stock of the Interprovincial Brick Co., of Canada, Ltd. The Interprovincial Clay Co., will operate in conjunction with the Brick Co., by whom it is controlled through the ownership of common stock.

Application has been made to the government by the Continental Wood Products Co., a subsidiary of the Continental Paper and Bag Mills, for the right to increase its capital to $500,000 preferred and $1,500,000 common.

CAUSE OF MINING STOCK RECESSIONS

Burdick Bros., of Vancouver, in their monthly letter of May 24th, says: "The general easing off of prices in mining stocks during the past few weeks has undoubtedly been contributed to by three principal factors, which are: (1) The decline in the price of silver from $1.35 to about $1.10 at time of writing, and absence of definite information regarding an increased price for gold; (2) the general weakness of all stock markets caused by scarcity of money and a strong selling movement; (3) new finance, contingent upon the organization of new mining companies, which has accounted for the disappearance of speculative capital usually in evidence.

"Though there have been no violent recessions in the local market, the general trend of business has been anything but strong. It is certain that the basic conditions underlying the mining industry are more solid than ever before, therefore, the reason must lie in some other direction. An analysis of the selling movement shows that for the most part those liquidating their holdings are small shareholders. Undoubtedly, then, the higher costs of living are being felt, some of these smaller investors requiring money to meet current expenditures being influenced to sell from the fact that most of the stocks listed locally have shown gains since the commencement of the year.

LAND MORTGAGE COMPANIES OF SASKATCHEWAN

Provincial Farm Loan Operations is Only Important Question on Which Members Differ from Government—New Laws Governing Loan Companies—Seed Grain Act

(Special to *The Monetary Times.*)

Regina, May, 19, 1920.

A LARGE attendance of representative loan company men gathered together at the annual meeting of the Land Mortgage Companies' Association of the Province of Saskatchewan held in Regina on May 14th, 1920. Saskatchewan has become the central lending field. Its agricultural territory is rapidly extending and settlement still seems to be leaning towards that province. This would be the impression formed by anyone listening to the discussion which took place at this particular gathering. Larger amounts of money have been placed in that province by institutions than in any other province of the Dominion. One cause of this is probably due to the reasonable attitude which the recent governments have taken towards lending institutions. The present government of that province is, of course, made up chiefly of farmers, but by closer contact with the lenders, they realize that the companies are not out to exact every cent which can be obtained by resort to usurious methods.

Government Farm Loans

Only one point of difference, and it is not regarded as a serious one, exists in that province. It was not discussed at the meeting, but is made clear enough in the public accounts of the province and in the address of the provincial treasurer. The latter carefully camouflages the position of the Farm Loans Board, operated under the auspices of the government. It is the only point upon which the provincial treasurer lacks in candour. He endeavored, in his address, to leave the impression that the Farm Loans Association's existence had succeeded in bringing down interest rates. There is a legendary story about King Canute which would be applicable in this case. Any discriminating farmer with a moderate capacity for independent thought must realize that no provincial government has it in its power to determine or regulate interest rates. The government here has loaned money to the farmers at a rate lower than the market would justify and in consequence the loss sustained comes out of the ratepayers' pockets. Mr. Dunning, in his budget speech carefully skidded over the fact of that loss and gave very much less information about the operations of the government farm loans' system, a public institution which should be open to public inspection and to a more minute inspection, from every standpoint than that to which the lending corporations are subjected by the provinces which grant incorporation. This matter is a little aside from the purpose of this article, which is to refer briefly to the proceedings of the annual meeting of the mortgage men, but it interests them.

In describing this act, the committee's report says that it provides for the incorporation hereafter of loan companies by the province of Saskatchewan. Since the year 1909, no loan company has been incorporated in Saskatchewan merely by memorandum of association under the Companies Act, but in each case has had to obtain a special act in which there have been varying powers given and varying requirements as to capitalization. Under the new act, a loan company will be incorporated by a short model bill, and will then automatically be goverened by the new act. Many of its provisions apply also to every loan company heretofore incorporated by act of legislature of Saskatchewan (but not those as to deposits and borrowing, mentioned later). It is to be noted, however, that the act makes no attempt to govern or regulate companies incorporated otherwise than by or under the authority of the legislature of Saskatchewan.

Organization of Company

Under the act as passed, before calling the first general meeting for organization purposes, a company must have $25,000 subscribed and $10,000 paid. Before obtaining a certificate enabling the company to commence business, it must have $75,000 subscribed and $25,000 to its credit in a chartered bank on account of these subscriptions. The company is forbidden to receive money on deposit. It is declared that all moneys, the payment of principal or interest on which is guaranteed, is deemed to be money borrowed. The borrowing limit of the company is four times the combined amounts of its then actually paid-up and unimpaired capital stock and reserve, with the proviso that the amount of cash on hand or in the bank, and the cash value of any war loan bonds of Great Britain or Canada shall be first deducted for the purpose of determining when the limit has been reached.

This act was fully described by *The Monetary Times* at the time it was passed. Its chief feature is the provision of government guarantee in cases where the land mortgage companies were unwilling to make advances on the security they had. The plan has worked satisfactorily.

There is one other important change which calls for mention and that is respecting the Sale of Shares Act. This is a revision and consolidation of the former act and amendments. The association secured an alteration of the bill as introduced so as to provide that the consent of the Local Government Board should not be necessary for the sale of any securities in which trustees are authorized to invest trust funds under the provisions of the Trustee Act. In particular, this amondment was asked for to cover the case of the sale by a company of its debentures where approval of such debentures as trustee investments has been secured under section 4 of the Trustee Act.

The new officers of the Saskatchewan Association are: H. W. Givins, president; John Rogers and J. D. Gunn, vice-presidents; executive committee—B. S. Lawrence, James Adams, Lorne Johnson, W. R. McConnell, H. M. Bing, H. Bowell, Don Fraser.

INVESTMENTS AND THE MARKET

(Continued from page 33)

Wellesley Telephone Co.—The Ontario Railway and Municipal Board at a sitting in Kitchener on June 8, has deferred judgment in regard to the company's request for increase in rates to $18 per annum, and to charge 10 cents for long distance calls, besides the Bell charges.

Ernst Telephone Co.—The Ernst Telephone Co., of Baden, Ont., asked for permission to make increases from $20 to $25 for a business telephone, and $15 to $20 for a rural telephone. The Railway and Municipal Board allowed increases from $20 to $24 for a business telephone, and $15 to $18 for a rural one.

New Brunswick Telephone Co.—An important decision on the most important phase in the company's case for increased rates, was given at a private session of the Public Utilities Commission on June 4. It is understood that the commission has agreed to make a ruling that the company be allowed to realize an amount somewhat less than $300,000 per annum in additional revenue, and it is said the order will cover a period of the company's present fiscal year as well as part of or all of their next fiscal year, which would make it effective until about December 31st, 1921. The company asked for $309,000, and the ruling reduces the amount about $25,000.

In making its application for increased rates, the company emphasizes the fact that the new rates proposed are not intended to be permanent, but to be operative only while the high cost era lasts.

Levis County Railway.—The company is endeavouring to increase the rate of fares, which now stands at 5 cents. In asking for the increase, the company presents the following statement for the five years ended June 30, 1919:—

Year	Gross earnings	Operating expenses	Interest on capital invested in property	Total expenses	Deficit
1915 ..	$ 88,461	$ 78,413	$26,408	$ 14,821	$16,359
1916 ..	94,976	91,379	26,467	117,846	22,869
1917 ..	95,069	96,318	27,203	123,522	28,452
1918 ..	96,955	114,006	26,457	140,463	43,508
1919 ..	129,224	131,741	36,480	168,221	38,997

The above figures do not include any interest on the new money which is at present being invested in the property, which interest will amount to approximately $35,000 a year, nor is any allowance made for depreciation which the company should properly provide for the wear and tear ot property.

Dome Mines Co., Ltd.—Although the mill of the company did not resume operations until May, 1919, production for the period ending March 31, 1920, amounted to $1,773,374, as against $2,171,784 in the 1916-17 period. In the 1918-19 period the company's mill was closed. After deducting maintenance and operating expenses of $930,762, net operating earnings were $842,612, to which is added revenues from other sources, chiefly discount and exchange, amounting in all to $109,372, making a net total profit of $951,984. Deduction amounting to $600,170 were made, chiefly for depletion of mining claims and properties, $325,190, and plant depreciation and replacement, etc., $234,373, leaving a net surplus for the year of $351,814. Current assets exceeded current liabilities by $1,253,025, while total assets amounted to $5,909,318, as compared with $5,002,625 previously.

President J. S. Bache, in commenting of the year's work, said: "The company had a satisfactory year, in spite of starting it under the handicap of a non-productive operation during the first forty days, and having to start the plant on a small tonnage, and increase gradually. As indicated in the report of the operating management, the mine and plant are in first-class condition to enable operations to be continued at a satisfactory profit, but the success of future operations must, to a great extent, depend upon the amount and efficiency of labor obtainable."

Tucketts Tobacco Co., Ltd.—Net profits of the company for the year ended March 31, 1920, after making provision for cost of management, taxes, etc., amounted to $333,131, as compared with $264,113 in the previous year. From this amount was deducted $140,000 for preferred dividends and $50,000 for common dividends, leaving a balance of $143,131, which has been added to the profit and loss account.

The balance sheet shows that inventories were increased $259,472 to $2,330,675. Additional factory space was provided during the year, bringing the value of real estate, buildings, etc., up to $3,050,204, as compared with $2,995,758 in the previous year. The amount of cash on hand and in the bank was reduced from $95,367 to $76,637, while investments were also lower, the figure being $45,853, against $122,655 in 1919. Bills and accounts payable advanced $45,177, but bills and accounts payable also increased, being $863,298, as compared with $702,866.

Generally the position of the company was much improved, total assets at the end of the year amounting to $6,048,076, compared with $5,794,513 at the end of the preceding year. The surplus was $605,177, as against $462,046 previously.

Granby Consolidated Mining, Smelting and Power Co., Ltd.—The report of the company for the six months ended December 31, 1919, shows net profits of $59,900, after charges and taxes. Gross earnings in the period amounted to $599,187, and taxes, interest and other charges to $539,487, leaving net as above.

Of the 11,260,585 pounds produced during the period, 7,088,000 pounds were sold at an average price of 19.6 cents a pound. The smelter cost of this metal was 14.20 cents a pound. In the corresponding period of 1918 the company sold 23,217,971 pounds of copper, against its production of 16,113,670 pounds. The average price then received was 23.8 cents a pound and the smelter cost 15.4 cents a pound.

During the last half of 1919 Granby increased its loans from bankers by close to $1,000,000. This item at the end of December stood at $5,983,900 against $5,035,243 on June 30. Accounts payable and accrued liabilities in the same period rose from $10,073 to $1,203,000. Accrued liabilities of $643,000 included provision for unpaid balance of Dominion taxes actually assessed to June 30, 1917. Since the beginning of 1920, Granby has paid out in back taxes approximately $1,000,000. The company has been adding to ore reserves through a monthly excess of ore developed over amount extracted.

International Nickel Co.—For the year ended March 31, 1920, a decline is shown in the earnings of the company. The surplus available for dividends after charges and federal taxes was $2,745,734, or the equivalent of $1.32 a share for the common stock. This compares with earnings for dividends of $5,922,629 in the 1919 report, or the equivalent of $3.22 a share on the common after provision for the preferred stock. The balance sheet shows a reduction in the inventory of about $1,500,000. An increase is recorded in cash and security holdings. The former item is $3,614,514, as against $1,941,044 in 1919, and the latter $1,728,486, as compared with $979,885. The surplus of the company now stands at $10,391,233.

In his statement to shareholders, President W. A. Bostwick said: "The demand for the company's products during the last fiscal year was much decreased compared with the war years. This is attributed in part to the large stocks of nickel held by governments and companies. These stocks are being slowly liquidated." In commenting on the absence of dividends on the common, Mr. Bostwick stated that the company did not resume payments because it was thought advisable to conserve cash for necessary capital expenditures. "The general financial condition of the company," he continued, "as contrasted with that of the close of the last fiscal year, shows a very material improvement in diminished inventories and liabilities and material increases in cash and quick assets, while at the same time there is a considerable increase in the amount of finished material ready for immediate shipment."

NEW ISSUE

We Own and Offer **$400,000**

Dominion Chocolate Company, Limited

TORONTO

(Incorporated under the Laws of the Dominion of Canada.)

Successors to the HOOTON CHOCOLATE CO. LIMITED

8% Cumulative Sinking Fund Preferred Shares

The DOMINION CHOCOLATE COMPANY, LIMITED, has purchased the HOOTON CHOCOLATE COMPANY, LIMITED, of Toronto, which was established in Canada some years ago by the Hooton Cocoa Company of Newark, N.J., a firm long identified in the Chocolate and Candy Trade. The Plant is located at 60-76 Duchess Street, Toronto.

MAKERS OF HOOTON'S CHOCOLATE.

The Company manufactures a complete line of solid Chocolate Confections, and are doing a large business from Coast to Coast. One of the strongest Assets of the Company is its standing in the Confectionery Trade. It enjoys a large trade with Manufacturers, Wholesalers and Retailers, and the best Manufacturers of Candy use Hooton's Chocolate Coatings.

SINKING FUND.

The Company's Charter provides that, commencing 1st January, 1922, 5% of the Net Earnings after payment of the Preferred dividends shall be set aside as a Sinking Fund for the purpose of redemption and cancellation of the Preferred Shares at $110 per Share and accumulated dividends.

DIVIDENDS.

Dividends will be payable 1st December and 1st June at PAR in TORONTO, MONTREAL or NEW YORK, at the option of owner.

Barcelona Traction, Light and Power Co.—After many trying years of labor trouble and political and social unrest, conditions in Barcelona, Spain, wherein the company operates, are gradually approaching the normal. Such was the gist of the statement made by Mr. E. R. Peacock, president, while visiting the head office in Toronto last week. Mr. Peacock, who formerly lived in Toronto, now makes his headquarters in London, and spends several months of each year in Spain. "The Barcelona company," he said, "is now completing the first two units of an important power development, and is expected to have 35,000 h.p. available next month out of a proposed development of 75,000 h.p. at that point. Progress in building this plant has been slow, but the completion of the first section is of importance because of the ready market for power at that point." Other extensions by the company are under consideration, and may be dealt with by the directors during Mr. Peacock's visit.

"So far as the properties and the business are concerned," he continued, "we are making progress, but the matter now is more dependent on the political and labor situation in Spain. It is a matter of satisfaction to the company that all the finances they have raised in the past three years have been in Spain, amounting to between $10,000,000 and $11,000,000. It is our desire that this shall be more and more the case, as it gives our company a better standing with the people of Spain, although they have not discriminated against us because of foreign connection."

With reference to the dividend on the common stock, Mr. Peacock stated that that was a matter for the distant future, as so much else had to be covered first.

FIRE DANGER NOW PRACTICALLY OVER

RAIN throughout the eastern provinces during the past week has removed the imminent danger of further heavy losses from forest fires. The situation in New Brunswick was most serious on June 1st, following three weeks of dry weather; not only had much timber and, some property in cities and towns been destroyed, but other towns, including Campbellton, were threatened. Rains fell, however, on June 2, 3, and 4, and, assisted by the fire-fighting forces, extinguished most of the fires. The counties of Restigouche and Madawaska, along the international boundary, suffered the most.

The villages of River Hebert, Two Rivers, Shulee, Sand River and MacCann, in Nova Scotia, were in danger on June 1. These are located in the northwest part of the province, near Amherst. Large fires were also raging in Halifax and Hants counties, and one near Sable River, in Shelburne county, destroyed about 1,000 acres of timber land. Nearly every section of the province, however, received some rain on June 3, 4, 5 and 6, and any fires remaining are under control, according to latest reports.

Newfoundland has also suffered considerably, and one forest fire on the Avalon peninsula destroyed a number of settlements last week.

Some of Quebec's best pulpwood resources were endangered as a consequence of forest fires at the end of May in that province. Price Bros.' limits at Lac des Iles, along the Red River, suffered to some extent. Other fires were at St. Andre, Kamouraska county, and at Neigette and St. Marcellin; several were scattered, in fact, throughout the valley of the Matapedia. Along the line of the National Transcontinental the heaviest fires were reported from Lac a la Beauce, McCarthy, Parent and St. Appoline. In the eastern townships they were reported from Daaquam Station and St. Sabine Station. The week-end, however, found the situation generally improved as the result of rains.

June 1st found fires raging in the north end of Peterboro county, and in the upper valley of the Gatineau, Ontario. Danger from these sources has been eliminated by rain. The Haileybury district, in northern Ontario, suffered further damage, buildings being destroyed at Paradise Bay and at Martineau Bay.

RECENT FIRES

Hortop Milling Plant Was Only Large Loss Reported This Week—No Insurance in Many Cases

Ayton, Ont.—June 3—Ayton Creamery totally destroyed. Fire caused by a spark from the smokestack. Loss, $5,000.

Brandon, Man.—June 1—Canada Gas and Electric Corporation building was damaged.

Elk Lake, Ont.—May 31—Tudhope Lumber Co.'s mill was destroyed. Fire caused by a cigar butt.

Fredericton, N.B.—June 5—Tenement house, owned by Mrs. Chas. Forbes, damaged. Estimated loss, $1,500.

Freeland, P.E.I.—June 4—Barn, owned by Wm. C. Palmer, destroyed. Blaze started from a rubbish heap. No insurance.

Gore Bay, Ont.—June 6—Pacific Hotel burnt. Loss partly covered by insurance.

Hamilton, Ont.—June 4—Old warehouse destroyed. Loss over $2,000.

Jackson's Point, Ont.—June 4—Lakeview House damaged. Estimated loss, $2,000.

Midland, Ont.—June 3—Residence of H. E. MacCartney destroyed. No insurance.

Montreal, Que.—June 2—Residence, owned by Edmond Martin, destroyed. Fire caused by a dog overturning an oil lamp.

Peterboro, Ont.—June 4—Large barn and two horses, owned by M. J. Kirn, destroyed.

Quebec, Que.—June 1—Residence of W. J. Lemesurier damaged. Loss, $1,500.

Regina, Sask.—June 6—Residence, owned by John Evans, destroyed. Fire caused by explosion. Three fatalities.

Sarnia, Ont.—June 7—Smith Reilable Repair Co. damaged. Loss, $9,000; partly covered by insurance.

Saskatoon, Sask.—May 31—Boys' Clothing Store damaged. Fire caused by a cigar butt. Loss covered by insurance.

Toronto, Ont.—June 3—Hortop milling plant completely destroyed. Estimated loss, $21,000.

June 4—Toronto Canoe Club boathouse, with three boats, was damaged. Loss, $2,200.

June 5—Nos. 27, 29 and 31 Howard Street damaged by fire. Fire caused by an overheated stove. Estimated loss, $1,200.

June 7—Brick warehouse on John Street destroyed. Estimated loss, $2,000.

Victoria, B.C.—May 27—Two dwellings destroyed. Loss, $7,500; insurance, about $3,700.

Way's Mills, Que.—June 3—New grist mill completely destroyed. Estimated loss, $5,000, with no insurance.

Welland, Ont.—June 7—Welland mill destroyed. Loss, $5,000, with no insurance.

Windsor, Ont.—June 4—Welding shop of the H. B. Holden Co. destroyed. Estimated loss, $1,500.

ADDITIONAL INFORMATION CONCERNING FIRES

Brantford, Ont.—May 6—The Wm. Buck stove factory was damaged by fire. Fire had evidently been caused by escaping natural gas, which became ignited and caused an explosion. Total loss on contents and building, $107,108. Total insurance on contents and building, $103,000.

Londonderry, N.S.—May 30—Town of Londonderry had a large fire when forty-eight buildings were destroyed. The estimated loss is $150,000.

Montreal, Que.—Building of the Imperial Tobacco Co. of Canada, Ltd., was destroyed. The cause of the fire is unknown. Estimated damage on contents, $5,800; damage on buildings, $1,700, with insurance of $24,750.

Ottawa, Ont.—May 18—Fur stock of A. J. Alexander, Ltd., was completely destroyed by fire. Estimated loss on contents, $53,000. Total insurance, $45,000. Fire supposed to have been caused by combustion.

New Legislation of Farmer-Labor Coalition

Two Hundred and Sixty Bills Were Considered in Twelve Weeks' Session — New Acts Characterized by Moderation — Labor Legislation Finds Precedents in Other Provinces—Economy Was Platform of Farmer Party, but Estimates are Increased and New Taxes Imposed

ONTARIO has been the first province of Canada to be governed by a farmer-labor coalition. The session completed on May 28 was in fact the first occasion on which either of these parties had an opportunity to play a leading part in Canadian politics. The bringing in of no really drastic legislation and the willingness to compromise on objectionable features put Premier Drury and his Cabinet over the rough places. Coming from a movement which has cried for economy and for legislation against what they have called the "interests" the legislation passed at the recent session cannot be defined as having gone as far as some would have hoped and others would have feared. However, it is not in legislation that a government practices economy and the province has still to wait to see if the government can carry on its policy with the rigorous expenditure cutting promised.

There has been no cutting down of the estimates. There have been measures to increase the revenue considerably. The next budget will tell the story of the success of the farmer-labor legislators. During this session it has carried on in much the same manner as previous party administrations. Financially the government has added a few burdens. Hon. Peter Smith, provincial treasurer, in his estimates for the year figures out an expenditure of $17,941,557.15. Besides this the two great commissions, the Hydro and T. and N. O., will spend according to estimates $17,257,000 and $18,314,772 respectively. Such according to estimated figures is the burden of the province for the year. The commissions, of course, are responsible how they spend their money and Hon. Mr. Smith has little to do with it.

Much New Taxation Imposed

Besides the ordinary sources of revenue Hon. Mr. Smith has made some amendments increasing taxation and put on some new ones. The greatest feature of his budget was the placing of bigger tax on race tracks. The original amount set out was $10,000 on mile tracks and $5,000 on half mile track. Here the government compromised with the result that the tax was reduced to $7,500 on mile tracks and $2,500 on half mile tracks. From that source the provincial treasurer hopes to get $800,000 revenue and $150,000 from the amusement tax at race courses.

An amendment to the corporation tax act increases the tax on banks 100 per cent. The tax was previously $1,500 on each head office and $50 on each branch. Insurance companies are also taxed differently according to amendments to the act. Hereafter there will be a tax of 1¼ per cent on the gross premium income on life insurance and one per cent. on other lines of insurance. There is no tax on dividends to policyholders.

There is also an increase on stock transfer stamps. Formerly the stamp was two cents on share at par value. This is now increased to three cents. The amusement tax was widened to include cabarets, etc.

Heavier Succession Duties

Heavy increases were made in the succession duty levies. These range from 15 to 60 per cent. The extreme rate is on estates that pass on to distant relatives or persons no relation to the deceased. Only small increases are made where the estate is small. Where the estate exceeds $25,000 and does not exceed $50,000 and goes to wife, husband, children, parents the tax remains at one per cent. On estates from $50,000 up to $150,000 the old rates are increased one-half of one per cent. Thence the tax increase one-half per cent. with each additional $100,000. Ten per cent. is collected on estates of over $1,000,000. In each case if it goes to one person the tax is heavier or if it passes to a non-relative. It is believed that the new rate will almost double the income from these taxes. It will not show much on the current year as estates have 18 months in which to pay.

These are practically all the measures passed to increase the revenue. By more careful handling the government hopes to increase the revenue from the Forests and Lands Department and the Mines Department which by act at this session was separated from the Lands. A Royal Commission is at work investigating forests and lands now and an inquiry will be made into the mines department. From the report on these the government hopes to get more return to the people from the natural resources of the north country. The intention is to arrange this so that the money coming out of it to the province will in no way hinder development by the timber men and the miners.

Additional Expenditure

As to increasing expenditure two acts were put on the statute books which at a general glance will cost the province money. One is the superannuation bill passed despite opposition from the United Farmers of Ontario, the parent body of the present government. The civil servants will pay into the superannuation fund half of the total but there are 110 servants ready for immediate superannuation for whom the province must provide the full superannuation. The government considers many of these still capable of service. Others will not be replaced. So the general cost will not be much.

Another bill which adds to the general cost will be mothers' pensions. There is an estimate for $250,000 for this purpose which will probably be enough for the first year. This bill provides pensions for widows with two or more children and also for wives whose husbands are in the hospitals for the insane. The municipalities pay part of the pensions.

This act was the product of the Labor party, which during the session has been more moderate than was expected it would be. The legislation brought in by them is not new to the Dominion, every act being brought having a similar one in force in some other province. Hon. Walter Rollo said that Ontario was "20 years behind the other provinces in this kind of legislation" and he thought the few bills being introduced would bring Ontario "more into line."

The Labor Legislation

Chief among the labor legislation was the bill amending the Workmen's Compensation Act. The two main provisions in it were the increasing of the maximum of compensation from 55 to 66⅔ per cent. and the giving of full compensation to those earning $12 a week and less. Other amendments with retroactive features and the pooling of funds from schedule two industries with those of schedule one industries were taken out when opposition developed.

The legislature also submitted itself to the principle of a minimum wage set by the state. The act passed this session applies only to women other than domestics and farm laborers. There is no amount set in the act itself for women workers but a board of five of whom two will be women is given wide powers of investigation and may set the mimimum wage to be paid to the women who apply for a board of settlement.

Another important bill in the general run was that providing local option in municipal taxation. If municipal councils so desire they may have the ratepayers vote on a by-law for the exemption of a proportion of improvements from assessment. By continuing this proportion year by year the municipality may in time wipe out all the assessment on improvements. Not more than 20 per cent. may be taken off in one year. The property qualification for those running for municipal office was also abolished by an act passing the House.

Elections and Prohibition

A general elections bill minus the fixed election date which met with much opposition was also passed. It puts the preparation of provincial voters' lists in the hands of the municipalities. The government also prepared the way to a bone dry Ontario by passing a resolution calling for a referendum on the question of liquor importation and passing an act stopping the carrying of liquor within the province except from private home to private home. This act becomes effective only if the province votes to stop importation. Much criticism was made of the cost of enforcing the Ontario Temperance Act. The estimated cost this year is $250,000. The government was sufficiently impressed with the criticism to appoint a large committee to investigate fully the working and cost of the act.

The minister of agriculture hopes to get good results from his bill by which the government may provide loans up to $3,000 for incorporated co-operative societies for the storage and cleaning of seed grain and potatoes. He also got a bill through providing for the purchase of cream by test.

The chief interest of the industrial world in the education legislation is in the act providing for the establishment of technical schools throughout the province. These are more particularly related to certain industries such as textile manufacturers in which the industry will pay half with the government for the school.

Borrowing and the Interest Rate

Heretofore the interest on provincial debentures was limited to six per cent. Hereafter the interest rate will be set by the government. The government got the usual legislation to borrow ten millions for emergencies in public service, public works, etc.

The House also passed a bill providing for the extension of the T. and N. O. to James Bay. The premier, however, made it quite plain that no immediate construction was contemplated. Hon. F. C. Biggs, minister of public works, got through all the necessary legislaton for his ambitious program of highways. Practically the entire system of 1,800 miles of highways is designated. Besides that, he provides for assistance to counties and townships. There is a tendency on the part of the government to delay public buildings until the cost of material comes down.

About 260 measures were considered by the legislature most of them being private bills. In experience in parliamentary procedure delayed legislation somewhat. But the 12 weeks occupied is not a record. There were longer sessions in old party days.

"GREAT WEST BANK" BEING ORGANIZED

Only Proposal Expected to Materialize This Session—Bill Already Passed Senate—Name Changed from "Bank of Saskatchewan"

APPLICATION has been made to the Senate of Canada for the incorporation of the "Great West Bank," with head office in Regina, and capital of $5,000,000. The names of those making the application are: Robert Sinton, farmer; J. K. McInnes, farmer and real estate agent; James Grassick, mayor of Regina; Wm. Thomson, physician; J. W. Brown, retired farmer; George Speers, undertaker; H. Black, contractor; Hugh Armour, farmer; Andrew Dalgarno, retired farmer; and F. S. Wilbur, financial agent. Mr. Wilbur, is of Creelman, Sask., and the rest are of Moose Jaw.

The bill to incorporate the Great West Bank was formally reported on before the commerce committee of the Senate on June 11, and passed its third reading on the same day; it is sponsored by Senator Laird, of Regina. It was originally intended to call it the "Bank of Saskatchewan," but the other title was regarded as preferable. The Imperial Financial Corporation, of Toronto, has taken an active part in the organization and Mr. Potts, of that company, has for some time past been in Regina and other Saskatchewan points arranging for the necessary financial support. Half a million dollars of capital is ready to be subscribed from one source alone, and in the province it is expected that over $2,000,000 will be subscribed. The balance of the authorized capital, three million dollars, will be subscribed through American agents. Mr. Potts stated recently that one multi-millionaire in the United States was ready to subscribe the whole of the capital, but that this would not be countenanced, as it is to be a bank of the people, for the people and by the people. There will be a directorate of about 25 Saskatchewan men who will direct the policy of the bank.

Saskatchewan Capital Interested

A special appeal will be made to the farmers of Saskatchewan to identify themselves with the new institution, as it was primarily for their benefit that the project was launched. W. R. Phillips, of the Imperial Financial Corporation, is also taking an active part in the organization.

Speaking of the future, Mr. Potts stated that the bank would erect a handsome building in Regina, sufficiently large to handle all the business of the head office. Nothing could be said relative to the site, but it is proposed to get a fine site right in the heart of the business section of the city.

The proposal to organize a Bank of Alberta has, it is understood, been given up. Notice was also given some weeks ago that application would be made at the present session for the incorporation of a "British Empire Banking Corporation," but nothing further has been done towards it.

TORONTO STOCK EXCHANGE COMMISSIONS

Some changes in commissions charged clients were agreed upon by members of the Toronto Stock Exchange at a general meeting on June 11. These changes were chiefly in the direction of scaling down the charge on the low-priced stocks and of raising them on the high-priced securities. Under the scale, the commission will be as low as ⅛ of 1 per cent. on stock selling under $5, and advancing by stages to ¾ on stock selling over $150, and ½ per cent. on over $200. Quite a number of stocks belong to the lower levels, while the issues affected by the ½ per cent. rate are virtually confined to banks and a few papers.

Ottawa Government Must Choose New Leader

Retirement of Sir Robert Borden, Previously Postponed, Expected at End of Session—Party Caucus Will Decide Policy—Canadian Autonomy Within Empire, and Moderate Tariff Will Probably be Main Planks in Platform—Meighen Best Guess for Leader

(Special to *The Monetary Times.*)

Ottawa, June 17th, 1920.

WITH the budget disposed of and the end of the session in sight, there is growing restlessness among the government ranks as to the future of the party. It is felt that the long-confused political situation must be cleared or the Unionist party will disintegrate completely. Followers of the government see opposite them two parties, with definite policies, with aggressive leaders, and with active organizations from coast to coast. As for the Unionists, they have nothing more to stand upon than the record of the government; they have no drafted platform; they are uncertain as to whether Sir Robert Borden proposes to remain as the head of the government, and there is not the slightest semblance of a political organization.

It was expected that immediately Sir Robert returned from his long and much-needed holiday a caucus would be called, a platform enunciated and the future settled. But there are no evidences so far of a caucus, and the supporters of the government are as much in the dark as ever. As for the cause of the delay, no one knows. Sir Robert has taken no private members into his confidence and few, if any, cabinet ministers.

Will Retire at Close of Session

The lack of any positive information, combined with the delay in calling a caucus, lends credence to the growing belief in political circles that Sir Robert Borden has finally and definitely made up his mind to retire. If he were retiring, it would be unwise and unfair to the cabinet to make the announcement in the middle of a session and precipitate a political crisis with the legislative program but half passed. The natural thing would be to wait until the session was nearly over. While Sir Robert has apparently told no one of his plans, there is good reason to believe that this is the cause of the delay, and that the last week of the session Sir Robert will summon his followers together, announce his firm intention to retire from public life, and outline his own personal views as to the future of the party.

Postponed Retiring Last Christmas

It is no political secret, of course, that Sir Robert came to this same conclusion last Christmas. After his return from the peace conference he found he was unable to carry on with the same energy as in the past. He consulted several leading Montreal specialists, and they strongly advised him to give up immediately political life, otherwise they would not answer for the consequences. Sir Robert communicated to his colleagues these opinions and announced his decision to retire. The question of leadership immediately arose. The cabinet was unable to unite on a successor. A Meighen boom started which frightened the ministry, few of whom, strange to say, were in favor of the brilliant young minister of the interior. As a result of the division the ministers fairly begged the prime minister on bended knee to remain at his post. They suggested that he take a prolonged holiday in order to recover his health, and in the meantime they would carry on under the leadership of Sir George Foster as acting premier. Sir Robert, in order to prevent what looked like a complete break-up, reluctantly consented to this arrangement.

The prime minister is back from his holiday. He looks much better, with a fine southern tan. At times he shows much of his old-time vigor. But it is said by those who should know that his doctors have again advised him to retire from the active political arena, and this time he is determined to take their advice, no matter what the consequences.

Party's Future to be Discussed

There is thus good reason to state with considerable definiteness that a caucus will be called shortly before the house adjourns, when Sir Robert will place his retirement in the hands of his followers. Three things will have to be settled by this momentous caucus: (1) Whether the Unionist party is to be continued, and, if so, under what name; (2) what will be the policy of the party; and (3) who will be its leader.

Must Remain Unionists

The first decision will be the easiest. There seems little doubt that the party will be continued. The majority of the Liberal Unionists have so burned their bridges behind them that there is no return for them. They have either to remain with a reorganized Unionist party or efface themselves form the political map. As for the Conservative Unionists, a number of them, particularly from Ontario, are anxious to get back to old-time lines and would like to see every Liberal Unionist kicked bodily out of the party. However, the majority of them are prepared to accept a new deal, provided the policy and the leadership are satisfactory. Hon. Robert Rogers cannot summon more than a half dozen followers, if that many, in the commons.

Name and Platform

The question of a name will prove considerable of a stumbling-block. There is talk of the name "national party." However, it is feared that it would be linked up with the old nationalist party of Bourassa's making. Conservatives object strenuously to the dropping of the old name entirely out of deference to the small percentage of Liberal Unionists in the party. The best guess is that some such name as National Liberal Conservative party will be adopted.

As to the question of platform, there would seem to be little trouble. The foundation-stone of the party will be continuance of British connection, the building up a great autonomous nation within the empire. A stern face will be set against such elements in the Liberal party as are represented by Lindsay Crawford and John S. Ewart.

Moderate Tariff Policy

The tariff policy will be one of moderate protection. It was perhaps best stated by Sir Henry Drayton in his budget speech. This enunciation will be accepted as the party's tariff policy. He said:—

"Our policy calls for a thorough revision of the tariff with a view to the adoption of such reasonable measures as are necessary: (a) To assist in providing adequate revenue. (b) To stablize legitimate industries and to encourage the establishment of new industries essential to the proper economic development of the nation to the end that a proper and ever-increasing field of useful and remunerative employment be available for the nation's workers. (c) To develop to the fullest extent our natural resources. (d) To specially promote trade with the mother country, the sister Dominions and colonies and the Crown dependencies. (e) To prevent the abuse of the tariff for the exploitation of the consumer; and (f) To safeguard the interests of the Canadian people in the existing world struggle for commerical and industrial supremacy.

The real sticking-point will be on the question of leadership. There is no one man upon which all are ready to unite. If Sir Thomas White had stayed in the cabinet he would have been an almost certain choice, upon whom Liberals and Conservatives could unite. He is now regarded as out of it. Hon. N. W. Rowell is the ablest of the Liberal Unionists, but he lacks personal magnetism and has collected too many enemies.

Sir George Foster is looked upon as was Hon. W. S. Fielding at the Liberal convention, as too advanced in years.

This leaves of those in the cabinet who would be available as Hon. Arthur Meighen and Sir Henry Drayton. From sheer ability, Meighen would undoubtedly be the choice. He has the parliamentary genius and instinct. He has the culture the position calls for. He is an aggressive fighter, and any party which has him as leader will at least know what they are fighting for. He would go down with colors flying. The chief argument that is used against him is that he is thoroughly disliked by Quebec, owing to his connection with conscription and the War Times Election Act. It is said that he could never make headway in Quebec, and that no party which cannot secure some following in Quebec cannot long make claim to the national party. Politicians are of the opinion that with an economic issue the government should make some inroads upon a solid Quebec. However, it is doubtful whether any leader could make gains in Quebec next election. The issue there, as far as present evidences go for anything, will be revenge for the defeat of Laurier in 1917. Every appeal will be made to the magic name of Laurier. Friends of Meighen ask why should he be sacrificed because he bore the brunt of the parliamentary fight for a conscription measure.

As a compromise, Sir Henry Drayton might be possible. He lacks, however, parliamentary experience, and has yet, after all, his spurs to win. Unless some dark horse looms up the present guess is Meighen.

Public Accounts Committee Meets

Public expenditures aggregating approximately $300,000,000 and covering several items of public interest, including $121,640,016 for pay of Canadian forces overseas, came before the public accounts committee on June 11th. The committee passed the formal motions asking for the production of documents, etc., also for the attendance of witnesses. This is the first sitting of the public accounts committee this session; in fact, for nearly two sessions. Interest, however, was somewhat lacking, there being a bare quorum present. It was decided to ask the house to reduce the quorum number from twenty-one to twelve. Among the items named were the following: $23,593 paid to Major R. R. Napier for travel and expenses $45,103 for advertising and $27,103 for printing in connection with the national war savings committee; $4,200 paid to W. S. Leckie, secretary of the War Purchasing Commission; $17,124 for the visit of the French mission; $1,792 to Colley and Scott, customs brokers; $147,169,187 from customs duties received on tractors, ditchers and agricultural implements.

LA BANQUE NATIONALE REPORT GOOD

At the annual meeting of La Banque Nationale, held in Quebec on June 9, the report for the year ended April 30, 1920, was presented and the directorate re-elected. Deposits for the year show a notable increase over the previous financial year, the increase reaching to the amount of $11,005,055. Canadian deposits in the bank for 1919 were augmented to $7,632,151, and those in the Paris branch show a raise to $3,372,904. A great number of Canadians sent money to the Paris institution in the hope of benefiting by the very favorable exchange condition. Profits realized during the year amount to $567,372. Those benefits are equivalent to 28 per cent. of the capital and to 14 per cent. of the capital and reserve combined. An additional $100,000 is credited to the reserve. The employees' fund receives $25,000.

Announcement was made by President R. Audette that the dividend would now be placed on a 12 per cent. basis, as compared with 9½ last year and 9 in 1918. "We are beginning a period where prudence is imperative," said Mr. Audette. "The banks must expect to have difficulty in maintaining their profits." Touching on the financial outlook, the president said he believed this year would see a diminution in the advances made to the public, and that prudence will oblige the banks to curtail and choose more carefully the operations in which they interest themselves.

BANKS STILL ASSIST FOOD PRODUCTION

Larger Advances Than Ever Before Are Made This Year in Spite of General Restriction of Credit, Says Bank of Commerce Official

(Special to *The Monetary Times.*)

Winnipeg, June 16th, 1920.

CROP conditions throughout all parts of the west are ideal. From Alberta, James McCaig, Commissioner of the Provincial Department of Agriculture, wires: "This moist weather is bringing the grain along in wonderful style. The wheat and oats are growing rapidly, and the blades are plump and luscious. They look like onion shoots, so fat and full of moisture are they." Only in one small district in the south of the province, that lying immediately north and east of Lethbridge and Macleod, has there been any damage reported. This has been due to the high winds there during the last week.

From Saskatchewan Department of Agriculture comes a similar report, stating that from fifty-seven points scattered over the province conditions are the most favorable of any crop reports ever issued. There is plenty of moisture in the ground and growing weather is the very best.

Similar reports from Manitoba are just issued, and all speak of conditions for the week as ideal. The crop outlook at present could not be more favorable, in fact.

Prominent Banker in West

H. V. F. Jones, who was for many years the agent of the Canadian Bank of Commerce in London, and who for some years past has been assistant general manager, with headquarters in Toronto, spent a few days in Winnipeg this week. He will visit most of the branches in the four western provinces and discuss affairs with local representatives everywhere. Mr. Jones said that it was essential that the financial institutions of the country should exercise a considerable degree of caution at the present time, and that this was their advice to all commercial borrowers. The banks were all, he said, making an effort to assist in food production, and the figures showed that larger advances have been made to farmers in the west than in any previous year.

Western Coal Development

A. C. Flumerfelt, of Victoria, president of the International Coal and Coke Co., of Coleman, Alta., one of the leading financial men of the Pacific Coast, was a visitor in Winnipeg and eastern Canada this week. Mr. Flumerfelt emphasized the necessity of Winnipeg using larger quantities of Alberta coal. He pointed out that it was in the national interest that the prairie provinces should use western coal, and that the present exchange situation made it almost imperative. There is at the present time an added tariff of 15 per cent., due to exchange. With reference to the labor situation, he said that there was little friction this year at the mines, which were operated under a closed shop arrangement, but that there was not sufficient men to take out the required quantities.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended June 11th: La Rose Mine, 65,992; Mining Corporation of Canada, 65,097; Dominion Reduction Co., 60,000; Nipissing Mine, 348,612; total, 539,701 pounds. The total since January is 9,920,222 pounds, or 4,960.1 tons.

Hon. M. Archambault (member of parliament for Chambly-Vercheres, has urged the finance minister to increase the income exemption per child from $200 to $500. Does the honorable member wish to exempt his province entirely?

THE FOUNDATION AND THE SUPERSTRUCTURE

IT is difficult to analyze the financial position at present because of the diversity of conditions found in the various branches of industry. This was not the case during the past three years, nor even six months ago, when demand exceeded producing capacity in all save a few exceptional industries. Now, however, some of the fundamental industries are faced with depression, and a general slackening of trade is reported by wholesale distributing houses. Even some retail prices have declined. The majority still continue upward, however, as the effect of increases in production costs which took place many months ago. Business has a superficial appearance of prosperity, but it has a hollow sound, for the prime factor of demand has disappeared.

This is an unhealthy condition. Bankers in Great Britain, in the United States, and in this country recognize the symptoms and are guarding their customers, and the financial structure as a whole, by moderate but firm restrictions on credit. By thus anticipating business depression they lessen the danger of a general collapse.

The first signs of a turn in the tide appeared shortly after the armistice was signed, when prices of war materials dropped off substantially, and the stock markets hesitated in the face of an uncertain outlook. After February, 1919, however, business forged ahead with unprecedented vigor. Prices reached new high levels, bank loans expanded, speculative stocks soared in value and money, even for long-term loans, commanded higher rates than during the most critical period of war financing. The armistice movement was, therefore, a temporary recession in the remarkable period of expansion which commenced in 1916 and continued until the end of 1919.

Whatever forces guide the course of the stock markets, they were again the keenest analysts of business, and the wisest prophets of the future, for in November last stocks commenced their downward plunge, and have continued downward in spite of substantial recoveries from time to time. In February they recovered almost to their November level and a prominent university professor in the United States, who makes a special study of business indices and who pinned his faith in the messages of the tape came near to throwing up the sponge. Now, however, they are again slipping rapidly, and reports of conditions in such fundamental industries as iron and steel, transportation, and the principal lines of manufacture confirm what was indicated by the exchanges.

THE ONTARIO LEGISLATIVE SESSION

GREAT things were expected of the new farmer-labor coalition in Ontario, both by city and country. Rural Ontario looked for a drastic program of economy, but was presented instead with estimates which were higher than ever before in the history of the province. The towns and cities anticipated legislation favoring the rural districts, but found nothing but what any previous government might have placed upon the statute books. The new Ontario legislation, as summarized elsewhere in this issue, contains nothing which can be called even a novelty in Canada. This is in spite of the fact that it is the first session of any legislature or parliament in Canada controlled by labor or a farmers' party.

An extensive policy of road building is the only feature which is of special value to the farmers. The labor party, which constitutes the weaker wing of the government, seems to have secured more new legislation, as the mothers' pensions, the minimum wage and the workmen's compensation amendments may be directly traced to it. Some of the other financial changes, such as the increases in the succession duties and the increases in the taxes on certain corporations, do not do more than reflect prevailing opinion on the subject of public revenue.

The session has therefore been a great revelation of the essentially common views which are held by the agricultural and industrial groups in Canada, and of the fact that labor's program, however radical it may seem in opposition, becomes comparatively moderate when clothed with authority. City and country have indeed been brought closer together by reason of Ontario's experience, for the farmers' party has learnt that governments in the past have framed their policies within the comparatively narrow limits of choice at their disposal, and must continue to do so in the present, and the urban citizens find in the work of the new administration little which differs from their own views.

PUBLIC SERVICE RATES GOING UP

GENERAL recognition of the financial plight of street railways, due to higher costs of material and labor, has resulted in street car fares in nearly 500 cities on this continent being increased from one to five times. The common five cent fare is now a thing of the past, for where this is the maximum allowed it is found impossible to provide an adequate service. The latest tabulation of street railway fares on this continent shows that 60 cities have a 10 cent fare; three have a nine cent fare; 21 have an eight cent fare; 120 have a seven cent fare; and 225 have a six cent fare. There are also 26 cities which have a seven cent fare with an additional cent for a transfer; five cities have seven cent zones, and 10 cities have six cent zones, with additional two cents for transfers.

In Canada the first bitter wave of opposition encountered by the street railways has been overcome. One of the most important factors in developing a more liberal attitude towards them has been the experience of the western cities which own and operate their own street railways, and which have found it necessary to charge higher fares. The commissioners in Calgary have, in fact, just recommended a 10 cent fare, which is double the present fare, with four tickets for a quarter, to meet the increased costs. Montreal also, which recently adopted the service at cost principle, has reached the eight cent stage, and the new expenses faced this year may necessitate a 10 cent fare. Meanwhile the companies operating under franchises which limit the fares which may be charged are ground between the upper millstone of a stolid public opinion and the nether millstone of labor difficulties. The Toronto Railway Co., the franchise of which expires in 1921, may have to meet additional costs this year by charging them to capital account. London, Ont., has not succeeded in obtaining permission to charge even a five cent cash fare. The Ottawa Electric Railway and the B.C. Electric have obtained small increases.

In its "Public Service News," of June 1st, the Winnipeg Electric Railway Co. points out some of the special burdens placed on street railways companies. "In these days when street railway fares all over the continent are being increased in order to meet the rising costs of operation," it says, "and when the future of all street railways is a perilous one, it becomes a really serious question as to whether it is fair to the car rider to tax him indirectly in this manner and make him contribute to the relief of the non-car-rider. It would seem to be a fundamental principle of economic justice, particularly in these days, that the street car rider should not be called upon to pay anything more than the actual costs incurred in giving the service he receives, including a fair return on the money which makes such service possible. To make the car rider pay 'excess taxation' is unjust.

"We do not seek to escape the taxes which are imposed on ordinary business concerns doing business in the city. We are willing to pay our just share towards the cost of civic administration. But the grestest portion of the taxes which we pay to the city to-day with fares from the street car riders are taxes which are not applicable to other businesses, and which are a direct charge on the car riders. These charges are contributing to the necessity for higher fares. When fares must be increased so much that traffic decreases, then it becomes necessary, in the interests of the community to eliminate every possible tax against the public utility to keep fares at a level that makes operation possible."

THE "PROGRESSIVE" PARTY AND ITS PLATFORM

SOCIALIZATION of the Canadian grain trade and of the banking system is one of the objects of the so-called "progressive" party in parliament, said H. H. Stevens, M.P., in addressing the Progressive Club in Montreal on June 12. The movement had powerful political support in the grain growers and the Canadian Council of Agriculture, and should be carefully watched and combatted, he said, as it was a dangerous doctrine. The first idea was the socialization of the grain industry of Canada, that the government should market all the grains, a step from which even Hon. Mr. Crerar shrank, but which the Council of Agriculture had approved. The plans called for all marketing by the government as a permanent policy and absolutely no private dealing in grains. This system was wanted as a foundation on which to socialize the grain industry so that in addition to government marketing and control of grain the government would also take over the terminal elevators, the storage elevators and the 4,000 to 5,000 line elevators in the districts of the west. "They intend to propose that the government of Canada shall take over the C.P.R. They intend to propose, in addition, that the government shall take over the banking system, or at least establish a state bank. These things have been favored by a large number of the members of the Council of Agriculture. Mr. Crerar, in justice to him, is not enamored of these proposals, but his fate as a political leader depends on working with the Council of Agriculture."

Mr. Stevens said that while there was some difference of opinion as to taking over the Grand Trunk lines, it had to be admitted that something of a drastic character had to be done, but there was no conceivable reason for any government taking over the C.P.R., no conceivable excuse whatever, and he felt that he spoke for those who sat in parliament with him, except the so-called "progressives," that there was no possibility of such a thing. In the matter of state banks, he said that many irresponsible people want such an institution. He did not wish to say that our present banking system was perfect, perhaps there were weaknesses, and he believed that as regards export trade there was a weakness, but the Bank Act was revised every 10 years, would be revised in 1922, and any necessary changes could be made. He would hesitate at any time in the near future to substitute a state bank for our present banking system. Perhaps when the revision of the Bank Act came it might be found that banks were making too much money for quasi-public institutions, and that the government should take more from them in taxes, but that was no reason for launching into a North Dakota banking system. The people of Canada should take heed before the propaganda of the grain growers took too deep root.

Vilhjalmur Stefansson has obtained from the Dominion government a 30-year lease of the southern part of Baffin's Land, and has secured capital for the establishment of a reindeer breeding industry there. For centuries the far north has taken toll of human life and property; it is time that economic payment, at least, be made.

* * * * *

Thirteen thousand disabled soldiers, who have received vocational training from the department of soldiers' civil re-establishment, are now seeking employment, and an appeal is being made to employers to make room for them if possible. Considering the millions of dollars that have been spent on this training, the present scarcity of labor, and the fact that most of these men are already in receipt of pensions and can therefore afford to sacrifice wages in order to secure a start in a new occupation, should make their problem of employment an easy one.

Trade with the Orient

With correspondents of the highest standing in China, Japan, India and other countries of the Orient, and branches in all the principal ports on the Pacific coast of North America, namely :

Prince Rupert Portland, Ore.
Victoria Seattle
Vancouver San Francisco

this Bank is excellently equipped to serve the interests of Canada's growing trade with the Orient.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. Howard Stutchbury has been appointed trade commissioner for Alberta. His first work will be directed towards establishing eastern markets for Alberta coal.

Mr. H. J. McCann, for some time past assistant to the president of the Dominion Steel Corp., has been appointed assistant general manager of the Dominion Coal Company.

Mr. John Barnsley, for the past eleven years assistant manager of the Union Steamship Company, of British Columbia, has been appointed temporary manager to succeed the late E. H. Beazeley, who was killed recently.

Mr. W. A. Black, vice-president and managing director of the Ogilvie Four Mills Company, has just returned from a three months visit overseas, spent almost exclusively in London, England, where he had confined himself largely to the special business that had taken him there.

Mr. Russell D. Bell, member of the stock and bond house of Greenshields and Company, was elected president of the Financial Club of Montreal, at their annual meeting recently. Mr. Hew R. Wood, of Hew R. Wood and Company, was elected vice-president.

Mr. George E. Bunting has been appointed Australasian manager of the Canadian Government Merchant Marine, Limited. Mr. Bunting began in the transportation business with the Grand Trunk when nineteen years of age. Later he was with the Lehigh Vallew Company, at Buffalo and afterwards with the Canada Atlantic Railway at Ottawa. He became travelling freight agent for the Allan Steamship Company when the Canada Atlantic Railway was absorbed into the Grand Trunk System, and in 1913 was promoted to the General Agency of the Allan Steamship in Chicago, where he remained until 1917. When the national merchant marine was organized, Mr. Bunting was made general agent for Ontario. Last December he was sent to Australia and New Zealand to organize agencies for the Canadian Government Merchant Marine, his appointment as Australasian manager following his work in that connection.

Mr. R. F. M. Sylvester, managing director in British Columbia of the Granby Consolidated Mining and Smelting Company, has retired. The position of managing director has been abolished and Mr. H. S. Munroe, of New York, has been appointed general manager, and will proceed to take charge of the company's mine at Anyox, B.C.

Mr. Allan A. Bain has been appointed special agent of the Canadian Surety Company, at the Winnipeg branch office which has jurisdiction over the provinces of Manitoba, Saskatchewan and Alberta. Mr. Bain, following several years in business life, entered as a student-at-law at Osgoode Hall, Toronto, and was admitted to the Bar in 1916, since then he has practised his profession.

Mr. Edward F. Merril has been appointed general manager of the Dominion Iron and Steel Company, and the Dominion Coal Company, with offices at Sydney, N.S. It is understood that Mr. Merril was an expert adviser to the interests behind the negotiations which have led to the creation of the British Empire Steel Corporation, and that he will be in charge of all operations of the above mentioned companies and their subsidiaries.

Mr. A. H. C. Heitman, manager of Chemical Products, Ltd., Trenton, Ont., is a prominent figure in the chemical business on this continent. Mr. Heitman was for ten years in charge of the research division of Parke, Davis and Co., Detroit, and then came to Canada to take charge of the Cott-a-Lapps Co., Ltd., of Walkerville, Ont., manufacturers of burlap, wall fabrics, linoleums, etc. He successfully installed the chemical division and was the first outside of Germany to manufacture salicylic acid, apart from the German firm which established itself at Garfield, Ind., just before the war. Mr. Heitman supplied the British expeditionary force with large quantities of salicylic acid. When the Walkerville plant was purchased by the Calco Chemical Co., of Bound Brook, N.J., it was expected that Mr. Heitman would join that company in New Jersey. He entered the service of Chemical Products of Canada, Ltd., as managing director, and when this company was dissolved recently, he was appointed manager of its successor, Chemical Products, Ltd.

Mr. W. M. Scott, C.E., has been appointed by the Administration Board of the Greater Winnipeg Water District, Man., to succeed Mr. R. D. Waugh as chief commissioner. Mr. Scott has been identified with engineering works in this country for many past years, having been at one time town engineer of New Glasgow, N.S., and manager of the town's public utilities. From 1906 until the end of 1911 he was resident engineer at Point du Bois, for the city of Winnipeg power development. Lately Mr. Scott has been in private practice in the city of Winnipeg.

OBITUARIES

Mr. William Crichton, general manager of the Buntin, Reid Paper Company, Toronto, Ont., died in his office on June 14th, from heart failure.

Mr. J. F. Whitson, Commissioner of the Northern Development Branch of the Ontario Department of Lands and Forests, died suddenly in Sudbury, Ont., on June 12th.

Mr. G. B. Byan, who for the past 35 years has been one of the leading dry goods merchants of Guelph, Ont., died in a New York hospital on June 12th, following a serious operation.

Lieut.-Col. Frederick Toller, former Controller of Dominion Currency, and at one time officer commanding the Governor-Genreal's Foot Guards, died at Ottawa, Ont., on June 15th. Col. Toller, who was prominent in military and financial circles in Ottawa, was 79 years of age.

Mr. Kenneth W. Blackwell, vice-president of the Canadian Steel Foundries, Limited, died at his residence in Montreal on June 11th, after a brief illness. Mr. Blackwell was vice-president of the Merchants Bank of Canada and a director of several prominent business concerns. He was a past president of the Canadian Society of Civil Engineers, prominent in engineering circles, and the most prominent figure in building up the steel casting industry in Canada.

Wheat Acreage Decreased Twelve Per Cent

Oats is Only Grain to Have More Acreage This Year — Conditions on May 31st were Below Average, But Rapid Recovery was Being Made — Canadian National Railway Reports Plenty of Moisture — Second Manitoba Free Press Report is Optimistic

EXCELLENT weather during the month of May enabled seeding, which had been delayed in the prairie provinces by a cold and backward April, to be completed. The condition of the grain at the end of the month was not far behind the average, concludes the Dominion Bureau of Statistics, in a report on conditions as at May 31st. A first estimate of areas sown to grain, hay and potatoes is also given by the Bureau.

Areas Sown to Grain, Hay and Potatoes

The total area estimated to be sown to wheat in Canada for 1920 is 16,921,000 acres, as compared with 19,126,000 acres, the final estimate of 1919. The decrease this year is 2,205,000 acres, or 12 per cent. The area to be harvested of fall wheat is 740,300 acres; so that the area under spring wheat is 16,180,700 acres, as compared with 18,453,175 acres in 1919. Of oats the total area sown is estimated at 15,291,000 acres, as compared with 14,952,000 acres last year, an increase of 339,000 acres, or 2 per cent. Barley has an acreage of 2,574,900 in 1920 as compared with 2,645,509, rye 730,100 as against 753,081, peas 219,065 against 230,351, mixed grains 900,800 as against 901,612, hay and clover 10,492,900 as against 10,595,383, and alfalfa 220,800 as against 226,869. These crops all show a decrease; barley, rye and alfalfa of 3 per cent., peas of 5 per cent., and hay and clover of 1 per cent. Mixed grains are practically equal to last year. The end of May is rather too soon for definite reports on the areas planted to potatoes; but a preliminary estimate of areas planted, or to be planted, is 802,500 acres as against 818,767 acres last year, a decrease of 16,267 acres, or 2 per cent.

Grain Acreage of Prairie Provinces

The area sown to wheat in the three prairie provinces totals 15,502,700 acres, as compared with 17,750,167 acres, a decrease of 13 per cent. Oats extend to 9,613,700 acres, or 2 per cent. above last year's area of 9,452,386 acres. Barley has an area of 1,751,500 acres, as against 1,800,745 acres, a decrease of 3 per cent., and rye 562,100 acres, as against 573,218 acres, a decrease of 2 per cent. By provinces the areas in 1920 are: Manitoba: Wheat, 2,563,500 acres (2,880,301); Saskatchewan, 9,422,800 acres (10,587,363); Alberta, 3,516,400 acres (4,282,503). Oats: Manitoba, 1,884,200 acres (1,847,267); Saskatchewan, 4,934,400 acres (4,837,747); Alberta, 2,795,000 acres (2,767,372). Barley: Manitoba, 876,100 acres (893,947); Saskatchewan, 477,800 acres (492,586); Alberta, 397,600 acres (414,212). Rye: Manitoba, 272,000 acres (298,932); Saskatchewan, 203,800 acres (190,482); Alberta, 86,300 acres (83,804).

Condition of Crops on May 31, 1920

Expressed numerically in percentage of the average yield of the past ten years, the average condition for all Canada on May 31st of the crops reported on was as follows, the figures within brackets representing the condition at the corresponding date last year: Fall wheat, 99 (101); spring wheat, 98 (98); all wheat, 98 (98); oats and barley, 98 (95); rye, 96 (101); peas, 98 (91); mixed grains, 101 (92); hay and clover, 95 (101); alfalfa, 94 (95); pasture, 94 (102). In Prince Edward Island conditions for all crops are either equal to or above the ten-year average. In the other two maritime provinces the condition for most crops is from 3 to 5 per cent. below the average. In Quebec, spring wheat is 100, oats are 103, barley and peas are 101, rye and hay and clover are 98, and mixed grains are 100. In Ontario the condition is for nearly all grain crops 1 or 2 per cent. below average, rye is 5 per cent. below average; hay, clover and pasture are 91, and alfalfa is 96, these crops showing the effects of the dry weather of May. In Manitoba spring wheat is 100, or just equal to the average; oats and barley are 1 and 2 per cent. respectively below. In Saskatchewan spring wheat and oats are 98, barley is 99. In Alberta fall wheat is 94, spring wheat is 91 and oats are 90. In British Columbia fall wheat is 88, spring wheat 95, oats 94 and barley 93, these averages being below both 1919 and 1918.

National Railways Report

The detailed crop report for the week ending June 5th, compiled by agents in the territories served by the Canadian National Railways lines between the great lakes and the Rocky Mountains is uniformly encouraging. There appears to be plenty of moisture, and there are only a few points where a small amount of re-seeding has had to be done on account of high winds. There is no indication of trouble anticipated, and wheat especially seems to be well advanced throughout the area served by the C.N.R. Wheat seeding may be said to have been completed, and the seeding of coarse grains progressing finely.

Manitoba Free Press Report

In its second crop report for 1920, issued on June 8th, the Manitoba Free Press states that, with the exception of 1912, the outlook this year is the best of any year since 1904, when the reports began. It is better than in 1915, the bumper crop year, as heavy frosts occurred early in June that year. Out of 250 points queried, 203 were heard from, and these indicate that the general condition of the wheat crop is excellent, and that, while at a number of points it is from a week to ten days later than the early development of the hot May and June of 1919, it is a much more healthy and vigorous plant. Out of the 203 points heard from, 100 report crop ahead of last year, in some cases ten days ahead. The last week of May there were very high winds reported and there was serious apprehension of damage from this source. The reports indicate that the heavy rains and cool weather have not only stopped the drifting and blowing, but that, to a very great extent, the crop has recovered without re-seeding being necessary. Where re-seeding has been done it is mainly to oats.

Oats were 95 per cent. seeded by June 5th. This does not include oats for sheaf feed. Just 100 points indicate increases in oat acreages, running from 5 to 50 per cent., the majority of points reporting increases from 5 to 10 per cent. Twelve points indicate decreases in oat acreages, and this is explained by difficulty in getting seed. There appears to be heavy seeding of barley, which is still going on. Increases in flax acreage was specially asked for, and 80 points report increases running all the way from 1 per cent. to 300 per cent. Nearly all the points which report the very heavy increase in acreage state that it is on new breaking and a few that flax has taken the place of wheat.

Very grave apprehension has existed as to grasshoppers, and all correspondents in the infected areas were asked as to hoppers. The replies, on the whole, show, that the wet weather has retarded hatching, but whether permanently or not, remains to be seen. Only two points, both in Manitoba, namely, Waskada and Clearwater, report any serious damage up to the present. All points report fine organization to fight the pests and abundant supplies of poison for bait.

The most northern point reporting any sign of hoppers is Outlook, Saskatchewan. All that human energy can do is being done to prevent a spread of the plague should hotter weather develop them. The strong feature of the report is the abundant supply of moisture throughout the entire west.

AFRICAN BANKING CORPORATION, LIMITED

(LONDON)

Paid-up Capital and Reserve, $6,800,000

Over 60 Branches and Agencies throughout South Africa

Principal Branches located at Bulawayo, Bloemfontein, Cape Town, Durban, East London, Johannesburg, Kimberley, Port Elizabeth, Pretoria, and Salisbury.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

391 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager.
Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

Only nine points report any need of rain, and these points add that there is plenty of sub-surface moisture, but showers are needed to help germinate the last sown grain.

Northwest Grain Dealers' Estimate

In a report dated June 11th, the Northwest Grain Dealers' Association estimates the acreage in Manitoba, Saskatchewan and Alberta as follows:—

	1919, acres.	1920, acres.	Inc. or dec.
Wheat	16,085,000	14,026,000	— 12.8%
Oats	9,626,000	10,973,500	+ 14 %
Barley	1,955,500	2,108,000	+ 7.8%
Flax	1,000,000	1,181,000	+ 18.2%
Rye	216,000	237,500	+ 10 %

Seeding operations were late in commencing, and some damage from wind reported in certain localities, but weather conditions since have created splendid prospects for a good crop.

BANK BRANCH NOTES

Seven New Branches Announced This Week—Bank of Montreal Announces Important Appointments

The following is a list of branches of Canadian banks which have been opened recently:—

Victoria, B.C., Douglas St. Branch	Bank of Montreal
Port Carling, Ont. (for summer months)	Bank of Nova Scotia
Verdun, Que.	Molsons Bank
Kingston, Ont. (Princess and Clergy Streets)	Canadian Bank of Commerce
St. Elzear, Que.	Banque d'Hochelaga
Jonquires, Que.	Banque d'Hochelaga
Letellier, Man.	Banque d'Hochelaga

Jerome A. Morris, manager of the Bank of Nova Scotia in St. John West, has been transferred to Chatham, N.B., and will be succeeded by R. M. Owens, manager of the branch at Petitcodiac. R. A. Sutherland, manager at Chatham has been appointed assistant manager at Havana, Cuba.

W. V. Gordon, manager of the Canadian Bank of Commerce, Brandon, has been transferred to the chief Winnipeg office.

Bank of Montreal Appointments

The Bank of Montreal announces the following appointments:—

J. Brydes, appointed acting manager at Abbotsford, Ont.; G. C. Chubb, acting manager at Cainsville, appointed manager at that branch; R. Wishart, acting manager at Calder, appointed manager at that branch; J. P. Fontaine, acting manager at Chicoutimi, appointed manager at that branch; M. Hunter, temporary manager at Darlingford, appointed manager at that branch; F. Audap, acting manager at Domremy, appointed manager at that branch; F. C. Ridley, acting manager at Edmonton, appointed manager at that branch; F. J. Daniels, appointed acting manager at Esquimalt; H. B. Brock, acting manager at Victoria Ave., Hamilton, appointed manager at that branch; W. J. Cormack, acting manager at Hedley, appointed manager at that branch; R. L. Curphey, acting manager at Hull, appointed manager at that branch; A. R. Jones, acting manager at Lampman, appointed manager at that branch; W. Firth, appointed acting manager at Lestock, Sask.; F. N. Smith, appointed acting manager at Magog, Que.; J. G. Dickinson, acting manager at Marysville, appointed manager at that branch; J. E. Demers, acting manager at Megantic, appointed manager at that branch; I. V. J. Cleary, acting manager at McGill St., Montreal, appointed manager at that branch; G. K. Nash, acting manager at Point St. Charles, Montreal, appointed manager at that branch; A. P. Murray, appointed manager at Sherbrooke and Main Streets, Montreal; H. H. Falding, appointed acting manager at Nanaimo; E. P. Hungerford, appointed fourth agent at New York; E. R. T. Huestis, acting manager at Paspebiac, appointed manager at that branch; W. J. Montgomery, manager at Nanaimo, appointed manager at Penticton; S. Crabtree, acting manager at Punnichy, appointed manager at that branch; W. A. Tucker, acting sub-agent at Whitney Pier, Sydney, appointed sub-agent at that branch; A. M. Qua, acting manager at Yonge and Bloor Streets, Toronto, appointed manager at that branch; F. A. Macrae, appointed acting manager at Granville and Nelson Streets, Vancouver; E. A. Rolsted, acting manager at Wakaw, appointed manager at that branch; E. H. Carey, acting manager at Waldron, appointed manager at that branch.

New Branches Planned

A sub-agency to the Hull office of the Bank of Montreal will be opened about June 7th, at the corner of Victoria St. and Champlain Ave., Hull, to be known as "City Hall Square" Branch. The branch of the Bank of Montreal at Sioux Landing has been closed.

The Bank of Nova Scotia is to have a branch at the corner of Avenue Rd. and St. Clair Ave., Toronto.

The Dominion Bank is to have a branch at the corner of the Lake Shore Rd. and Ninth St., Toronto, the cost to be $10,000.

The Royal Bank of Canada will erect a new branch at Sydney Mines, N.S.

The Royal Bank of Canada, the Bank of Nova Scotia, and the Canadian Bank of Commerce have given financial assistance to instruction classes in Spanish at Halifax during the past few months. During this time, three hundred students have engaged in the study of the language, and of that number, fifty have obtained a knowledge of Spanish sufficiently comprehensive to enable them to transact business and speak with comparative fluency. The students were drawn from the staffs of the banks, Dalhousie University and the Nova Scotia Technical College.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended June 17, 1920, compared with the corresponding week last year:—

	Week ended June 17, '20.	Week ended June 19, '19.		Changes.
Montreal	$151,400,980	$138,969,046	+	$12,431,934
Toronto	113,715,077	85,758,524	+	27,956,553
Winnipeg	42,219,027	34,775,661	+	7,443,366
Vancouver	16,705,553	11,146,771	+	5,558,782

Trade Union Membership Reaches High Record

One Big Union and Other National Units Made Rapid Strides in Canada in 1919, But International Organizations More Than Held Their Own—Ontario has Most Unions, But Montreal Leads among Cities — Over Ten Millions Paid in Death Benefits.

INTERNATIONAL labor organizations made progress in Canada in 1919, in spite of the advent of the "one big union"; the non-international bodies and independent units, in fact, show losses. Another feature of the year was the progress of the national Catholic unions in the province of Quebec. These facts are brought out in the ninth annual report on labor organization in Canada, for the year 1919, which has just been issued by the Department of Labor, at Ottawa.

The figures given in the report show that trade union membership in the Dominion has reached the highest point recorded since the department commenced the publication of these annual reports in 1911, the total reported membership for all classes of labor bodies in Canada at the close of the year 1919 being 378,047. There are in all 2,847 local branch unions in the Dominion, of which 2,309 are affiliates of international organizations, comprising 260,247 members, an increase over 1918 of 412 branches and 58,815 members; 325 local branches with 33,372 members are connected with what are termed non-international bodies, these figures showing a loss of seven branches and of 4,556 members; 29 are independent units, a decrease of 16, and the reported membership was 1,249 less than that reported in 1918; the national Catholic unions number 83, comprising a membership of 35,000; the one big union reported 101 units with a membership of 41,150. These figures show a gain of 573 in local branches of all classes of labor bodies operating in Canada, and the remarkable increase in membership of 129,160.

Rapid Increase in Membership

The membership of all classes of organized labor in Canada, as reported to the department for the past nine years, has been as follows:—

1911	133,132	1916	160,407
1912	160,120	1917	204,630
1913	175,799	1918	248,887
1914	166,163	1919	378,047
1915	143,343		

Trade Union Membership by Provinces

Including all classes of trade unions operating in the Dominion, the standing by provinces is as follows: Ontario, 1,223; Quebec, 513; British Columbia, 263; Alberta, 231; Manitoba, 170; Saskatchewan, 158; Nova Scotia, 157; New Brunswick, 124; and Prince Edward Island, 8.

Membership in Chief Cities

There are 32 cities in the Dominion having not less than 20 local branches of the international and non-international organizations and independent units, and between them they represent 57 per cent. of the branches of these bodies and comprise 56 per cent. of the local lodges of all classes of labor organizations in the Dominion, as well as containing approximately 49 per cent. of the trade union membership of 378,047, as reported from the headquarters of the central organizations. Montreal leads the cities with 203 local branches of all classes of unions, 130 of which reported 45,289 members; Toronto stands in second place with 159 branches, the membership of 95 which reported being 24,822; Winnipeg occupies third position with 101 branches, 54 of which reported 10,741 members.

Other cities in order of number of branches of all classes are: Vancouver, 85 branches, 60 reporting 29,596 members; Ottawa, 80 branches, 58 reporting 9,271 members; Hamilton, 75 branches, 57 reporting 3,253 members; Quebec, 70 branches, 47 reporting 7,388 members; London, 68 branches, 49 reporting 5,053 members; Edmonton, 62 branches, 40 reporting 3,760 members; Calgary, 58 branches, 40 reporting 4,718 members; St. John, 50 branches, 32 reporting 4,590 members; Victoria, 48 branches, 32 reporting 4,164 members; Halifax, 35 branches, 23 reporting 2,946 members; Regina, 35 branches, 25 reporting 1,163 members; Saskatoon, 35 branches, 24 reporting 1,457 members; St. Thomas, 34 branches, 27 reporting 2,946 members; Moose Jaw, 34 branches, 26 reporting 3,251 members; Windsor, 33 branches, 25 reporting 1,987 members; Fort William, 32 branches, 25 reporting 1,368 members; Kingston, 31 branches, 15 reporting 978 members; Brantford, 29 branches, 24 reporting 1,404 members; St. Catharines, 28 branches, 19 reporting 858 members; Peterborough, 28 branches, 20 reporting 1,080 members; Sault Ste. Marie, 27 branches, 17 reporting 1,592 members; Brandon, 27 branches, 19 reporting 1,034 members; Stratford, 25 branches, 20 reporting 1,991 members; Niagara Falls, 23 branches, 17 reporting 3,012 members; Sarnia, 23 branches, 16 reporting 757 members; Moncton, 22 branches, 17 reporting 2,937 members; North Bay, 21 branches, 16 reporting 1,448 members; Kitchener, 21 branches, 12 reporting 646 members; Welland, 20 branches, 12 reporting 459 members.

Benefits Paid by Central Labor Organizations

Nearly all of the international labor organizations operating in Canada provide for the payment of benefits to members on a varying scale. The report contains a table showing the reported disbursements made for this purpose in Canada, the United States and elsewhere, the expenditure for 1919 totalling $15,550,052, a decrease of $1,252,040, as compared with the payments made in 1918. The amount expended for each class of benefit was as follows:—

Death benefits	$10,436,671
Unemployed and travelling benefits	298,902
Strike benefits	1,789,961
Sick and accident benefits	1,828,218
Old-age pensions and other benefits ..	1,196,300

Four of the non-international organizations reported having made payments for benefits; the total expenditure amounting to $23,035, an increase of $6,140 over the disbursements in 1918.

Benefits Paid by Local Branches

The report also contains a statement showing the amount paid in benefits for the year 1919 by local branch unions in Canada to their own members, the disbursements aggregating $583,093, an increase of $151,589 over 1918. The payments made on account of each class of benefit were:—

Death benefits	$185,784
Unemployed benefits	15,306
Strike benefits	198,438
Sick benefits	120,327
Other benefits	63,238

Other Features of the Report

The report follows closely along the lines of earlier reports on labor organization in Canada, the various phases of the plan of organization which has been developed being given due consideration.

Chapters dealing with the advent of the one big union and the national Catholic union movement in the province of Quebec are discussed, as are also the activities of the Industrial Workers of the World, and other important incidents in labor matters which have occurred during the year 1919.

MANITOBA MORTGAGE LOANS ASSOCIATION

President Bond Deplores Unnecessary Extension of Government into Financial Operations—Seed Grain Liens Again Displace First Mortgages in Many Instances

(Special to *The Monetary Times.*)

Winnipeg, May 30th, 1920.

MANY head offices of loan companies operating throughout the Canadian west are located in Winnipeg, and for this reason the meeting of the Manitoba Mortgage Loans Association is always of general interest. This year it was held on May 17th. The executive presented a report as to what had been done in Manitoba, which, it might be added, was not very much in the way of legislation correcting some of the mistakes of the past. According to the generally expressed opinion of the members, they find that in getting money for investment in the province, the difficulties have increased and the borrowers there will have to bear the burden. That is a matter of regret, inasmuch as borrowers of that province are already bearing a greater load than is desirable, having regard to the best interests of the people as a whole.

The Executive Committee in its report complained of Section 95 of the Insurance Act as amended which requires, that where a mortgagee or vendor requires premises to be insured, this condition in an agreement will be complied with adequately if the mortgagor or purchaser offers a policy in any fire company licensed to carry on business in Manitoba. Objection was taken to this amendment by the Association with the result that during the session just ended a further amendment was passed exempting its operation as to property situate in the city of Winnipeg.

Hail Premiums a First Lien

The District Hail Insurance Act passed at the last session of the legislature enabled rural municipalities to be brought under the operation of the act if they so elected and provided that if they do so the rate of premium levied may be assessed against the land upon which the insured crop is grown in the same way as a tax, and in this way it becomes a lien, ranking ahead of existing encumbrances. The association appears to be sympathetic towards hail insurance under proper regulations, and for that reason they did not consider that the measure was inimical to the lender in view of the added security created by the operation of the act.

The usual Seed Grain Act, the committee pointed out, was enacted retaining the feature of granting priority to municipal seed grain liens over first mortgages. The government, however, refused to eliminate the objectionable clause. It has transpired that quite a number of first mortgages in the province of Manitoba have, through this, become second mortgages and of a doubtful value as a result of the Seed Grain Act. It is now being realized that lenders, as a result, will have to exert greater discrimination in selecting their borrowers in this province.

Moratoria

The committee pointed out that the War Relief Act of 1918 was amended by providing that the words "termination of the war" or "termination of the said war," or words to the like effect are to be held to mean the first day of May, 1920. If succeeding sessions of the legislature do not change this then there is a finality to this particular measure which has been fraudulently used in that province. While the soldiers relief measure comes to an end definitely it would appear that the civilians are still left an indefinite period in which to make settlement with their creditors. The association recommended to the government that changes in the general moratorium of that province be made:—

(a) To amend the act so as to permit collection of any interest, taxes or insurance premiums in arrears after the first of August, 1920.

(b) That securities which have already matured or will mature prior to the first of August, 1920, bearing interest at a lower rate than 7% shall at the option of the holders bear interest at 7% from that date until the first of August, 1922, and from first of August, 1920, to first of August, 1922, permission be given to call in 10% of the overdue principal each year, or 5% each half year on securities, the interest on which is payable half-yearly.

(c) That the moratorium shall cease entirely on the first day of August, 1922.

These suggestions were not adopted by the legislature.

The President's Address

Mr. Bond after reviewing the activity of the association, dealt with the question of the government's activities. He said:—

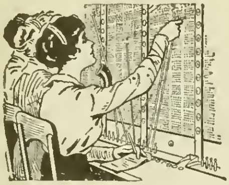
"In these days of inflated credits when governments and other public bodies find it difficult to borrow the funds necessary to provide and carry on by reason of their nature form the special burdens or functions of the state, or of such public bodies we cannot but view with misgivings the tendency of our local government to usurp still further the field of private enterprise, and more particularly to the use therein of the credit of the state and of all the people for a particular class or occupation. In a new country such as ours the developments and services which properly fall to the lot of the state may well of themselves fully tax the credit resources of our province. If that credit is used in fields already covered by private enterprise it must be apparent to all that it cannot be also fully used in other and proper public lines of development.

"What, for instance, has the province of Manitoba lost in, for example, highway development by the diversion of $4,000,000 of the public funds to farm loans, a field amply covered by your resources and enterprise. The public and private credit of this province and its institutions represents a more or less definitely ascertainable figure, varying to be sure, but from time to time clearly reflected in the reception which our offerings may receive. It must, therefore, be apparent, and it cannot be too often impressed upon the public and our legislators that every time the government uses up some portion of its resources of credit in fields of private enterprise proper, public enterprises which the state should undertake must be deferred or dropped. When neither public or private enterprise steps outside its legitimate field will our credit resources best serve and with the least straining perform their proper functions.

Therefore, while outside our own immediate field, we cannot, as already intimated, but regret the ultimate effect upon the country of the government adding to the follow of the farm loans scheme that of 'rural credits' based on credit of the government. I believe this association might well devote some of its energy to educating the public to the fundamental fallacies involved in these public policies, and personally I have sufficient faith in human nature to believe that the public could soon be made to see that the ultimate results will prove harmful to the country, and even also to the class now seeming to be peculiarly favored thereby.

"While the fundamental defects in these policies above pointed out are of paramount importance the association should not wholly lose sight of the question of actual cost of the public services, particularly of that relating to farm loans. The true situation in this regard should, from time to time, be called to the attention of the public as well as the government. From the facts which have been so far elicited there appears to be no doubt that the Farm Loans Board has in a proper view of the situation not been carrying itself. The detailed facts in connection with this should be in my view made public. In this connection it is interesting to note the anomaly that the credit of the individual borrower under either of these schemes is presumed to be of a higher standard than, for example, that of the city of Winnipeg itself if we are, as we believe we should, to judge thereof by the price or rate of interest paid for the money borrowed."

The following were elected officers for the current year:—F. S. Long, president; J. H. Riley, vice-president; executive committee:—Messrs. Paton, Peters, Bond, Telfer, McKinnon, Whyte, Gouzee, Fortuyn.



Helping the Operator

We suggest that subscribers practise the following :—

1. Always consult our latest directory, because numbers are frequently changed.
2. In a moderate tone, speak slowly and distinctly directly into the mouthpiece with your lips not more than an inch away.
3. Answer promptly when your bell rings. It saves "Central" ringing again; saves the calling party's time, and speeds up business generally.
4. When you answer give your name or the name of your firm instead of the old-fashioned "Hello," thus allowing the conversation to begin without waste of time.

Co-operation with the operator, as above, cannot but help your service.

INSURANCE LICENSES ISSUED IN MAY

Fewer than in Previous Months This Year—Recent Agency Appointments—One Fraternal Society Quits Field

FIVE Dominion licenses to write insurance have been issued during the past few weeks by the department of insurance. Four of these, however, are for additional lines, to companies already operating in Canada. The only company new to this field is the Manufacturing Wood Workers Underwriters, which has obtained authority from the Department of Insurance, Ottawa, to transact fire insurance. The chief agency of this company is to be situated in Toronto, and W. E. Bigwood has been appointed chief agent.

The London Mutual Fire Insurance Co. has been licensed to transact in Canada all branches of automobile insurance, in addition to fire insurance, for which it is already licensed.

In addition to guarantee, accident, burglary and plate glass insurance, the United States Fidelity and Guarantee Co. will write in Canada the business of insurance against loss or damage by robbery, a license having been issued for this purpose. A. E. Kirkpatrick, manager for Canada, Toronto.

License has been issued to the Phœnix Insurance Co., of Hartford, Conn., authorizing the company to write in Canada the business of hail insurance, in addition to the classes for which it is already licensed.

Explosion insurance will now be written in Canada by the Westchester Fire Insurance Co., under license just issued, in addition to the classes for which it is already licensed.

Modern Woodmen Cease Writing

The Modern Woodmen, a fraternal benefit society, has stopped writing business in Canada, because of the new Canadian fraternal insurance act, which provides that such concerns may be licensed only if they can show 100 per cent. of solvency as of December 31, 1918, or that new business is being written on an adequate rate basis. License issued in case all the business of a fraternal is not on a solvent basis shall not continue beyond March 1, 1925, by which time all fraternals must have their reserves adequate.

Provincial Licenses

Registered under the Alberta Insurance Act, the Continental Casualty Co. will now write sickness and automobile insurance in that province.

Notice is given that the Caledonian-American Insurance has been granted certificate of registration for the transaction of fire insurance in the province of Manitoba.

The following companies have been licensed under the British Columbia Fire Insurance Act:—

Caledonian-American Insurance Co. to transact the business of fire insurance. Provincial head office is at Vancouver. Fred W. Burgess, insurance manager, Vancouver, is the attorney for the company.

Canadian Indemnity Co. to transact the business of fire insurance. Provincial head office is at Vancouver. Andrew McC. Crerry, agent, Vancouver, is the attorney for the company.

Palatine Insurance Co., Ltd., to transact the business of automobile insurance. Provincial head office is at Vancouver. A. W. Ross, branch manager, Vancouver, is the attorney for the company.

Insurance and Agency Notes

J. A. L. Robinson, formerly of the North American Life Agency in Regina, Sask., has succeeded A. L. Hibbard, as city manager for the company in Calgary, Alta.

On June 1, W. R. Brownlee, of the Continental Life Insurance Co., commenced his duties as provincial manager for Quebec, with office at Montreal, succeeding M. D. McPherson, who has resigned.

E. E. Heath, Victoria, B.C., has been appointed agent for the Caledonian-American Insurance Co. for Victoria and vicinity.

J. E. S. Buchanan, Monarch Life Assurance Co., Winnipeg, has been elected president of the Winnipeg Life Underwriters' Association, succeeding J. H. Baird, of the Aetna Life, who has gone to Seattle.

The insurance branch of the business of Cunningham and Co., Ottawa, will in future be conducted under the name of Cunningham and Sparks, the firm having formed a partnership with Mr. R. Russell Sparks. The companies represented by Cunningham and Sparks are the Northern, Phœnix of London, Mercantile, Canada Fire and Accident, and Dominion Gresham Guarantee and Casualty Co.

G. P. Awrey, formerly with the Monarch Life Assurance Co., has been appointed agency manager for Ontario for the National Life Assurance Co., with headquarters at the company's head office, Toronto.

The British Northwestern Fire Insurance Co., of Toronto, has appointed Lewis, Apedaile and Hanson, Inc., Lewis Building, Montreal, general agents for the province of Quebec. The British Northwestern is now controlled by the Eagle Star and British Dominions.

R. Bruce Abel, who has moved from the Winch Building to the Bower Building, 543 Granville St., Vancouver, B.C., has been appointed Vancouver agent of the Caledonian-American Insurance Co.

J. R. V. Dunlop has been appointed second agent for Vancouver, B.C., of the Caledonian Insurance Co., Ltd., of Glasgow, Scotland, Waghorn, Gwynn and Co., Ltd., being the first agent.

NEWSPRINT PRICES GOING UP

Further advances in the price of newsprint are announced by the Canadian Export Paper Co., Ltd., in a schedule of prices issued on June 1st, to apply during the third and fourth quarters of the present year. For the third quarter of 1920, which commences July 1st next, the new prices will be 5½ cents a pound, mill, which is equivalent to $110 per ton. For the fourth quarter of 1920, which commences Octobe 1st next, the new price will be 6½ cents a pound, mill, which is equivalent to $130 a ton.

The Canadian Export Paper Co., Ltd., controls approximately $25,000,000 per annum of the export paper output of five of the leading Canadian newsprint producers. It is generally expected that the other Canadian producers of newsprint paper in Canada will advance their prices in line with those adopted by the Export Paper Co., as is usually the case, and that for the last six months of this year the highest prices yet paid for export newsprint from Canada will be netted by the companies.

CANADIAN BOND AND MORTGAGE CORPORATION

Evidence of what a well-managed mortgage company in our Canadian west may accomplish, is shown in the report of the Canadian Bond and Mortgage Corporation, which appears in this issue. The company commenced business just before the war. The stock was sold without a premium, yet out of the earnings, after regular dividend payments, a surplus of $84,838, or approximately 18 per cent. of the paid-up capital is shown in the last annual statement. A 6 per cent. dividend was declared.

The earnings of the company for the year were at the rate of 8.5 per cent. after payment of all expenses, except government taxes, and 7.9 per cent. after making provision for these. This is an exceptional showing, in view of the fact that the company has no debentures outstanding and no deposits, and lends only its own money on first mortgage security.

At the annual meeting the retiring directors were re-elected and W. W. Evans joined the board. J. C. McGavin was appointed president, A. R. Davidson and C. H. Enderton vice presidents, W. W. Evans, managing director and R. F. McMillin secretary-treasurer.

DOMINION FINANCES AT THE END OF MAY

Ordinary Expenditure Exceeded Revenue for Month—Increase in Net Debt Less Than a Year Ago

ONLY $961,703 was spent by the Dominion government on capital account during the months of April and May, as compared with $27,201,913 for the same months in 1919. War expenditure was responsible for the best part of this reduction, of course, that account totalling $237,625, against $26,566,009 last year. Ordinary expenditure advanced $14,165,103, while ordinary revenue increased more than $29,000,000. For the month of May, 1920, ordinary expenditure exceeded ordinary revenue by $1,784,063, the heavy May interest payments on Victory loans being the reason.

Gross debt of Canada at the end of May, 1920, was $3,043,636, against $2,172,464,093 at the end of May, 1919. The net debt at the end of the month showed an increase of $397,220,612, as compared with last year, while the increase for the month was $22,216,764. These advances are appreciable, however, considering the fact that those in 1919 were $434,596,705 and $58,996,154, respectively. Details follow:—

A "Non-cancellable and Incontestable Income Policy" has been issued by the Continental Casualty Co., of Chicago, now doing business in Canada with office in Toronto. The features of this policy are described as follows: Cannot be cancelled by the company; incontestable after one year; cannot be restricted after issue; covers every disability; pays a monthly income for life; house confinement not required; fixed premium regardless of age; renewable until age 60; issued subject to medical examination.

PUBLICATIONS RECEIVED

Everyman's Legal Guide.—By Edward Meek, K.C. McClelland and Stewart, Toronto. 364 pages, with index; $3.

Mr. Meek, who has for thirty years been legal editor of the Toronto "Mail and Empire," has entirely rewritten the "Canadian Lawyer," five editions of which appeared, and now presents it in an enlarged and convenient form. The subjects are arranged in alphabetical order. As the sub-title explains, it is intended to be a "Synopsis of the Laws of Canada on Many Subjects for Use in Universities, Colleges and High Schools, and by Merchants, Bankers, Business Men and the Public Generally." A good feature of the book is the non-technical language in which it is written.

Statistics Fraternal Societies.—Published by "The Fraternal Monitor," Rochester, N.Y. 240 pages. Manilla covers, $1; red flexible binding, $1.25.

Consolidated Chart of Insurance Organizations, 1919.—Published by "The Fraternal Monitor," Rochester, N.Y. Manila covers, 75 cents per copy; red flexible covers, $1 per copy.

These publications, which have just come from the press, show the results achieved by the fraternal societies of the United States and Canada in 1919. The fraternal system at the beginning of 1920, as shown by "The Monitor's" publications, was composed of 9,218,101 benefit members, with insurance protection of $10,601,938,151 in force. The total number of lodges was 123,431. The increase in members for the year was 352,014, and the increase of insurance in force was $769,755,410. There was an increase of 494 lodges. More new members were admitted and more insurance written than in any previous year. This resulted in increasing the insurance in force, and the $10,000,000,000 mark was passed during the year. A total of 1,334,852 new members were admitted, while in 1918 the new members written were 940,228. The insurance written or increased in 1919 was $1,519,361,805, and this item for 1918 was $936,410,829,444.

That the adoption of the reserve plan by practically all of the societies is making the fraternal system stronger is shown by the increase in assets. This item at the end of 1919 was $385,588,444, an increase for the year of $12,560,237. During the year the liabilities decreased from $108,706,159 to $86,303,425. The latter amount consisted of reserves of $60,870,538. The beginning of 1919 marked the close of the influenza epidemic. At that time the societies had, like all insurance organizations, heavy outstanding claims for death losses due to the epidemic. Years ago the accumulation of a reserve was contrary to fraternal principles, but experience has shown the societies the wisdom of providing funds to meet future death claims.

Canadian Company Forms and Precedents.—By William Kaspar Fraser, B.A., of the Toronto Bar. Carswell Co., Ltd., 145-9 Adelaide Street West, Toronto. 699 pages, with index; $10.

For many years there has been a distinct need of a complete and up-to-date collection of company forms and precedents. The existing text books on Canadian company law contain only a brief selection of forms, which are adapted for use only under one of the many Companies Acts in force in Canada; nor are the English collections of forms entirely satisfactory for Canadian practitioners, as they are based on statutes widely different from our own. Moreover, recent and extensive changes in the Companies Acts of the Dominion and many of the provinces have largely rendered obsolete many of the forms appearing in existing Canadian text books. The forms in the present collection have been revised and brought into conformity with the most recent statutory amendments.

Fraser's "Company Forms and Precedents" contains over 1,000 forms. Those relating to applications for registration or license under the Extra-Provincial Corporations Acts of the different provinces and to departmental applications are based on precedents which have been approved and accepted. A selection only of statutory and departmental forms has been included. These are subject to change from time to time, and are always available on application to the proper Dominion or provincial authorities.

FINANCIAL ADVERTISERS' CONVENTION

Relative Merits of Different Forms of Publicity Discussed at Meeting in Indianapolis—D. McEachern is Canadian Representative on Directorate

THE 1920 convention of the Financial Advertisers' Association was held in Indianapolis, Ind., June 6 to 10, as part of the Associated Advertising Clubs of the World Convention. About 500 members constitute the financial section, and make it the largest in the association.

Fred W. Ellsworth, the president, gave the opening address at the first business meeting held on June 7. Reports of the treasurer, secretary and various committees followed, showing the association to be on a firm financial basis, international in scope, and in a position to render important service to its members.

The programme included the following addresses: "How Financial Advertising can Advance the Truth-in-Advertising Movement," by William P. Green, organization secretary, National Vigilance Committee; "Why Every Bank Should Advertise," by John G. Lonsdale, president, National Bank of Commerce, St. Louis; "How to Plan an Effective Advertising Campaign," by W. R. Snodgrass, manager, department of publicity and new business, Fidelity National Bank and Trust Co., Kansas City; "Why You Should Use Newspapers," by L. R. Brooks, publicity manager, "Chicago Daily News," Chicago, Ill.; "Why You Should Use Direct by Mail," by Homer J. Buckley, president, Buckley, Dement and Co., Chicago; "Why You Should Use Street Cars," by Otta N. Frankfort, Chicago Elevated Advertising Co., Chicago; "Why You Should Use Trade Papers," by G. D. Crain, Jr., publisher of "Class," Chicago; "Why You Should Use Outdoor," by H. E. Erickson, Thomas Cusack Co., Chicago; "Dressing the Copy," by E. R. Currier, Charles Everett Johnson Co., Chicago; "The Central File," by E. H. Kittredge, publicity manager, Old Colony Trust Co., Boston; "How the Banker May Help in Developing Agriculture," by H. M. Cottrell, of the Arkansas Profitable Farming Bureau, Little Rock; "The Financial Advertisers' Interest in the United States Department of Agriculture," by Hon. E. T. Meredith, secretary, United States Department of Agriculture; "The Investment Bankers' Opportunity—Now and How," by Charles A. Otis, Otis and Co., Cleveland; "My One Best Bet," by twelve financial advertising experts.

Developing Inactive Accounts

D. McEachern, secretary of the Huron and Erie Mortgage Corporation and of the Canada Trust Co., was one of the last-mentioned twelve speakers, his subject being, "Making Inactive Accounts Profitable." After pointing out the fact that the Huron and Erie had been established as long ago as 1864, he said:—

"As you can imagine, during this period of fifty-six years of successful savings department operation, a large number of small, inactive accounts accumulated. In fact, so serious a menace to the efficiency of the department did they become that, from time to time, the dormant accounts were transferred wholesale—by the hundred—into a 'sundries account,' which soon reached a very respectable total.

"As you are aware, small accounts are unprofitable to carry unless the owners can be persuaded to increase them. We realized that if this class of account were allowed to accumulate without attention being paid to the problem, the profit derived from our savings department would soon feel the burden. We, therefore, determined to stop the leakage and turn the accounts into revenue-producers. Incidentally, the methods we adopted also proved valuable in gaining goodwill for the corporation.

"After a considerable amount of research work by the use of directories and correspondence, the addresses of these inactive depositors were brought up to date. Personal letters, carrying a human interest appeal, were then mailed. Each of the depositors was informed of the amount of his balance at the time the account was last used, whether six, eight, ten or twenty years ago. The interest additions during the intervening years were then pointed out. Many were told that if regular deposits of, say, $20 per month had been made, the balance at their credit would now be $547.68 instead of only $35.42, as the case might be. In many instances it was found that a depositor was now resident in another city where we maintain a branch office. He was promptly invited to allow us to transfer the account to that branch. Strange to say, many had completely forgotten they had a balance with us. Imagine the feeling of good-will upon being told of 'found money' in days like these!"

Charles A. Otis, of Otis and Co., Cleveland, was elected president of the Associated Advertising Clubs of the World; it is something new for this organization to have an investment banker at its head. D. McEachern, of the Canada Trust Co., London, Ont., was re-elected to the directorate of the financial section. "I have returned from the convention more enthusiastic than ever regarding the future of this organization," said Mr. McEachern, in an interview with *The Monetary Times*. "It is built upon a solid foundation, and there is a splendid spirit of fellowship among its members who are always willing to lend to each other helpful suggestions and constructive ideas."

UNIFORMITY IN FIRE INSURANCE POLICIES

Saskatchewan Commissioners Prepare Redraft — Statutory Conditions Vary Somewhat from Those Previously Considered

ANOTHER step towards securing uniform conditions in fire insurance policies in the various provinces of Canada has been taken in the preparation of a redrafted act, prepared by the Saskatchewan commissioners. This is one of the points which has been taken up by the commissioners which were appointed several years ago by every province except Quebec, to draft uniform legislation on such subjects as partnership law and the law governing the sale of goods. Three commissioners represent each province, and two general conferences have been held. At the last one, held in Winnipeg, in August, 1919, the question of statutory conditions in fire insurance policies was considered, and two draft bills, one of which was prepared by the commissioners themselves and the other by a committee of the Canadian Bar Association, were referred to the three Saskatchewan commissioners for further consideration in the light of the discussion which had taken place.

Recent legislation affecting fire policies have been in the direction of uniformity, but there are still substantial differences between those required by the western provinces, which resemble one another closely, and those required by the eastern provinces. The redraft, which has just been prepared by the Saskatchewan commissioners and sent to the various parties interested, for their consideration, contains several changes as compared with the first draft. It is, of course, in the form of a provincial bill, and is entitled "the fire insurance policy act."

The redraft stipulates that fire insurance contracts shall not extend for a term of more than three years, or more than one year in the case of mercantile or manufacturing risks. Every policy is to contain the names of the company, of the insured, the person to whom the insurance is payable, the premium, the subject matter of the insurance, the indemnity, the term and the event on the happening of which the liability is to accrue.

Statutory Conditions Clause

The clause relating to statutory conditions is redrafted to read: "If a company desires to vary, omit or add to the statutory conditions or any of them, the proposed variations or additions or a statement clearly indicating the omissions shall be printed in conspicuous type and in red ink on a separate sheet attached to the policy, which sheet shall be signed by the company and the insured and shall contain these introductory words: 'Variations in conditions. The attached policy is issued subject to the statutory conditions

We have audited the books and accounts of the Canadian Bond and Mortgage Corporation for the year ended 30th April, 1920, and report to the Shareholders that we have received all the information and explanations that we have required.

We have examined the Mortgages constituting the security for the Corporation's investments and found same in order, the Corporation's Solicitors certifying to the sufficiency of the title and conveyancing.

In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Corporation, according to the best of our information, the explanations given us, and as shown by the books.

(Signed) GEORGE A. TOUCHE & CO.,
Chartered Accountants.

Winnipeg, 2nd June, 1920.

Masters of the Road

Superb and Supreme

¶ The measure of mileage you expect to get from an automobile tire is exactly the measure we are prepared to give you in Dunlop Cord Tires.

¶ Dunlop Tires are thoroughly "thought out" in the Scientific Research Department, then they are thoroughly "tried out" on the road. You as a tire buyer, get the Final Result.

¶ The new ideas we have evolved from world-wide collaboration with Dunlop Master Tire Builders have worked wonders in tire construction.

¶ Every other make of tire has suffered in comparison with Dunlop in a test of endurance; **and that means foreign made tires as well as Canadian made.**

¶ A tough tread, sturdy walls, largest air-chamber, unsurpassable anti-skid features, are some of the reasons why Dunlop Cord Tires are so much in evidence these days.

¶ And just as Dunlop Cord Tires, wherever you go, are being awarded the palm as "1920's best," so, right across Canada, our 1920 sales figures are registering the definite approval of motorists in decidedly unusual increases.

¶ When you buy Dunlop Tires you buy from the world's greatest rubber organization, whether the comparison is in technical knowledge, area of plant, financial resources, etc.

¶ Our new million-and-a-half dollar factory is now nearing completion. It will be exclusively devoted to the manufacture of Dunlop Cord Tires—"Traction," "Ribbed."

SIXTIETH ANNUAL REPORT, 1920

The Sixtieth Annual General Meeting of the Shareholders of this Institution was Held at the Office of the Bank on Wednesday, the Ninth of June, 1920, at Three O'clock p.m.

There were present:—Messrs. J. B. Laliberte, Napoleon Drouin, Nazaire Fortier, Charles Pettigrew, Napoleon Lavoie, Revd. Tancrede J. Paquet, His Worship Mayor Jos. O. Samson, Capt. J. E. Bernier, Col. Chas. A. Chauveau, C.R.C., Alfred R. Desjardins, Pierre Drapeau, Thomas Duchaine, J. F. Dumontier, A. S. Garneau, Stanislas Gaudreau, Ls. A. Gosselin, Charles Grenier, N.P., Elzear Labrecque, M.D., M. A. Labrecque, S. Jules La Rue, N.P., C. J. Levesque, James McCone, N. T. Pare, F. X. Rainville, Adjutor Rivard, Arthur E. Scott, Cyrille Tessier, N.P., Geo. V. Tessier, etc., etc.

In the absence of Mr. R. Audet, President of the Bank, Mr. J. B. Laliberte, Vice-President, was called to the chair and Mr. P. Lafrance was requested to act as secretary.

Before proceeding to the reading of the annual report, the following gentlemen were elected scrutineers, viz.: Messrs. A. S. Garneau, Chs. Grenier, N.P., and C. J. Levesque. The President then read the following report:—

REPORT OF THE BOARD OF DIRECTORS.

Gentlemen Shareholders:—

The Directors have the honor to submit to your approbation the result of the operations of the Bank for the year 1919-20, by the statement of Profit and Loss account, together with the statement of the Assets and Liabilities of the Bank:—

The balance at the credit of Profit and Loss, on April 30th, 1919		$ 48,699.35
The profits of the year, after paying interest on deposits and deducting bad and doubtful debts		567,372.36
Forming the sum of		$616,071.71
Which has been disposed of as follows:—		
To Quarterly Dividends, at the rate of 10% per annum, (i.e., 2½% payable 1st August, 3rd November, 2nd February and 1st May)	$200,000.00	
To Reserve Fund	100,000.00	
To Depreciation on securities and for contingencies	100,000.00	
To Rebate of interest on discounts	25,000.00	
To Depreciation on Bank premises	50,000.00	
To Depreciation on fixtures	15,000.00	
To Pension Fund	25,000.00	
To War Tax on circulation	26,851.74	
		541,851.74
Leaving to the credit of Profit and Loss a balance of		$ 74,219.97

The result which has been achieved this year is most encouraging; it is far ahead of all previous years. After examining and comparing the statements of last year with those of this term you will see a general increase. The deposits show a very satisfactory increase; from $37,455,103, last year, they have reached $48,460,158, an increase of $11,005,055. The increase in our deposits in Canada is $7,632,151, and the increase in those of our Paris branch is $3,372,901. This increase of our Paris deposits is due both to our Paris depositors to whom have been added a great number of Canadian depositors who, in the hope of benefiting by the French exchange rate, have made deposits either for a proposed trip, or for buying goods or simply as a speculation. Our assets, of $50,433,531, last year, are now $68,675,366, an increase of $18,241,835. Commerce, industry and agriculture, which we support and stimulate as much as possible wherever we are established, have necessitated for their wants much more than in past years and though deposits have increased in large proportions, they have not been sufficient and we have been obliged, to give satisfaction to our customers and also to contribute to reconstruction, by increasing production, to obtain advances from the Government. Our current loans, from $25,065,603, ast year, are ,this year, $36,967,916, an increase of $11,902,313. Our Imperial and Dominion Government securities, Canadian municipal and foreign securities, railway and other debentures and stocks, and on call loans on bonds, debentures and stocks, of $13,135,792, last year, are $16,955,114, an increase of $3,819,322. This increase on the total of our advances, has been possible, as said before, by the increase of our deposits and by our borrowings from the Government, which, last year, $3,697,350, are, this year, $9,470,449; an increase of $5,773,099. Our circulation of $5,609,060, is an increase of $646,205. It is a general increase on all the line.

Our statement of Profit and Loss tells you in what manner we have disposed of our profits of $567,372, which are 28% on the capital, equal to 14% on both capital and reserve. By this disposition, our reserve is increased by $100,000. We supply the depreciation and contingencies $100,000. Unearned interest on our discount is protected by an additional $25,000. A depreciation on our buildings and furniture, of $65,000, has been made. The Pension Fund of our employees has been gratified with an amount of $25,000. This protection given them is an acknowledgement of their good services and of their fidelity to the Bank.

We believe that this year will see a diminution in the advances made to the public and that prudence will oblige the banks to curtail and choose more carefully the operations in which they will interest themselves. The facilities which have been offered by the Government during the war, will grow less; the banks who have borrowed, will have to reimburse and this will allow the Government to withdraw a good proportion of its paper and, to a great extent, re-establish the gold basis it had before the war.. However, this should not be done at the expense of production. It is evident that, if the Government collects its loans too suddenly and obliges the banks to hamper production, it will cause a greater evil; as, if by such a line of conduct, our exports with the United States decrease and our imports are the same; our money, which, in relation to the United States, was worth 10% to 15% all the year, less then theirs, will be worth still less, whatever the gold guarantee the Government may have for its paper. What is wanted for the welfare of Canada, is to import only what is strictly wanted, not to accumulate any goods for speculation, specially necessities of life; we must produce and produce still more, so that the balance of trade will be in our favor.

The Bank has had the most prosperous year of its existence and your Directors believe they are in a position and are justified to pay the future dividends on a 12% basis. To pay 12% on the capital of the Bank is practically to pay 6% on the amount invested by the shareholders, as the reserve must be considered as an additional investment which results from the economy of the shareholders, who, in drawing a fraction less of dividends, each year, have been able to accumulate an equal amount and more to the capital. It has taken sixty years to obtain this result. Under such circumstances, nobody can speak of undue profits and exaggerated dividends, and if we add to that the obligation of the double responsibility, we come to the conclusion that the revenue of such a capital is relatively small.

We have had exceptional years, but we must not expect that this will be repeated indefinitely. As said before, we are beginning a period where prudence is imperative. The banks must expect to have difficulty in maintaining their profits. The sources from which the banks derive their profits are the same, they come principally from the difference between the rate which they pay on deposits received and the interest received from their advances. These rates are the same as before the war; they have not changed; but the expenses have enormously increased and the principal item, salaries, has been increased on a large scale.

La Banque Nationale, every year, revises the salaries of its employees and gives increases. The last two years, to the increases, was added a reasonable bonus. This year, no bonus was given, but the increases were much more important, on the basis of 40%, 30%, 25% and 20%, the highest percentages given to the smaller salaries, with the result of a greater expense of about $140,000, which means 7% on the capital. Under these conditions, even without any other cause, the profits cannot be the same.. We will maintain our profits only by an increase in our transactions, deposits, loans, exchanges and commissions.

This question of salaries which causes so much unrest in all the world, specially in industry, has also preoccupied the banks. Unions have been organized amongst bank clerks. It is always easy to enroll members in Associations of this nature by the temptation of still higher salaries, but, up to now, no success has been theirs. These organizations have been affiliated to the Councils of Trade and Labor. We are asking ourselves if those large associations of labor have considered if it was advantageous for them and if it was in their interest that associations of this nature be formed, with the intention, more or less avowed, of controlling the administration of the banks.

Their wishes are to protect labor against the possible injustices of capital, but is it just to pretend, as often said, that the banks represent capital? Undoubtedly, they manage large sums of money, which are the proceeds of savings. Let us ask ourselves from what sources come the capital and deposits of banks. What is the capital of a bank formed of? From money subscribed and paid by shareholders. These shareholders what do they represent? Capitalists, millionaires and other very wealthy people? No, just the opposite; these gentlemen have not a great deal of their money so invested. The shareholders are more of the middle class. If you take your bank as an example; with a capital of $2,000,000, 20,000 shares owned by 1,084 shareholders, an average of $1,840 each. The deposits in the banks, by whom are they made? by what we call capitalists, millionaires and rich people? No. They have have proportionately very little of their money in the banks. The deposits are made by the middle class, by the farmers and by the workers, the labor. We cannot believe that the labor associations will, in full knowledge of this, embarrass the institutions where their savings are invested and manage to put them under a control whose principal action is the strike, which would endanger their savings, and this to prevent supposed wrongs, and certainly cause calamities.

A strike of bank employees would be an attack against the credit which is at the basis of the economical organization of this country. A strike which would close the banks, even for a short period, would stop trade, disorganize industry, and labor without work would kill itself.

The bank is the public utility, the most necessary and the most delicate that exists, and the labor organizations, in their interest as in the general interest, should not embarrass it. The wrongs they want to prevent, there may be some, but the remedy which would be used would be a disaster.

We express the preceding ideas so that the workers knowing the situation, will not be led to regrettable acts under the pretext of redressing wrongs which, if they exist, are very limited.

We have opened, during the year, nine branches and thirty-four sub-agencies. We have in operation ninety-two branches and two hundred and ten sub-agencies.

The inspection of all our branches and sub-agencies have been made with care and we are thankful to our employees for the zeal and labor which they gave for the success of the institution.

N. LAVOIE,
Geeral Manager.

R. AUDETTE,
President.

N. LAVOIE,
General Manager.

R. AUDETTE,
President.

To the Shareholders of La Banque Nationale.

In accordance with sub-sections 19 and 20 of Section 56 of the Bank Act, 1913, and as auditor for La Banque Nationale, I have the honor to submit the following report:—

I have compared the above balance sheet with the books and vouchers kept at the Head-Office of La Banque Nationale and with the certified returns from the different branches to April 30th, 1920; I have checked the cash and verified the securities and other valuables at the Head-Office and at four of the principal branches of the Bank; and, after having obtained all the necessary information and explanations, I certify that, in my opinion, this balance sheet represents a true and correct view of the state of the Bank's affairs up to April 30th, 1920.

I have, in addition to the above-mentioned, during the current year, checked and verified the cash and securities at different branches and Head-Office of the Bank and found them to be in agreement with the entries on the books of the Bank relating thereto.

I may also mention that the different officials of the Bank have given me, to my satisfaction, all the required informations concerning the Bank's affairs and transactions which have come under my notice, and I consider them within the power of the Bank.

OCTAVE BELANGER, L.I.A.,
Auditor.

Quebec, May 20th, 1920.

Moved by Mr. J. B. Laliberte, seconded by Mr. Nazaire Fortier: That the report of the Directors and the statement now read be adopted, printed and published for distribution among the shareholders. Adopted.

Moved by Mr. Charles Grenier, N.P., seconded by Mr. Pierre Drapeau: That Mr. Octave Belanger, accountant duly qualified as per section 56 of the Bank Act, be appointed auditor of the Bank for the year 1920-21; with the same remuneration. Adopted.

Moved by Mr. C. Alfred R. Desjardins, seconded by Capt. J. E. Bernier: That Messrs. Rodolphe Audette, J. B. Laliberte, Victor Chateauvert, Napoleon Drouin, Nazaire Fortier, Charles Pettigrew, Napoleon Lavoie be unanimously chosen Directors of La Banque Nationale for the ensuing year, and that a single ballot be deposited in the votation box. Adopted.

The President left the chair and Mr. C. Alfred R. Desjardins being called thereto, it was moved by Mr. A. S. Garneau, seconded by Revd. Tancrede J. Paquet: That thanks be tendered to the President and Directors for the services they have rendered to the shareholders during the past year. Adopted.

Moved by Mr. F. X. Rainville, seconded by Capt. J. E. Bernier: That the thanks of this meeting are due and tendered to Mr. J. B. Laliberte for his services in the chair, and also to the scrutineers and Secretary for the fulfilment of their respective duties.

This motion was adopted and the meeting adjourned.

P. LAFRANCE, J. B. LALIBERTE,
Secretary. Chairman.

Quebec, ninth June, 1920.

At the meeting of the Directors held on the same day, Mr. Rodolphe Audette was re-elected President, and Mr. J. B. Laliberte, Vice-President, of the Bank for the ensuing year.

P. LAFRANCE,
Secretary.

UNIFORMITY IN FIRE INSURANCE POLICIES

(Continued from page 26)

with the following variations, omissions and additions, which are, by virtue of the Fire Insurance Policy Act, in force as far only as they shall be held to be just and reasonable to be exacted by the company.'

"No variation, omission or addition shall be binding on the insured, unless the foregoing provisions of this section have been complied with; and any variation, omission or addition shall be so binding only in so far as it is held by the court before which a question relating thereto is tried to be just and reasonable."

Provision is also made for the co-insurance clause, in which case the words, "This policy contains a co-insurance

MANITOBA ASSESSMENT OFFICERS' CONFERENCE

Taxes Cannot be Just Unless Assessment is Equitable—Administration of Act Discussed

ABOUT 125 assessors from municipalities in all parts of Manitoba held a conference in Winnipeg on June 9th and 10th to discuss subjects of common interest. This is the first meeting of the kind, and was called together by L. W. Donley, chairman of the Manitoba Tax Commission for the purpose of discussing equitable methods of assessment and administration of the Assessment Act.

Hon. Dr. J. W. Armstrong, municipal tax commissioner, welcomed the visitors, and referred to the difficulties of making proper assessments. The work of an assessor has always been unpopular, he said, and a stigma followed the collector of taxes from the earliest times. It was, however, of the utmost importance, and should be pursued without regard to unjust criticism.

Administrative Questions

"It is the desire of the Manitoba Tax Commission to create the spirit of co-operation, and to assist in every way the assessors and all officials charged with the administration of the assessments of the province of Manitoba," L. W. Donley, chairman of the commission, declared in the course of his address. He expressed the commission's appreciation of the splendid representation from the various municipalities, and hoped that the conference would result in better assessment throughout the province "The matters to come before the meeting are mostly those of administration," Mr. Donley said.

Equitable Assessment Necessary

Commissioner Robert Forke recalled the early days of taxation in the province, and showed how the methods of assessment had changed. Taxation, he said, is a complicated problem, and the authorities frequently differ on the methods of collecting. No matter how taxes were collected, however, there must first be a proper and equitable assessment. In the early days the school was the principal item of taxation, Mr. Forke pointed out, and there was no taxation of any account outside the municipality. Assessments in those days were not always correct. As the years went on the people woke up to the fact that with the increase of taxation assessments should be accurate and equitable. Mr. Forke declared that the conference had been called for the purpose of giving and receiving advice and exchanging ideas.

A paper on "The Principles of Taxation," by Prof. A. B. Clark, was read, and addresses were given by Assessment Commissioner Hay, of Winnipeg, and by Assessor Sinclair, of Assiniboia. Informal discussions were also held on numerous subjects affecting the work of the assessors.

UNDUE INFLUENCE IN DRAWING WILL

Although Person Drawing Will May Benefit Thereby, Burden of Proof of Undue Influence Rests on Those Alleging Same

IN a decision of the Supreme Court of Nova Scotia it was held recently that when it is once proved that a will has been executed with due solemnities by a person of competent understanding who is apparently a free agent, the burden of proving undue influence rests on the party alleging the same.

The Dominion Law Reports states as the facts of the case that the deceased left five sons surviving her and the estate was inventoried at $14,284.62. John, Oliver, Samuel and Joseph were each left $250, and the balance of the estate was left to Henry, who wrote the will and who gets the bulk of the estate. The mental capacity of the testatrix is admitted and there is no evidence of undue influence. The legal formalities in connection with the execution of the will were fully complied with. When the witnesses arrived, the testatrix had the will in her hand, stated that it was her will and asked them to witness it. The result of which is that the case must depend on the legal effect of the fact that the respondent takes the bulk of the estate under a will written by himself.

Will Held to be Effective

Ritchie C. J., in deciding the case says: "The facts in this case and a recent decision of the Privy Council relieve me from the duty of dealing in this judgment with a very long line of cases on this subject. I refer to Craig vs. Lamoureux, the head note of which is as follows: 'The principle applicable in the case of gifts *inter vivos* that persons who benefit under a document which they have been instrumental in framing or obtaining have the burden of proving the righteousness of the transaction, does not apply in the case of wills. When once it is proved that a will has been executed with due solemnities by a person of competent understanding who is apparently a free agent, the burden of proving that it was executed under undue influence rests on the party who alleges this.'

"In this case it was proved that the will was 'executed with due solemnities by a person of competent understanding who is apparently a free agent,' and as I have said there was no evidence of undue influence.

"The appellant cannot succeed and the appeal is dismissed."

CANADIAN FISHERIES' ASSOCIATION CONVENTION

The Canadian Fisheries' Association held its 1920 meeting in Vancouver, June 4 and 5. Welcomes to the city were extended by Hon. Wm. Sloan, on behalf of the province, and by Mayor Gale, of Vancouver. A feature of the convention were the exhibits of British Columbia fish. Dr. A. G. Huntsman, of the Biological Board of Canada, gave an address on the importance of co-operative scientific investigation of sea resources, and pointed out that the time for looking upon fisheries resources as unlimited was now past. President Brittain submitted a report on the activities of the association since last August. J. A. Paulhus, chairman of the publicity committee, described the work done to extend the internal fish market of Canada. F. A. Spooner reported for the transportation committee. H. B. Short, general manager of the Maritime Fish Corporation, of Digby, N.S., gave an address on the necessity for standardization and grading of the Canadian fish pack, and Henry Doyle, of Vancouver, vice-president of the Northern British Columbia Fisheries, Ltd., spoke on the history of the salmon canning industry at the coast from 1862 up to the present time.

Montreal was selected for the meeting place next year. A. L. Hager, Vancouver, was elected president, J. Paulhus, Montreal, vice-president, and A. Boullier, Halifax, second vice-president. Provincial directors are: Nova Scotia, H. B. Shortt, Digby; A. H. Whitman, Halifax; H. R. Silver, Halifax. New Brunswick, F. P. Logie, Black's Harbor; F. Leonard, St. John. Prince Edward Island, H. J. McLean, Souris. Quebec, H. G. Connor, Montreal; W. R. Spooner, Montreal; J. T. O'Connor, Montreal; A. H. Brittain, Montreal. Ontario, F. T. James, Toronto; Roy Lampkill, Toronto; J. M. McIntosh, Ottawa. Manitoba, W. Douglas, Winnipeg; J. E. Simpson, Winnipeg. Alberta and Saskatchewan, C. R. Rhodes, Calgary, A. S. Duclos, Edmonton. British Columbia and Yukon, T. H. Johnson, Prince Rupert; H. Gosse, Vancouver; H. Doyle, Vancouver; and H. B. Bell-Irving, Vancouver.

Messrs. Logan and Bryan, stock brokers, Toronto, are opening an office in the C.P.R. Hotel, in Banff Springs, Alberta, under the management of James Edward Hall. It will be on their direct Vancouver-New York wire, and will give connection with Chicago and New York over their private wire.

News of Industrial Development in Canada

Kenora Will Have a New Pulp and Paper Industry if Government and Ratepayers Accede to Company's Requests — Two New Manufacturing Concerns For St. John — Toronto Companies Extending Plants — Lumbering Operations in the West

PROVIDING that the Pulp and Paper Co. of Fort Francis and International Falls can agree with the Ontario government respecting the English River pulp concession and the power rights of White Dog Falls on the Winnipeg River, into which the English River flows, Kenora, Ont., will sell its municipal power plant to the company according to a contract just closed with the town, which must be ratified by the ratepayers. Mayor Toole, two of the aldermen and the town's solicitor, have just returned from International Falls, where they have been in conference with E. W. Backus, president of the Pulp and Paper Co., and the plans submitted have been approved by both the council and the board of trade. Principal points of the agreement are as follows:—

"The town agrees to sell to the company subject to the approval of the ratepayers the municipal power plant for the sum of $335,000, payments to be completed on the maturity of the debentures issued by the town for the construction and equipment of the plant, that is $200,000 maturing in 1936, $100,000 maturing in 1937, and $35,000 in 1942. The interest payable by the company to the town in the case of the first two above issues is 5½ per cent. and 6 per cent. on the $35,000 debentures.

"The company upon the ratification of the agreement by the ratepayers, and upon the ratification of satisfactory agreements between the company and the government of Ontario to proceed at once to enlarge or improve the present power plant to such an extent as will ensure the maximum utilization of the water available in the east branch, and will proceed to construct, equip and operate a pulp mill in the town of such maximum capacity as can be operated by the available power of said plant, having due regard to the company's obligation to supply electrical energy to the town of Kenora and the Maple Leaf Flour Mill Co. The pulp mill shall be constructed and in operation within twelve months after the company is placed in possession of the power plant of the corporation.

"The company will sell to the town such electrical energy as may be required for municipal and domestic purposes and for all present small users of power and for future uses applying for electrical energy up to five horsepower for the period from the time the company takes possession of the power plant and until January 1, 1931. The town will pay to the company for such energy at the rate of $20 per horse-power per year. The rate after January 1, 1931, to be determined by mutual agreement, or in event of failure to reach an agreement, then by arbitration in accordance with the arbitration act of Ontario."

It is also provided that the town must give active assistance to the company in its applications to the Ontario government for the English River timber concessions, the White Dog Falls power and for the application it may make for the grant of railway charters to enable the construction of railways in the English River watershed and elsewhere as the operations of the company may require.

New Companies for St. John

Announcement is made of the formation of two important companies in St. John, N.B. There has been recently organized in St. John a new branch of mechanical industry, viz., the St. John Welders and Engineers, Ltd., who will from now on engage in all classes of oxy and acetylene and electric welding, also machinist and engineers' work. This company is now engaged in the repairing of all parts pertaining to any metals which may become defective, and they will guarantee their work accordingly. The company will undertake the manufacture of all classes of steel tanks and containers. This especially pertains to gasoline tanks, water sprinklers, steam traps, air receivers, etc., also portable and stationary boilers requiring manufacture or repairs thereto. Preparations are also being made to do all kinds of marine and stationary boiler and engine work, as they are equipping their plant with the very latest electric welding unit, and are in a position to operate on vessels requiring work of this nature at the company's own dock, as this company has acquired a dock suitable to accommodate vessels up to fifteen hundred tons register. J. B. Barrett, who has been for the past twelve years a chief engineer in the British navy is the president, and J. MacRae, of MacRae, Sinclair and MacRae, barristers, is vice-president.

Five of the leading wholesale grocery concerns of the maritime provinces, Puddington, Wetmore and Morrison, Ltd., Jones and Schofield, Baird and Peters, Ltd., of St. John; R. F. Randolph and Sons, Ltd., Fredericton, and the Reid Co., Ltd., Moncton, have united to form a new manufacturing concern, the Canada Spice and Specialty Co., Ltd. They have taken over the Dearborn building, Prince Wm. Street, St. John, and will start work as soon as possible on their new "Purity Brand" spices, baking powder, flavoring extracts, peanut butter, jelly powders, fruit syrups, egg-powders, flavored icings and other specialties.

The new company will not confine its business to the maritime provinces, but will gradually enter upper Canada, the western provinces and Newfoundland, while they have already arranged for representation in the West Indies. F. B. Schofield is president of the firm.

Canada-India-Java Service

On June 11, announcement was made by the New Zealand Shipping Co., Ltd., Montreal agents of the Ellerman and Bucknall Steamship Lines, Ltd., that there would be a direct line of steamers from Montreal to ports in the Red Sea, East Indies, the Straits Settlements and Java, to be known as the Ellerman-Bucknall Canada-India-Java Service. The first sailing will be the British steamship, Katuna, 8,500 tons deadweight, which will sail from Montreal about the end of July, and this will be followed up by the steamer Romeo towards the end of August, the ports of call being Port Said, Port Sudan, Aden, Bombay, Colombo, Singapore Patavia and such other ports as inducements may offer. Thereafter the new service will be maintained by other regular sailings every three to four weeks as trade requirements may demand.

The Ellerman and Bucknall Steamship Lines, Ltd., is one of the largest steamship companies in the world, operating from the United Kingdom to British South and East Africa, Australia, the Persian Gulf and the Far East; also from United States ports to India and the Far East, the Levant, Africa and Australia.

Manufacturing Notes

It has been decided by the Shinn Manufacturing Co. to enlarge its Canadian plant, which is at Guelph, Ont. W. H. Day is Canadian manager.

Thorold, Ont., has granted the Montrose Paper Mill a fixed assessment at $125,000. The Montrose company is a branch of the Provincial Paper Co., Ltd., and has grown into one of Thorold's largest industries from a company which was granted a fixed assessment of $20,000 some years ago.

A new plant will be erected by the North West Biscuit Co., at Edmonton, Alta., at the cost of $190,000.

ATTRACTIVE AGENCY CONTRACTS

British Empire Fire Underwriters

82-88 King Street East, Toronto

A factory for the manufacture of matches is to be opened at Neepawa, Man., with J. D. Manton, who is experienced in the match-making trade, as superintendent. J. M. Baird of the Manitoba Finance Corporation has completed arrangements with the Neepawa council in this connection.

In conjunction with a large tract of freehold timber lands recently acquired in the Sudbury, Ont., district by the Continental Wood Products Co., a subsidiary of the Continental Paper and Bag Mills Co., a second pulpwood preparing plant and sawmill will be erected, and for that purpose a site is now being cleared.

Machinery and stock have been arriving for Vanderwegbe, Ltd., fur manufacturers, St. Johns, Que., who will commence manufacturing soon. Seven tons of raw furs arrived from Belgium and France for this concern recently.

The new foundry and machine shop of the Roman Machine and Repair Co., Moose Jaw, Sask., has commenced operations, and will turn out automobile moulds, castings and other accessories for cars and tractors.

Toronto manufacturing companies which will extend their plants, are as follows: Lever Bros., addition to Sunlight Soap factory, $350,000; Dunlop Rubber Co., addition to plant, $400,000; Staunton's Ltd., 944 Yonge St., $100,000.

Vancouver Harbor Industries

Two new industries which have leased acreage from the Vancouver Harbor Board will commence on the operation of plants on Granville Island, B.C., this summer. Both are interested in the development of the natural resources of the province. The Alunite Co. will manufacture potash, alum, alunite, alum fertilizer and glass, obtaining the raw products from the great deposits of alunite rock in British Columbia. The Silicia and Talc Co., which owns large deposits of talc on Vancouver Island, will prepare the raw products for the market at the Vancouver plant.

British Columbia Spruce Mills, Ltd., of Wattsburg, B.C., capitalized at $1,000,000, is actively engaged in preliminary construction work on a sawmill and planing mill, having a capacity of 250,000 feet per day, or 35,000,000 to 40,000,000 feet per year.

The construction of a large new sawmill in Southern Alberta is under consideration by the McLaren Lumber Co., who have completed a preliminary survey for the project on the banks of the Old Man River, near Macleod. It is proposed to throw a dam across the river just west of the town and erect a mill that will employ in the neighborhood of four hundred men. The company has been in communication with the Macleod town council for some time, and has recently submitted a memorandum asking certain concessions from the town in the event of the mill being finally located there which include a site, free power for running machinery during construction, free water for fire protection, a proportion of the cost of constructing a necessary railway spur and a fixed rate of taxation.

Waste paper will be utilized by the Red River Paper Mills Co., in the manufacture of "Kraft" wrapping paper at its new plant at Winnipeg, Man. The mill is situated on Linden Ave., Norwood, and has a river frontage of 350 feet, with facilities for shipment of the product. Kraft wrapping papers manufactured from mere waste paper collected and paid for throughout the city will be the initial product of the new mill. Other adjuncts will be manufactured after the mill has been operating for a short time.

The sixth shoe manufacturing concern to locate in Galt, Ont., is "Cut Soles, Ltd." It is estimated that the output of the company will be 4,000 to 5,000 soles per day.

That American immigration into Saskatchewan should be encouraged, and that efforts should be made to enlarge the membership of the Saskatchewan Land Settlement Association, were the opinions expressed by J. H. Haslam, president of the organization, at a meeting held in Saskatoon on June 8.

NEW INCORPORATIONS

North American Life Assurance Company
"SOLID AS THE CONTINENT"
HOME OFFICE - TORONTO, ONT

1870 —— OUR GOLDEN JUBILEE —— 1920

NEW BUSINESS RECORD OF THE MUTUAL

The popularity of the Mutual Life of Canada with the insuring public is being demonstrated in the amazing amount of new assurances issued. The first four months of 1920 indicated an increase of no less than 46% over the amount of insurance underwritten in the corresponding period of 1919. Insurance is in greater demand to-day than it has ever been before in the history of the world. The people are impressed with the importance of securing life insurance and naturally their thoughts turn to the Mutual of Canada. The life agent is fortunate to-day owing to the increasing demand for insurance, and especially if he represents The Mutual Life of Canada which is expanding at a rate that surprises even its most optimistic friends.

News of Municipal Finance

Improved Financial Position Shown in Edmonton's Annual Statement—Large Surplus Revealed in Balance Sheet of Victoria — St. John Debenture Debt Near $5,000,000 — Brandon Tax Rate Thirty-Five Mills — Barrie Has made Provision For Hydro Debenture Debt.

Montreal, Que.—It is estimated that the amusement tax will bring the city $450,000 for the year ending July 31st next. For the eleven months ending May 31st last the revenue from this source amounted to $412,518.

Walkerville, Ont.—A tax rate of 20.02 mills on the dollar has been struck by the council, representing an increase of ½ mill over last year. The assessment is higher this year, but the increase in assessment does not equal the increase in the expenditure.

St. John, N.B.—The debenture debt at the end of 1919, according to the annual financial report, was $4,998,926. There was at the credit of the sinking fund $1,333,259, including investments of $1,233,816 and cash in bank of $99,430. Tax collections during the year amounted to $1,107,224. being $74,670 under the 1919 warrants.

The balance sheet shows excess assets over liabilities of $2.949,165, assets totalling $8,295,400 and liabilities $5,346,165. Principal items on the assets side are: Real estate, $3,457,010; water plant, $2,158,961; uncollected taxes and water rates, $90,000; cash on hand, $10,673. Under liabilities the principal items are: Debentures outstanding as above and indebtedness to the Bank of Nova Scotia, $331,561.

Barrie, Ont.—The town has made complete provision for the whole of its debenture debt on the Hydro-Electric account after taking its power for seven years from the generating plants on the Severn River. During that period Barrie's hydro earnings have met $52,000 in debentures, have provided for an indebtedness of $44,000 on the old steam plant, have purchased $33,000 in Victory bonds, and have left an available surplus of $60,000 against the town's total liability of $34,000. As a result, the town has declared a further reduction of 10 per cent. in rates.

Barrie's balance sheet shows assets of $169,971, the largest item of which is a plant valued at $116,034. Liabilities are placed at $36,944, with reserves of $72,348, and a surplus, including Victory bonds, of $60,679.

Brandon, Man.—The tax rate for the year has been struck at 35 mills, not including a levy of one mill, which is to be levied for five years for the General Hospital. Total estimates amount to $201,273.

It was stated at the meeting of the council when the tax rate was struck that this year debentures were issued to provide liquid funds as against past arrears, but there is no guarantee that the condition which necessitated such bond issue does not still prevail, nor can the city depend on selling the lands when acquired for the value in taxes and costs which they represent. During the past five years the collections fell short of the yearly levy by the following amounts: 1915, $31,000; 1916, $17,000; 1917, $34,000; 1918, $29,000, and 1919, $15,000. The average deficiency would be $25,000 without taking into consideration the loss of the business tax, which amounts to about $2,000 or $3,000 yearly.

Victoria, B.C.—A surplus of $3,414,096 is shown in the balance sheet of the city for 1919, assets totalling $26,238,665, and liabilities $22,824,557. The principal items under assets are: $10,595; bank balance, $68,619; debentures held for delivery and unsold, $1,362,112; tax arrears, $1,951,310; general purpose sinking fund investment, $1,212,660; local improvement sinking fund, $954,454. Under liabilities the principal items are: $9,859,410, general purpose debentures outstanding; local improvement debentures outstanding, $8,341,284; short loans, including treasury certificates and bank loans, $1,371,100; overdraft, Bank of Montreal, $18,592; local improvement sinking funds not paid, $2,828,631.

Seventy-five per cent. of the general taxes were collected during the year, comparing favorably with the collections during 1918, namely, 69.12 per cent., and 1917, 61.44 per cent., and the arrears of taxes collected was correspondingly greater. Expenditure was kept well within the revenue received, receipts totalling $2,060,166, being $52,775 in excess of disbursements. Exchange cost the city in the neighborhood of $25,000 during the year.

Edmonton, Alta.—Outstanding features in the 1919 annual report of the city are: An improved percentage of collections of current taxes for the year; a substantial reduction in the net funded debt; a surplus on general revenue account; a net surplus on the combined operations of the civic utilities and a further addition of $359,446 to reserve against uncollectable taxes. The year, which closed without an overdraft, was commenced with an indebtedness to the bank on current account of $873,404, which is merged in the short-term loans and notes outstanding as at December 31st last, and which amount to $5,546,564, compared with $5,395,488 a year previous.

The debenture debt of the city outstanding as at December 31st, 1919, inclusive of general, special (property share) and utilities, was $25,351,597. Deducting therefrom the sinking fund investments, inclusive of surplus earnings, the total net funded debt was $19,980,201. Of this amount, $9,488,997 represents the net general funded debt, or $375,008 under that of 1918.

Tax arrears brought forward from 1918 amounted to $6,755,760, of which $2,980,352 represented arrears against lands forfeited to the city. During the year collections of arrears were effected of $1,074,036, leaving arrears outstanding at December 31st of $7,280,739, $5,284,530 representing tax arrears as per tax roll and $1,996,208 against lands forfeited to the city.

"The abnormal amount of tax arrears still remaining due to the city," points out Comptroller Mitchell, "accordingly emphasizes the importance of the reserve which has been created to offset any shrinkage which may occur in these arrears as a realizable asset. This reserve, to which $359,346 has been added during the year, of which $100,000 was contributed from the tax levy, the balance being the difference between estimated interest penalty and the actual, now amounts to $695,078. A further addition to the reserve has been included in the current year's tax levy of $150,000, and it is fully expected that by the end of 1920 the reserve will at least have reached $1,000,000."

There was a revenue surplus of $53,359 over expenditure on current account for the year 1919, as compared with $30,194 for the previous year. The current tax levy showed an improvement in the percentage of receipts, the total collection being $2,567,665, inclusive of discount, as against $1,991,270 in 1918, or 69.36 per cent. of the levy imposed, the figure for the previous year being 54.5 per cent. Combined net collections of current taxes and arrears amounted to $3,641,701.

Operation of the several public utilities during 1919 resulted in producing an unprecedented net surplus of $147,147, as contrasted with $14,274 for the year previous. The combined revenue from all utilities amounted to $2,150,737, as against $1,708,991 for 1918.

Referring to the expenditures, the comptroller said: "The economic conditions of the past two years, but especially in 1918, have not been conducive to normal cost of administration arising out of the universally increased scale of wages for services and prices of commodities. The demand, therefore, is the more potent to use every effort to secure increased efficiency and the elimination of all but the most essential operations until the situation in these respects has improved. Indeed, at no time since the war commenced has there been any greater need for careful nursing of the city's financial position than at the present time, and only with conservative managament will ultimate recovery from the difficulties be assured."

Government and Municipal Bond Market

Ontario Bonds Meet With Good Reception—Issue Being Retailed at Par and Interest—Alberta to Try "Over the Counter" Method—Edmonton May Take Legal Action Against National Bond Corporation in Regard to Sale of Bonds

THIS week was featured by the sale of $3,000,000 6 per cent. 10-year province of Ontario bonds at a price of 98.317. The bonds are now being retailed at par and interest. Although the price was a little higher than expected, it did not come up to that of a similar loan which was made in April, when the United Financial Corporation, Ltd., took $2,000,000 6 per cent. 15-year bonds at 100.719, which was on a basis of about 5.95, as compared with 6.22 per cent. now. The April issue was retailed at 102, to yield 5.80 per cent. Since last October, the province of Ontario has floated loans to the extent of $26,800,000, of which $6,800,000 was for refunding purposes. This is a record in provincial financing in that length of time.

It is generally considered that there is an improvement in the Canadian bond market, as evidenced by the strengthened demand for Victory bonds. Bond dealers offer no opinion, however, as to the future trend of Victory loan prices, and members of the special committee say very little on the matter. A campaign is being conducted by the eastern section of the Bond Dealers' Association, whereby all members advertise collectively the attractions of Victory bonds. It is thought that such a plan will help in increasing the demand.

Alberta to Try Local Sale

Because of the popularity of the Alberta saving certificates, the provincial treasurer is now planning to sell 6 per cent. 10-year bonds "over the counter." Last month the province sold $311,000 worth of savings certificates, while $81,000 was withdrawn, leaving net sales of $230,000. The net sales of certificates this year to date amount to $688,800, or more than the total sales in any previous year. Last year, the sales for the twelve months were $632,437, while in 1918 the net sales amounted to $637,473.

"We have been receiving so many applications for a form of investment at a higher interest and for a longer term of years," said J. Newson, deputy provincial treasurer, "that we have decided to issue 6 per cent. 10-year provincial bonds for sale over the counter. These, I am certain, will prove almost as popular as the savings certificates, and will provide a splendid investment, especially for the larger investors. The bonds will be issued in $100, $500 and $1,000 amounts. One great reason for the popularity of the savings certificates has been the elimination of red tape. A purchaser of a savings certificates would send in his money one day and get the certificates the next, or withdraw his money with equal facility by sending in his certificate."

Investors in certificates have dealt in small sums usually, although some large investors have applied for them. For instance, one firm wished to put a million dollars into savings certificates this year. The offer was refused, however, as it would mean too large a sum liable to instant withdrawal by one depositor.

Coming Offerings

The following is a list of debentures offered for sale of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
St. John, N.B.	$ 100,000	6	10-years	June 21
Carleton County, Ont.	190,000	6	20 & 30-inst.	June 21
Shaunavon, Sask. ..	15,500	7	....	June 21
Lancaster Tp., Ont. .	47,726	6	19 & 20 inst.	June 21
Peterborough, Ont. .	500,000	6	30-years	June 21
Lawrence R.M., Man.	50,000	6	20-years	June 22
Pipestone, Man.	93,000	5½	20-years & 30-instal.	June 25
Essex Border Utilities, Ont.	117,615	6	28-instal.	June 25
Assiniboia, Sask. ..	13,500	7	20-instal.	....
Three Rivers, Que. .	363,000	Various	10 & 30 yrs.	June 28
Drummondville, Que.	83,000	6	40-years	June 29
Swan River, Man. ..	58,000	6	30-instal.	July 6

Essex Border Utilities Commission, Ont.—Tenders will be received until June 25, 1920, for the purchase of $117,615 6 per cent. 28-instalment debentures.

Drummondville, Que.—Tenders will be received until June 29, 1920, for the purchase of $83,000 6 per cent. 40-year debentures. W. A. Moisan, town clerk.

Regina, Sask.—Debentures to the amount of $45,000, maturing in fifteen years and bearing interest at the rate of 6 per cent., will be offered for sale locally at par.

Lancaster Township, Ont.—Tenders will be received until June 21, 1920, for the purchase of $25,000 6 per cent. 20-instalment debentures, and $22,726 6 per cent. 19-instalment debentures.

Peterborough, Ont.—The city is receiving tenders until June 21, 1920, for the purchase of $260,000 6 per cent. 30-year bridge debentures, and $240,000 6 per cent. 30-year public school debentures.

Carleton County, Ont.—Sealed tenders will be received until June 21, 1920, for the purchase of $150,000 6 per cent. 20-instalment debentures, and $40,000 6 per cent. 30-instalment debentures. (See announcement elsewhere in this issue.)

St. John, N.B.—The municipality of the city and the county of St. John, invites tenders up till June 21, 1920, for the purchase of $100,000 6 per cent. debentures. Term, ten-years, with option by the municipality of reissuing the debentures at maturity for 30 years at the then current rate of interest, or straight term of 30-years with like interest, as may be selected by bidder. Debentures are dated July 1.

Three Rivers, Que.—Tenders will be received until June 28, 1920, for the purchase of $363,000 debentures as follows: $80,000 6 per cent., dated November 1, maturing in thirty years; $277,000 5½ per cent., dated November 1, 1919, maturing in ten years; $6,000 5 per cent., dated November 1, maturing in ten years. Principal and interest are payable at the Bank of Hochelaga, Montreal, Quebec, or Three Rivers. Bids are to be for each issue separately.

Debenture Notes

Elgin County, Ont.—The county will have to raise $100,000 for roads this year.

Lambton County, Ont.—Money by-laws totalling $160,000 have been adopted.

St. Lambert, Que.—Ratepayers have cast their votes in favor of the $500,000 local improvement loan.

St. John, N.B.—A bond issue amounting to $51,377 for paving, and one for $2,400, also for paving, have been authorized.

Middlesex County, Ont.—Several money by-laws, including one to borrow $140,000 for current expenditures, have been passed.

Oshawa, Ont.—A by-law will be submitted to ratepayers on June 26, authorizing the raising of $250,000 for extensions to the waterworks system.

Fredericton, N.B.—The city council has decided to take a vote on the issuing of $100,000 of bonds to provide for the extension of the Victoria public hospital.

Victory Bond Owners

rightly congratulate themselves upon their choice of investment. The announcement that there will be no increase in the supply of Dominion Government Bonds assures them that the Victory Bond market will gradually strengthen, while owners of tax exempt bonds realize that the increased taxation upon income has added to the intrinsic value of their holdings.

Your Income Tax

When the Federal Tax on personal incomes for the year 1920 becomes payable, it will be found to have increased from 25% to 100% over the amount of the tax paid in 1918.

Check up the amount you paid for 1918 and realize what a substantial increase this means.

Victory Bonds due November 1st, 1933, are exempt from Federal Income Tax.

Have you purchased all you require?

The present is an exceptionally favorable time to buy these bonds.

W. A. Mackenzie & Co.
Government and Municipal Bonds
42 King St. West - - TORONTO, Ontario

Township of Charlottenburg, Ont.—All tenders have been rejected on the $60,000 5½ 20-instalment debentures.

Winnipeg, Man.—A by-law has been passed authorizing the borrowing of $2,340,000 from the Canadian Bank of Commerce by way of overdraft for current expenses.

Sarnia, Ont.—On July 9, ratepayers will be asked to vote on two money by-laws, one being for $300,000 for a new water main system, and the other to spend $50,000 on an asphalt plant.

Sudbury, Ont.—On June 24, ratepayers will be asked to vote on two money by-laws, one asking for $27,000 for an extension of the municipal building, and the other for $27,000 for a new trunk water main.

Winnipeg, Man.—Ratepayers have approved of the school money by-law of $1,500,000 and the expenditure of $279,000 for the improvement of municipal hospitals. The vote was against the $300,000 Maryland bridge by-law, however.

Regina, Sask.—The Local Government Board has given permission to issue debentures to the amount of $245,000, out of a total of $315,000 applied for, providing the price at which the debentures are sold at, is favorable to the board. Application for issuing bonds in connection with the paving of down-town lanes, has been granted, providing such are sold locally.

Bond Sales

Rawdon Township, Ont.—Messrs. A. E. Ames and Co. have purchased privately $9,000 5½ per cent. 15-instalment debentures.

Lincoln County, Ont.—A. Jarvis and Co. have purchased $60,000 6 per cent. 20-year bonds at 97.77, which is on about a 6.20 basis.

Chatham, Ont.—The city treasurer has reported that $72,000 debentures offered for sale locally, have been practically all disposed of.

Kingston, Ont.—Messrs. Wood, Gundy and Co., have exercised their option on $142,000 6 per cent. serial bonds, due 1921-50. The price was 97. Bonds were in denominations of $100, $500 and $1,000.

Saskatoon, Sask.—The city council has accepted the offer of W. A. Mackenzie and Co., for the $100,000 6½ per cent. 20-year bonds, at the rate of 92.61. The total was $250,000, and it is probable that the balance will be taken by the city's sinking fund.

County of Renfrew, Ont.—Messrs. C. H. Burgess and Co., have been awarded the following debentures at 90.172: $100,000 5½ per cent. 20-instalment, for roads; $150,000 5 per cent. 20-instalment, also for roads. The county paid about 6.47 for its money. Other bids were:—

Wood, Gundy and Co.	89.16
United Financial Corp., Ltd.	88.70

Messrs. A. Jarvis and Co. bid 89.75 for the 5½'s and 84.09 for the 5's. R. C. Matthews and Co. offered 91.06 for the first block and asked for an option on the balance for 30 days.

Ontario.—Bonds to the amount of $3,000,000, maturing in 10 years and bearing interest at the rate of 6 per cent., have been awarded to a syndicate comprising A. E. Ames and Co., Wood, Gundy and Co. and the Dominion Securities Corporation at 98.317, at which price the province pays about 6.22 per cent. for its money. Other tenders were:—

Home Bank of Canada	98.11
A. Jarvis and Co., W. A. Mackenzie and Co. and R. A. Daly and Co.	97.138
United Financial Corp., Ltd., Osler, Hammond and Co., R. C. Matthews and Co. and the Imperial Bank of Canada	96.91

Truro, N.S.—Eastern Securities Co., Ltd., St. John, N.B., were on June 11 awarded $50,000 5½ per cent. 30-year bonds of the town at 87.07. Other bids were:—

Royal Securities Corp. and J. C. Mackintosh and Sons	86.30
National City Co., Ltd.	85.07
Mahon Bond Corporation	84.59

Moncton, N.B.—The city has just sold $190,000 serial bonds, maturing $9,500 each year for twenty years, from July 1, 1921, and bearing interest at 6 per cent., at 94, and $203,500 6 per cent. 20-year straight-term bonds at 95.33 and accrued interest. These bonds were sold privately to J. M. Robinson and Sons on June 8, notwithstanding the fact that the city clerk had advised that tenders would be called on June 22. They are now being offered at 98.50 and interest.

May Enforce Bond Purchase

Edmonton may take legal steps to enforce the bond purchase made by the National Bond Corporation, of Vancouver, B.C., according to City Solicitor Brown at an informal meeting of the council last week. As a result of this, a telegram was dispatched to Mayor Clarke advising him not to bring back the unsold portion of the $3,000,000 issue, which amounts to something like $1,759,000. The telegram reads as follows:—

"At informal meeting of a majority of council, it was the opinion that the National Bond corporation be held liable for any damages the city might sustain by reason of their default, and that until such matter is adjusted, the bonds remain with the present holders. Make full investigation with idea of laying matter before council on your return."

Several of the aldermen felt that the mayor should not bring the bonds back without the authority of council, while Alderman East held that if the securities had to be brought back, the mayor should do it if it was to save expenses. Alderman Abbott favored the city giving the company notice that if full payment was not made within sixteen days, the bonds would be withdrawn and the city would hold the company liable for any loss sustained in a subsequent sale. The securities were deposited with the Merchants Bank in Vancouver, where the full issue was to be taken up within sixty days by the National Bond Corporation. The company failed in this obligation, but it was pointed out that since that time the city has received payments from the company and was not in a position on that account to summarily close the buyers out.

In his opinion on the matter, City Solicitor Brown said: "As the city has accepted money since the expiry of the sixty days, there may arise some question as to waiver with the strict compliance of the time limit, but, in my opinion, the city has a right to give notice calling upon the company to perform their contract, say, within ten or fifteen days, or some other reasonable time. This course, I am of opinion, would be wise. The notice might be to the effect that the city requires payment of the balance within the time mentioned and in default of such payment, that the city will proceed to sell the debentures and hold the company liable for any difference in price."

WINNIPEG BOARD OF TRADE

Settlement of western lands will be one of the subjects to be taken up by the Winnipeg board of trade this year, according to the statement made by W. H. Carter, in presenting the president's address at the annual meeting held on June 1. Reports of the work of the various bureaux were submitted at this meeting and the accomplishments of the year reviewed. W. E. Milner, managing secretary of the board, gave the combined outline of the year's work. A nominating committee and a committee in charge of election was appointed. Members of the latter are W. H. Carter, J. B. Coyne, K.C., William Fingland, R. G. Persse and T. J. Coyle.

"An important matter that requires attention," said Mr. Carter, "is the reorganization of the Winnipeg industrial exhibition. This is necessary in the best interests of the city and to afford young people an opportunity of becoming acquainted with the products of the city and country." In touching on the functions of the board, Mr. Carter declared that it was one of the most composite and influential of the nation-wide voluntary organizations. Comprised in its ranks were representatives of every branch of business life, including commerce, industry, finance, law and education. Mr. Carter stated that Winnipeg possessed the material for one of the finest boards of trade on the American continent.

Riordon Financing Plans Officially Announced—Companies Increase Capitalization—Northern Light Railways Issue on the Market

PRICES of industrial bonds remained steady during the week ended June 16, with little activity in the market. New issues are less plentiful than they were earlier in the year, as the market is considered less favorable, and industrial concerns are averse to borrowing in view of the uncertain business outlook.

An issue of $300,000 7 per cent. first mortgage 10-year bonds is being offered by the Northern Light Railways Co. This is part of the financing necessary for the construction of the proposed light railway from Elk Lake into the Gowganda mining camp, which is counted upon as an important link for the development of a promising silver region in the north country. It is understood that part of the necessary money for the construction work is coming from British interests connected with mining properties in the north. The money from the sale of the bonds and stock will be used for the construction of a 36-inch gauge railway from Elk Lake to Gowganda, a distance of about thirty miles.

Increases in Capitalization

Companies registered under Dominion charter, have been authorized to increase their capitalization as follows:—

	Former capital stock	Increased to
St. Lawrence Starch Co., Ltd.	$ 800,000	$2,500,000
Thurston-Flavelle, Ltd.	250,000	1,000,000

The increase of the last named company will consist of 3,500 shares of 7 per cent., cumulative preferential stock of $100 each, and 4,000 ordinary shares of $100 each.

Under provincial charters the changes are as follows, the name of the province being indicated:—

	Former capital stock	Increased to
Andersons, Ltd. (Ontario)	$ 100,000	$ 250,000
*Louise Lumber Co., Ltd. (Quebec)	20,000	100,000
*Globe Bedding Co., Ltd. (Manitoba)	100,000	250,000
*A. F. Higgins Co., Ltd. (Manitoba)	100,000	500,000
*Union Grocers, Ltd. (Manitoba) ..	20,000	150,000
*Garrick Theatres, Ltd. (Manitoba)	100,000	250,000

---

*New shares issued to be of $100 par value, both common and preferred, if any.

Riordon Financing Plans

Issued capitalization of the new Riordon Co., Ltd., official information of which was given out in Montreal last week, will be $12,401,000 of bonds (including bonds of subsidiaries); $10,000,000 of 8 per cent., cumulative first preferred shares, of which $4,000,000 have already been disposed of; $10,000,000 of 7 per cent., convertible second preferred shares, and $27,000,000 common shares. The present Riordon Pulp and Paper Co. maintains its corporate existence, and its bonds, amounting to $5,901,000, remain outstanding, and the payment thereof will be assumed by the new company. Its present issued capital of $1,500,000 of 7 per cent. preferred shares and $6,000,000 par value of common shares will also remain outstanding. The present Riordon Pulp and Paper Co., therefore, will continue only as a holding company of the shares which it receives from the new Riordon Co., Ltd., in exchange for all its assets. There will be no distribution at the present time among the present shareholders of the Riordon Pulp and Paper Co. of these new securities received from the Riordon Co., Ltd.

Basis of Exchange

Outstanding shares of the Kipawa common will be exchanged as soon as possible for the new Riordon Co. common shares on the basis of one and a half shares of new Riordon common for each share of Kipawa common. These new Riordon common shares will, therefore, be distributed and outstanding in the market in place of the Kipawa common shares, which will disappear with the merging of the identity of the Kipawa Co. in the new Riordon Co. The water-powers, timber limits and mill properties of the Edwards and Gilmour-Hughson Co. will be purchased by a new company to be called "the Gatineau Co., Ltd.," and all of its capital stock will be owned by the new Riordon Co. There will be no change in the existing status of the Ticonderoga Paper Co., except that the new Riordon Co. will become the immediate controlling shareholder, owning over 60 per cent. of the Ticonderoga capital stock and receiving dividends, which have been most substantial in past years, thereon. Of the $10,000,000 of first preferred shares of the new Riordon Co., $1,500,000 par value will be held by the old Riordon Pulp and Paper Co. to offset their $1,500,000 of 7 per cent. preferred shares outstanding.

Arrangements have been made with the Royal Securities Corporation for the sale of the new Riordon Co.'s, securities, the proceeds of which will be used to finance the purchase of the various properties involved, supply funds for the increase in capacity of the company's plants and also for the further extension and development of the properties of the company and its subsidiaries.

Riordon Public Offering

Public offering of the unsold balance of $8,500,000 8 per cent., cumulative first preferred shares of the Riordon Co., Ltd., is now being made by the Royal Securities Corporation at par and accrued dividends, with a bonus of 20 per cent. common stock. At first $4,000,000 was offered privately, which issue was substantially oversubscribed, as stated in these columns last week. Since then, however, the demand has increased still further, and up to the present more than $8,000,000 has been subscribed for.

HEAVY TRADING IN CANADIAN STOCKS

Paper Issues Dominant, But Interest is Lagging—New York Market Uninteresting

DEALINGS on the New York exchange for the week ended June 16, were without interest, although prices for the most part were regular and firm. There were special reasons for declines in some stocks, but it was apparent at the close that the general trend was upward. Call money was easy, but did not stimulate the market to any great extent. The switching of the public interest from politics to industry did not have any notable effect.

On the Canadian market, paper stocks were dominant. There was a notable lagging of interest, however, in those issues toward the latter part of the week. Trading which was very heavy, especially in Montreal, was confined to certain issues.

Montreal Stocks Declined

In Montreal, Brompton with sales of 43,840, closed with a net loss of ½ point. Laurentide was weaker among other paper stocks, while Spanish River and Wayagamack showed gains. National Breweries was active with sales of 25,011, and also displayed strength but declined at the close. "Merger" issues were weaker, as a result of the break in negotiations Dominion Steel, Steel of Canada and Canada Steamships all showing losses. The tendency in the majority of the other stocks was to slightly lower levels.

Porto Rico was the feature of the Toronto market, furnishing trading of 1,675 shares on a net gain of 2¼ points. Brazilian was active but closed weak with a net loss of 2¼ points. Penman's was notable for its strength, closing at a new high of 132¼, being a gain for the week of 8½ points. Mining issues were active and stronger, while bank stocks closed weaker. With a few exceptions, other issues registered small declines.

New Issue *Subscription List will close on or before June 28th, 1920.* MONTREAL, *June 18th, 1920*

$8,500,000

Riordon Company Limited

8% Cumulative First Preferred Shares

Dividends will be cumulative at the rate of 8% per annum from July 1st, 1920, and payable quarterly thereafter.

Transfer Agents—Montreal Trust Company Registrars—Royal Trust Company

The First Preferred Shares will be Preferred as to assets and entitled to a fixed cumulative dividend at the rate of 8% per annum and subject to redemption in all or part on any dividend date at 110 and accrued dividend. They will be non-voting except in the event of default in payment of dividends.

CAPITALIZATION.

	Authorized	To be Issued
8% Cumulative First Preferred Shares	$30,000,000	$10,000,000
7% Convertible Cumulative Second Preferred Shares	10,000,000	10,000,000
Common Shares	40,000,000	27,000,000

There will be authorized $30,000,000 Twenty-Year 7% Mortgage Sinking Fund Bonds, of which $7,401,000 will be presently issued, which amount will include bonds to be held by Trustee to provide for ultimate retirement of outstanding Funded Debt of the Riordon Pulp and Paper Company, Limited.

Application will be made in due course to list both Preferred and Common Shares on the Montreal Stock Exchange.

Complete prospectus (copies will be mailed on request) contains a letter from Carl Riordon, Managing Director of the Company, from which we summerize as follows:—

1. Riordon Company, Limited, has been incorporated to acquire the properties and assets of Riordon Pulp & Paper Company, Limited—Kipawa Company, Limited—and all the issued Capital Stock of the Gatineau Company, Limited, which has been incorporated to acquire the water powers, timber limits and mill properties of Gilmour & Hughson, Limited, and W. C. Edwards & Company, Limited. Company will also own over 60% of the outstanding Capital Stock of the Ticonderoga Pulp & Paper Company.

2. Combined timber holdings comprise 10,590 square miles of leasehold timber limits located mostly in the Province of Quebec on the watersheds of the Ottawa and Gatineau Rivers, and tributaries, containing over 25,000,000 cords of pulpwood and over 1,200,000,000 feet of pine.

3. Water Powers, developed and undeveloped, on the watersheds of the Quinze, Gatineau, Kipawa, Rouge and Nation Rivers, etc., have a capacity of 175,500 horse power of hydro-electric power.

4. Company's (and subsidiaries) annual output as follows:—

	Tons
Bleached Sulphite Pulp	91,000
Easy Bleaching Sulphite Pulp	8,000
Soda Pulp	11,000
Book Paper	18,000
Present Output	128,000
Increased Kipawa Plant Output available March, 1921	25,000
Annual Output	153,000
Lumber, feet b.m.	125,000,000

5. After deducting all Current Liabilities, Net Liquid Assets (Working Capital) as at the date of completion of present financing should amount to not less than $5,000,000.

A conservative estimate of the Property Values of the Company and its subsidiaries shows a valuation in excess of $50,000,000 which, after deducting Company's and subsidiaries' Funded Debt amounting to $12,401,000, shows a surplus available for First Preferred Shares of over $37,000,000.

6. Net Earnings of the properties acquired, for the year ended December 31st, 1919, after payment of Interest on present Funded Debt of the Company and subsidiaries and available for First Preferred Dividends, Depreciation, Depletion and Taxes, amounted to over $2,250,000, equal to nearly 3 times First Preferred dividend requirements.

Net Earnings of the Company and its subsidiaries, for the current year ending December 31st, 1920, after payment of Interest Charges and allowing for Depreciation and Depletion and available for First Preferred Dividends and Taxes are estimated to be not less than $5,000,000, equal to over 6 times First Preferred Dividends, and after payment of all Preferred Dividends, equal to over 12% on the Company's Common Share Capital.

Over $8,000,000 par value of this issue has already been sold in Canada and the United States. We offer the unsold balance, if, as and when issued, at a price of—

100 and accrued dividend yielding 8%

Carrying a Bonus of 20% in Common Shares (One Common Share with every Five Preferred Share).

Payable : 25% of the par value on application.
25% of the par value on July 15th, 1920.
25% of the par value on August 16th, 1920.
25% of the par value on September 15th, 1920.

Common Stock Bonus will be adjusted to even amount by purchase or sale of fractional share at the rate of $50 per share.

The right is reserved to allot none, or a portion only, of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 8% per annum. Interest will be adjusted upon final payment.

Dominion Steel Directors Protest Against British Empire Steel Merger—Complete Information Lacking—Balance Sheet of New Consolidation—Brantford and Levis County Street Railways and Consumers' Gas Company Secure Higher Rates But London Street Railway Must Practice More Economy

Intercolonial Coal Mining Co.—Dividends on the common stock of the company, according to the rate just declared, has been raised 1 per cent. to 7 per cent.

City Dairy Co.—The company has declared a dividend of 2 per cent. on account of the arrears on its preferred stock, payable July 2nd to shareholders of record June 21st, in addition to the regular quarterly dividend of 1¾ per cent. on the preferred, payable on the same date.

London Street Railway.—A four-cent increase, bringing wages up to 48 cents an hour, has been accepted by the employees, and, consequently, the strike has ceased. There will be no increase in fares, the advance in wages being made up by reduced service and other economies.

Levis County Railway.—The city of Levis, Que., has accepted the new schedule of rates suggested by the company in order to allow the latter to pay the increased wages to the employees. Rates are as follows: Four tickets for 30 cents instead of four for a quarter; fifty tickets for $3.50; ten cents cash fares and eight children's tickets instead of ten for a quarter.

St. John Drydock and Shipbuilding Co.—At the annual meeting of the company on June 7th at St. John, N.B., James Playfair, of Midland, Ont., was elected president; D. S. Pratt, of Midland, vice-president and managing director, and Colonel Thomas A. Duff, of Toronto, secretary. Other directors were chosen as follows: D. L. White, jr., Midland; W. P. Phin, Hamilton, Ont.; W. J. Sheppard, Waubaushene, Ont., and James B. Craven, New York.

Brantford, Ont.—Tickets of the street railway company, which have hitherto sold at six for 25 cents, have been abolished and a straight five-cent fare inaugurated. This higher rate follows the granting of a new wage scale for employees, which provides that the men will receive 46, 48 and 50 cents per hour for the first, second and third years, respectively, and time and a half for overtime. The agreement is for one year.

Spanish River Pulp and Paper Mills, Ltd.—The plan for payment of the deferred dividends on the preference stock by the declaration of a preferred stock dividend, submitted by the directors of the company to the shareholders by circular dated April 29th last, is to be considered at a special general meeting to be held on June 23rd, 1920. The secretary reports that proxies have already been received from 90 per cent. of the shareholders, both common and preferred, and that with the proxies expected from the British Isles, the plan will be practically unanimously approved.

Toronto Street Railway Co.—Employees of the company, who several weeks ago demanded a wage of 85 cents per hour at the expiration of their agreement this month, have reduced their demand to 66 cents, representing an increase of 20 per cent. over the present scale. This decision was reached on June 16th at a large mass meeting, when it was decided to strike if the company did not meet the demands within forty-eight hours. The company claims that its revenue in 1919 was just sufficient to pay operating expenses, and that even at the present scale a deficit of $500,000 will be incurred this year. The franchise expires in 1921, and in the meantime higher fares cannot be secured. The city has decided to stand aside in case of a strike, but the Ontario Railway and Municipal Board may operate the system pending a settlement, as it did last year.

British Empire Steel Corporation.—A circular issued by the Nova Scotia Steel and Coal Co. to shareholders of that company in regard to the special meeting on June 25th to ratify proposals in connection with the new British Empire Steel merger, contains some new interesting details. The name of the Century Coal Co., Ltd., appears for the first time as one of the merging concerns, while the balance sheet, based upon the reports of the appraisal companies as to the value of assets of the companies proposed to be consolidated, is presented as follows:—

ASSETS	
Properties, etc.	$403,770,990
Deferments	79,209
Investments	2,973,464
Deferred charges	2,008,386
Cash for bond redemption	250,661
CURRENT ASSETS	
Cash	$ 24,091,269
Call loans	1,526,204
Canadian and United States government bonds	4,913,591
Notes and accounts receivable	17,018,536
Inventories	27,757,052
Total current	$ 75,306,652
Total assets	$484,389,362
LIABILITIES	
Issued capital stock:	
Seven per cent. cumulative preferred	$ 37,000,000
Eight per cent. cumulative and participating preferred	25,000,000
Seven per cent. non-cumulative preferred	72,750,000
Common stock	79,000,000
Total issued	$213,750,000
Held for constituent companies:	
Seven per cent. non-cumulative preferred	$ 4,750,000
Common stock	2,000,000
Total	$ 6,750,000
Net issued capital	207,000,000
Net funded debt	43,550,294
Deferments on property	1,484,000
Deferred credits	1,308,231
Renewals, etc., reserves	1,998,844
*Capital surplus	196,839,595

---

*Represented by excess of appraised value over cost of properties.

CURRENT LIABILITIES	
Bank and other loans	$ 6,445,973
Notes payable	398,560
Accounts payable, taxes and dividends	15,147,017
Payments on incomplete contracts	10,216,847
Total current	$ 32,208,397
Total liabilities	$484,389,362

The circular concludes by stating that, in the event of any of the other companies failing to accept the proposals submitted to them, such company will be eliminated from the consolidation and the balance sheet will be amended accordingly.

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

Consumers' Gas Co.—Acting Finance Commissioner Black and City Auditor Scott, of Toronto, who were appointed to examine the company's books when its intention was announced to increase its rates, assert the company is justified in raising the price of gas to $1.10 per 1,000 feet on and after June 15th. An examination of the company's books revealed the fact that its reserve fund had been greatly depleted within the past five years, and it now stood at $278,791. The amount is not nearly sufficient to meet the increased costs of operation, which, owing to the higher prices of coal and other commodities, will probably total $730,639, so unless an increase is made in the price of gas the company would be faced with a serious deficit at the end of the year. The civic officials point out that the reserve fund should be strengthened, and that the 5 per cent. set aside annually for the plant renewal fund is not adequate to meet the demands for renewals, etc.

Dominion Steel Corporation.—Protest against the ratification of the British Empire Steel merger by six influential directors of the Steel Corporation is being made, at least until further information is given. The protest charges that the Dominion Steel Corporation receives an unfair deal under the proposal; that $38,000,000 of common stock in the merger is to be sold to parties unnamed for $30 per share; that $25,000,000 which it is hoped will be received for preferred stock is already counted in the cash in the balance sheet just issued, and that the Dominion Steel Board has failed to secure essential information regarding the smaller concerns.

Those directors which signed the protest were: George Caverhill, Hon. R. Dandurand, Sir William Mackenzie, William McMaster, J. H. Plummer and E. R. Wood. As a result of the protest the annual meeting, at which the merger proposals were to be ratified, and which was called for June 15th, was postponed for three days.

The protest, which was in the form of a letter to shareholders, says:—

"The balance sheets of the Dominion Steel, the Nova Scotia Steel and Canada Steamship Lines have been published, and are available. The properties of the Nova Scotia Steel Co. are well known to your directors, but beyond the information furnished by the balance sheet, they have little knowledge of the affairs of Canada Steamships; certainly, not sufficient to enable them to form an opinion as to the propriety of joining with them in a merger on the terms mentioned. As regards the remaining eight companies, no information whatever has been given as to their separate assets, liabilities and earnings, it being stated that in some cases the owners refuse to allow their position to be disclosed to your board.

"In order that the proposals might receive proper consideration, your directors have pressed urgently for full information as to each of the companies which are to be merged, but so far it has not been furnished, the promoters taking the ground that you are not concerned in what others receive, and that certain companies decline to have their affairs investigated. But the value of the shares offered to you depends on what the constituent companies contribute in assets and earning power, and what they receive in exchange. You are, in effect, asked to buy an interest of 51 per cent. in the combined properties on values not verified by you, or to form a partnership in which you contribute 51 per cent., without being allowed to satisfy yourselves as to the value of what the other partners contribute.

"The promoters have, however, submitted a certified consolidated balance sheet, prepared for them by Messrs. Marwick, Mitchell and Co., as it would be if all the companies were merged, and if $25,000,000 new money had been provided for capital expenditure by the sale of preferred stock, which is one of the conditions named in the proposal. This balance sheet shows the total common stock issued as $77,000,000, of which $39,000,000 goes to the merging companies. The balance, $38,000,000, is to be sold to realize $11,400,000, out of which the cash payments of $6,945,000 to certain companies above mentioned will be provided, with the costs of the merger, discount on securities, etc.

"Your directors are not satisfied to proceed until full information on all points is available, as they cannot recommend you to accept shares in the new corporation, in exchange for your stock, until they are satisfied as to their value; they feel that they are asked to approve of the comparative values assigned to the various properties by the promoters of the merger, without knowledge of the facts on which these values are based. This they regard as out of the question."

In connection with this statement, Mark Workman, who is at present in England, states that he has put the facts before the London Advisory Committee, and that on May 6th the committee instructed their secretary, asking that full information be furnished.

"The Advisory Committee," continued Mr. Workman, "are still without the information asked for regarding the companies it is proposed to merge. Under these conditions I feel it my duty and in the interest of all concerned that I make these facts public. I protest most vigorously against this proposed merger of non-essential companies without the fullest investigation, and in this I have, to the best of my knowledge, the fullest co-operation of members of the London Advisory Committee. Some of the most influential members of the London syndicate have already lodged protests with the syndicate manager here."

BANK MANAGER, with seventeen years' banking experience, desires change of position. Has first-class executive ability, fully reliable, and can furnish highest references. Thirty-three years of age and married. Open for position of trust with Industrial or other corporation. Box 317, *Monetary Times*, Toronto.

RECENT FIRES

Buildings in Chatham, N.B., Bishop Lumber Co. at Nesterville, and Moyneur, Ltd., Ottawa, Had the Largest Loss This Week

Chatham, N.B.—June 9—Ten buildings were destroyed and caused a loss estimated at $250,000. The fire is believed to have been caused by gasoline fumes coming in contact with a lighted lantern.

Erindale, Ont.—June 12—Residence and barn of Price Bros. were destroyed. Loss estimated at $50,000. Fire caused by lightning. Several other buildings were destroyed in Erindale by the electric storm. There is a total loss of about $100,000.

Granton, Ont.—June 10—Home of Jos. Casey burnt. Insurance of $1,000.

Lumsden, Sask.—June 12—Garage, elevator and school destroyed by fire.

Montmagny, Que.—June 10—Sawmill destroyed. Loss, about $75,000. The mill was owned by Price Bros.

Ottawa, Ont.—June 13—Warehouse of Moyneur, Ltd., destroyed. Damage estimated at $150,000 to building and contents. The building and contents are partly covered by insurance.

Sault Ste. Marie, Ont.—Bishop Lumber Co. at Nesterville was burnt, resulting in a loss of more than $200,000. The lumber mill, owned by Robert Hare, of Laird township, was destroyed by fire. The fire was caused from a spark from the sawmill. Loss, $4,000, partly covered by insurance.

Woodstock, Ont.—June 11—Brewery, owned by James Clothes, damaged. Estimated loss, $4,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Ontario.—The fire marshal's report for February, 1920, shows that during the month there were 828 fires, with a loss of $1,152,950, of which $721,390 fell upon the insurance companies and the balance of $431,560 was uncovered. The corresponding number of fires in February, 1919, was 708, with a loss of $496,753, of which $364,109 was met by the insurance companies.

An analysis of the causes of fires during February shows that stoves, furnaces, boilers and their pipes caused 147, matches caused 96, exposure 52, electricity 46, smoking 45, chimneys 40 and sparks 40. Five hundred and fifty-one dwellings were destroyed or damaged, 105 stores, 49 manufacturing and special hazards, and 16 barns. The largest losses were at Timmins, Ont., Capreol, Ont., and Toronto.

Milford, N.B.—The following insurance companies were interested in the fire which destroyed the Dwyer property on May 20th: Norwich Union, $5,000; Hartford, $3,000; Ætna, $3,000; British Empire, $3,000; British and Canadian, $2,000; Atlas, $4,000. Total, $20,000.

Specific to Stock—North Empire, $2,500; Newark, $2,500; St. Lawrence, $2,000; London and Lancashire, $3,000. Total, $10,000.

Buildings—Globe Underwriters, $3,000; Great American, $3,000; Rochester Underwriters, $2,000; Palatine, $3,000; Canada Accident, $3,000; Home Underwriters, $2,000. Total, $16,000.

Other insurance carried was: W. T. Stout, $800 on dwelling, Liverpool and London and Globe; $400 on furniture, New York Underwriters. W. J. Evans, $1,000 on dwelling, Liverpool and London and Globe; $400 in Royal. Thomas McGrath, $800 on dwelling, Liverpool and London and Globe; $800 on furniture, Nova Scotia Fire Insurance. Dwyer Bros., $400 on small building, London and Liverpool and Globe. James Ingalls, $1,000 on dwelling, Queen; partial loss. J. W. Crowley, dwelling, $1,000 in Continental. E. Percy Howard has declared the Dwyer property a total loss as regards insurance after a personal examination. Mr. Howard expressed the opinion that Dwyer Bros. had suffered a loss double the amount of insurance.

Bond Dealers Fourth Annual Convention

Good Representation at Winnipeg Meeting—Victory Loan Marketing Committee Has Reduced Floating Supply—Delegates Hear Resources of West Described, and are Shown Greater Winnipeg's Water System—Municipal Finances Receive Attention—J. H. Gundy is New President

(Special to *The Monetary Times.*)

Winnipeg, June 19th, 1920.

BOND dealers, like other industrial and financial interests in Canada, take a keen interest in the west, and this year held their annual convention in Winnipeg, June 17th to 19th. Special cars arrived in the city on June 16th, bringing about forty delegates from Toronto, Montreal and other eastern points. The west was also well represented.

Has Grown Rapidly

The Bond Dealers' Association was organized in June, 1916, and was the outcome of a bond dealers' section of the Toronto Board of Trade, formed in 1911. Originally composed of two sections, western and eastern, with centres in Toronto and Montreal, respectively, the growing importance of western Canada as an investment field was recognized in 1918 by the formation of a third section, with headquarters in Winnipeg. This section has jurisdiction over Manitoba, Saskatchewan, Alberta and British Columbia. The central section now covers Ontario, while the eastern section consists of Quebec and the maritime provinces.

Members Attending

The following delegates from outside Winnipeg were present:—

Vancouver—V. W. Odlum, Royal Financial Corporation; R. C. Morrow and S. Burke, Pemberton and Son.

Calgary—E. Taylor, Lougheed and Taylor.

Regina—G. H. Sneath, Nay and James; S. W. Harris, Harris, Read and Co.

Edmonton—W. Ross Alger, W. Ross Alger and Co.

Toronto—R. A. Daly, R. A. Daly and Co.; R. C. Cottrell, Canada Bond Corporation; H. B. Housser, Housser, Wood and and Co.; H. G. Cooper, W. A. Mackenzie and Co.; W. L. McKinnon, W. L. McKinnon and Co.; W. A. Woodcock and C. H. Burgess, C. H. Burgess and Co.; A. E. Ames and F. J. Coombs, A. E. Ames and Co.; J. W. Mitchell and J. A. Fraser, Dominion Securities Corporation; R. C. Matthews, R. C. Matthews and Co.; W. N. McIlwraith, Wood, Gundy and Co.; J. E. Cochrane, Æmilius Jarvis and Co.; D. McLeod, Nesbitt, Thomson and Co.; H. C. Aird, National City Co.; G. T. Chisholm, Osler, Hammond and Co.; E. G. Long, general solicitor; and J. A. Kingsmill, general secretary.

Hamilton—C. E. Bull, C. E. Bull and Co.

Montreal—Col. Gerald Hanson, D.S.O., and Edwin Hanson, Hanson Bros.; A. P. Frigon, St. Cyr, Gonthier and Frigon; A. H. B. Mackenzie, Mackenzie and Kingman; C. Flood, Nesbitt, Thomson and Co.; A. P. Williams, United Financial Corporation; Hew R. Wood, Hew R. Wood and Co.; H. P. Thornhill, National City Co.; J. B. How, A. E. Ames and Co.; J. A. McQuestion, Dominion Securities Corporation, and J. M. Mackie.

Sir Augustus Nanton, president of the association, occupied the chair and welcomed the delegates. Most of the business sessions were held on the 17th, and on the 18th the visitors were taken to see Winnipeg's power plant and water system. Business was then completed on Saturday. On Thursday evening the entire party were the guests of Sir Augustus Nanton at the Manitoba Club.

Officers Elected

After the business sessions the election of officers took place, and J. H. Gundy was elected president. The executive committees elected to represent the respective sections are as follows:—

Eastern section—A. J. B. Nesbitt, vice-president; Russell Bell, J. A. Eccles, Gerald Hanson, N. L. C. Mather, Montreal; J. M. Robinson, St. John; A. F. MacIntosh, Halifax.

Central section—J. W. Mitchell, vice-president; J. H. Gundy, H. B. Housser, W. L. McKinnon, R. A. Daly, F. J. Coombs, Toronto.

Western section—A. L. Crossin, vice-president; Sir Augustus Nanton, J. A. Anderson, Winnipeg; G. H. Sneath, Regina; E. Taylor, Calgary; Stanley Burke, Vancouver.

It was decided to hold the next annual meeting in Toronto.

Victory Bond Market

In regard to Victory bonds, it was estimated that the institution of marketing conditions under a special committee of bond dealers has effected a saving to Victory bond owners of not less than five points on the market value of the outstanding two billion of national debt; in other words, one hundred million dollars. Another interesting point was that against six hundred and fifty million of bonds floated in the last Victory Loan compaign, the floating supply in Canada is only ten million dollars, or approximately 1½ per cent., while the total floating supply of all Victory Loans, including both tax-free and taxable, is only about 2 per cent. of the entire outstanding amount.

A. H. B. Mackenzie, of Montreal, presented the treasurer's report, which showed a balance of $991 for the year, after investing in Victory bonds worth $3,000. The report of the secretary, J. A. Kingsmill, of Toronto, stated twenty-four new members had been received in the association during the year, making a total membership of 101 members.

A. L. Crossin, of Winnipeg, gave the report of the western section, and J. W. Mitchell, of Toronto, and A. P. Frigon, of Montreal, the report of the central and eastern sections.

Need for Irrigation Financing

A. S. Dawson, who is the chief engineer of the department of natural resources of the Canadian Pacific Railway at Calgary, addressed the bond dealers on June 17. One of the most interesting statements made by him in his address, which dealt exclusively with the question of irrigation in southern Alberta, referred to the position of a considerable number of farmers, which has been rendered critical owing to the extraordinary circumstances which have recently arisen in the world at large.

These people located years ago in regions in Alberta which are semi-arid. For the past three years they have had practically no return, and, according to Mr. Dawson, they cannot stand a similar fourth season. The territory which they occupy can be irrigated, but there are several obstacles in the way of those who are endeavoring to promote the irrigation movement. In the first place, the money market is in such a condition that it is difficult to sell bonds, and if sold, interest rate is high; and in the second place, when money is obtained, everything needed for the irrigation project is very dear, including labor. In spite of these difficulties it is probable that big irrigation projects will go forward in the western province. Work is, of course, in progress at the present time on certain undertakings.

Mr. Dawson said that irrigation bonds were looked on with some suspicion in the United States, owing to the fact that some wildcat and some ill-considered projects had been launched in that country. In Canada government engineers had been employed for years in investigation, and it was not possible to launch any project without the government's approval. Regarding the results which followed irrigation in Alberta, statistical information was given. It was stated that no mortgage had ever been foreclosed on an irrigated farm of the province. The statistics quoted showed that in a period of ten years the average yield of potatoes on dry land of Alberta had been 237 bushels, and the yield on adjoining irrigated land was 487 bushels per acre.

The increase in Marquis wheat was 77 per cent., in oats 54 per cent., in barley 81 per cent., and in peas 51 per cent. On the dry land crops were produced following summer fallow, while on the irrigated land crops were produced each year. The yield from the dry land ought, therefore, in fact, to be cut in two. Mr. Dawson spoke of the return on a farm in Brooks, Alta., a record for the prairie provinces, where, under irrigation, 784 pounds of flax were taken from an acre. The farmer in this case had 14 acres of flax, and the yield was $666 per acre, or $7,992 for the 14 acres of crop. C. A. Magrath said that no enterprise in the west would yield a greater return to Canada than the expenditure of $20,000,000 on irrigation development in southern Alberta at the present time.

In introducing Mr. Dawson, Sir Augustus Nanton explained that Col. Dennis, who had been asked to attend, was unable to do so, but had sent Mr. Dawson instead. At the close of the address Sir Augustus commented favorably upon it. "I think it is news to a great many of you—the few words he read from the report of the president of the Canadian Pacific Railway. Many of us in the west, for a number of years, were very doubtful as to whether the irrigation schemes of the Canadian Pacific Railway were going to be successful. They have been successful in two ways. The company will get its money back with interest, and will get enormous traffic from the development of the country, and many hundreds of thousands of acres will be occupied that never would have been occupied had it not been for the irrigation schemes of that company which were largely suggested by Col. Dennis, and which have been constructed, to a great part, under the direction of Mr. Dawson."

Mining in Manitoba

An address on the possibilities of northern Manitoba was given on the same evening by Professor R. C. Wallace. There were large areas suitable for agriculture, he said, and also valuable fishing resources. Pulpwood and other timber resources are extensive. The most rapid progress had been made in mining, however, and the speaker briefly outlined the present state of development.

At the inspection of the power plant on the Winnipeg River, 80 miles from the city, F. H. Martin, designing engineer, explained the work done so far. A construction camp has been organized and a large coffer dam built. Regarding the plans for the future, he stated that the development, when completed, would have a capacity of 168,000 h.p., and would cost about $10,000,000. It was proposed to install six 28,000 h.p. units, operating under a head of 56 ft. When the plant was completed there would be a large reservoir, extending over five miles up the river, forming a reserve supply of water sufficient to produce an additional 50,000 h.p. for three hours every day. Mr. Martin pointed out that owing to the remarkably good site, the ultimate cost of the development would average $65 per horse power, which was decidedly low. He stated that the Winnipeg River was one of the best regulated rivers on the continent, draining an area of 55,000 square miles, and gave Winnipeg a power situation which could not be duplicated anywhere on the continent.

The initial output for Great Falls of 56,000 h.p. has already been contracted for. It was also stated that the steam railway companies were discussing the probability of electrifying their lines to the pleasure resorts and outlying districts, and this would absorb large quantities of power. Many industries, it was said, were contemplating coming to Winnipeg as soon as an abundance of power was assured.

INSURANCE REGULATIONS IN ONTARIO

The June meeting of the Life Underwriters' Association, tion, held on the 17th inst., was addressed by Hon. Peter Smith, treasurer of the province of Ontario, who pointed out the good effect which the new government was having in bringing city and country closer together. They were, he said, both essential to one another. So far as the insurance business was concerned, the provincial department had a high regard for the work the companies are doing, and would co-operate with the agents in every way possible. The provincial superintendent of insurance, V. E. Gray, described the new license application form, which will require the applicant to declare that he does not want the license merely to write a single risk.

The meeting was thrown open to suggestions for next season. Noon or evening meetings will be held to suit the circumstances, and more attention will probably be given to selling methods. Several agents commented favorably on the good work now being done by the Ontario Insurance Department.

COMMERCE BOARD EXONERATES GROCERS

Wholesale grocers in the city of Hamilton, Ont., are not organized in a detrimental combine for the fixing of resale prices, according to a final decision of the Board of Commerce issued on June 22. In an interim report of the board recently a similar finding was made, and the board announced its intention of pursuing its investigations of the operations of wholesale grocers from coast to coast. The final decision in the case recapitulates these points, gives at length legal reasons why hearing had failed to reveal an alleged combine on the part of the wholesale grocers, expresses its regret that, owing to limitations of staff, it has been unable to pursue its complete investigation of the Dominion-wide conditions in the trade, and points out that, with the resignation of vice-chairman O'Connor from the board, this final decision must be made while there is still a quorum of the board to render it.

The board states, however, that since the hearing in Hamilton and Toronto, in March, it has pursued its inquiries into the methods of the firms concerned, and has failed to obtain proof that the grocers operate a combine to the detriment of the public, or that the Grocers' Association had ever refused to admit to its membership a *bona fide* wholesale grocer. The board points out that differences of opinion on the wisdom of its conclusions in this matter may be referred to the Supreme Court of Canada, and expresses its willingness to expedite any such appeal which may be brought.

Parliament Still Faces Large Program

Leadership and Platform of Unionist Party Not Definitely Settled Yet—New Pensions Scale Means Large Increase in Expenditure—Government May Finance Shipbuilding Industry

(Special to *The Monetary Times.*)

Ottawa, June 24, 1920.

By the time this appears in print the government will likely have held its caucus to settle the fate of the Unionist party as well as the leadership. If it has already been held the worst will be known; if it is not yet summoned it cannot be much longer delayed as the end of the session is in sight. When I last wrote I predicted that Sir Robert Borden would retire. That seemed absolutely certain at the time, but a lot of water, speaking politically, has run under the bridge during the past week. While there has been no general caucus yet on the subject, there have been many secret conclaves and much canvassing of the whole situation.

The net result seems to be that Sir Robert Borden, despite his own personal wishes and the advice of his physicians will likely continue at the head of the Unionist party. The trouble is that the cabinet cannot agree on a successor. There is no doubt that there are negotiations on foot for a "reapproachment" with the French protectionists, Liberal and Conservative. They are frightened of the free trade platforms of the two Oppositions. But they will not accept Hon. Arthur Meighen as leader. They say it would be hopeless to attempt to make headway in Quebec under his leadership at present, at least, owing to the long, persistent and continued attacks upon him in the French-Canadian press. To the habitant he has so long been painted as a man with horns, that it is impossible to face the electors with him as a leader. This is hard and unfair on Meighen, but politics is a cold-blooded game. Sir Thomas White was a possibility and acceptable, and if he would have been willing to take the premiership, he could apparently have it. But Sir Thomas is emphatic in his statements that he is out of politics. Under the circumstances, Sir Robert is being urged to remain at the head, and will probably agree. He has been actually recovering his strength since his return to Ottawa, although he will have to conserve his energies. However, on several occasions he has delighted his followers with his verve and vigor in debate.

Criticism of Extravagance

In reminiscent mood Sir Robert recalled this week that he was first returned to parliament twenty-four years ago on June 23, 1896. It was the year of the great flood as far as the Conservative party was concerned, Sir Robert being one of the few new Conservative members to be elected in that contest. Sir Robert, speaking at the time on the question of the pensions, recalled that in the election of 1896, one of the chief arguments against the then government was its extravagance. It was attacked on every platform for its lavish expenditures. Yet these expenditures were only $43,000,000, or only a few million dollars more than the pensions bill alone of the Dominion this year. It was a striking contrast and one that gave a house used to the spending of millions and attacked for not spending millions more for gratuities, pause for considerable thought.

Much Late Legislation

There has been a rush of important eleventh-hour legislation which may hold up the plans for prorogation. Aside from the pensions proposals, the most important is the ship-building legislation and the decision to continue the Wheat Board for another year. The policy to encourage shipbuilding is at least unique. The government found it was unable to assist the industry by bonus; it was anxious to keep the industry alive. It has devised an original system of credit financing. The government's proposal, briefly summarized, is that the minister of finance may be authorized by the governor-in-council to endorse promissory notes drawn by the purchaser in favor of the shipbuilder for 50 per cent. of the purchase price in cases where the remaining half has been provided for, this to apply to vessels of more than three thousand tons and the vessels to be mortgaged to the government for the full amount of the notes endorsed and to be registered in Canada without right of transfer until the mortgage has been cleared off. It is intimated in Ottawa that if this legislation goes through there are orders enough ahead from foreign countries, principally France, to keep Canadian yards busy for two years.

Huge Claim Against Germany

Canada's claim against Germany for reparation for losses sustained by the country and by individual citizens during the war has been forwarded to England for presentation at a conference of representatives of all parts of the British Empire, soon to be held in London, and, subsequently, at an inter-Allied conference at Spa. The bill rendered by the Dominion is for a total of 1,871,000,000. The total is made up of the following items: Cost of war and demobilization, 1,715,000,000; separation allowances, $85,000,000; Halifax losses, $30,000,000; army of occupation, $8,000,000; illegal warfare, $31,500,000. The separation allowances alluded to are those paid to families and dependents of persons who served in the military and naval forces during the war. By Halifax losses is evidently meant the damages occasioned in that city by the explosion of the munition ship "Mont Blanc" in 1917. The sum claimed under the head of army of occupation is the cost of maintaining Canadian troops on the Rhine frontier for a period after the signing of the armistice on November 11th, 1918. The last item is a claim for compensation for damages sustained by Canadians as a result of the resort by Germany to illegal methods of warfare. Included in this item, for instance, would likely be a sum to cover losses of Canadian merchant and fishing vessels sunk by German U-boats during the period of unrestricted submarine warfare.

Senate Approves Hudson Bay Route

After three years of investigation, a special committee of the senate has just reported that the railway route to the Hudson Bay is feasible, that valuable fish and marine animals abound in the bay and strait, and that consideration should be given the matter of making Fort Churchill instead of Port Nelson the terminus of the road. The committee, which held fifteen meetings, extending over a long period, and heard twenty-one witnesses, makes the following findings:—(1) That the Hudson Bay route is feasible and will be probably in time profitable. (2) That under present conditions the season of navigation would last at least four months, and may by improvements in aids to navigation be considerably increased. (3) That in the opinion of the committee sufficient care was not taken in the selection of Port Nelson as the terminus of the railway, and that the government should not make further important expenditures on this port without first making a new and thorough examination into the relative merits of Fort Churchill and Port Nelson as the terminus. (4) That the waters on the strait and rivers tributary to the bay teem with fish and valuable marine animals, and the committee believes the bay is equally well stocked. (5) That mines already discovered in the Hudson Bay district are of sufficient nature and richness to indicate the existence of great potential mineral wealth.

West Indies Agreement

The scope of the agreement reached by the Canadian-West Indies Conference is indicated in an official statement issued on June 19th. The text of the agreement will not be made public till August 4th, but, in general, says the statement, it may be stated that the agreement—

"(1) Carries the assent of all the delegates present at the conference;

"(2) Is framed upon an increase of the mutual preference now granted and an extension of the list of products upon which preference has hitherto been given;

"(3) Includes in the mutual preference all the British Colonies in the West Indies;

"(4) Contemplates mutual co-operation of the signatories towards the provision and maintenance of improved steamship transports and includes a memorandum urgently pressing for improved cable communications."

State Insurance Proposal

The chief feature of the pensions report, aside from its generous increases, was the recommendation in favor of the establishment of a state insurance for all returned men. What is not generally known is that this is applicable to widows of soldiers, as well as returned men, provided the insurance is made payable to dependents. A man cannot marry a soldier's widow for her insurance. As in the case of the veterans, there is no medical examination. The insurance is merely straight life. The rates are about twenty per cent. less than those charged by the regular insurance companies.

Pensions Committee Report

The report of the pensions committee presented by Mr. Hume Cronyn, member for London, was comprehensive in character and met with the general approval of the house. There was but one objection and that was the appeal of Col. Peck to have loans, on the basis of those granted to soldiers going on the land, to fishermen. The view of the committee was that, if the gate was opened for fishermen, every class would have to be included. The financial obligation would be overwhelming.

It would appear as if R. J. Maxwell, president of the G. W. V. A., rushed into print too soon in his attacks on the committee and the government for doing nothing for the soldier. It would have been the part of wisdom, as well as courtesy, to have waited until the report was made. He has weakened his own case and the cause of the soldiers by his precipitate action.

Housing Loan Limits Increased

Loans under the federal housing scheme are increased from $3,000 to $3,500 for four or five roomed houses, and from $3,500 to $4,000 for six and seven roomed houses. This is the maximum loan. The period of repayment is twenty years, with interest at five per cent. These figures were tabled in the House of Commons on June 7.

Board of Commerce Report

The annual report of the Board of Commerce was received by the government on June 1. It is in two sections—one signed by Mr. W. F. O'Connor, and the other by Mr. W. G. Murdock. Mr. Murdock, in his report, urges strongly that the correspondence between the two commissioners and Sir George Foster, acting prime minister, relating to the retirement of Judge Robson, the former chairman of the board, be published in the public interest, and for the protection in particular of people of small means. He does not quote the correspondence, but he gives the dates of the letters which he wants given out. Mr. O'Connor's only reference to the matter is to the effect that there has been a disagreement between the two commissioners in regard to the publication of certain official documents.

COLLECTIONS IN WEST ARE SLOWER

Good Crop Prospects Maintains Confidence, However—Irrigation Projects Being Urged on Government

(Special to *The Monetary Times.*)

Winnipeg, June 24, 1920.

CROP reports throughout the west continue favorable, and it would seem that in almost all sections of western Canada the crops are to be the best in years. Growing conditions are ideal, and except for the slight damage from grasshoppers in southern Manitoba, which is being held in check, and for the rather serious wind storms around Lethbridge and in some spots of southern Alberta where drifting has been bad, the outlook is bright indeed. On the Portage plains wheat is already in the shot blade and the crop is looking splendid. Rain is needed in some localities, but on the whole there is plenty of moisture as yet.

The damage from drifting around Lethbridge was considerable but already this week good rains have fallen throughout Alberta which have helped things greatly. In blown-out areas, farmers are organizing to sow fall rye. Many organizations are urging on both Alberta and Dominion government the importance and urgency of irrigation. On irrigated land the crops are excellent.

The damage from grasshoppers of the actual amount of crop eaten is very small when the total area is considered.

Collections are somewhat slow this week.

CANADIAN BOND DEALERS
Inspecting Power Plant on Winnipeg River, June 18, 1920

BANK STATEMENT SHOWS CREDIT RESTRICTED

The summary of chartered banks' statements, as at May 31st, which will be given in detail next week, shows that current loans are practically unchanged, while call loans in Canada are substantially decreased. Deposits continue to grow. The principal figures, with comparisons, are as follows:—

	May, 1920.		Changes from April, 1920.
Note circulation	$ 226,335,037	+	$ 2,947,306
Demand deposits	645,957,229	—	6,961,531
Notice deposits	1,229,073,515	+	19,498,525
Total deposits in Canada ...	1,875,030,744	+	12,536,994
Deposits outside Canada	345,095,475	+	17,860,278
Current coin	80,198,600	—	3,149,897
Call loans in Canada	110,114,493	—	15,530,366
Call loans outside	213,964,182	+	7,734,731
Current loans in Canada	1,349,079,981	+	1,841,751
Current loans ousitde	183,986,222	—	1,098,802
Total assets	3,080,682,800	—	2,854,864

OUR FICKLE TRADE BALANCE

CANADA'S favorable trade balance, of which we boasted so proudly yesterday, is gone to-day. In fact the figures for the last two months of the fiscal year ended March 31st showed an unfavorable balance; for the year as a whole, exports exceeded imports by $174,975,929. The record is as follows:—

1919-20.	Imports.	Exports.
April	$ 54,255,229	$ 64,489,159
May	71,344,816	92,258,687
June	75,015,479	87,348,952
July	84,281,499	113.787,099
August	81,357,385	116,474,792
September	85,506,012	104,994,406
October	91,910,477	109,446,814
November	92,718,270	119,413,661
December	94,553,432	133,541,805
January	103,579,349	117,948,674
February	87,496,856	86,655,190
March	142,497,365	93,132,859
Total	$1,064,516,169	$1,239,492,098

April and May finds our unfavorable balance increasing still more rapidly, as the figures elsewhere in this issue show. Evidently the increase in buying was a more vigorous movement than the increase in selling, which resulted from the scarcity of goods in foreign markets rather than from the special attractiveness of Canadian goods.

The United States is retaining a better hold on foreign markets than is Canada. Figures just published from Washington show that the United States has rolled up a trade balance of approximately seventeen billion dollars against the world. This exceeds by several billions of dollars the total balance in favor of the United States from 1875 to 1914. The balance in favor of the United States in the fiscal year ended in 1914, one month before the war began, was only $470,000,000. During the first year of the war it was $1,094,419,600, and in the next year ended June 30, 1916, it was $2,135,599,375. During the suceeding year the total was $3,530,693,209. Meantime the United States had entered the struggle, and in the year ended June 30, 1918—the first full fiscal year of her participation—the balance was only $2,974,055,973. In the next year ended last June 30, however, it was $4,136,562,618.

During the first eleven months of the present fiscal year the balance was only $2,788,451,602, but exports were larger in those eleven months than in any other full fiscal year in the nation's history, totalling $7,474,193,349, as against the previous twelve months' record of $7,232,282,686, made during the last fiscal year.

At the same time that American export trade began to advance by leaps and bounds, the import trade also showed an enormous increase, totalling $2,917,883,510 in the year ended June 30, 1916, and advancing steadily each year to a new high record of $4,685,741,747 during the eleven months of the present fiscal year. The previous high record was $3,095,720,068 last year.

THE PROPOSED SHIPBUILDING MEASURE

BOLSTERING up inefficient industries has become too much of an every day occurrence with the Canadian government. Such a policy can only lead from bad to worse, and the latest proposal is distinctly more unsound than any so far carried out. On Monday last, the finance minister introduced a resolution to guarantee to companies building ships of 3,000 tons or over, one-half of the purchase price. The guarantee would take the form of a promissory note drawn by the company on the purchaser, and endorsed by the government. A lien on the ship would be the government's security. Twenty-five per cent. of the purchase price would have to be paid by the purchaser, and the remaining twenty-five per cent. would have to be financed by the company itself.

As has frequently been pointed out in these columns, shipbuilding is a mushroom industry which grew up in this country under exceptional circumstances. The keen demand for ocean tonnage is rapidly falling off, rates are being reduced, and values of ocean going ships are declining to a corresponding degree from their inflated levels. A summary of the present shipbuilding situation given elsewhere in this issue indicates that Canadian firms are quite unable to compete with the shipyards of the United Kingdom, and even the latter may have difficulty in keeping busy now that there is no longer a shortage of shipping. The credit of the Dominion should not be pledged on such a venture.

Strenuous opposition to the resolution was met with in the House of Commons. Hon. T. A. Crerar, the farmers' leader, said that if the purchaser and the shipbuilder were financially sound it was unnecessary for the government to give assistance. Experience in the case of the railways proved that guarantees should be avoided. He facetiously inquired if the government would endorse his note so that he could build a pulp mill. Hon. Frank Cahill stated that no person outside of a pawnshop would do what parliament was being asked to do. "A banker," he said, "would not be allowed to take the security the government is willing to accept. It would be against the law to do it. It is the most vicious legislation that has ever been presented in parliament. We tell the returned soldiers that we are not in a position to re-establish them properly, but we tell the people of foreign countries to come here and buy ships, with our assistance."

A LESSON IN RADICALISM

JUDGING by the names of the delegates who attended the convention of the American Federation of Labor in Montreal last week, the Anglo-Saxon is a small factor in the labor movement on this continent. Yet even this cosmopolitan gathering, including many delegates who are avowedly desirous of seeing the downfall of established government, failed by a vote of three to one to pass resolutions in favor of friendly relations with the Russian soviet. In fact an Anglo-Saxon representative of the Seamen's union scored one of the loudest rounds of applause when he declared that Lenin and Trotzky represented the people no more than did the former Czar; Bolshevism, he said, was not the thing for America.

The report of a British labor delegation which has just returned from Russia has practically elimated any sympathy for the Bolshevist which still existed in the United Kingdom. Elements which opposed conscription for military service find the Russian government conscripting the entire population for all classes of work. But curiously enough the same government, which commenced to run industrial plants by means of shop councils, has found it necessary to multiply the salaries of the former managers and foremen in order to maintain production at all. Russia has, in fact, outradicalled the radicals, and has carried socialism to its most extreme form, where the *de facto* government, supposedly representative of the popular will, is absolute in its power and in its methods of administration. A government which professes liberty but which practices tyranny cannot endure, for slavery in the name of liberty is slavery none the less.

But Russia's experience is no discouragement to the healthy spirit of progress which has guided more democratic nations. Great Britain's famous policy of conciliation and compromise is amply supported by her brilliant record during the war and during the industrial strife which has succeeded it. Human vision is too limited to permit of a successful revision of economic and political life in a year or in a decade. Advance rather takes the form of gradual change marked by successive milestones at which the nation stops to review the progress made so that its future course may be the more intelligently determined. Russia did not test the new before dispensing with the old; but Russia's loss is other nations' gain, for the unfortunate example confirms their accepted policy of reform, and at the same time reduces the danger of disastrous anarchy.

THE NEWSPRINT SUPPLY

PULPWOOD is an asset which Canada should guard with a watchful eye as to the future, for it is one which cannot be replaced except over a long period of years. A controversy has arisen between Canadian publishers, who claim that domestic requirements should be satisfied before any is exported, and publishers in the United States who depend upon the Canadian product. This would mean drastic action on the part of the Dominion government. It does not correspond to the generous treatment accorded to this country when the United States was allotting its coal supplies. Restrictions on the use of pulpwood should be placed upon the Canadian as well as the American consumer, and such restrictions can successfully be applied by carefully limiting the areas leased to the companies rather than by fixing the price or by directly controlling consumption.

In a letter to the "Wall Street Journal" of June 22, James White, assistant to the chairman of the Commission of Conservation, points out that the estimate that Canadian resources would last for 344 years at the present rate of consumption does not take into consideration the fact that many of these supplies will be inaccessible for an indefinite period. The extent to which the so-called pulpwood species are being used for the manufacture of lumber and other products is also overlooked, he says. Present available supplies are practically limited to the four eastern provinces. Continuing, Mr. White says:—

"A revised estimate by the commission, based upon the best available data from all sources, places the total of spruce and balsam, the species primarily used for newsprint, accessible and inaccessible at 561,000,000 cords, for eastern Canada. That which is accessible to existing transportation amounts to 421,000,000. With reasonable deduction for diameter limit restrictions, loss and waste in logging and stream driving and for merchantable material left uncut and which will be lost through insects, decay and windfall, the total on the basis of potential delivery is 301,000,000.

"This includes 100,000,000 cords in Ontario, 18 per cent. private; 155,000,000 cords in Quebec, 14 per cent. private; 26,000,000 cords in New Brunswick, 46 per cent. private; and 20,000,000 in Nova Scotia practically all private. As nearly as can be determined from census statistics the total of lumber and pulpwood consumption and pulpwood exports of spruce and balsam from these four provinces was in 1918, 5,500,000 cords, or fifty-five years' supply in eastern Canada at the 1918 rate of consumption, and the rate of cutting is increasing.

"It is inconceivable that the price of paper will ever rise to a figure justifying railways into muskeg areas where river timber belts are only two or three miles wide, and where local needs would consume the timber."

Nova Scotia miners are becoming restless, says a despatch from Glace Bay. Probably, not as restless as those who are still waiting for next winter's coal supply.

* * * * *

The oldest known code of laws, dating about 3,000 B.C., contains laws regulating rentals. Government control of rents is at present being advocated by parties who evidently wish to achieve a standard of civilization of 5,000 years ago.

* * * * *

The Canadian National Railways will construct a branch line extending fifty miles north of Prince Albert, to accommodate soldier settlers in the district, according to a statement of Hon. J. D. Reid in the House of Commons on June 8. Could not suitable land have been found along some of the superfluous lines already built in the west?

Exports

A special Department of this Bank is devoted to the interests of the foreign business of its customers.

Exporters and others having business relations with foreign countries are invited to avail themselves of the very complete information which has been gathered by the Bank's Foreign Department. This may be done through any one of the Bank's many branches.

PERSONAL NOTES

Mr. **Charles Camsell**, of the Dominion Geological Bureau, Vancouver, has been appointed deputy minister of mines for Canada.

Mr. **W. F. Alloway**, of Alloway and Champion, Winnipeg, has returned from a trip to the Orient, where he visited China, Japan and the Philippine Islands.

Mr. **W. J. Rooney**, who has been in the employ of Pellatt and Pellatt, Toronto stock brokers, for a number of years, has been admitted to partnership in the firm.

Mr. **J. H. Gundy**, of Wood, Gundy and Company, Toronto, who was elected president of the Bond Dealers' Association at their annual meeting held in Winnipeg last week, occupied the position of vice-president during the year just ended. He was connected with the Dominion Securities Corporation from 1900 until 1905, in which year the firm of Wood, Gundy and Company was organized. Outside of the bond field, Mr. Gundy has also rendered important services to the Dominion. He served as a member of the War Trade Board during the war, and is now in Europe, having been appointed by the Dominion government to represent Canada at the financial conference of the Allies in Brussels, in association with Sir George Perley, Canadian High Commissioner, and G. C. Cassels, of the Bank of Montreal, London.

Mr. **Henry J. Fuller**, president of the Canadian Fairbanks-Morse Company, Limited, has been elected to the directorate of the Gillette Safety Razor Company.

Sir **Thomas White**, former minister of finance for Canada, will re-enter law practice, and will open offices in the Dominion Bank Building, Toronto, early in September of this year.

Mr. **F. R. Hearne** has entered the service of Hearne and Van Norman, insurance brokers, Toronto, as a city representative. He is a son of Mr. F. G. Hearne, senior member of the firm.

Mr. **H. G. Vincent** has been appointed accountant and office manager of the provincial savings bank of Manitoba. He obtained his banking experience with the Canadian Bank of Commerce at Dauphin, Man., and at Edmonton, Alta.

Dr. **Tebyi Haiii**, one of the foremost business men of modern China, is on a visit to this continent as trade and labor commissioner from the Chinese government to Canada and the United States. He comes with the object of acquainting merchants and political students with the trend of events in modern China.

Mr. **C. J. Brittain**, formerly manager of the Winnipeg branch of the Canadian Fairhanks-Morse Company, Limited, has been appointed vice-president and general sales manager, with headquarters in Montreal, succeeding Mr. C. G. Drinkwater, who has been vice-president in charge of sales for many years and who has resigned to join the banking firm of Aldred and Company, Limited.

Mr. **Andrew J. Dawes**, who has been a director of the Merchants Bank of Canada for the past ten years, has been elected vice-president of the bank succeeding the late Mr. K. W. Blackwell. Mr. Dawes is president of the National Breweries, Limited, a director of the Bell Telephone Company, and chairman of the Montreal board of the London and Scottish Assurance Company.

Mr. **George Weir**, general manager for Canada of the London Guarantee and Accident Company, Limited, recently left for a trip to England and Scotland. Mr. Weir is combining business and pleasure, the latter feature being coupled with his successfully winning a place on the "Bisley" team in the recent elimination contests in Toronto. During the past year he has successfully carried off numerous trophies, among which was the Lieutenant-Governor's gold medal at the Ontario Rifle Association competitions.

Mr. **T. Percy Hill**, C.A., of Winnipeg, and J. C. **Crawford**, C.A., of Fort William, have formed a partnership under the firm name of Crawford, Hill and Company, with office in Winnipeg, Man. Mr. Hill is a member of the Dominion Association of Chartered Accountants, also a member of the American Institute of Accountants, and for a number of years was connected with Edwards, Morgan and Company, chartered accountants, at their Calgary office, later joining the staff of Lybrand, Ross Bros. and Montgomery, of New York, with whom he has been associated since the fall of 1918.

Mr. **J. H. C. Lawrence** has been appointed manager of the Manitoba branch of the Canada Permanent Mortgage Corporation in succession to Mr. George F. R. Harris, who will retire from that position on July 1st. Mr. Lawrence entered the service of the Canada Permanent in 1896 and occupied various positions of increasing importance with the corporation till 1910, when he accepted an offer from the Great West Life Assurance Company to act as inspector in Manitoba. Later, he was stationed at Regina and for the past seven years he has had charge of their loaning department for the northern portion of Alberta with an office in Edmonton.

TORONTO STOCK EXCHANGE ANNUAL

E. Gordon Wills,
President, Toronto Stock Exchange 1920-21

New officers were elected at the annual meeting of the Toronto Stock Exchange, held on June 22, as follows: President, E. Gordon Wills, Brouse, Mitchell and Co.; vice-president, J. C. Fraser, F. H. Deacon and Company; secretary, A. E. Duncanson, Duncanson, How and Company; treasurer, Malcolm Stobie, Stobie, Furlong and Company. Committee; Avern Pardoe, A. Pardoe, and Co.; Stuart B. Playfair, Playfair, Paterson, and Company; C. E. Abbs, A. E. Ames and Company. The retiring president was G. W. Blaikie, of G. W. Blaikie and Company, who was a member of the executive commitee for six years prior to being elected president last year. The new president has been with Brouse, Mitchell and Company since 1903, previous to which he represented A. E. Ames and Company on the floor of the exchange. The membership of the Toronto Stock Exchange has now increased to 56.

CROP CONDITIONS GENERALLY ARE NOW GOOD

Adequate Moisture and Good Growing Weather—Wind and Grasshoppers Have Done Some Damage—Ontario Crops Progressing

DETAILED crop reports for the areas served by the national railway lines in the west for the week ending June the 12th, are uniformly optimistic. Seeding may be said to be practically completed in all grains, and the crops are making rapid growth. The agents report plenty of moisture generally, and with the exception of the few who remark about high winds there is nothing in the report to dampen the bright expectations now held of a big crop in the prairie provinces this season.

Cutting Clover in Ontario

The following is a summary issued on June 22 by the Ontario Department of Agriculture:—

"Rain falls during the past week have more or less covered the province, and as a consequence all field crops have been much improved. The first cuttings of sweet clover and alfalfa have been made in several counties, and both crops as a rule are giving satisfaction. Red clover is heading, and will soon be ready for cutting, but it is short in stalk, and although now thickening after the recent generous showers it will be a comparatively light crop. Alsike is also described as having a low stand. Early potatoes are in blossom, but the bug is said to be prevalent, and the flea beetle is also doing injury to the crop. Middlesex reports that the potato beetle is also attacking tomato plants. Sugar beets are doing well, but Huron reports that mangels have been so disappointing that there has been a great demand for turnip seed. With recent rains all roots are doing better. Elgin reports that the bean acreage is smaller than usual, but that the crop is coming along well.

"Fall wheat is heading out nicely, but the straw will be shorter than usual, although recent rains have improved the general prospects of the crop. Lincoln makes mention of the appearance of loose smut, and Norfolk of injury from the Hessian fly. Spring grains have also picked up well since the rains, which were much needed."

Saskatchewan

A report of the Saskatchewan department of agriculture, issued on June 15, states that seeding is practically completed and that the recent rains have ensured good moisture conditions. All grains are making good growth and are as far advanced as in average years. Even in those parts of the province where it was feared that damage would be done by grasshoppers, the opinion prevails that the precautions taken by the farmers, aided by municipal and provincial organizations will be sufficient to hold these pests in check, or at the worst, will reduce the damage to a minimum. Not the least satisfactory part of the report is that the rains have induced a good growth of grass and the stock are fast recovering from the shortage caused by the long winter when it was almost impossible to obtain feed stuffs in sufficient quantities.

The fourth semi-monthly report, issued by the Alberta department of June 15, says:—

"The last semi-monthly report was favorable over the whole of the province with respect to moisture, progress of seeding and the improvement in live stock subject to some delay in the Peace River country on account of rains and to the beginning of a little blowing in Southern Alberta. During the past two weeks conditions have not improved in Southern Alberta. There have been a good many local showers rather widely distributed but there have not been any heavy general rains. The country is not going back from drought but there is required rain in order to keep up the lush growth of crop that has occurred so far.

"The slight injury to crop from wind reported at the first of the month has increased to a rather unfavorable extent. Statements with regard to soil blowing appearing early in June were rather broad and were apt to lead the reader to the conclusion that soil blowing was general in Southern Alberta. This was a mistake. While the injury that has taken place more recently is serious it should be understood that the injury is still to some degree local. The severe winds funnel through the Crow's Nest Pass following the valley of the Old Man River and sweeping such points as Kipp, Commerce and Monarch spreading north towards Slaresholm, and continue as far as the Bow River touching such points as Nobleford and points on the Suffield Branch of the Canadian Pacific Railway. A heavy dust storm occurred over this area on the 8th. It is not to be understood that within this area all crop is injured as moisture conditions in the soil have reduced the injury from wind. On light soil and particularly on summer-fallowed land the blowing has been serious and has caused considerable loss. The Noble Foundation with nineteen thousand acres of crop has had eight or nine hundred acres more or less injured by wind. The effects of blowing are shown at Barons, Ironsprings, Lomond, Travers and Enchant. The Noble Foundation has about four thousand out of its nineteen thousand acres in fall rye which is looking well. This crop promises to serve useful purposes on the lightest of the Southern Alberta soils besides furnishing good pasture in the fall and spring. It holds the soil in winter and will withstand the strong blows of summer which usually occur in June. Those who have crop blown out this season are now considering the reseeding with rye instead of oats or barley."

Manitoba Outlook Remains Good

The Manitoba Free Press, in presenting its third crop report, says it is most gratifying to find that in the last fifteen days there has been no general depreciation of the extremely satisfactory conditions which obtained early in June. The amount of wheat in shot-blade is rather surprisingly large, in view of the late seeding. When it is remembered that at this date in the famous year of 1915 the crop was just beginning to recover from a bad frost, the condition of the present crop gives much grounds for hope of an early and satisfactory harvest.

Chief interest centres around the grasshopper, and the feature of the reports is, that so far the percentage of crop actually eaten off is very small, that in a number of cases the crop eaten off is again coming, though it will be late, and, best of all, at every point where the poison bait has been applied long enough to give results, reports indicate that it has been most effective in keeping the hoppers in check. A limited amount of damage from cut worms is reported; they are worst in Alberta, but even there, they are in spots, and are reported as not of the travelling variety. There has been hail at a considerable number of points, but the damage reported is small, and in every case it is stated as not permanent.

Condition as to moisture is not quite so satisfactory as at last report. Forty points out of the two hundred and forty heard from need more rain than they have at present, though nearly all of these points state crops are not actually suffering and that sub-surface moisture is good. In addition to the forty points five others report moisture conditions as really bad, immediate rain being necessary to save the crop from serious depreciation.

With the exception of the very serious wind disaster in forty townships in southern Alberta, wind damage since last report has been very slight. The only other point reporting serious blowing is Youngstown, on the Saskatchewan-Calgary branch of the C.N.R., where ten per cent. of the crop is blown out; there, considerable recovery is expected.

Canadian Press Summary

Crop prospects in Canada, from coast to coast, in regard to grains, fruits and vegetables, according to reports gathered by the Canadian Press, Limited, on June 22, gives reasonable ground for optimism as to Canada's agricultural and horticultural production for the year 1920. In the fruit growing districts of eastern Canada, the prospects are for

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

bumper crops, and there is already great anxiety as to securing help for the harvesting of them.

Western Canada wheat reports are optimistic. In some parts of Ontario record crops of wheat and oats are promised, while other grains are also doing well. The same is true, generally speaking, of the reports from Quebec and the maritime provinces. Potatoes are doing well in practically all centres, although the area seeded was restricted. The various pests are making themselves felt—cut-worms and grasshoppers are being fought. There is still danger from frosts, and the help problem is ever in sight—but so far as actual growth is concerned, Canada's crops are in a remarkably favorable position.

Plenteous showers during the last week have worked wonders in the agricultural and horticultural districts centreing on Toronto and throughout central Ontario. Fields which were given up as dead, following the unusually dry month of May, have suddenly changed to green, and the tardy and withered fall wheat crops have put on several inches in growth. Oats, barley and wheat promise big yields; potatoes and roots are coming along well, and the vegetable plots in Toronto suburbs are very promising. Strawberries have grown to record sizes, and a few days' sunshine will put on the market a very heavy berry crop.

Province of Quebec

The grain harvest through the province of Quebec is likely to be satisfactory, according to latest despatches. In the counties south and west of Montreal, namely, Terrebonne, Hull, Pontiac and Argenteuil, and a few others, the severe frost of last winter, coupled with the thin coating of snow, has almost destroyed hay prospects. In the Matapedia and Baie des Chaleurs regions excessive dryness is also causing damage to hay. In the old counties, however, the harvest will, as usual, be very valuable, and farmers are optimistic. Around Montreal, very warm spring weather, followed by generous rains, give promise of good crops of wheat, corn and oats. The apple yield is expected to be exceptionally heavy.

Maritime Provinces

The hay crop in New Brunswick will be light. Grain thus far is looking well, and the same may be said of vegetables. The potato bug, however, is reported to be rather more plentiful than usual in many districts. The apple crop promises to be at least an average one. The strawberry crop looks light because of lack of rain.

Crop prospects in Nova Scotia are most encouraging. An unusually large crop of roots, grains and potatoes has been seeded, and present indications are that a record harvest will follow. It is estimated that the apple crop will total one-half of last year's record harvest of 1,500,000 barrels.

Prospects are for a good yield of fruit in British Columbia this season, and the outlook for a heavy crop, according to reports received from all districts, is favorable, according to information given out on June 22 by the provincial Fruit Inspector's office in Vancouver. The season so far has been favorable to growing, and it is anticipated that the yield will be equal or greater than last year's crop.

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended June 18, 1920, in provinces, as compared with those of previous weeks and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.

BANK BRANCH NOTES

Four New Branches Announced This Week—Branch in London, Eng., Will be Opened August 1st, by Bank of Nova Scotia

The following is a list of branches of Canadian banks which have been opened recently:—

St. Elzear, Que.	Banque d'Hochelaga
Jonquieres, Que.	Banque d'Hochelaga
Leterrier, Man.	Banque d'Hochelaga
Enderby, B.C.	Bank of Hamilton

Nova Scotia's London Branch

The Bank of Nova Scotia has decided to enter the European field by opening a branch office in London. Arrangements were completed during the recent visit to England of J. A. McLeod, assistant general manager, and it is expected that the branch will be opened about August 1st. It is to be situated in the heart of the financial district of the city. The bank took steps some six years ago to open an office in London and the general manager, H. A. Richardson, was in England, for that purpose, when the war broke out in 1914, and the plan had to be postponed. The manager of the branch will be E. C. McLeod, who, for the past seven years, has been manager of the Kingston, Jamaica, branch.

The Molsons Bank has a permit to build a bank on the corner of Bernard and Park Ave., Montreal, costing $36,000.

The Canadian Bank of Commerce are planning to build twelve new buildings throughout Alberta and Saskatchewan.

The Union Bank of Canada announces the appointment of Arthur Dunbar, formerly manager at Lethbridge, Alta., to be inspector of branch returns at Toronto.

The Royal Bank of Canada are building new branches at the corner of Gage Ave. and Main St., and at the corner of Boston and Lottridge Streets, Hamilton.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended June 24th, 1920, compared with the corresponding week last year:—

	Week ending June 24, '20.	Week ending June 26, '19.		Changes.
Montreal	$139,512,264	$131,074,406	+	$ 8,437,858
Toronto	106,241,058	78,698,800	+	27,542,258

Coming Crisis in Canadian Shipbuilding Industry

Hundred Million Dollar Industry Built Up in War Time is Threatened with Extinction—Ocean Tonnage is now Equal to Demand, and Rates are Coming Down, But Dominion Government is Still Building Ships — British Ship-builders in Strongest Position

By GEORGE W. AUSTEN

IS the death of Canada's war-time steel shipbuilding industry decreed by inevitable circumstance? Is the $58,000,000 invested in plant, and the $40,000,000 invested in contingent industry, such as engines, fittings, machinery, etc., to become non-productive? These are serious questions facing Canada to-day. The shipbuilding industry employs 23,500 men, and about the same number are employed in the contingent industries. On the usual average, therefore, it is safe to say that at least 200,000 persons are dependent on this industry.

Most of the steel shipyards still have orders for government freighters. About twenty-seven of the sixty-three vessels ordered by the government have been delivered, another ten are being finished, and another fifteen are well advanced. By autumn, most of the berths will be clear, unless new orders are received in the meantime. What then? Several of the large shipyard companies have stated to the writer that they expect to be forced to close. The Vickers Co., of Montreal, for instance, has four vessels in hand for Norwegian interests, the third of which has been launched. They will be completed by autumn. Keen searching has not brought further orders from Europe. The government has in mind building one or two 15,000-ton cargo and passenger liners, but these will probably have to be built in Nova Scotia. In the hope of being able to obtain foreign business, the shipyard interests have appealed to the Dominion government for subsidies, or for credits to enable them to get orders from countries whose currency is at present at a heavy discount here. The Dominion government is favorably minded, judging by the expressions of the minister of marine and fisheries and Sir George Foster, but the question is whether even the government subsidies will be sufficient to offset handicaps.

British Prices are Lower

As Mr. Edmund Bristol, M.P., said in the House of Commons recently, the British shipbuilders' prices of about $150 a ton can be lowered if necessary to get business. The lowest price at which a Dominion freighter is being built is $167.50 a ton. Earlier vessels cost as high as $210. If to such a price, be added 20 per cent. for exchange, plus recent increases in costs, the cost to European shippers of vessels built here, would probably be $225 a ton. The British price of $150 looks cheap beside that figure. This is the real crux of the problem. A comparison of labor costs as between Clyde shipyards and Montreal and Vancouver yards, shows 50 per cent. difference in favor of the Clyde. Perhaps, the Canadian workers produce more, but the yard organizations are necessarily much more primitive. Moreover, the Canadian shipbuilder has to pay duty on much of his material. Building ships in a "protectionist" country, in competition with Britain is a difficult job. During the war, as Sir Auckland Geddes revealed to an enquirer, the British government paid a subsidy of about $20 a ton on ship-plates. This subsidy ended in January, 1919, but the protection now afforded by adverse exchange against North American competition offset the loss ten times over. At present British shipyards are booked months ahead with business, and have regained their tonnage lead over the American yards,

Subsidizing Would be Costly

What, therefore, can be done to protect this valuable industry? It seems that both long-term credits to foreign interests, plus a tonnage subsidy would be needed. The French government was willing to buy almost the whole Canadian merchant marine at one time, if the exchange problem could be overcome. France would still place large orders in Canada at good prices if payment were deferred for 15 or 20 years. Half of the French marine was destroyed during the war. But there is reason to fear that even such credits as this would only be temporary help. Mr. Bristol, who, as a director of the Canada Steamships, has followed the shipping industry with close attention, told the House of Commons that if the next five or ten years could be bridged, our shipbuilding industry could be organized on a permanent basis. But the world tonnage situation interferes.

No Shortage in Tonnage

There is now in existence five million tons more ocean shipping than before the war. The British merchant fleet is, with the German vessels to be turned over, almost equal to its pre-war strength. The United States Shipping Board is operating 1,200 vessels on the ocean, or eight or nine million tons, and the United States will have twelve million tons within the year. Even now, the tonnage is becoming so plentiful at times that ships travel in ballast, and rates have been cut below cost. A recent international conference, called by the U.S. Shipping Board, agreed to maintain rates on the north Atlantic. If port delays did not tie ships up weeks at a time, in loading and unloading, the growing tonnage would have more effect on rates. On March 31 of this year, there were about seven million tons of ships building. The future, therefore, is far from bright for shipbuilding.

In Japan, the big slump has already occurred. At the armistice period, Osaka had one hundred shipyards, turning out ships at a rate of 500,000 tons a year. Now it has twenty, with half the capacity. Rates have fallen to one-half of what they were. In the United States, many yards are closing, even though orders for half a million tons of ships have been obtained for private interests, supplementing the remaining orders of the Shipping Board. If the British output be estimated at two million tons a year, the United States at a million and a-half—allowing for reduced force—Japan's at 250,000 tons, Canada's at 150,000 tons, and Continental Europe's at 500,000 tons, we have an annual output, on a diminished basis, of about five million tons. This is far in excess of the ordinary requirements of trade growth. Only the exceptional commerce consequent on filling up the commodity vacuum of the war period creates ample business for the present tonnage. In another year, at present rates of progress, the period of saturation will have been reached.

Before the war British shipbuilders turned out tonnage at about $40. They will probably never return to anything like that basis, because costs of food, and materials are about as high in Britain as on this continent. But if orders for ships are hard to obtain, the British shipbuilder can reduce his price to $125 a ton probably, and still make ends meet.

Canada is eighth among the nations in the size of her marine, and fifth in shipbuilding production. Costs of ships here compare favorably with American costs, but, unfortunately, outside business, following Dominion government orders, must come from Europe, South America, or Africa, and only the fact that British yards are still booked far ahead turns business our way from such sources. When the slack comes, as it must, what of our $100,000,000 industry?

B. C. INSURANCE ASSOCIATIONS MEET

Insurance Federation, Automobile Underwriters' Association and Vancouver Fire Agents' Association—State Insurance Movement Successfully Opposed

(Special to *The Monetary Times.*)

Vancouver, June 15th, 1920.

AT the second annual meeting of the Vancouver Fire Agents' Association, held last week, the following officers were elected: President, George L. Schetky; vice-president, H. B. Leuty; secretary-treasurer, A. E. Goodman. The secretary reported that out of 106 first and second fire agents doing business in Vancouver, 105 had signed the by-laws and constitution, and the pledge to abide by the rules as regards fair dealing between each other and as regards other important conditions tending to improve the working arrangements with the companies and promote a better feeling and more honorable attitude between agents.

It was decided by resolution to ask certain institutions which have erected fine business blocks in Vancouver, and who though operating in the province, were placing their fire insurance on these buildings outside the province, to do so no longer, but place their risks with local agents, thus complying with the British Columbia Insurance Act which stipulates that all insurance policies covering properties in the province of British Columbia must be signed by an agent resident in the province.

Insurance Federation Meeting

The annual meeting of the Insurance Federation of British Columbia took place on June 9th, when the following officers were elected: President, A. Z. DeLong; vice-president, E. P. Withrow; secretary-treasurer, A. E. Goodman. In the address of Wm. Thompson, the retiring president, it was pointed out that the insurance men of British Columbia had had a very strenuous year apart from their ordinary business duties, in fighting threatened provincial legislation adverse to the interests not only of the insurance companies but to the public generally. The results were on the whole satisfactory and it was not too much to say, that the withdrawal of the Bell fire insurance bill or drafted bill, and the abandonment of the government state health insurance legislation at the last session of the legislature was in a large measure due to these efforts; however, although much had been done to educate the people to the inadvisability of the British Columbia government adopting any measure of state insurance, the insurance interests should, nevertheless be prepared for what might happen at the next session of the legislature in 1921.

Unlicensed Competition

The question of taxing unlicensed insurance companies came up for consideration. No action was taken. It was pointed out that unlicensed companies were operating in the province but the government of British Columbia would not proceed against them unless a complaint was formally made to the attorney-general by a private citizen and such complaint referred to the government by the attorney-general. As no private citizen cared to take the initiative, nothing had been done.

It was stated that unlicensed companies had done $300,000,000 worth of business in Canada during 1919 and it had been suggested that the federal authorities in their anxiety to raise money might tax these companies 15 per cent. on the net premium income. Protests against this proposed tax might have gone forward to Ottawa, but the insurance interests here had not been given an opportunity to express their views in an effective manner.

Automobile Association

The British Columbia Automobile Underwriters' Association held their annual meeting in Vancouver on June 10th, when the following officers were elected: E. P. Withrow, president; R. Winckler, vice-president; A. E. Goodman, secretary-treasurer and stamping officer. The report of the retiring president, Donald Cramer, showed that 54 companies out of 58 doing an automobile insurance business in British Columbia were members of the association, also that the loss ratio of the companies during the year in the province had not been such as to warrant any substantial cut in the rates.

The secretary's report showed that some 1,400 applications had been stamped in the past twelve months and that business was growing rapidly, as there were many new cars coming into the city and many cars not theretofore insured were being brought into the fold.

New Rating System

The report of the rating committee was adopted in its entirety. It was decided to change the entire system of rating automobiles to conform to the basic system adopted by the United States and eastern Canada. In other words cars will be listed by number and rated according to merit, as to construction, etc. The rates for Vancouver and within a radious of 50 miles from the post office, so far as liability, property damage and collision is concerned will be the same as those in use in Toronto with the exception that five per cent. will be allowed off the property damage rate if loss of use cover is not required. In collision, trucks are given a slight advantage over converted delivery cars. Vancouver Island and other points not specially indicated will get a liberal reduction off all rates and will conform somewhat closely to the rates as they apply to the rural districts of Ontario.

In the fire and theft rating the eastern system has also been adopted, but owing to the satisfactory experience on theft in Vancouver and Victoria theft rates are to be lower than those in the east. It is impossible to get "clean" away with a car in Victoria and very difficult in Vancouver. It will be found that in comparison with the rates at present in use in this province, however, that liability will be somewhat lower on account of favorable experience. Experience, however, has necessitated a slight increase in property damage. The experience in collision warrants an increase in rates for this risk, particularly as before another year is out the "rule of the road" is to be changed requiring autos to turn to the right instead of the left and it is expected that many accidents will result until auto owners become accustomed to the change so that their subconscious mind will act without effort.

Some Reductions

Fire rates will be considerable lower, while theft rates will be slightly higher because, although experience has not shown heavy losses in the past, the risk is becoming a greater hazard in fact at the request of the Automobile Underwriters' Association a squad of detectives have been added to the police force to run down "booze" runners, auto thieves, and joy riders; so far as "booze" runners are concerned there have been instances where a car has been first stolen from the owner, then stolen from the thief and run across the "line" full of case whiskey. In each instance the culprits have been caught and the car returned.

Abstract of return of companies doing an insurance business in British Columbia in classes as below, during the year 1919:—

	No. of companies.	Premiums earned.	Losses.
Automobile	51	$ 423,094.50	$ 142,563.38
Accident	31	249,607.73	113,586.92
Sickness	22	106,429.80	65,037.72
Burglary	13	5,483.55	1,202.37
Liability	22	42,654.51	34,349.44
Guarantee	18	53,688.78	12,572.59
Plate glass	18	42,911.89	21,334.35
Marine	30	447,849.98	209,732.78
Miscellaneous	22	32,907.21	794.77
Total		$1,404,647.95	$ 601,174.30

Unsettled claims .... $ 172,362.80.

Trade Balance For Two Months Is Reversed

While Exports Fall Off, All Classes of Imports Have Increased—Merchandise Entered For Consumption Exceeded That Sent Out of the Dominion By More Than Eighty Millions—Principal Changes in Agricultural and Animal Productions, Textile and Wood and Paper

CANADIAN trade for April and May, 1920, the first two months of the fiscal year, reached a grand total of $348,027,372, representing an increase of $58,688,074 over the same period in 1919. Exports, however, show a reduction of $26,048,882. For the first two months of the previous year, exports were $31,147,801 in excess of imports, but now that position is reversed, the adverse balance for the two months at the end of May last, being $81,039,570.

Under imports, agricultural and vegetable products, animals and animal products and iron and steel, show the principal increases, while the same classes under exports, reveal the most notable declines. An appreciable advance is shown in the export of wood, paper, etc., which were the only products that made advances worthy of mention. Imports of fibres and textiles were more than $31,500,000 higher than in the previous year, while exports of the same products were also slightly higher.

The showing made for the month of May was generally better than in the preceding month, but decidedly less favorable than the same month a year ago. While exports increased $23,986,192 over the April figure, there was a reduction of $14,916,009, as compared with May, 1919. Imports, on the other hand, made big advances both for the month and the year.

A summary of Canadian trade by classes, compiled by the Department of Customs, gives the following results:—

IMPORTS ENTERED FOR HOME CONSUMPTION

MANUFACTURERS RETURN FROM CONVENTION

Other Cities of West Visited on Journey Back—Increase in Railroad Freight Rates Predicted—The Tariff and Prices

AFTER spending June 7, 8 and 9 in Vancouver, where the business sessions of the Canadian Manufacturers' convention were held, the delegates went to Victoria on the 10th, where they remained until Saturday. In this city hey were the guests of the Rotary Club, and were taken o various points on the island. On their return they spent part of the 15th in Saskatoon, and part of the 16th in Winnipeg.

In addition to the resolutions already mentioned in these columns, another resolution, passed at the convenion in Vancouver, requested the Canadian government to supplement the present declaration of country of origin which accompanies all imports, by the requirement that such mports, particularly of manufactured goods, be marked, or have affixed to them in an unmistakable manner an indicaion to the ultimate consumer of the country in which they were manufactured. With a view to stimulating Canadian export trade, a request was made to the Department of Trade and Commerce that proper facilities be provided trade commissioners in the various countries to which they are appointed, that will enable them to effectively display Canadian manufactured goods for which there might be a market n those respective countries.

Higher Freight Rates

S. B. Brown, of Toronto, assistant manager of the transportation department of the Canadian Manufacturers' Association, predicted an increase in freight rates, some idea of which might be gained, he said, by freight rate increases n the United States. Mr. Brown did not, however, think hat the increase would be as high as 26 to 30 per cent. as the American roads had applied for. He considered the $33,000,000 deficit of the Canadian National Railways during the past fiscal year the biggest single agency liable to bring about the increase, "but another," he said, "and not so generally known, is that the C.P.R. boasted a net surplus of about $840,000 in the past year operated. This, in the opinion of transportation men, is far too small. The Canadian Pacific Railway's proportion of operating expenses to revenue ran somewhere in the neighborhood of 85 cents to the dollar, when American railway economists insist that 70 cents to the dollar is getting to the danger point."

The by-laws of the B.C. division were amended, the name of the Pacific Coast Division being changed to British Columbia Division.

In moving the tariff report Mr. S. R. Parson, Montreal, declared that manufacturers were not pirates nor were they robbers. All they wanted was a national revenue and employment for Canadian workmen. He said it was not true that the war tax had been imposed at the instigation of the manufacturers, but the manufacturers accepted it as they always accept government pronouncements, as patriot citizens should. The charge that the manufacturers are opposed to the removal of the war tax is also untrue he said. Some of them had suffered a loss as a result of that impost. It was a false view that if the tariff is removed commodities would be cheaper. Revenue has to be secured, he declared, and if not secured in the form of duties, then it must come through other channels. The farmers of this country has not paid 1 per cent. of the income tax, said Mr. Parsons. If, therefore, there is removal of the customs duties, the farmers would have little to pay, but he was sure this was not what was wanted by the farmers, but that they are willing to bear their fair share. The vast majority of manufacturers are making but a very reasonable return.

J. O. Thom, Winnipeg, said his firm was manufacturing in Toronto and Winnipeg, and they have to pay 50 per cent. more on raw materials than his firm did before the war.

GROUP INSURANCE BUSINESS SLACKENS

Few Contracts Reported Written in May—Uncertain Outlook is Cause, But Recovery in Fall is Anticipated

LABOR unrest is assigned by life companies as the principal reason why very few new group insurance contracts were written during May. This is a temporary condition, however. "I expect that in the fall we will again be doing as much business as ever," said M. D. Johnson, of Johnson and Orr, Toronto, agents for the Aetna Life, which company has written a large part of the group business so far done in Canada. Mr. Johnson also pointed out that the large volume written shortly after this class of business was authorized, is accounted for in part by the fact that many of the firms had previously decided to try it out.

Contracts were closed in May by the Canada Life Assurance Co. as follows: McIntyre, Sons and Co., Ltd., Montreal; P. B. Yates Machine Co., Ltd., Hamilton; Rideau Club, Ottawa.

The Aetna Life Insurance Co., Hartford, Conn., added the following companies to its list of policyholders: Western Canada Motor Car Co., Winnipeg, Man.; Hiram Walker and Sons Metal Products, Ltd., Walkerville, Ont.; Dowsley Spring and Axle Co., Ltd., Chatham, Ont.

L. E. Waterman Co., Ltd., Montreal, completed a policy with the Sun Life Assurance Co., of Canada, covering employees at the St. Lambert, Que., factory. The insurance ranges from $500, increasing $100 every year to $1,000. Walter Blue and Co., Ltd., clothing and cloth manufacturers, of Sherbrooke, Coaticook and Montreal, Que., have also closed a contract with the Sun Life, covering all employees for $500, which is increased by $100 for each year with a maximum of $1,000.

The last annual report of the New Brunswick Telephone Co., stated that 571 employees were insured for a total of $537,400 at a total annual premium of $4,171.31. Three deaths occurred since the policies were taken, on which claims amounting to $3,500 were paid.

DECLINE IN VOLUME OF EMPLOYMENT

The Employment Service of the Department of Labor reports that returns from the Dominion and provincial offices of the Employment Service of Canada for the week ended June 5th, show a decrease in placements, when compared with the returns for the preceding week. The decline may be attributed to the closing of nine temporary offices in Ontario and Quebec. The offices reported that 6,932 applicants had been referred to regular positions and 6,202 placements were effected. This is a decrease of 109, when compared with the returns for the preceding week, when 6,311 applicants were placed. In addition, 1,674 casual jobs were supplied, as compared with 1,689 during the week ended May 29.

During the week 7,700 applicants were registered, of whom 6,749 were men and 951 were women. This is an increase of 288 applicants when compared with 7,412 registrations during the preceding week. The number of vacancies noted by employers to the Service during the week totalled 8,152, of which 6,966 were for men and 1,186 were for women workers. When compared with 7,581 vacancies notified during the preceding week, an increase of 571 is represented. Of the placements in regular employment 5,701 were men and 501 were women. The number of ex-service men reported as placed was 1,389.

Messrs. Stobie, Forlong and Co., members of the Toronto Stock Exchange, with offices both in Toronto and Hamilton, Ont., have announced the opening of another branch at 103 Dalhousie Street, Brantford, Ont., under the management of A. E. Lyon, resident partner.

DAIRY FACTORY PRODUCTION IN 1919

Total Value Was $133,653,493, Compared With $107,340,850 in 1918—Condensed Milk Industry is Expanding

THE number of dairy factories in operation in Canada in 1919 was 3,343, comprising 1,043 creameries, 1,835 cheese factories, 442 combined butter and cheese factories and 23 condensed milk factories. The number of cheese factories was less in 1919 than in 1918, while the numbers of creameries, combined factories and condensed milk factories increased. These figures are given in a statement just issued by the Dominion Bureau of Statistics.

The quantity of creamery butter made in 1919 was 101,554,131 pounds, valued at $55,182,422 compared with 93,298,348 pounds valued at $41,859,156 in 1918. The quantity of cheese made in 1919 was 167,734,982 pounds valued at $44,805,794, compared with 174,878,313 pounds valued at $39,456,532 in 1918. The average wholesale price of creamery butter in 1919 for the Dominion was 54 cents per pound compared with 45 cents in 1918, and of cheese 26½ cents per pound, compared with 22½ cents in 1918.

Condensed and Evaporated Milk

Condensed milk shows an increase in production over the previous year, being 61,898,303 pounds, valued at $9,425,076 in 1919, and 40,700,209 pounds, valued at $5,711,174 in 1918. Evaporated milk on the other hand shows a decrease, being 16,107,934 pounds valued at $1,789,089 in 1919, and 38,612,367 pounds, valued at $4,048,055 in 1918. The quantity of milk powder made in 1919 was 6,591,099 pounds valued at $1,539,272 and in 1918 it was 5,530,915 pounds, valued at $1,388,248.

Other products of dairy factories in 1919 comprised whey butter, (all in Ontario) 1,396,814 pounds, valued at $661,373; casein, 199,013 pounds, valued at $32,588; sterilized milk, 7,460,400 pounds, valued at $852,080; skim condensed milk, 494,973 pounds valued at $32,921; ice cream sold 2,892,974 gallons, valued at $3,715,488; whole milk sold, 22,398,786 gallons, valued at $10,377,292; cream sold, 6,380,727 (pounds of butter fat) valued at $4,718,678; and miscellaneous items of buttermilk, whey cream and whey to the value of $521,420.

The total value of products of dairy factories in 1919 was $133,653,493 compared with $107,340,850 in 1918.

GRAIN INSURANCE ASSOCIATION

The annual meeting of the Grain Insurance Association was held on the 16th inst. in Montreal. The reports showed that the current season's operations were resulting favorably. Members feel that the inspection service is becoming effective, and that individual losses can be held to a reasonable percentage. A reduction in rate is proposed for the 1920-1921 season. F. H. Harrison is manager of the association.

WESTERN CANADA FIRE UNDERWRITERS

The annual meeting of the Western Canada Fire Underwriters' Association was held in Montreal on the 15th and 16th instant under the presidency of John Pickering, Winnipeg. In addition to Mr. Pickering, the following members were present from Winnipeg: C. A. Pickering (Occidental), John Holroyde (Commercial Union), W. P. Fess (American Central), F. T. Bryers (British America), Thos. Bruce (Union of England), W. Penny (General of Paris), F. W. Pace (Yorkshire). K. J. Henderson (Moose Jaw), and A. H. S. Stead (secretary of the association). The western agents were represented by H. E. Middleton, Chas. Anderson and Mr. McIntyre. Many Toronto members were also present. A considerable amount of business of interest to the association was transacted. The new officers elected were. President, W. P. Fess; vice-president, A. W. Blake.

COMPETITION FOR BANKING BUSINESS

Some Ideas of a Suburban Branch Bank Manager—Courteous Service and Convenient Buildings are Best Means of Securing Business

(Contributed.)

IN these days of keen competition and where competitive branches of banks have the same facilities to offer the public, one wonders if it is possible to get ahead of the other fellow in a legitimate and fair manner, and I have a few suggestions to offer on these lines.

Efficient, courteous service is one of the bank's strongest assets and I think that the executive cannot make a too close study of the material they have in relation to the positions they assign, particularly those positions coming in direct contact with the public. The advertisement to a bank, fortunate to have tellers and ledger keepers of good manners and address, courteous and obliging, is worth more than tons of printed matter, booklets or circulars.

Adaptability of Branch Bank Buildings

Is it fully realized how great an advertisement a branch bank building may be, not as an ornate and imposing structure, so much as by the conveniences it offers the public. Take the case of a new building erected on a corner, and, say, in a business section, how often you see an imposing entrance right on the corner and with half a dozen or more steps to climb before you can get inside. Consider the waste of time and energy in climbing and coming down those steps, and the menace they are to old people and young children at all times, and especially so in the long winters. A building on a corner, should, to my mind, have two doors opening one to each street, for by this, greater facilities are offered the public for the quick despatch of business, and crowding and congestion are avoided. Then, if you must have steps, let them be as few as possible and as broad and low as possible. Inside the building, all the space it is possible to allow, should be given the public, and their every convenience studied and cared for.

Cutthroat competition, canvassing and other methods of like nature may be called aggressive and smart, but I consider they are lowering and degrading to the dignity of banking, and are bound sooner or later to react on the institution practising the same, but on the other hand, quick, efficient, courteous service, together with a bank building in which the customers' interests and convenience have been studied throughout, will add to the prestige and business of the bank.

LONDON AND SCOTTISH ASSURANCE CORPORATION

Assets totalling £5,771,642 are shown in the balance sheet of the London and Scottish Assurance Corporation, as at December 31, 1919. This, it will be remembered, is the new name of the London and Lancashire Life and General Assurance Corporation. Investments total £3,846,881, policy loans £355,784, mortgages £428,861 and agents' balances £328,937. The authorized capital is £1,000,000, of which £600,000 is subscribed and £120,000 paid up. The funds total £5,018,325, including the paid-up capital, the investment reserve of £109,320, reserve fund of £60,000 and £23,126 in profit and loss. The profit and loss account for the year shows £11,872 brought forward from 1918, £20,260 interest and dividends, £27,526 transferred from fire insurance account and £1,902 transferred from accident, employers' liability and general insurance account. The balance carried forward after paying dividends, etc., is £34,243.

Assets of the Scottish Metropolitan Assurance Co., which is associated with the London and Scottish, total £1,646,980, of which investments comprise £1,124,589. The funds, including the paid-up capital of £80,000, total £1,329,579. A balance of £11,015 is carried forward in the profit and loss account, compared with £8,719 brought forward from 1918.

Holders of City of Saskatoon debentures, payable at the Union Bank of Canada in Toronto and Montreal, are requested to present their interest coupons, due July 1st, 1920, for payment at the Bank of Montreal in either of the above-mentioned cities.

J. C. OLIVER,
City Treasurer.
Saskatoon, June 7th, 1920. 171

QUALIFICATIONS OF LIFE INSURANCE AGENTS

Assured Takes Agent's Word For it, and Sometimes Has Wrong Conception of His Policy—Should an Examination be Required?

(Contributed.)

THAT a life insurance agent be compelled to pass a reasonable examination as to his knowledge of the business before he receives a license, is the persistent demand made by many of our foremost life insurance underwriters. When one pauses to think it over, the wonder is that such a requirement should not have been made years ago.

The time has arrived when men in nearly every walk of life are adding to their estates very largely by means of life insurance. Many of those men have but a slight knowledge of the fundamentals of insurance. Others have practically no knowledge of the laws relating to beneficiaries. Such men accept, as a rule, the statements of the agent who writes the business.

If mistakes be made or inaccurate information be given, it is possible that the insurance may find its way into altogether different channels than the insured intended. This is in event of death. There is also no doubt but that many people are carrying policies different from what they believe they are carrying. On maturity of policies, such people will, if living, be confronted with a grave disappointment.

Insurance an Important Contract

Innumerable instances could doubtless be given where the insuring public have been misinformed by agents who presumably did not know their business. After all, there is something anomalous in a system that permits a man wholly unqualified and inexperienced to complete papers involving possibly thousands of dollars to an estate, and because of his lack of knowledge, giving incorrect information in relation thereto. The better class of insurance men in every province, we believe, would welcome regulations compelling every present holder of a license and every future applicant for a license, to come first before an examining board and there give evidence as to his qualifications.

With approximately seven hundred millions of insurance written by line companies in Canada last year, clearly the time has arrived when no man should be trusted with a rate-book who is not duly qualified.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended June 18th: McKinley Darragh, 80,410; Dominion Reduction, 64,000; O'Brien Mine, 64,000; LaRose Mine, 81,207; Nipissing Mine, 447,241; Coniagas Mines, 173,797; Mining Corporation of Canada, 130,301. The total since January is 10,961,178 pounds, or 5,480.5 tons.

TORONTO STOCK EXCHANGE COMMISSIONS

As announced in these columns last week, the Toronto Stock Exchange has adopted a new scale of commissions to apply to listed and unlisted stocks, both general and mining. This new schedule cancels all special rulings. The following are to be the charges: On shares selling under 5 cents, ⅛ cent per share; at 5 cents and under 10 cents, ¼ cent per share; at 10 cents and under 50 cents, ½ cent per share; at 50 cents and under $1, 1 cent per share; at $1 and under $2, 2 cents per share; at $2 and under $3, 3 cents per share; at $3 and under $5, 6¼ cents per share; at $5 and under $10, 12½ cents per share; at $10 and under $150, 25 cents per share; at $150 and under $200, 37½ cents per share; at $200 and up, 50 cents per share. The minimum charge will be 50 cents.

METHODIST CHURCH WRITES LARGE INSURANCE

From July, 1919, when the Methodist Church decided at its annual conference to organize an insurance agency, $1,954,668 in fire insurance was placed up to April 24, 1920. This figure was given in a report to the Methodist Insurance conference at Woodstock early this month. The business is handled by the Methodist Church Insurance Commission, which is registered as an insurance agency, and obtains the commissions which formerly went to local agents when the individual churches placed their own insurance. The premiums on the business written so far have totalled $11,369. Each church is still responsible for its own property, however, and whether insurance is placed at all, or whether it is placed through the commission, is at its own option. Figures submitted showed that out of 3,498 properties registered, 695 do not carry any insurance. The total number of properties owned by Methodist churches in Canada is about 5,000.

Condensed Advertisements

"Positions Wanted," 2c per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged

HOW MANITOBA'S BANK WILL BE MANAGED

Regulations Issued by Provincial Government—Books Subject to Inspection of Comptroller-General—Reserve Fund Not Necessary, Says Provincial Treasurer

MANITOBA'S plan for the financing of the rural credit societies will soon be put into effect. A site for a branch in the city of Winnipeg has been secured in the Lindsay Building, at the corner of Garry Street and Ellice Avenue, and it will be opened in July. The system will be operated under the authority of the Provincial Savings Act, passed at the last session of the legislature. A central board, composed of E. A. Weir (chairman), A. Fisher, J. R. Murray, F. J. Colyer and J. W. McWuay, will administer the act, the first three forming an executive committee.

Regulations have already been issued by the provincial government regarding the conduct of the business. These deal largely with the details as to calling meetings, etc., and keeping records of business transacted. Regulation number 8 says: "All books and records of agents and all books and records of the board of trustees shall be open at all times to the inspection of the comptroller-general of the province, and there shall be twice in every year an audit by the comptroller-general of all such books and records."

District boards of trustees are to meet quarterly. Interest at the rate of 4 per cent. is to be allowed on deposits.

No Reserve Fund to be Required

The provincial savings bank will be an organization separate and distinct from the government, according to an announcement made by Hon. Edward Brown, on June 2. Mr. Brown stated that all persons in responsible positions in the new organization will be bonded and that an audit of the financial condition of the bank will be made once per month. The board of trustees will supervise the investment of the money and if it is loaned to the government the arrangements will be precisely the same as those in any other bond or treasury bill issue. The department will receive government securitiesfor all funds so loaned bearing a stipulated rate of interest. Mr. Brown stated that the chief difference between the new provincial savings bank and general banks will be in the matter of the reserve fund required to cover depositors.

In the general banking business an amount totalling 25 per cent. of the amount of money received on deposit has to be held in reserve. This is because the general run of business in a bank embraces securities that cannot be readily liquidated, said Mr. Brown. As far as the provincial organization is concerned, the class of securities in which the deposits will be invested will be limited to provincial, school district and municipal debentures. Under the head of provincial securities will come the rural credits and the Manitoba farm loans. Such securities, said Mr. Brown, will be of the class that can be quickly liquidated so that no reserve fund of this nature will be required.

Deposit Systems Combined

The deposit business of the Manitoba Farms Association will be assumed by the provincial savings trustees, according to an announcement made by E. A. Weir on June 10. Mr. Weir referred to the fact that both organizations were now empowered to accept deposits, guaranteed by the province, at 4 per cent. interest, and continued:—

"In order to obviate any possibility of misunderstanding or confusion in the public mind, the board of the Manitoba Farm Loans Association has kindly agreed to have the deposit end of its business merged into the new savings office which will be opened shortly. The Farm Loans Association at its office in the Scott Block will act as an agent for the new saving office for any depositors who find that office convenient. Depositors, not bond holders, who already have their accounts with the Farm Loans Association may leave them there or change these to the new savings office when a pass book will be submitted for the deposit certificate. As old depositors with the Farm Loans Association bring in additional funds their attention will be directed to the new savings office and new deposits will be taken for that institution.

"The Farm Loans Association, of course, will still continue to accept moneys for investment in its bonds, maturing in from one to ten years and bearing interest at 5 per cent."

CONTRACT IN REGARD TO COMPANY REORGANIZATION

Court Holds Contract Enforceable Against Estate—Relation of Executors to Deceased's Contract—Definition of "Quick" Assets

IN an appeal from the judgment of Justice Drysdale, of the Nova Scotia Courts, the Supreme Court of that province, in reversing his judgment, held that the executors of the estate of one party to a contract cannot succeed in an action to rescind the contract on the ground of fraud and misrepresentation where the facts establish that the deceased was told and knew all about the matter before entering into the contract.

The facts are, in effect, that the Canada Clay Co., being on the verge of insolvency, an agreement was entered into between Davison and the officers of the company, through Grandin and Priest, whereby the company was to be reorganized under the name of the Pictou Clay Co., Davison to be the largest shareholder in the latter company. The agreement contained a clause in regard to the payment of liabilities over which the present case and appeal arise.

Financial Position of the Company

A reference to the statement of quick assets and liabilities of the company enclosed in Grandin's letter shows that the gross liabilities were $7,848.95; the quick assets were $2,042.30, and the net liabilities were $5,806.65; and in Grandin's letter there is a statement that "The promoters of the Pictou Co. to receive 587,193 shares remaining in the Canada Clay Co.'s treasury on payment of the company's debts ($5,806.65, plus expenses likely to be incurred between now and taking over the Canada Clay Co., say, in all, $7,000), which are to be exchanged for 58,710 shares in the Pictou Co." The net liabilities are referred to in this clause and in the statement, and the $5,806.65 is arrived at by deducting the quick assets in question from the gross liabilities. The evidence shows that these quick assets were handed over to the defendant, who paid all the debts, and the contention of the plaintiffs is that the agreement on the part of Priest to pay all the debts of the company required him to pay the gross debts without the aid of these quick assets.

Knew Conditions of Contract

The court took the view that from the evidence there is no escape from a finding that Frank Davison knew from the beginning that the $2,000 of quick assets were not to form part of the assets retained by the company, but were to be applied in reducing the liabilities to about $6,000, and that sum was what was to be paid by Priest.

Harris, C.J., in his written judgment, says in part: "The quick assets consisted largely of promissory notes, stocks of manufactured brick, coal and cement. The word 'properties' is an apt phrase to use in referring to the lands, but quite unappropriate in referring to these quick assets. I think it is obvious that it was not intended to include the quick assets.

"The only answer suggested by counsel for the plaintiffs was that the agreement expressly stated that all the debts were to be paid by the defendent (Priest). I have already given my reason for thinking it did not include, and was never intended to include, the quick assets, but, assuming that it did, it could at most give rise to an action against the defendant to restore these assets to the company. It would not justify a judgment setting aside the agreement."

News of Industrial Development in Canada

Establishment of Large Steel Plant on British Columbia Coast Being Investigated—Dominion Pulp Properties in New Brunswick Transferred to Fraser Interests—Progress of Belleville During Past Year—Swedish Lumbermen Interested in Canadian Pacific Coast Prospects

INVESTIGATIONS for the establishment of a steel plant on the Pacific coast have been commenced by Henry S. Fleming, of New York, chairman of the board of directors of the Canadian Collieries (Dunsmuir), Ltd., who is now at Victoria, B.C. Mr. Fleming has just returned from Brazil, Paris and London. In Europe he was instructed by a number of high steel and financial men to look into the possibilities here and report at once. Provincial government experts of the department of mines, under the Hon. William Sloan, will be called into consultation. It will take Mr. Fleming until September to complete his investigations on the coast. The sites being considered are at Union Bay, B.C., near the coal mines on Vancouver Island, and at Vancouver. The Canadian Collieries, the reorganization of which has just been completed, will be largely interested in the works, according to present plans.

"There is no doubt about the iron resources of this island," said Mr. Fleming. "The magnetic ores, which some persons have been decrying, make the highest grade steel. We use magnetics in Pennsylvania for the production of steel that was sold at a price above the market price. The only trouble with the magnetic ores is that with them the furnace capacity is slightly reduced. The ores have to remain longer in the furnace than is the case with the hematite ores."

The chief side of the steel situation that Mr. Fleming is starting out to investigate at once is the marketing possibilities. As far as he can see now, Mr. Fleming says that the coast steel plant would not be able to compete in the territory farther east than the middle of the prairies with the great mills at the Soo. He says that he even fears the Chicago plants more than the Sault Ste. Marie plants, because of their greater efficiency in production. The lowest daily production that a steel plant can be worked on is 325 tons, and even this output involves overhead costs which are the same for plants four times the size.

Dominion Pulp Properties Transferred

Formal transfer of the Dominion Pulp Co.'s plant and properties to the Fraser Companies, Ltd., took place in Montreal last week. A cheque for between $1,000,000 and $1,250,000 was handed over to the British interests, who have owned and operated the Dominion Pulp Co.'s business for some years past.

The Dominion mill is situated on the Miramichi River, opposite Chatham, N.B., and is known as an easy-bleaching sulphite mill. It has a capacity of fifty tons daily, and the manager is Walter G. Steevens, who, it is understood, will continue in that position. It is the intention of the Fraser companies to increase the output of the mill, and as soon as the necessary additional plant can be arranged it is expected the capacity will be brought up to not less than sixty-five tons daily. The timber limits being transferred are largely areas under license from the Department of Lands and Mines, consisting of about 288 square miles of Crown timber lands, but it is believed the source of supply for raw material which the Fraser interests are depending largely upon for their new plant is the Miramichi portion of the 1,580,000 acres of timber limits they are acquiring from the New Brunswick Railway Co., and upon which the Fraser's now hold an option.

The Dominion mill will be the second pulp plant operated by the Fraser companies, their other mill being at Edmundston, N.B., where the bleached sulphite plant is being increased from a capacity of 110 to 180 tons daily. They also operate ten band saw lumber mills, most of which have shingle mills in connection.

Belleville's Progress

Industrial Commissioner White, in his first annual report, reports that Belleville, Ont., since he was appointed to his position in June, 1919, has secured seven new industries. These are not all in operation yet, but are expected to be in the near future.

The Judge Jones Milling Co. have located a flour milling plant in the former premises of Graham, Ltd., H. A. Woods Manufacturing Co., Ltd., manufacturers of valves, automobile steering wheels and automobile door locks. The latter company purchased the patent of the tilting detachable steering wheel from W. H. Appleby, of Windsor, Ont., and will manufacture the locks and wheels at their plant. As soon as machinery can be secured from the United States the Natural Tread Shoe Co. will start production in Belleville. Operations have already been commenced by the Toronto Hat Manufacturing Co. A. S. Richardson and Co., Ltd., and the Weed Harvesting Machine Co., Ltd., will also start operations shortly. The latter company is waiting on the shipment of machinery from the United States.

Mr. White, in his report, stated that the city had not been called upon for any special concessions with the exception of certain fixed assessments. When developed to capacity, it is expected that the new industries will employ upwards of 500 hands. Future prospects are: The Acme Road Machinery Co., of Frankfort, N.Y.; Kirsch Manufacturing Co., of Sturgis, Mich.; the American Ironing Machine Co., of Chicago; the Hayward Tire and Equipment Co., of Indianapolis, Ind.

Manufacturing Notes

Removal of the plant of the Ontario Cement Co. from Blue Lake to Beachville, Ont., is now under way.

Plans are under way for the construction of a plant by the Dominion Oxygen Co., Ltd., at Winnipeg, Man., on Erin Street. The company proposes to manufacture oxygen for welding purposes by taking it from the air, and the plant will constitute another addition to the Canadian chain.

The wagon works at Petrolea, Ont., which have been closed for the past six months, will probably shortly reopen under new management.

Commerce Truck Co. has decided to locate its Ontario plant in Kitchener as a result of recent developments in connection with the industry. Negotiations were originally opened with Guelph, and announcements were made that the motor truck plant would be situated in that city. The Canadian management of the Commerce company made a proposition to the Kitchener Board of Trade, which was endorsed by that body. The truck company's proposition included the erection of houses along with the factory.

The plant which formerly manufactured peat blocks at Alfred, Ont., from the bogs there has resumed operations and is exporting its products.

The hide and liver of mud sharks form the basis of a new industry in British Columbia to be manned by returned soldiers and aided by provincial government capital, according to an announcement from Vancouver. The skins when tanned make up into a variety of choice leathers, and the huge shark livers are rich in heavy oil, which, when pressed out, brings a high price as a lubricant for heavy machinery.

A company, headed by J. V. Cavicchi, of Halifax, N.S., and Vincent McFadden, of Glace Bay, N.S., is being organized to operate the Montgomery Moore coal areas at False Bay, on Mira Bay, C.B. Work on the sinking of a colliery is to be started at once, and an output of from 1,000 to 1,500 tons a day is aimed at. Shipment will be made at False Bay Beach, where a good site for a harbor is available. Mr. McFadden has resigned his position of electrical and construction super-

intendent with the Dominion Coal Co. to take up the management of the new colliery. The coal is described as of good quality, and the seams are estimated to contain 20,000,000 tons of marketable coal.

Swedish Lumbermen Interested

It is reported from Victoria, B.C., that Swedish lumbermen have been on the coast and successfully investigated the possibility of rafting lumber from British Columbia to Europe. Rafts of large size, called rafanutes, have been successfully towed from Sweden to Great Britain. It is believed that the huge timbers of the province will make possible the construction and successful operation of rafanutes larger than those shipped out of the Baltic, which contain four or five million feet each. The rafts leaving the Pacific coast will probably contain from fifteen to twenty million feet.

The Rat Portage Co. has sold timber limits containing fir and some cedar on the south-west of Vancouver Island, B.C., to John W. Blodgett, of Grand Rapids, Mich., for $400,000. A mill will be erected on the property.

An additional paper machine is being installed by the Howard Smith Paper Mills, Ltd., at Crabtree Mills, Que., which, when completed, will give the company eight paper machines, with daily capacity of about 200,000 pounds of high-grade writing paper, both bond and ledger. The sulphite mill at Cornwall, Ont., is being increased to sixty tons per day of bleached sulphite.

NEW INCORPORATIONS

Gatineau Co., Ltd., $45,000,000—British Columbia Sugar Refining Co., Ltd., $10,000,000—Canada River Steamship Co., Ltd., $1,700,000

The following is a list of companies recently incorporated under Dominion and provincial charter, with the head office and the authorized capital:—

Port Arthur, Ont.—Jorgensen and Kirk, Ltd., $40,000.

Amos, Que.—The Amos Navigation Co., Ltd., $49,000.

Cobble Hill, B.C.—Macklin and Napper, Ltd., $20,000.

Sherbrooke, Que.—Denault Mercantile, Ltd., $49,000.

RECENT LIFE INSURANCE LEGISLATIVE PROPOSALS

In a review of matters dealt with by the Life Underwriters' committee on legislation during April, John A. Tory, chairman, says in the May "Life Underwriters' News":—

"In the province of Manitoba the amendment to the Insurance Act as it related to workmen's compensation gave the committee some concern, but D. J. Scott, the member of the legislative committee for Manitoba, handled this matter in a very able manner, and brought to his assistance all those interested in the proposed legislation. The matter has been adjusted to our entire satisfaction, and we take this opportunity of expressing our appreciation to Mr. Scott.

"Another matter that received the attention of your committee was a complaint made by a western association against the advertising of a certain underwriter and his company. The matter was taken up by your chairman with the secretary of the company, and I am very pleased to state that the response from him was entirely satisfactory. He wrote that the advertising was done without their knowledge. It was not approved of by them, and the class of advertising would be stopped.

"Another matter that received our attention was the complaint of the Woodstock association against a certain member, asking that his license be cancelled by the Superintendent of Insurance. After a great deal of correspondence and conferences, the Superintendent of Insurance for the province of Ontario has cancelled the license, as requested by the Woodstock association.

"Another matter that is receiving our attention at the present time is the question of new taxation in the province of New Brunswick. This case is being attended to by the very able member of New Brunswick, E. R. Machum. As this matter has not yet been settled, it will be a later date before we can report.

"But the matter that is receiving the most time and attention, and in which every life underwriter of Canada has been vitally interested in, was the proposed legislation by the federal government with reference to federal licenses. Your chairman has been in touch with every member of the committee, from the Atlantic to the Pacific, and the work done by them during the past three weeks shows what a united body of men can do, and I take this opportunity to offer my personal thanks for the services rendered to the association by not only the members of the legislative committee in each individual province, but by the members of our association in Canada. The proposed amendment has been vitally changed, and I am quite satisfied that when the parliament adjourns, the change will be entirely satisfactory to the Life Underwriters of Canada.

"There is no difference of opinion about us only wanting one license system, the one that would be the most effective, but in view of the fact that the provinces already have a license system, and will insist upon the licensing of agents, the proposed legislation, in my opinion, was of a very serious character."

1870 —— OUR GOLDEN JUBILEE —— 1920

Mutual in Principle: Mutual in Practice
Prosperity has attended every step in the march of the Mutual from the opening of its long campaign in 1870 down to the present, and much of that success has been due to the practice of the principle of mutuality which has characterized all ranks of the ever-increasing army. Obstacles have been removed, difficulties overcome and a long succession of victories achieved by co-operation, the most vital force in the world. The objective of the Mutual Life of Canada since its organization in 1869 has been "to furnish the largest amount of genuine life insurance at the lowest possible net cost." This objective has been attained as actual results clearly show. The limited number of lapses indicates a membership of satisfied policyholders while the rapidly expanding business reveals the growing popularity of the company. Join our victorious march.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario
Hume Cronyn, M.P., President. Charles Ruby, General Manager.

So many people
have considered The Great-West Life Policies **the best obtainable** that, for fourteen successive years, the Company has held the distinction of writing the largest paid-for Canadian Business of all Canadian Companies.

This is one good reason why those needing Life Insurance should examine the Policies of

News of Municipal Finance

Financial Progress of South Vancouver During Past Year—Winnipeg Tax Rate Down Half Mill and Budget Also Reduced—Essex County Assessment Shows Huge Increase—Brandon Tax Rate Up Five Mills—Toronto and Regina Report Good Collections

Regina, Sask.—Taxes for the current year, paid to June 15th, amount to $94,175, as compared with collections of $51,975 for the same period last year.

Grey County, Ont.—The tax rate has been fixed at 7 mills, 4 mills being for good roads and 3 mills for general expenses, yielding $205,484 on an assessment of $29,354,900.

Hastings County, Ont.—A tax rate of 13.7 mills has been approved by the county council, as compared with 12½ mills last year. Expenditures are estimated at $367,026 and receipts at $129,400.

Carleton County, Ont.—Hugh Riley, late clerk of the county, has been dismissed, following the audit of the books, which revealed a shortage in funds of $3,300. It is not known whether legal proceedings will be brought against Mr. Riley, but it is understood that restitution will be made just as soon as he can realize on some of his property.

Calgary, Alta.—All departments are keeping within their financial allowances this year, according to the report of Comptroller Wood. The year's appropriations total $3,536,911, or the average of $294,742 for one month. Expenditures during the first five months of the year total $1,023,946, or a monthly average of $204,789, which amount is $89,953 less allowed per month.

Lennox and Addington Counties, Ont.—A discussion of the equalization of assessment in the united counties took place last week, but no agreement was reached. Finally, the equalized assessment of each municipality was raised eleven per cent., with a recommendation to next year's council that equalization be taken up in the January session.

Brandon, Man.—The tax rate for the city has been fixed and adopted at 35 mills, an increase of 5 mills over last year. Increased expenditures in all departments and a jump in the school estimates, are the causes of the advance.

Street car fares on the city's street railway have been raised by permission of the Manitoba Public Utilities Commission. The rates were: Cash fares, 5 cents; regular tickets, 5 cents; workmen's tickets, 6 for 25c.; children's tickets, 10 for 25c. The rates now are: Cash fare, 7 cents; regular tickets, 6 for 35c.; workmen's tickets, 5 cents; children's tickets, 8 for 25c.

Essex County, Ont.—Assessment valuation in the county has been raised from $33,301.000 to $86.029.500. At the council meeting on June 18th, the report of the Equalization Committee increasing these values, was adopted, with only one cut of $300.000 in Sandwich West. The principal increases are: Sandwich West, from $1,700,000 to $11,908,000; town of Sandwich, $1,350,000 to $6,523,600; Ojibway, $300,000 to $3,238,000. It is understood that those municipalities will appeal for reductions.

Owen Sound, Ont.—At a conference between a committee from the city council and a special committee from Grey county council on June 19th, when the separation of the city from the county was discussed, it was recommended that Owen Sound pay one-sixth of the judicial expenses, one-eighth of the expenses of the Children's Shelter, a share to the House of Refuge, proportionate to the number of inmates, and $250 to the county treasurer's salary. The city is entitled to one-eighth of the county's assets, and is also liable for one-eighth of the liabilities.

Toronto, Ont.—The amount of taxes which the city has received during the period of the first instalment will total nearly $12,500,000, and is a new high record. As the first instalment involved only $9,800,000, if all payments were made, it is evident that there were a large number of payments on all three instalments.

Expenditures for the first six months of the year are well within the limit, according to the acting city treasurer's report. Complete figures are not ready yet, but the total for the five months from January to May, which is $12,690,014, indicates that the total for the six months will be well under the year's appropriations of $29,987,278.

County of Middlesex, Ont.—Estimated expenditures for the present year amount to approximately $363.665. Of the total, $20,000 is a deficit from 1919, while $30.388 is for interest and sinking fund on debentures. About $170,000 will be expended on county, provincial county and suburban roads.

A report of the auditors on the unpaid taxes in the different municipalities throughout the county has brought up the matter of each municipality dealing with its own taxes. It was pointed out by the county clerk that under a recently enacted provincial legislation a county might pass a by-law giving each municipality control over its own matters of taxation.

Edmonton, Alta.—City Treasurer Barnhouse has issued cheques redeeming tax arrear debentures to the amount of $130.000. This action had been approved of previously by the city council. The bonds are in blocks of $80.000 and $50,000, and are held in the United States. They do not mature before next July 1st, but have been offered to the city at discounts ranging from 1 to 5 per cent. In addition to the saving of 6 per cent. interest for this month, the city will have the extra advantage if the exchange rate becomes less favorable. When the cheques were issued exchange was around 13 per cent. The securities are all short-term bonds against tax arrears.

Edmonton, Alta.—The finance committee has recommended recognition of deserving cases under the ten-year extension plan on tax arrears. In order for the applicants to come under the Arrears of Taxes Act, current taxes for 1919 and 1920 have to be paid with interest at eight per cent. on the arrears. In the following eight years, the act calls for a payment of one-eighth of the arrears each year.

The period for receiving notices from persons wishing to take advantage of the act expired last year, and now the council has the question of deciding what should be done regarding applications which were not submitted at that time owing to no fault of the person now owning the property, and who may have been holding a mortgage last year.

Winnipeg, Man.—A tax rate of 22.5 mills, as compared with 23 mills last year, has been recommended by the finance committee, and will most likely be enforced. Estimated expenditure for the year is $6,490,461, as compared with $6,493,943 last year. The expenditure will be financed as follows: Miscellaneous revenue, $607,350; business tax, $431,915; tax levy on rateable assessment of $236,970,410, $5,331.834; balance from preceding year, $119.361.

At the meeting of the committee on June 18th, a surplus of $282,539, in connection with the hydro-electric department was reported. The total revenue for the year is $1.279.469, and the total expenses $1.099,189. The surplus for the year is $180,279, which with the surplus at the beginning of the year of $104,262, and adjustments during the year (profit and loss) of $2,003, bring the total surplus to $282,539.

South Vancouver, B.C.—According to the second annual statement of F. J. Gillespie, commissioner named to take charge of the affairs of the municipality by the provincial government, South Vancouver during the year ended May 1st last, made satisfactory financial progress. General collections. The sum of $17,848 was gained by taking advan- years were allowed by the reeve and council to fall into arrears, were restored to the extent of over $10,000, thus reducing the unpaid funds to that amount, and the 1919 sinking fund allotment was set up; trust funds were opened to reduce loans under government gunrantee, and on April 1st over $120,000 had been deposited to these accounts. retention moneys were reduced by $5,000 on account of Kingsway contract, and the amount owing to the municipality on overdue mortgages was reduced, though the greater part remains unpaid.

The increase in general collections was partly due to the tax sale held in September, 1919, over $400,000 arrears of taxes being paid in during the year. Increased collections are shown in every branch. The 1918-19 collections were: Taxes, $587,645; schools, $93,244; water, $79,677; sundry, $34,229. Total, $794,897. In 1919-20: Taxes, $1,061,482; schools, $96,813; water, $82,752; sundry, $53,979. Total, $1,295,028.

Commissioner Gillespie sets forth that on December 31st last, the amount owing to the Canadian Bank of Commerce was $467,370, having been increased by $102,370 on April 7th, 1917, to pay interest on debentures, since which time no money has been borrowed by South Vancouver for any purpose whatever except to pay off the balance of the Spitzer-Rorick loan, known as the "1917 Tax Loan," due March 1st, 1920, payable in New York. Cash on hand has increased from $34,869 on January 1st, 1919, to $428,727 on December 31st last. The sum of $92,495 was deposited to sinking fund account, reducing the unpaid sinking fund from $307,057 to $296,876 after providing for the 1919 allotment. Special trust accounts have been opened to reduce the loans under government guarantee. Amounts on deposit on April 1st last, were: 1917 trust account, $111,844; 1920 trust account, $9,766. These amounts are being increased by monthly collections. The sum of $17,848 was gained by taking advantage of the low rate of exchange to England in transmitting debenture interest during the past year.

Government and Municipal Bond Market

Volume of Municipal Issues Increasing—Two Interesting Sales During Past Week—Alberta's "Home" Issue Now Being Advertised—Edmonton Takes Unsold Portion of $3,000,000 Bonds Off The Market—No Legal Action Will Be Taken

DEVELOPMENTS in the bond market during the past week or two were of a more promising nature than they have been for some time, as indicated by the keen bidding on various issues. Indications are that these conditions will continue, at least until the usual inactive summer period. The supply of provincial and municipal bonds is small, so that the issues which are now coming on the market in good volume will be placed, it is expected, without much difficulty.

In regard to the control of Victory bonds, members of the Montreal Stock Exchange have decided to renew the agreement with the special Victory Loan committee, at the request of the finance minister through that body, thereby insuring the continuance of price stabilization of the bonds for the next few months. There was some doubt as to whether the agreement would be continued, but it was finally considered that such a plan would be best. No action has as yet been taken by the Toronto exchange, although it is scarcely thought that the request will be refused. The market committee, in a letter, says: "The minister of finance feels that it would be an inopportune moment to allow any maturities of the 1917 and 1918 issues to find their level on the open market." The agreement in connection with the 1919 issue terminates at the end of this year.

Alberta's Local Issue

A new issue of $1,000,000 6 per cent. 10-year province of Alberta bonds, of which mention was made in these columns last week, is now being advertised, and will be sold in denominations of $100, $500 and $1,000 to local investors. The bonds may be registered as to principal, and are payable at the Imperial Bank of Canada at Toronto, Montreal or Edmonton.

This action is a new policy for Alberta, and, in fact, for any Canadian province. The 3,000 or more holders of provincial savings certificates are now being circularized with an offer to sell them the new bonds, and, if they so wish, they may apply their certificates in payment.

The proceeds of the issue will be used for the general revenue purposes of the province. It is the intention of the treasury to have a certain amount of provincial bonds always available for sale, and, while the present issue will not likely exceed $1,000,000, the experiment, if as successful as it now promises to be, may later be extended to two or three times that figure. The more bonds that can be sold at home, the better it will be for the province, as Hon. C. R. Mitchell looks at it. Interest payments that are now going out of the province will then be kept within it, and will to some extent be available for reinvestment. Not all the holders of savings certificates now being invited to invest, along with others, in the bond issue are Albertans, but it is expected that the bulk of the issue will be taken up by purchasers in the home market.

Coming Offerings

The following is a list of debentures offered for sale, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Three Rivers, Que. .	363,000	Various	10 & 30 yrs.	June 28
Drummondville, Que.	83,000	6	40-years	June 29
Swan River, Man. ..	58,000	6	30-instal.	July 6
Tp. of Teck, Ont.....	15,000	6	15-instal.	July 26
St. Chrysostome, Que.	7,000	6	10-yr. ser.	July 5
Neelon and Garson Townships, Ont. ..	10,000	6	20-instal.	July 3
Sudbury, Ont.	167,004	5 & 6	Various	July 3

Township of Teck, Ont.—Tenders will be received until June 26th, 1920, for the purchase of $15,000 6 per cent. 15-instalment school debentures. G. E. Fairburn, Kirkland Lake, Ont.

St. Chrysostome, Que.—Tenders will be received until July 5th, 1920, for the purchase of $7,500 6 per cent. serial debentures, payable from October 1st, 1922, to October 1st, 1931. J. E. Derome, secretary-treasurer.

Neelon and Garson Townships, Ont.—The united townships will receive offers until July 3rd, 1920, for the purchase of $10,000 6 per cent. 20-instalment debentures. J. R. Vincent, Box 809, Sudbury, Ont.

Sudbury, Ont.—Tenders will be received until July 3rd, 1920, for the purchase of the following debentures: $16,000 5 per cent. 10-instalment, for electric light; $3,862.07 5 per cent. 20-instalment, for waterworks; $1,497.71 5 per cent. 5-instalment for waterworks; $25,503.97 5 per cent. 20-instalment, for sewers. Tenders will also be received for the following debentures, which were validated by an act of the legislative assembly in 1920: $6,000 6 per cent. 10-instalment, for technical school; $53,000 6 per cent. 20-instalment, for public school; $61,141 6 per cent. 20-instalment, for technical school. Tenders will not be opened until July 5th.

Debenture Notes

Brant County, Ont.—The council has approved the expenditure of $160,000 for good roads.

Sherbrooke, Que.—Ratepayers have defeated a by-law authorizing the raising of $566,000 for local improvements.

Hamilton, Ont.—City Treasurer Davis has been authorized to issue $50,000 debentures for the Hamilton Health Association.

Hold—and Buy More!

Every barometer by which investment values are appraised points to a strengthening tendency in the Victory Loan Market. The Minister of Finance announces there will be no increase in the supply of these bonds. There has, however, been an increase in the income tax. These two factors alone add substantially to the value of Canadian Victory Bonds. Every owner should make the strongest effort to retain his present holdings. Also, he should do his utmost to buy more at present prices.

W. A. Mackenzie & Co.
Government and Municipal Bonds
42 King St. West - TORONTO, Ontario

Wingham, Ont.—Ratepayers on July 5th will be asked to vote on the borrowing of $18,500 for the building of a bridge and $6,500 for water mains.

Woodstock, N.B.—Debentures will be issued to the amount of $30,000 for sidewalk purposes. Work has already been started.

Westmount, Que.—Ratepayers have approved two money by-laws calling for the raising of $750,000 for a number of street and other improvements and $80,000 for other local purposes.

Moose Jaw, Sask.—On July 9th ratepayers will be asked to vote on a by-law authorizing the raising of $98,000 by debenture issue for school purposes. A by-law to raise $102,000 for the Britannia Park water extension has been passed by ratepayers.

Hamilton, Ont.—Civic officials have announced that they should not be called upon to issue any more bonds as a guarantee for the proposed hydro-radial between Toronto, Hamilton and St. Catharines because of advancing costs in material. The province should assume the responsibility, it is declared. Hamilton has $6,600,000 worth of bonds on deposit, and it is contended that if the work is postponed, the city should not allow the bonds to be left on deposit indefinitely.

Edmonton, Alta.—According to Mayor Clarke, who has returned from Vancouver with 1,500,000 of the city's $3,000,000 tax arrears bond, the whole question of the sale to the National Bond Corporation is closed. The mayor reached an agreement with the company, and it is understood that no legal action will be taken.

Following a discussion with G. R. F. Kirkpatrick, manager of the Imperial Bank of Canada, Edmonton, the council decided to take the unsold balance of the bonds off the market, and no other sales will be made at the present time.

Quebec, Que.—At the city council meeting on June 18th, a report of the civic finance committee, recommending that the city issue bonds for a sum of $279,000, was adopted. The bonds are required to reimburse the Bank of Montreal for the issue of treasury bonds for money required by the city for paving of Beauport and Charlesbourg roads and for other permanent work. The bonds will be in denominations of $100, $500 and $1,000 for ten years, bearing 6 per cent. interest. They will be sold at par on the local market.

London, Ont.—In order to secure sufficient funds to make the necessary extensions to the waterworks and the electric lighting plants of the city, the Public Utilities Commission will likely ask the Ontario Municipal and Railway Board to validate a debenture issue. What amount will be asked for is not definitely known, but it is probable that approximately $75,000 will be asked for each department. The city of London bill contained two clauses, asking authority for the city to issue debentures to the extent of $80,000 for electric light extensions and $85,000 for waterworks. On account of the defeat of the bill, the commission has stopped all extension work in both departments, but the necessity has been such that it has been decided to bring the suggestion of going to the Ontario Railway Board.

Calgary, Alta.—A recommendation from City Treasurer J. H. Mercer that the city issue debentures to the extent of some 180,000 to cover expenditures on local improvements which were taken out of the general revenue of the city about four years ago is being discussed by the finance committee of the council. The treasurer also proposes that debentures in the future be issued to bear 6 per cent. interest instead of 5 per cent. as at the present time. The reason for the latter proposal is that 6 per cent. debentures can be sold for a price more closely par than the lower interest issues, thus netting a cash amount closer to the expenditure involved than where the bonds are sold much below par. In the latter place, the deficit arising from such a sale has to be made up later in a further issue.

Bond Sales

Grand Forks, B.C.—The city has sold to Brent, Noxon and Co. 55,000 7 per cent. 20-year bonds, which were issued for the purpose of the construction of sewers.

Pembroke, Ont.—Messrs. A. Jarvis and Co. have purchased 37,349 6 per cent. 10-year instalment debentures at 95.56, which is on a basis of about 6.75 per cent.

Carleton County, Ont.—Debentures to the amount of $190,000 were awarded to the Dominion Securities Corporation at 96.587 as follows: $150,000 6 per cent. 20-instalment, $40,000 6 per cent. 30-instalment. Wood, Gundy and Co. bid 96.53 and the United Financial Corporation, Ltd., 94.55. A. Jarvis and Co. submitted an offer of 96.502, but reduced it by 1.50 to 95.002 before tenders were opened.

Peterborough, Ont.—The city has disposed of $240,000 bridge bonds and $260,000 public school bonds, both issues bearing interest at 6 per cent. and maturing at the end of thirty years. Messrs. A. E. Ames and Co. were the purchasers, paying 96.09, which is on about a 6.30 basis. Bids were as follows:—

A. E. Ames and Co.	96.09
Brent, Noxon and Co., Morrow and Jellett, and Nesbitt, Thomson and Co.	96.0858
Harris, Forbes and Co. and Dominion Securities Corporation	95.777
W. A. Mackenzie and Co. and National City Co.	95.595
Wood, Gundy and Co.	95.337
United Financial Corporation and R. C. Matthews and Co.	94.78
Housser, Wood and Co.	91.12
Æmilius Jarvis and Co.	*91.47

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

CORPORATION SECURITIES MARKET

Shawinigan Four Million Note Issue Disposed of—Three New Stock Offerings—Brompton's New Capitalization Plans

THERE was a fair volume of trading in outstanding industrial bonds during the week ended June 23, Cedar Rapids and Quebec Railway being the most active issues. Prices in most cases were steady, but in the two issues mentioned, the tendency was to lower levels. Rio Janeiro, on the Toronto exchange, fell off 12 points on sales of $20,500.

Announcement is made of the sale of $4,000,000 7½ per cent. six-year convertible notes of the Shawinigan Water and Power Co., dated July 1, 1920, and maturing on that date in 1926, to the following syndicate: Aldred and Co., Montreal; Brown Bros. and Co., New York; Alexander Brown and Sons, Baltimore; Jackson and Curtis, Boston.

The notes are secured by $5,344,000 of Shawinigan Water and Power, series "B" first and refunding 30-year 6 per cent. gold bonds, due July 1, 1950. The securities just disposed of are convertible into the 30-year 6 per cent. bonds on a 6½ per cent. income basis on any interest payment date after July 1, 1921. Proceeds of the issue are to be used during the current year and 1921 on the expansion and improvement program already adopted by the Shawinigan executive. A second transmission line is to be built between Shawinigan Falls and Montreal in order to cope with the company's increasing supply of power here, while a new unit of 50,000 horse-power will be installed at the Shawinigan plant.

A considerable portion of the bonds have already been distributed. The bulk of the issue, it is expected, will be sold in the United States.

Willard's Chocolates, Ltd.

An offering of $600,000 8 per cent. sinking fund cumulative preferred stock of Willard's Chocolates, Ltd., is being offered by the Dominion Securities Corporation, and Morrow and Jellett, at par, carrying a bonus of 25 per cent. common stock. The shares are preferred both as to dividends and capital, callable as a whole or in part at the company's option at 110 and accrued dividends on any dividend date on thirty days' notice. Provision has been made for the retirement during the year commencing June 1, 1921, and during each year thereafter, of an amount equal to 3 per cent., of the largest amount of the preferred stock at any time outstanding.

Willard's Chocolates, Ltd., have made remarkable progress during the past six years, as indicated by sales. For the year ended April 30, 1914, sales amounted to $192,510. In 1917 the figure was $365,830 and for the year ended April 30, 1920, reached a total of $2,783,637. The market established by the company already includes the United States and the West Indies, the British Isles, Belgium, Australia, New Zealand and other foreign countries in lesser degree

Messrs. J. C. Mackintosh and Co., are offering 7 per cent. cumulative preferred stock of the Maritime Telegraph and Telephone Co., Ltd. (shares $10 par value) at 100 and accrued dividends. This is a portion of the $2,000,000 to be issued. The capitalization of the Maritime Telegraph Co. is as follows: $1,500,000 6 per cent. first mortgage bonds; 6 per cent. preferred stock, $1,000,000; 7 per cent. preferred stock, $2,000,000; common stock, $850,000. Receipts have increased from $230,461 in 1911 to $1,209,472 in 1919.

Paramount Kitchener Theatres, Ltd., are offering through Messrs. Goldman and Co., Toronto, $175,000 7 per cent. cumulative preference shares at $100 per share (par value), carrying a bonus of 25 per cent. common stock. Preferred shares are redeemable at $110 per share and accumulated dividends.

Capital Increases

Companies registered under Dominion charter have been authorized to increase their capital stock as follows, the shares in each case being for $100:—

	Former capital stock.	Increased to
Swift Canadian Co., Ltd.	$1,000,000	$5,000,000
Kenwool Mills, Ltd.	300,000	1,000,000
Canadian H. W. Gossard Co., Ltd. ..	125,000	500,000
Northern Rubber Co., Ltd.	500,000	1,000,000

In the three former cases just ordinary shares will be issued, while in the latter case new shares will be divided evenly between preferred and common.

Under provincial charters the changes are as follows, the name of the province being indicated. New shares will have a par value of $100:—

	Former capital stock.	Increased to
Frankford Canning Co., Ltd. (Ontario)	$ 200,000	$ 500,000
Beaver Abitibi Timber Co. (Ontario)	1,000,000	2,000,000
Citadel Leather Co., Ltd. (Quebec) ..	300,000	450,000

Brompton Capitalization Plans

Directors of the Brompton Pulp and Paper Co. at a special meeting in Montreal on June 17, announced that they would recommend to shareholders that the common capitalization, presently consisting of 70,000 shares, of a par value of $100 each, to be increased to 210,000 shares of no par value, holders of the present stock to receive two shares of the new securities for each old one held. The new shares, it was stated officially, at the next dividend declaration, due next month, will be placed on a $6 per share basis, or equivalent to 12 per cent. on the present securities, or double the present yield.

As there are 70,000 shares of Brompton common now standing, the capital rearrangement will entail the issuing of 140,000 of the proposed authorization of 210,000 shares, leaving 70,000 to be held in the company's treasury to provide for contingent financing in the future. It is not the intention of the board, however, to issue any part of the additonal 70,000 shares at the present time, nor is it contemplated that any need will arise to do so, under the company's present program. The funds required to provide for the extensions at East Angus and elsewhere are being provided for out of current earnings, which, it is stated, are of a particularly excellent character, with prospects of still further enhancement.

Irrigation in Southern Alberta

IRRIGATION is one of the greatest—if not the greatest—factor in the development of Southern Alberta. Eventually there will be a million and a half acres of irrigable land south of the Red Deer river capable of producing grain and fodder crops of the value of $40 to $50 an acre season after season. The annual crop production of these lands at these figures will be worth between sixty and seventy-five million dollars. For it is possible to get a crop on the same land every year with irrigation.

The above refers to grain and fodder crops only. In addition to these crops, peas, beans, tomatoes, potatoes, roots and vegetables of all kinds, and small fruits, are grown successfully on irrigated farms, bringing bigger returns to the acre, so that the farmer is not dependent on one or two crops, but can grow those that are the most profitable, according to the demands of the market. The enormous yields of alfalfa and other fodder crops on these farms make stock raising and dairying very profitable.

It has been demonstrated that the irrigated lands of Southern Alberta are well suited for the growing of seed of a high quality, which, possessing the vitality of northern-grown seed will always sell at a premium over seed grown elsewhere. Last season a farmer near Brooks harvested 8,400 pounds of alfalfa seed from twelve acres of land. This seed was worth between seven and eight thousand dollars. It thus brought the grower a return of more than $600 an acre in one season. From eighteen acres on another farm, 18,500 pounds of white clover seed was harvested, bringing a return to the grower of $288 an acre, or $5,600 from this field. Peas, clover, alfalfa, grain, potatoes are grown successfully for seed on irrigated farms in Southern Alberta, and farmers who specialize in them gain large profits.

The Canadian Pacific Railway has been the pioneer of irrigation development in Southern Alberta. Its officials long ago realized that the rich soil of Southern Alberta needed only water applied at the right time to make it yield bounteously. At an expenditure of millions of dollars, the largest irrigation system on the continent was constructed, and thousands of farmers have settled there making their home and winning success on irrigated farms. The value of irrigation was proved in 1918 and 1919, two exceedingly dry seasons, when farmers in the irrigated areas who used their water properly reaped enormous crops.

Through its Department of Natural Resources, the Canadian Pacific Railway operates three irrigation systems containing approximately 750,000 acres of irrigable land. East of Calgary is the large Irrigation Block, consisting of two systems, called the Western and Eastern Sections. The water for the former is taken from the Bow River at Calgary, and for the latter from the same river at Bassano, about 85 miles east of Calgary. The other system is the Lethbridge Irrigation District, which is supplied with water from the St. Mary River.

Full information regarding the kind of crops grown under irrigation in Southern Alberta, as well as interesting particulars concerning the construction and development of the largest irrigation scheme on the American continent are contained in an illustrated handbook entitled "Irrigation Farming in Southern Alberta," which the Company has published and will send to anyone on request.

Investments and the Market

Dominion Steel Directors Disagree on Merger Plans — Further Information Requested — President Wolvin Makes Favorable Comment—Riordon Shareholders Adopt Consolidation Proposals

Woods Manufacturing Co.—Dividends on common stock have been increased from 7 to 8 per cent., according to the announcement by the directors, who have declared a quarterly rate of 2 per cent., payable September 1. The usual quarterly rate was 1¾ per cent.

Toronto and York Radial Railway Co.—Fares on the company's line have been raised, the old rate of six tickets for 25 cents having been abolished. A straight 5-cent fare is now charged. Increase in operating expenses is given as the reason for this advance.

Grand Trunk Railway.—The company has accepted the recommendations of the board of conciliation which recently dealt with the dispute between the company and its clerical employees. So far, employees have not indicated whether they have accepted the award or not, but the company is putting it into effect. This award involves an increase of $1,000,000 a year in wages.

Canada Steamship Lines, Ltd.—On June 26 there will be a special meeting of shareholders to approve of the acquisition by the company of the Montreal Transportation Co., one of the smaller concerns entering the "merger." It has been generally understood for some time past that the two companies would join the British Empire Steel Corporation, as a unit. The announcement of the special meeting confirms this.

Atlantic Sugar Refineries, Ltd.,—Directors have declared a dividend of 1¾ per cent., to be applied against the dividend arrears on the preferred stock, together with the regular quarterly disbursement of 1¾ per cent. Preferred dividends were first passed in July, 1914, from which time they accrued. A year ago the first payment of 1¾ per cent. was made, which left arrears of 29¾ per cent. The current declaration will reduce these arrears further to 28 per cent.

Dome Mines, Ltd.—Optimism for the future prevailed at the annual meeting of the company on June 18, when the former board of directors was re-elected. In dealing with the question of future dividends, the president, J. S. Bache, said that it was recognized that the $1,000,000 which they have to-day in cash and bonds was all the working capital required, and that the board was seriously considering, in lieu of any increased dividends, that they would pay back the capital.

Cape Breton Electric Co., Ltd.—Gross earnings of the company for April, 1920, amounted to $47,111, an increase of $655, as compared with last year. Net amounted to $5,995, as compared with $13,139 in April a year ago. For the twelve months ended April 30 last, net earnings totalled $97,460, a decrease of $38,389, compared with the previous period. Largely increased operating expenses were responsible for this reduction, the cost of administration for the year being $78,310 more than in the preceding twelve months.

Hollinger Consolidated Mines.—For the five months ended June 2, according to an interim report just issued, total income was $2,879,706, compared with $2,822,858 in the same time last year. Total expenditure, including maintenance, showed slight reduction of $1,448,020, compared with $1,507,060. Net profit, therefore, was $1,431,685, against $1,315,798, or an increase of $115,000. Expenditure for plant was $83,363, compared with $75,079, and the dividends were unchanged at $738,000. The average number of men employed was 1,098, compared with 1,259. The average tonnage per day showed a favorable production, reaching a total of 4,056, against 3,907.

Toronto Street Railway Company.—Refusal of the company to accede to the demand of the employees for a 20 per cent. wage increase, has resulted in a strike. No definite action has yet been taken by either the Ontario Railway Board or the city. The company claims that even at the present rate there will be a deficit this year, and unless fares can be raised a wage increase is out of the question. The employees are equally insistent in their demands, and at present no relief is in sight. Increased jitney and taxi-cab service has relieved the traffic situation to a large extent.

Dominion Natural Gas Co., Ltd.—Ratepayers of Tillsonburg, Ont., have voted to allow the company to raise the rates from 35 to 45 cents per thousand for this year, and 50 cents for the remainder of its franchise. In return the company agrees to spend $80,000 in the vicinity of Tillsonburg in the next five years in the digging of new wells and laying of adequate pipe lines to assure first-class gas service to its consumers, to divert a quantity of gas to Tillsonburg which was formerly supplied to other towns, equal to 30 per cent. of the total amount used here last winter. It will drill three new wells the present year, and will be in a position to encourage drilling by independent producers by being able to offer them an increased price for their product.

Riordon Pulp and Paper Co.—Shareholders of the company and the Kipawa Co., the Riordon subsidiary, at a special meeting on June 19, in Montreal, ratified the proposal of the directors to incorporate a new concern under the name of the Riordon Co., Ltd., as previously outlined in these columns. Approximately 85 per cent. of the shareholders of the Riordon Co. were represented either in person or by proxy, while over 90 per cent. of the Kipawa holdings were voted at the meeting. The proceedings were of a purely perfunctory character, the proposals submitted going through without discussion.

Under the recommendations adopted by the shareholders, no actual change of the Riordon securities is contemplated, the sale of the assets of the company to the new corporation being provided for through the issuing of two classes of preferred stock and a common one. The securities received through the exchange will be retained in the treasury of the existing Riordon Pulp and Paper Co., thereby practically restricting the operations of the latter enterprise to those of a holding company.

Dominion Steel Corporation.—Eight directors retired at the annual meeting of the company on June 18. They are as follows: Sir Montagu Allan, Hector McInnes, Halifax, Mark Workman, J. H. Plummer, E. R. Wood, George Caverhill, Hon. Wm. McMaster and Hon. R. Dandurand. The resignation of the last six named was in connection with the protest against the proposed British Empire Steel merger. New directors were appointed as follows: Sir Clifford Sifton, Hon. Charles Beaubien, Stanley Elkin, M.P., president of the Maritime Nail Co., St. John, which enters the merger; Viscount Furness and Benjamin Talbot, of London, members of the London advisory committee; J. F. M. Stewart, Toronto, director of Halifax shipyards, and Edmund Bristol, M.P., Toronto, director of Canada Steamships. Former directors reelected were: Sir Henry Pellatt, Sir William Mackenzie, Sir William D. Reid, Hon. Frederic Nicholls, J. W. Norcross, H. B. Smith, Sir Newton Moore and Roy M. Wolvin. Members of the London advisory committee are: Col. Grant W. Morden, M.P., chairman; Right Hon. Viscount Furness, V.C., Sir William Beardmore, Bart., Major-Gen. Hon. Sir Newton Moore, K.C., M.G., M.P., Henry Steel, Benjamin Talbot, Commander Sir A. Trevor Dawson.

Col. W. Grant Morden, who is engineering the merger, was present at the meeting and pointed out that the position of the shareholders was clear enough and that they would be given every opportunity of approving or disapproving the amalgamation at a special meeting to be called for that purpose.

E. R. Wood took up the so-called balance sheet issued by the British Empire Steel Corporation. He pointed out that working capital of eighteen millions was shown for all the concerns combined Of this, he pointed out, Dominion Steel alone showed working capital of $12,500,000, and Nova Scotia $7,500,000, leaving the remarkable showing of Steamships, and all the other minor companies involved, with an actual working capital of one and a half millions less than nothing. He and ex-vice-president McMaster also pointed out that, so far as could be seen, British Empire Steel reserve of $196,000,000 was composed of a valuation placed on two steel and coal companies, coal and iron ore, over and above their book value. On such a valuation, Mr. Wood said that Dominion Steel's stock should be worth at least $300 per share. The speaker then dissected the value of common stock as planned for the merger of a total of $77,000,000, the three great companies mentioned got a total of $28,600,000, leaving the huge sum of forty-eight millions outstanding and available for distribution among the eight other companies of which he and the other dissenting directors had no more information.

President Roy M. Wolvin, in adopting the annual report, referred to the various speeches made, and commented upon one or two points which had been brought up. "During the past year," he said, "the Dominion government lent valuable assistance to the steel industry. We cannot, however, look for aid in this direction in the future, and we must now prepare to depend entirely upon our own resources and stand on equal terms with the steel producers of the world. Your company, by reason of its location, must now go into the markets of the world, and against the keenest competition, produce sufficient business to keep your plants in operation, and your employees at work.

"Our strongest competition will come from the large steel companies of the United States. During the first three years of the war and prior to the time when the United States threw in her lot with the allies, the American companies accumulated large surpluses, which were not at the time subject to tax. This enabled them to write down the cost of existing plants, to build large extensions, thus increasing their output, and to install every known improvement and labor saving device, tending to greater output. Our companies have great advantages in our properties, but I wish to draw your attention to the conditions which I have just described, as they constituted one of the most potent factors which influenced your directors upon which I consider to be the most important step taken by your company in many years."

Referring to the merger, Mr. Wolvin said: "The object is to put under single contract the largest known deposits of ore and coal, operating coal and ore mines, steel works, steamships, shipbuilding and repair yards and other complementary enterprises. It would be the greatest industrial enterprise in Canada, and promises greater economy and efficiency in the production of coal and steel, the much-needed shipping factories and organization for the transportation of the companies' raw material and finished products, and an outlet for its ship plates.

"In addition, there must be many economies to be effected in uniting the various enterprises under one management. I only mention this because of the publicity it has been given Your directors have been carefully investigating the proposals, and as it is an important matter for the consideration of our shareholders I hope it will soon be in shape to present to you, and when the directors so decide a special meeting of shareholders must be called to pass thereon."

DIVIDENDS AND NOTICES

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that the Directors have declared a dividend of 1¾% on the Preference Stock, and a dividend of 5% on the Common Stock for the quarter ending the 30th day of June, 1920.

The above dividends are payable on the 15th day of July to shareholders of record on the 30th day of June, 1920.

By Order of the Board.
SAMUEL D. FOWLER,
Secretary.
Toronto, 23rd June, 1920. 175

COMMERCIAL FINANCE CORPORATION, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of three and one-half per cent., being at the rate of seven per cent. per annum on the paid Preference shares of this Corporation, has been declared for the current half-year, and that the same will be payable in accordance with the terms of the resolution of the Board, on July 1st, 1920, to shareholders of record at the close of business on June 28th, 1920.

By Order of the Board.
HAROLD R. FROST,
Secretary.
Toronto, June 18th, 1920. 174

RECENT FIRES

Business Section of Riverport, N.S., Destroyed—Jas. Robinson Mill at Millerton, N.B., and John Watson Co. Plant at Ayr, Ont., Also Suffered Losses

Allen, Sask.—June 3—K. Sebyler's farm buildings reported as destroyed, together with 2,000 bushels of oats, fourteen horses and other stock. Buildings stated to be covered by insurance but no insurance on stock.

Ayr, Ont.—June 16—Manufacturing plant, owned by John Watson Co., destroyed. Estimated loss, $200,000. The town hall, Bank of Commerce and the Molsons Bank were also damaged.

Carievale, Sask.—June 8—O. A. Cowan's barn destroyed by tornado. Loss, $3,098.53. Insurance in Springfield, $1,500. Skating and curling rink, owned by village of Carievale. Loss, $2,821.30. Insurance in Springfield, $3,000. Cause, tornado.

Danville, Que.—June 9—Barn, owned by Mrs. N. F. Gibson, destroyed. Loss covered by insurance.

Fort William, Ont.—June 4—Geo. Mireault's livery barn and stable destroyed. Insurance, $2,250 on building and $1,000 on contents.

Millerton, N.B.—June 15—Lumber mill, owned by James Robinson, was destroyed. Estimated loss, $100,000. Insurance was carried on the mill as follows: Imperial Underwriters, $1,000; North America, $1,500; Liverpool and London and Globe, $3,000; Liverpool-Manitoba, $2,000; St. Lawrence Underwriters, $2,000; Ocean, $2,000; Canada Accident, $1,000; Palatine, $5,000; Hartford, $1,000; London Guarantee and Accident, $2,000; Sun, $2,000; London Assurance, $3,000; Phœnix of London, $3,000; British Colonial, $1,000; Northern, $2,000; Queen, $2,000; North British and Mercantile, $3,000; Northwest, $1,000; Yorkshire, $1,500; Commercial Union, $2,000; Phœnix of Paris, $1,000; General of Perth, $4,000; Quebec, $3,000; Fidelity Phœnix, $3,000; Fidelity Underwriters, $3,000; Royal Exchange, $3,000; British Empire Underwriters, $1,500; Queensland, $1,500. Total, $61,000.

The insurance on the lumber was as follows: Phœnix of London, $14,000; Royal Underwriters, $5,000; British Colonial, $3,000; Allied Underwriters, $3,000; Yorkshire, $11,000; Queen, $8,000; Fidelity Underwriters, $11,000; Fidelity Phœnix, $11,000; Commercial Union, $13,000; Springfield, $5,000; Home, $4,000; Guardian, $7,000; London Guarantee and Accident, $6,000; L'Union, $2,000; National of Hartford, $10,000; North British, $10,500; Northwest, $7,250; Ocean, $10,000; London Assurance, $7,000; General of Perth, $5,000; North American, $5,000; General of Paris, $5,000; Quebec, $7,000; St. Lawrence Underwriters, $5,500; Sun, $5,000; Northern, $10,000; Liverpool and London and Globe, $5,000; Phœnix of Hartford, $5,000; Royal Exchange, $14,500; Liverpool-Manitoba, $3,000; British Empire Underwriters, $2,000; British Crown, $2,000; Phœnix of Paris, $2,000; British America, $3,000; Connecticut, $2,000; Imperial Underwriters, $2,000; Exchange Underwriters, $2,000; Queensland, $2,000; Law Union and Rock, $2,000; Canada Accident, $5,000; Palatine, $14,000.

Moncton, N.B.—June 17—Shed owned by Wm. Master Co. destroyed by fire. Estimated loss, $5,000; insurance, $3,000.

Montreal, Que.—June 18—Kuranoff Fur Co. and the Dillon Chemical Drug Co., Ltd., was damaged. Large number of furs destroyed. Home of Mrs. M. Presse damaged. Two firemen injured.

June 20—Black Diamond Realty Co., Ltd., destroyed. Fire caused by spontaneous combustion. Estimated loss, $70,000, with insurance of $12,500.

Sunbury, Ont.—June 20—Town hall and blacksmith shop, owned by James McBride, destroyed.

Toronto, Ont.—June 19—Garage, owned by Irwin Little, destroyed. Estimated loss, $1,800. The fire was caused by one of the cars backfiring and igniting the woodwork.

Vancouver, B.C.—June 20—Balmoral apartment house destroyed. The fire is believed to have been caused in the boiler-room from the furnace. Estimated loss on property, $100,000. Six fatalities.

CORPORATION SECURITIES MARKET

(Continued from page 42)

An issue of $3,000,000 7 per cent. cumulative preferred stock of the Winnipeg Electric Railway Co. has been authorized by the Manitoba Public Utilities Commission, and will come on the market shortly. It is for the purpose of retiring floating obligations made for extensions since 1913. A. W. McLimont, manager of the railway, was in the east this week making some arrangements in connection with the issue.

Spanish River Issue Approved

A special general meeting of the shareholders of the Spanish River Pulp and Paper Mills, Ltd., was held in Toronto on June 23, at the office of the company, which was called for the approval of a by-law passed by the board of directors providing for the issue and allotment of preference shares of the company amounting to 42 per cent. of the par value of the outstanding preference stock in full payment and satisfaction of all arrears of dividend on the preference stock of the company up to June 30th, 1920, and also a further amount to retire the dividend vouchers issued last year with respect of the one year's dividend on the original issue of $3,000,000 preference stock. G. H. Mead, president of the company, presided at the meeting and out of a total of 136,991 shares of the capital stock, practically all of both preference and common stock was represented at the meeting and the by-law was unanimously approved. The by-law will accordingly become operative July 1st, and the issue of preferred stock will be made to the shareholders of record on June 30th, 1920, and to the holders of the dividend vouchers above referred to.

TRADING LIGHT ON CANADIAN EXCHANGES

Price Fluctuation of an Ordinary Character—Restrained Speculative Interest in New York

DOMINATING factors which combined to restrain speculative activity in New York for the week ended June 23rd were: The railway strike, international exchange and stringent monetary conditions. In all these there was an uncertainty which prevented developments either one way or the other, resulting in an irregular market. Although some say that the exchange is in for a period of stagnation, it is generally believed in authoritative circles that the underneath financial district is feeling better, and that this feeling will be reflected in a better tone to stocks when money rates become more stable, as is expected in the near future.

With the exception of one or two outstanding issues, business on the Canadian exchanges was quiet and price fluctuations were generally meaningless. There was some interest in paper stocks, but this was small in comparison with previous weeks.

Business Quiet

Trading in Montreal was of a comparatively light volume, Brompton being the most active issue, with sales of 11,417. Atlantic Sugar was a strong feature, gaining 6¾ points on sales of 4,665. The generally strong position of sugar on the wholesale and retail market is regarded as responsible for the popularity of that stock. Quebec Railway was in good demand, the turnover for the week amounting to 9,736, with a net gain of three points. Other interest was distributed among Laurentide, Spanish River, preferred and common, and Wayagamack.

There was nothing of especial interest in the Toronto market. Trading was fairly brisk, with Brazilian and Quebec Railway in the lead. The majority of the issues closed stronger, but the gains were not of an extraordinary nature, with the exception of Atlantic Sugar, which advanced 10½ points on sales of 514, with a falling away of 2½ points at the close.
